To all radio amateurs

SB PROP ARL ARLP014
ARLP014 Propagation de K7RA

Solar activity increased over the past week, with average daily
sunspot numbers up 32 points to 81.6, and average daily solar flux
increasing more than 16 points to 113.4. The geomagnetic field was
active on March 29, due to solar wind.

The predicted solar flux is 130 on April 5-7, 125, 115 and 110 on
April 8-10, 105 on April 11-12, 120 on April 13-14, 115 on April 15,
110 on April 16-17, 105 on April 18-19, 100 on April 20-21, 105 on
April 22 and 110 on April 23-24.

The predicted planetary A index is 5 on April 5, 8 on April 6, 5 on
April 7-9, 8 on April 10-12, 5 on April 13-22, then 12, 8, 18 and 15
on April 23-26, 5 on April 27-29, and 8 on April 30 through May 4.

OK1HH predicts the geomagnetic field will be mostly quiet April 5,
quiet to active April 6, quiet to unsettled April 7, mostly quiet
April 8-9, quiet April 10, quiet to unsettled April 11-12, quiet to
active April 13-14, mostly quiet April 15, active to disturbed April
16-17, mostly quiet April 18-19, quiet April 20-22, active to
disturbed April 23, quiet to unsettled April 24, quiet to active
April 25, quiet to unsettled April 26, and mostly quiet April 27.

Our three month moving average of sunspot numbers for January
through March was 80.7. To review recent numbers, the three-month
moving average of sunspot numbers centered on January, 2012 through
February, 2013 were 83.3, 73.7, 71.2, 87.3, 91.5, 96.5, 91.9, 89.9,
81.2, 82.3, 74.4, 82.8, 73.6, and 80.7.

NBC ran an interesting report this week about modeling of the Sun's
interior on a supercomputer. Read it at,
http://science.nbcnews.com/_news/2013/04/04/17603918-suns-magnetic-heartbeat-is-discovered
.

Jon Jones, N0JK reports: "I was in Hawaii during the weekend the CME impact March 17 mentioned by Bill, W3XO occurred. There was no significant VHF enhancement from the CME and geomagnetic propagation that day. If anything, conditions seemed worse on 6 meters. The day before the KH9 Wake Island beacon, H4 and 3D2 were in for hours.

"A day after the geomagnetic field started to settle down, propagation picked up. On March 22 the KH9/WA2YUN/b was in again for about 5 hours, and I worked stations in Australia and FK8CP on TEP around 0545 UTC. I was heard by BV2DQ in Taiwan. The KH9 beacon was back almost every evening until we left for home on March 23."

Jim Smith, K3RTU sent in another report from the field, working DX from his backpack-based radio. He writes, "Last emailed you on 2/25/2013 after working EA8BVP in the Canary Islands, with both of us running QRP. I had been operating from Ridley Creek State Park in FM29 (southeast PA). Since then I have made a number of good contacts from the same location, but yesterday April 3 I hit the jackpot on 17 meters. From 2045 UTC until 2124 UTC I worked the following stations using CW: R7AY and SV2JAO, then worked the following stations using SSB: S57DX, W7FE and IK4GRO. Both R7AY and SV2JAO gave me 559 reports and got a 5x6 from S57DX, 5x4 from IK4GRO, but W7FE could barely hear me. I was using my FT-817 and Buddistick again. To say the least, 17 meters was red hot but not the weather in FM29. Had to finally pack everything up into my backpack and head back to the car, which was a mile away, because of the mid 40s temperature and wind chill that made it feel like 30. It's hard to send CW when your fingers are stiff from the cold!"

Jim mentioned working W7FE, who is in Henderson, Nevada. Check out the W7FE page at http://www.qrz.com/db/W7FE to see what's inside the little building behind his house.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for March 28 through April 3 were 49, 73, 70, 83, 84, 103, and 109, with a mean of 81.6. 10.7 cm flux was 98.7, 105.1, 108.4, 113.3, 119.1, 122.1, and 127, with a mean of 113.4. Estimated planetary A indices were 9, 23, 17, 4, 6, 4, and 3, with a mean of

9.4. Estimated mid-latitude A indices were 10, 19, 12, 3, 6, 4, and
3, with a mean of 8.1.

Cambridge Amateur Radio Association 100 Year SES 1913- 2013

Posted: 05 Apr 2013 07:40 AM PDT
http://forums.qrz.com/showthread.php?386401-Cambridge-Amateur-Radio-Association-100-Year-SES-1913-2013&goto=newpost

Cambridge Amateur Radio Association (CARA) is 100 Years old. CARA is
located in the city of Cambridge, in South East Ohio, USA, and is having a
SES each month (www.w8vp.org) to celebrate their 100 year birthday. A
Special Event QSL Card for each month and a Special QSL Certificate
showing all the events for the year. Certificate will be available in
December and will show each event worked. Please see www.w8vp.org for QSL
information and frequencies (frequencies and modes may vary depending on
our operators).

Next Event is on April 6th, 2013 Celebrating the Cambridge Glass Company.
On April 3, 2002, the National Cambridge Collectors, Inc.
proudly opened a premier glass museum in downtown Cambridge, Ohio.
It houses a superb collection of Cambridge glassware produced by
The Cambridge Glass Company from 1902 to 1958.

Some of our operators:

W8FHF Sonny

AB8P Jim

N8IMW Lyn

AB8JH Roger

KD8QYV Larry

KA8NZS Evelyn

SP DX Contest 2013

Posted: 05 Apr 2013 04:50 AM PDT
http://forums.qrz.com/showthread.php?386378-SP-DX-Contest-2013&goto=newpost

Dr OP`s

Please accept our cordial invitation to join us in SP DX Contest 2013. The history of our competition is long, as the first event took place in 1933 so in 2013 we are celebrating the 80th Anniversary of the SP DX Contest. We are going to activate some special event stations. This year contest awards and trophies will have new, special, jubilee design.

Contest Rules and info: http://www.spdxcontest.pzk.org.pl/en/index.php

Good Luck!

//
University of Michigan W8UM Centennial Special Event

Posted: 04 Apr 2013 10:20 PM PDT
http://forums.qrz.com/showthread.php?386360-University-of-Michigan-W8UM-Centennial-Special-Event&goto=newpost

The University of Michigan Amateur Radio Club is celebrating its 100th Anniversary in 2013. To commemorate the Club's centennial we will be operating station W8UM on the central campus Diag of the University. Operation will commence around 1400Z and run until approx. 2200Z on Sunday, April 14th.

QSL with a SASE to:

U-M Amateur Radio Club

3411 EECS Building

1301 Beal Avenue

Ann Arbor, MI 48109-2122

USA

For more information [including frequencies and club history] visit http://www.umich.edu/~umarc/specialEvent.html

Hope to hear you on the air!

Rare County Activation During 7QP

Posted: 04 Apr 2013 07:27 PM PDT
http://forums.qrz.com/showthread.php?386349-Rare-County-Activation-During-7QP&goto=newpost

The TERAC Amateur Radio Club (K7AUO) www.terac.org is planning on activating Gilliam County, OR during the upcoming Area 7 QSO Party (7QP) on Saturday, May 4, 2013. K7AUO will be equipped for SSB and CW on 10 through 80 meters, actual operation will depend on band conditions. There are only two licensed hams in Gilliam County and they do not currently have HF capability so this is a rare county. Confirmation by QSL card (SASE appreciated), EQSL, or LOTW. K7AUO looks forward to making a QSO with you!

First Cuba to EI contact on FO-29

Posted: 05 Apr 2013 03:09 AM PDT
http://forums.qrz.com/showthread.php?386370-First-Cuba-to-EI-contact-on-FO-29&goto=newpost

co6cbf_working_ei5ev.jpgFirst Cuba to EI contact on FO-29

Hector Martinez CO6CBF in Cuba has worked Joe
Murphy EI5EV in County Kilkenny on the amateur radio satellite FO-29 over
a distance of 6955.1 km.

Hector writes:

I am pleased to report that today I had my first contact on
satellites with Ireland.

Joe, EI5EV and I completed it successfully on
FO-29. We had just a 66 seconds window but there was enough
time to exchange reports and greetings. I believe that it is the first
contact between Ireland and Cuba on FO-29! It is a 4321.7 mi (6955.1 km)
contact!

Our first attempt was yesterday but Joe couldn□t find me on
the passband. We made a schedule again and we tried to be more accurate on
frequencies calculation. Doppler is always in play!

We did the calculations based on the great feature
implemented on SatPC32 V12.8b. There is an option of seeing the frequency
you are at the satellite receiver. This was our common reference point. I
was very satisfied when I heard Joe exactly on the frequency I was
expecting!

I was operating portable from a tall building's roof which
allows me a great horizon visibility forwarding Europe. I was running my
new

FT-817nd, a 30W power amplifier and a homebrew ARROW antenna
with a homebrew mast mounted preamplifier. Everything was supplied by two
12V 7A Gel batteries.

Right Now, FO-29 has a big footprint. Please, if you are in
the footprint and want to try a long distance contact, just drop me an
email. I will try until complete a contact with you.

Thanks very much to Joe for this great contact!

73!

Hector, CO6CBF

STRaND-1 signal reports requested

Posted: 05 Apr 2013 03:01 AM PDT
http://forums.qrz.com/showthread.php?386369-STRaND-1-signal-reports-requested&goto=newpost

chris_bridges_with_strand.jpgSTRaND-1 signal reports requested

Dr Chris Bridges (pictured right with STRaND-1) from the Surrey
Space Centre has advised that the amateur radio beacon on their STRaND-1
CubeSat became intermittent over the Easter weekend.

Both Mike Rupprecht DK3WN and Nader Omer ST2NH have reported
that no signals have been heard since Sunday.

Radio amateurs are asked to listen for STRaND-1 over the
next few days and report any positive results to
C.P.Bridges[at]surrey.ac.uk

Listen for a 9k6 bps AX.25 signal around 437.568 MHz (+/-
Doppler).

Stratford Students Host Question and Answer with Space Station:

Posted: 04 Apr 2013 05:04 PM PDT
http://www.eham.net/articles/29985

Stratford Academy students made their own history today by hosting chat
with an orbiting astronaut 250 miles above them. The students held a
Question and Answer with Canadian astronaut Chris Hadfield, who is on the
International Space Station. It was all part of a project through amateur
radio to connect the ISS to schools. The event was only possible during a
9-minute window from 8:47 a.m. to 8:58 a.m., when the ISS was flying over
the radio center in Santa Rosa, California. During that time, kids squeezed
in questions on everything from what astronauts do for fun in orbit to how
they tell the difference between night and day. Since the radio project is

experimental, there was no guarantee of a connection. Although the astronauts could hear their questions, the responses coming in were staticky and hard to follow. "It's still really cool that we actually got to hear his voice and know that he's actually listening to us speak," says junior Maggie Bergmark. They say it's still a moment they'll never forget.

WIANEWS WEEK COMMENCING APRIL 7 2013.

WIA AGM DATE CLAIMER

VI 100 ACT

VK7AX OUTSTANDING SERVICE AWARD

VK4PJ PETER BROWN 100 YRS. YOUNG

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING APR 07 2013.

Having just last year celebrated the centenary of amateur radio in Queensland,
I was surprised to learn that the first ship-to-shore wireless message
occurred on 9th April, 1903. The receiving station was at Kangaroo Point,
Brisbane and the message was sent from HMQS Gayundah off Moreton Island.

http://en.wikipedia.org/wiki/HMQS_Gayundah

http://www.couriermail.com.au/questnews/central/paying-respect-to-all-the-waves-of-communi
cation-at-kangaroo-point/story-fn8m0qb4-1226601482615

The Governor and the Anglican Archbishop of Brisbane will dedicate a memorial
plaque in the grounds of St Mary's Church at 10.15 a.m., 110 years later, as

part of the ongoing development of a permanent memorial on the site.

This is recorded as the first Naval wireless communication in Australia and it is not surprising that the RAN. became the regulator for Wireless experimentation prior to its being ceded to the Post Master General's Department after World War I. The PMG is the great grandparent to the existing regulator, the ACMA.

Remembering part of Queensland's radio history, I'm Geoff Emery VK4ZPP.

WORLDWIDE FLORA & FAUNA IN AMATEUR RADIO

'WorldWide Flora & Fauna in amateur radio' abbreviated as WWFF, is an international amateur radio program which encourages portable operation from designated nature parks and protected nature areas around the world.

The aim of WWFF is 'to draw attention to the importance of protecting nature, flora and fauna', whilst at the same time providing a fun activity for amateurs.

The Flora and Fauna movement within ham radio was initiated in 2008 by the Russian Robinson Club as World Flora and Fauna (WFF). In 2012 the program relaunched as WorldWide Flora & Fauna in amateur radio (WWFF), and has undergone a major revamp.

Numerous countries around the world have participating National programs, offering a significant number of very attractive Awards.

The Australian WWFF National program was launched in March, 2013. Hundreds of National Parks in the various Australia States and Territories are listed on the Australian list.

A series of attractive Awards are available for 'Activators' working portable from a specified number of Australian parks. The Award is also open to 'Hunters' who work 'Activators' and also Short Wave Listeners.

Paul, VK5PAS is the Australian co-ordinator, and is looking for amateurs prepared to act as representatives from each of the Australian states.

More information can be found on the WWFF global website at:

www.wwff.co

Or on the Australian WorldWide Flora & Fauna website ar:

wwffaustralia.weebly.com

Socialise - 7 April 2013, 0'42"

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

Meeting and speaking with fellow Amateurs is a rejuvenating experience that cements friendships and opens the door to interactions beyond a QSO or a QSL card. With tours of club facilities and tourist attractions throughout Fremantle you'll have the opportunity to share your wonder with other visitors to the state and enjoy the hospitality that VK6 has to offer.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

HAMS ACROSS AUSTRALIA.

VK1

VI100ACT, not your average callsign; Canberra, not your average city.

As mentioned in previous news broadcasts, 2013 is Canberra's centenary year. To commemorate the event the Canberra Region Amateur Radio Club is sponsoring the special event callsign VI100ACT, which will be active until the end of December.

Canberra is unique in Australia: and not because it is where we send our federal politicians for solitary confinement. Canberra is an entirely planned city - it was sited, planned and constructed as the seat of federal government. Canberra receives more than its fair share of good natured ribbing from the rest of the country, historically probably well deserved. However, the national capital has grown into a fine place to live or visit.

The VI100ACT call sign is being rostered out to amateurs around the ACT area, and has already been worked on a variety of bands and modes. The first use of the callsign was a SOTA activation by VK1DA from Mount Ainslie which overlooks the parliamentary triangle and Lake Burley Griffin.

VK1TX has been busy logging up an impressive 600 plus contacts, including activating the callsign for the ANZA DX Net. VK1DSH and

VK1SV have been using the VI100ACT callsign on the LF bands, while VK1WJ has been running the call on the digital modes.

So: listen out for VI100ACT Canberra calling.

VK4WIT active from Jaycar Townsville

The Townsville Amateur Radio Club Inc. will be operating VK4WIT on HF, VHF, UHF
all modes from a portable operation located at Jaycar Townsville.

The station will set up at 0830local Sunday 14th April outside the front entry
of the Jaycar complex in Ingham Road. The WIA National News transmission will
be delayed that morning from its usual 0900local start until 1000local and will
be sent to air from the Field Day display on VHF.

It is expected that the multi-mode

interactive operations (including IRLP on node 6444) will conclude around
1500local.

If you are in Townsville that weekend pop on down to the Field Day display !

Peter, VK4EA, from the Brisbane VHF Group and the Redcliffe and Districts
Radio Club says Sunday, 21st of April is the day to play microwaves.

The venue for this year's microwave test and tune up day is the
Redcliffe & Districts Radio Club, Klinger Road, Kippa Ring. On offer will
be test equipment such as spectrum analysers, weak signal sources,
noise meters, return loss measurement and a 10GHz weak signal source in the
park to help peak up your feeds and dishes.

HOME OF THE GOOD GUYS

Outstanding Service Award

Tony VK7AX, has thanked the participants of the Tasmanian Sewing Circle Net for making this award available and is honoured to be a recipient of same. Winston VK7EM has handed the award to Tony who has found a place for it on the shack wall where it hangs with pride.

(vk7wi news)

Peter Brown VK4PJ (TEXT EDITIONS ONLY)

The WIA is pleased to announce that Peter Brown VK4PJ will attain 100 years of age on Saturday April 13th.

It is believed by his friends that Peter was first licensed in the early 1950's .There is evidence that he was issued with Amateur Radio licence QA.244 on 12 May 1963 so we can say with some certainty that he has been licensed for well over 50 years.

He received a Meritorious Service Badge in 1978 from the Queensland Divisional Council of the WIA following a sustained effort to bring the Division into a good financial and administrative position with the assistance of his great friend Al Carter VK4LT, now resident on the Sunshine Coast.

Peter also received certificates from QNEWS in 2001 and 2002 for his assistance in this area of the hobby.

His interest in space communication is evidenced by being made AMSAT Life Member Number 1130 in 1979.

All in all Peter's contribution to our hobby has been sustained and substantial and he is congratulated for a job well done.

Happy Birthday

(Laurie Murray VK4LO)

Hello I'm Jason VK2LAW and this week I'm reporting on Media and also from the QNEWS work bench

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

Raspberry Pi as WSPR transmitter up to 250 MHz

Guido PE 1 NNZ has released code that he says enables the Raspberry Pi to operate as a WSPR transmitter at HF and VHF.

Guido has modified the WsprryPi code originally developed by Dan Ankers MD 1 CLV. He says the Raspberry Pi requires just a Low Pass Filter and antenna connected to the GPIO4 pin in order to function as a WSPR transmitter.

The PE1NNZ code and binary is available at

https://github.com/threeme3/WsprryPi

MEDIA WATCH

Manga Radio Ham in Japan Times

Japan Times reports on radio amateur and manga artist Mitsuru Sugaya JI 1 MFT
who is best known for his kids manga and anime, "Game Centre Arashi," which
began in 1978 and was about a video-game loving boy named Arashi, who fought
it out with rivals on popular arcade games of the time such as
"Space Invaders."

Sugaya also created many other manga about technology, computers,
amateur radio, radio-controlled cars, pre-Internet online service and so on.
And it's said his manga affected a lot of kids who grew up to be engineers.

Ham Radio Menace

Now available, for those who dare, is the latest humorous ham radio music
video from Paul NA4ZI.

It's the sad and funny tale of a Ham Radio Lid who annoys all he meets on the
air, and how he gets his due.

Google NA4ZI Ham Radio Menace

Now we do have some international news from our sister programs so lets
"head stateside" to amateur radio news line

NELSON NZ CITY COUNCIL BACKS HAM RADIO TOWER INSTALLATION

Some good news for a ham radio operator in
Nelson, New Zealand who was being hounded by a
neighbour to take down his antenna. This because
she said it interfered with her view of the
surrounding landscape. The Town Council says
that the antenna can stay. Amateur Radio
Newsline's Jim Meachen, ZL2BHF, has this follow-up report:

--

According to information supplied by Andrew
Mackie, ZL2HZ, the Nelson City Council has no
intention to proceed with the complaint filed
against a ham radio antenna installation owned by Rick Kiessig, ZL2HAM.

As reported, the complainant Dallas Woods
had appeared before the City Council
alleging that Kiessig's tower and antenna
interfered with her landscape overlay
view. Among other things she asked council

members to change the rules so that amateur radio
antennas are no longer a permitted activity in residential zones.

But in a phone call from Rachel Reese on behalf
of the entire Nelson City Council, Mackie was
told that the council does not intend to proceed
with the complaint from Wood's at this time. Nor
is it proposing to make any immediate changes to
the district land use regulations that permit
antenna systems such as that of ZL2HAM. Rather,
at some time in the future and only if the land
use regulations come up for review, it might
possibly take another look at amateur antennas,
but limited to geographic areas where the view
is perceived to be important.

According to Mackie, this is a major step towards
maintaining the good relations between the Nelson
City Council and the areas amateur radio
community. It also ensures that continued
cooperation in areas of Civil Defence and other
activities will not be adversely affected.

For the Amateur Radio Newsline, I'm Jim Meachen,
ZL2BHF, in Nelson, New Zealand.

--

The bottom line is that the Nelson City Council
agrees that Kiessig's tower and antenna
installation complies with all relevant
regulations and as such and he is free to enjoy
his hobby without further outside interference.

==========

WEIRD AND WONDERFUL

You may recall way back in 2007 Google announced Sponsorship of their
Lunar X PRIZE to Create a Space Race for a New Generation, the X PRIZE
Foundation and Google Inc.

This being a robotic race to the Moon to win a remarkable $30 million prize
purse. Private companies from around the world competing to land a privately
funded robotic rover on the Moon capable of completing several mission
objectives, including roaming the lunar surface for at least 500 meters and
sending video, images and data back to the Earth.

Well roll on some 6 years and the race was still on!

Then, 2011 the X PRIZE Foundation announced the official roster of
33 registered teams competing for the $30 million Google Lunar X PRIZE,
an unprecedented competition to send a robot to the Moon. This group of 29
teams signifies this new era of exploration's diverse and participatory

nature as it includes a huge variety of groups ranging from non-profits to university consortia to billion dollar businesses representing 17 nations on four continents.

The global competition, the largest in history, was announced in September 2007, with a winner projected by 2015.

Now roll on another year and the race is still on with the first team to claim a $20 million Grand Prize, while the second team will earn a $5 million Prize. Teams are also eligible to win a $1 million award for stimulating diversity in the field of space exploration and as much as $4 million in bonus prizes for accomplishing additional technical tasks such as moving ten times as far, surviving the frigid lunar night, or visiting the site of a previous lunar mission

The teams left "in the race" now has dropped to 23 but all 23 are confident of pulling of the greatest competition in history!

OPERATIONAL NEWS - DATELINE 2013

HOLYLAND CONTEST 2013 - APRIL 19 - 20

The Day of the YLs will be held 18 and 19 May.

WW International Museums Weekends June 15/16 and 22/23

John Moyle Memorial Field Day.

Don't forget that entries by mail, Snail Mail that is, have to be posted with a post mark not later than 19th April 2013. electronic mail submissions close at midnight also on the 19th April 2013.

You can check if your log has been entered into the system by checking if your callsign is in the list on the John Moyle page on the contests tab on http://www.wia.org.au/members/contests/johnmoyle/

This Denis Johnstone Contest Coordinator for the John Moyle Memorial Field Day contest.

Whilst logs are continuing to be received it is becoming apparent that there is some confusion on a couple of points.

Firstly, The John Moyle Memorial Field Day is open to all licensed VK, ZL and P29 amateurs who can submit a log as an entry to the contest. There is no requirement that a person who submits a log has to belong to the WIA. Whilst it is a good idea, it is certainly not compulsory. How this false information has started is not important, just remember that it is wrong and all eligible amateurs are welcome to submit an entry.

Secondly, there is another piece of disinformation has been aired that all contacts for the John Moyle Contest have to be only with VK, ZL and P29 stations. The real situation is that all contacts with any station anywhere in the world scores for a Portable Station or a Home Station. CW

contacts are scored according the rules.

So with these matters explained that is another excuse removed for not submitting a log to the contest.

There were many more stations operating during the contest than have yet submitted an entry to the contest. Further, the number of logs that have been submitted is well below the number submitted at a comparable time last year.

So it is over to you.

Gather all of the details you require, do not delete any DX contacts that you have made , prepare your log and submit it to me as soon as possible.

Please do not forget that you must submit your log by snail mail date stamped no later than 19th April or by electronic mail it must be received no later than midnight also on the 19th.

To verify details of how and where to send your log visit the John Moyle Contest Page on the contests tab under the heading of Members on the WIA website. The URL is http://www.wia.org.au/members/contests/johnmoyle/

Also to confirm that your log has been entered into the system you can see if your callsign is on the John Moyle Contest page.

Contest Results will be published on the website as soon as they are completed and in AR magazine the following month.

Speak to you all later.

(Denis Johnstone VK4AE/VK3ZUX Contest Manager JMMFD 2013)

International Museums Weekend

In 2013, this event will take place on the double weekends of 15 & 16 and
22 & 23 June. Radio amateurs are encouraged to participate by setting up
stations in their local museums.

Organiser Harry, M1BYT asks that all those intending to take part in the
event should register their museum via the web form on the website
www.ukradioamateur.co.uk/imw

WW SPECIAL INTEREST GROUPS --- DIGITAL

Digital Data transmitted over normal "commercial" voice short-wave
transmitters.

VOA Radiogram is a Voice of America program experimenting with digital text
and images via shortwave broadcasting.

A number of tests have been conducted during the past month using VOA,
"The Mighty KBC" and WRMI transmitters .

I was told of the experiments and initially monitored the VOA frequencies
without success because of the time of day. Then I learnt that WRMI was also
involved. It operates on 9955 KHz and was transmitting at a time when there
was some chance of receiving the signal here in Melbourne. Data was heard
just before the 07.00UTC station identification time and information was
decoded using Fldigi at the 08.00 UTC transmission. The modes used at that
time were PSK125R and PSK250R, both of which were decoded with some difficulty
due to low signal level and QRN. In fact, the signal was so weak that at
times, the voice modulation was unreadable!

Another test conducted, but not audible here, involved sending Olivia data
under a vocal recording. This was directed to the USA from Europe and was
considered a success. The promotion for the test read read: "Olivia is a

robust digital text mode. It can overcome all types of noise. But can Olivia 8-1000, reduced by 24 dB, be decoded under the amazing voice of country singer Suzy Bogus? We will find out 24 March 2013 at about 0130 UTC, with the mode cantered on 2500 Hz. This will be during The Mighty KBC broadcast to North America, 0000-0200 UTC on 7375 kHz. And at just before 0200 UTC, MT63-1000 (long interleave) in Flmsg format will be cantered on 1500 Hz, and an MFSK32 image cantered on 2500 Hz." - a pity "The Mighty KBC" is not audible here!

These tests commenced after jamming by China of BBC, VOA and Radio Australia's English language broadcasts as reported on WIA News a few weeks ago. This maybe purely coincidental, but it is interesting times at present with the restriction of internet communications in some countries, the closure of so many international broadcaster and jamming of others. So, are we about to see another mode of direct international broadcasting on the short-wave bands in an attempt to get information into some countries?

For further information, use your search engine to find "VOA Radiogram".

I would be interested to hear from any other VK amateurs who succeeded in getting any decodes from these tests. I can be contacted on vk3rv@wia.org.au

73....Peter VK3RV

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW with a reminder that due to the first Monday of this month being the Easter holiday, the RAOTC's regular monthly bulletin of news and information has been held over until tomorrow, Monday April 8th.

As usual, tomorrow's RAOTC April bulletin will be broadcast on a number of VHF and HF frequencies at different times depending on your local area. The principal HF transmissions will be on 20 metres on 14.150 MHz USB at 0100 UTC beamed north from Melbourne for the eastern states and again at 0200 UTC beamed westward for Western Australian listeners.

Also at 0200 UTC Barry VK6WF will be transmitting on 40 metres on 7060 kHz LSB for WA and SA country listeners.

Numerous local relays will take place on both VHF and HF frequencies. To find the times and frequencies for your area please visit the RAOTC website at www.raotc.org.au

Everyone, RAOTC members and non-members alike, is invited to listen to this interesting half-hour of news, information and anecdotes and to participate in the call backs afterwards.

Once again, the RAOTC monthly bulletin is scheduled for tomorrow, Monday April 8th,

73 de Clive VK6CSW.

IARU REGION 3
Emergency Centre of Activity (CoA) frequencies
3.600, 7.110, 14.300, 18.160 and 21.360 MHz

GlobalSET to be held soon

The Global Simulated Emergency Test has 100 stations listed so far representing the International Amateur Radio Union member society and emergency communication groups.

The IARU Region 1 Emergency Communications Coordinator, Greg Mossop G0DUB and organiser of GlobalSET tells us that it will be held on the 13th and 20th of April.

This event is different than previously as messages will be passed in both directions. On the first day they will be sent to Regional Headquarter stations, and the following week flow back to the participating stations.

The training exercise aims to increase the common interest in disaster preparedness, test the Centre of Activity frequencies for emergencies, create practices for international emergency communication and the relaying of messages using all modes.

More information about GlobalSET can be found on the IARU Region 1 website www.iaru-r1.org/

http://hamradionow.tv

HAMRADIONOW EPISODES 71 and 72: Online Now

71: Ten-Ten International Net

10 meters is supposed to be hopping these days, but instead, it's limping. And when the sunspot cycle is near minimum, 10 stays dead for months on end. 10-10 International was formed to encourage 10 meter use all the time, initially to stave off a potential CB expansion back in the 60's. Now it's just to have fun on this quirky band. Jeff and Gary talk to Gerry Gross WA6POV, former 10-10 president, at the Orlando HamCation, to see what the group is all about.

72: Digital Modes for Alabama ARES

Alabama hams were early D-STAR adopters, led by the ARRL Section and ARES officials. And it's not just D-STAR. ARES hams are encouraged to experiment and adopt a variety of digital modes, and they're in use routinely. Gary talks to Section Manager Dave Drummond W4MD, and Assistant Section Manager Tommy Howell KG4MPU about how it's working.

SARL NEWS SUNDAY 07 April 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEY

It is with regret that it must be announced that the key of Martin Coetzee, ZS6BQA, went silent on 16 March 2013 due to a motor cycle accident in Rustenburg.

Our sincerest condolences to Martin's relatives and friends.

(PAUSE)

IN THE NEWS TODAY:

ICASA IS GETTING TOUGH ON ISP's

RADIO AMATEURS HAVE NOTHING TO FEAR

UK AMATEUR HEARD OVER 2 000 km USING ONLY 10 MILLIWATT

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ICASA IS GETTING TOUGH ON ISP's

The Independent Communications Authority of South Africa has sealed and seized WBS radio communication equipment at six Gauteng sites. This has affected persons who connect to the internet using services from IBURST and WBS. The Authority's inspectors are conducting tests to verify allegations that WBS has or is reconnecting the affected radio communication equipment.

In October 2012 ICASA adopted a hard-line approach to non-compliance with regard to the collection of outstanding radio frequency licence

fees. As a result, ICASA inspectors commenced with investigations that led to the crackdown on WBS earlier this week. ICSA's action against WBS forms part of a national drive to recover all outstanding licence fees from electronic communications, broadcasting and postal licensees. To this end, the Authority has been engaging several affected licensees to make payment arrangements for all outstanding radio spectrum licence fees.

On Friday in an interim order the High Court order informed ICASA to return the equipment to WBS but the saga is far from over. Early Saturday morning ICASA issued a statement saying that they acknowledge the Interim Court Order of the South Gauteng High Court to hand back radio communications equipment that the Authority sealed and seized earlier this week. The Interim Court Order is valid until 25 May 2013 and does not exempt WBS from their obligations, as the operator is still required to settle all outstanding radio frequency licence fees.

Several Radio Amateurs who are using IBURST reported intermittent internet outages.

RADIO AMATEURS HAVE NOTHING TO FEAR

Radio Amateurs have nothing to fear ICASA told the SARL. Invoices for the current license year have been posted. There are still delays in the Post Office so it may take longer before the invoices are received. The ICASA spokesperson said that Amateurs who wish to pay before receiving their invoice can do so but must make sure that they include the license number and call sign in their payment advice.

TIME IS RUNNING OUT TO BOOK FOR THE SARL NATIONAL CONVENTION

If you have not yet booked for the SARL National Convention, do it this weekend. Avoid having to pay a late registration fee which applies for bookings made after 9 April. To get the full programme and the booking form go to www.sarl.org.za and follow the links from the home page.

Join a large contingent from Cape Town and many local Gauteng radio amateurs for this annual event. The Dinner fee includes tickets to the lucky draw which includes an ICOM handheld and dual band antennas sponsored by Sam Ford of Radio Accessories and Data Modems.

If you have any booking problem contact Geoff Levey, ZS6GRL, at 082 546 5546.

UK AMATEUR HEARD OVER 2 000 km USING ONLY 10 MILLIWATT

Eddie Bennett, G3ZJO, of Northampton in the United Kingdom is not making any claims. Even so he may now hold a QRP distance record for a micro power transmission using a Raspberry Pi microcomputer as a transmitter.

Bennett reportedly used the 10 milliwatt of RF that can be generated from the Raspberry Pi computer board to be heard at over 2 000 km on the 7 MHz band. The Raspberry Pi board can be made to operate as a WSPR

mode transmitter covering Low, High and VHF frequencies up to 250 MHz. G3ZJO connected the board via a low pass filter to a dipole for the 7 and 14 MHz bands. A small Marconi inverted L at a height of only 6 metres was used on 472 kHz.

WSPR (pronounced "whisper") stands for "Weak Signal Propagation Reporter". It is a computer program used for weak-signal radio communication. The program was initially written by Joe Taylor, K1JT, but is now open source and is developed by a small team. The program is designed for sending and receiving low-power transmissions to test propagation paths on the MF and HF bands.

The Raspberry Pi is a credit-card sized computer board that plugs into a TV and a keyboard. The Raspberry Pi Model A and Model B boards are supplied as board only, and come without operating system, SD card, power supply, keyboard, case or cables. In South Africa Raspberry PI is available from RS Components. The cost is under R500.

Among the stations who received Eddie's WSPR signal on 40 metres was LA9JO at a distance of 2 124 km. On 20 metres he was heard by LY2BOS at a distance of 1 736 km. 472 kHz did not fare anywhere near as well. Even so he was heard some 80 kilometres away by G4KPX.

If you want to give micro power Raspberry Pi DXing a try, the PE1NNZ code and binary to turn the minicomputer into a super QRP signal emitter is available at tinyurl.com/raspberry-pi-transmitter.

Here is a challenge to South African Radio Amateurs. The first South African radio amateur to be heard on 40 metre by another radio amateur using a Raspberry Pi will be awarded an ARRL Basic Antenna book. Tell SARL News about your experiments at artoday@sarl.org.za and include proof of your signal having been received over at least 500 km.

WORLD AMATEUR RADIO DAY 18 APRIL

What is your club doing to celebrate world amateur radio day on 18 April? From the NARC in Gauteng ZS9DCC will be on the air. Join Geoff, ZS6GRL, and his team in demonstrating amateur radio. Operators are still needed. Call Geoff on 082 546 5546. Send details of your club activity to artoday@sarl.org.za for inclusion in next Sunday's SARLNEWS. The theme for the day is Celebrating a Century of Disaster Communications Support by Radio Amateurs. If nothing else, take your hand-held to work on 18 April and create an interest in Amateur Radio.

THE SARL HOME PAGE AND DISCUSSION FORUMS ARE OPEN TO ALL

The SARL Home Page and Discussion Forums are open to SARL members as well as all non members, local or foreign. All that is required is to open the Home Page with the URL: www.sarl.org.za The Home page covers Radio Today, HF Update by Dennis Green, ZS4BS, VHF/UHF and Microwave News by Mike Bosch, ZS2FM, Contest News by Geoff Levey, ZS6GRL, and an index of SARL Forum Current Topics.

To open the Discussion, click Forums on the SARL Home Page when a request will appear for your password. If you are not a subscriber you may register by filling in your call sign, password, URL and then login. Give it some time to be processed and you will be informed in due course that you are a new subscriber. Just remember your password.

There are currently 4 193 topics and 1 918 subscribed members of whom 949 have made 51 267 posts in 15 Forums. There are also 16 511 archived posts in 1 587 archived topics.

ANOTHER CLUB AFFILIATES WITH THE SARL

This week the SARL welcomes the Wolkberg Amateur Radio Club as an affiliate member. More about the club can be obtained from www.zs6twb.za.net/. The club is inter alia actively involved in VHF and UHF experiments and undertakes training for the RAE in Polokwane and environment.

MEMBERSHIP APPLICATION

An application for membership of the SARL have been received from Monty Nell, ZS6CEW.

Any objections against the acceptance of the application must reach the Secretary before or on the Tuesday after this bulletin.

HAMNET SIMULATED EMERGENCY COMPETITION RESULTS

The organizers of the Hamnet simulated emergency competition has requested that the following names be added to the results of this competition:

Category C. ZS1KR, South Cape Amateur Radio Club, 1 440 points

Category D. ZS6FDX, Francois Reyneke, 1 854 points.

The omission of the names of these participants in the previous bulletin is regretted.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to continue at low levels. Sunspot AR 1 713 is experiencing a growth spurt but it is not yet producing significant flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 71.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be 10 m openings on sunlit paths in the afternoons.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

18 April - World Amateur Radio Day and ZS9DCC on the air. Operators required, email Geoff to contest@sarl.org.za or call him on 082 546 5546. April 20-May 1 - Commemorative station PB33BQ on the air, see pa7da.jouwweb.nl/pb33q for more information. 26- 27 April - SARL National Convention, register now, get details on www.sarl.org.za. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 025, and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

We wish all our listeners a happy Easter and our Jewish listeners happy Passover.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Radio hams active in Argentine floods

Radio amateurs in Argentina are providing
communications support in response to flooding. Nets are currently
operating on 7.070 MHz and 7.120 MHz

A report on RAYNET-HF says:

The flooding rains have been very strong in the city of Buenos Aires and
surrounding areas, and in the city of La Plata, which is the capital of
the Province of Buenos Aires, located 60 kilometers south of the City of
Buenos Aires. So far 57 people have died, 51 of them in La Plata.

The frequencies that are being used on 40 meters are 7070 and 7120, in
addition to VHF and UHF repeaters kept on alert for the radio club La
Plata, LU8DZE.

There is also a lot of communication activity through the Facebook
Emergenciaslu Amateur group, maintained by the Amateur Radio Emergency
Service of Argentina.

Mahoning County ARES host webinar with ARES groups involved with Hurricane
Sandy.

Posted: 05 Apr 2013 01:41 PM PDT
http://forums.qrz.com/showthread.php?386445-Mahoning-County-ARES-host-webinar-with-ARES-groups-involved-with-Hurricane-Sandy&goto=newpost

What is being billed as the first of its kind, the local ARES group of Mahoning County Ohio, will be holding a webinar presentation with several ARES members of New Jersey and New York who were active before, during, and after, Hurricane Sandy. The 20/9 ARC K8TKA will be hosting the event at their regular club meeting on April 9,2013, at 7:00PM. The location of the meeting is the Austintown Senior Center 100 Westchester Dr. Austintown, Ohio 44515. This is a presentation conducted and coordinated by Mahoning County ARES. The ARES groups on the Webinar will be presenting information on how Amateur Radio responded, what were the strengths, the weaknesses, and what was learned from this most recent natural disaster.

This event is open to all hams interested. The 20/9 ARC invites any hams in the local area to attend. The webinar is being conducted with the GoToWebinar program and the amount of participants online are unlimited. Additional information on the event can be found at www.mahoning-ares.org. The information on the meeting location can be found at www.20over9.org. There are also links to maps to the Austintown Senior Center.

Eagle 3 Near Space Balloon Launch Announcement

Posted: 05 Apr 2013 07:12 AM PDT
http://forums.qrz.com/showthread.php?386395-Eagle-3-Near-Space-Balloon-Launch-Announcement&goto=newpost

EAGLE3 Near Space Balloon Launch

Olde Towne Middle School in Ridgeland, MS will be launching a balloon April 13th at approximately 9am Central Time from Olde Towne Middle School.

Missions specifics:

Date: April 13th

Time: Setup ☐ 7am, Launch ☐ approximately 9am Central Time

Location: Ridgeland, MS

Gas: Helium

Purpose: Carry experiments to altitudes greater than 90k feet

Equipment: GoPro Camera, 2 meter voice beacons, APRS telemetry (KC5NXD-12), another APRS tracker with slower transmission rates (KC5NXD-11) , HF Telemetry(trackable at http://spacenear.us/tracker/), possible SPOT tracker, radiation detector, and an audio alarm for location in dense woods. Over one dozen experiments will be on the flight including bacteria survival rates, radiation detection, cosmic ray capture, micro meteor

capture, and many more.

Telemetry specifics: APRS tracking as standard, HF tracking will be using a HF transmitter designed and built by WB8ELK and transmitting on or approximately 14.103 ☐ 14.104 Mhz. The telemetry will be in short bursts and can be decoded using the FLDigi High Altitude Balloon version of the software. Download the latest version of this at http://ukhas.org.uk/projects:dl-fldigi All telemetry reports would be greatly appreciated. Send all telemetry reports to otmsradio@gmail.com. Any reception QSL cards will also be greatly appreciated and mailed to the address for KC5NXD in QRZ.com. Special attention is needed to listen to the descent flight telemetry especially when in the last 30K feet. If configured right, FLDigi HAB will relay the information to the spacenear.us/tracker site.

Amateur Radio Connects Discovery Class to Space Station:

Posted: 05 Apr 2013 05:14 PM PDT
http://www.eham.net/articles/29991

MADISON -- Amateur radio may seem low-tech, but this medium went sky high to an in-flight astronaut for Discovery Middle School students. "The students chatted with astronaut Dr. Tom Marshburn (who serves as physician for the space station team) for approximately 10 minutes as the International Space Station flew directly over Huntsville," Jane Caudle said. The session was staged at the University of Alabama in Huntsville. "We put to use our amateur radio lessons that we explored for a month preceding the UAH field trip," Caudle said. Caudle teaches eighth-grade physical science and serves as science department chair at Discovery. "This opportunity allowed our university students to share their experience with amateur radio to middle-schoolers in the area." Two of Caudle's classes, or about 60 students, participated in the session. "Students asked questions about what astronauts did when they had personal time on the space station," Caudle said. In addition, the Discovery youth wanted to know about required training to become an astronaut. "What was the scariest thing that happened to you onboard the ISS?" was one question. Four Discovery students had the opportunity for one-and-one conversations with an astronaut. This exchange was affiliated with an education partnership program named Amateur Radio on International Space Station (ARISS).

//
Solar Maximum: Fizzle, or Finale Yet to Come?

Posted: 05 Apr 2013 05:13 PM PDT
http://www.eham.net/articles/29990

Thinking back through my life, I recall four times when I took notice of sunspots one way or another. Back in 1980 when I was in the 12th grade, I remember seeing them in solar images I projected from my 4-inch Astroscan telescope. Then in 1991, when I worked in an aircraft hangar at NASA/Ames Research Center, I remember walking by a disk of light on the floor and realizing that it was an image of the sun projected from a hole in the hangar roof -- making the entire hangar a giant pinhole camera. The disk was several inches across, and in it I saw sunspots once again. In 2002, around the time that I started working at Chabot Space & Science Center, I made a regular activity of sharing the spotty sun with visitors, teachers,

and summer camp kids alike, using Sunspotter Telescopes, pinhole projectors, and filtered telescopes. Again, the spotty sun was raised in my awareness. And now in 2013, we have spots once again! The pattern was always there for me to notice: 1980, 1991, 2002, 2013. See it? I didn't, until in recent years, because noticing the regular pattern of the appearance of sunspots over time requires that you notice the times when the sun isn't so spotty. During those times, the sun simply fell from my attention because there wasn't much to see. bIf you've been following the sun lately, you're aware that we're somewhere in the midst of Solar Maximum: that season in the solar cycle of greatest magnetic activity when sunspots and other related magnetic events like solar flares and coronal mass ejections are frequent and pronounced. On average, Solar Maximum comes every 11 years, reaching a singular high in magnetic activity and then relaxing toward Solar Minimum. By the original predictions, Solar Maximum was expected to peak around May of 2013. However, except for a sharp spike in activity in late 2011, all of 2012 fell below par, appearing on graphs as if Solar Maximum climaxed a year early and is now on the way out. Did it fizzle, ending unexpectedly early -- and after a performance that fell short of the anticipated mark? Or perhaps\&with a light drum roll\&is the drop in activity we've observed lately only a brief calm before a spectacular resurgence?

FCC seeks to reassess RF exposure limits

Posted: 06 Apr 2013 09:43 AM PDT
http://forums.qrz.com/showthread.php?386551-FCC-seeks-to-reassess-RF-exposure-limits&goto=newpost

On March 27, the FCC released a First Report and Order, Further Notice of Proposed Rulemaking and a Notice of Inquiry (ET Docket Nos. 13-84 and 03-137). The documents seek to reassess the FCC□s RF exposure limits and policies, as well as to propose changes to the FCC□s rules regarding human exposure to RF electromagnetic fields. These proposed changes would affect the Amateur Radio Service (Part 97) rules.

http://forums.qrz.com/showthread.php?386473-HamRadioNow-10-10-International-Digital-at-Alabama-ARES&goto=newpost

HAMRADIONOW.tv

Episode 71 Ten-Ten International Net

Saving 10 meters, one ham at a time

10 meters is supposed to be hopping these days, but instead, it's limping. And when the sunspot cycle is near minimum, 10 stays dead for months on end. 10-10 International was formed to encourage 10 meter use all the time, initially to stave off a potential CB expansion back in the 60's. Now it's just to have fun on this quirky band. Jeff and Gary talk to Gerry Gross WA6POV, former 10-10 president, at the Orlando HamCation, to see what the group is all about.

Episode 72

Digital Modes for Alabama ARES

Not just D-STAR!

Alabama hams were early D-STAR adopters, led by the ARRL Section and ARES officials. And it's not just D-STAR. ARES hams are encouraged to experiment

and adopt a variety of digital modes, and they're in use routinely. Gary talks to Section Manager Dave Drummond W4MD, and Assistant Section Manager Tommy Howell KG4MPU about how it's working.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 31st-March, through Sunday, 7th-April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C5, C6, C9, CE, CE0Y, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JX, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T2, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZF, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2, FIJI. Before heading to the International DX Convention in Visalia, CA, look for Wes, ZL3TE/W3SE, to be active as 3D2SE from Suva on the Island of Viti Levu (OC-016, WLOTA 0055) between April 12-16th. Activity

will be casual, mainly CW, and some Digital modes possibe. He also states that he will be operating in the Japan International DX CW Contest (April 13-14th). Logs will be uploaded to LoTW at a later date.

A3, TONGA. Vadum, UT6UD, will be active as A35UD from Tongatapu Island (OC-049) between May 1-7th. Activity will be on 40-10 meters using CW, SSB and RTTY. QSL via UT6UD.

A3, TONGA. Masato "Masa", JA0RQV, a member of a DX group in region zero of JA known as JA0-DX-GANG, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan government. He mentions that he will try his best to be on every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. He will use 100 watts into a ATU and GP. QSL via his home callsign, by the Bureau or direct to: Masato Tamura, 891-4 Tomitake Nagano-city 381-0006 Japan (w/SASE and 1 IRC). He will upload later to LoTW. If you have any requests or a scheduled QSO, let him know by E-mail at: ja0rqv@jarl.com

CARIBBEAN TOUR. By the time you read this, Rick, AI5P, should be active as J75PX from the Sea Cliff Cottages, Dominica, on the NE side of the island (as reported by "The Daily DX") between April 6-20th. Activity will be holiday style. Rick will leave Dominica and fly to Martinique where he will be active as TO5PX between April 20th and May 4th. QSL both operation via AI5P.

E5, SOUTH COOK ISLANDS (Reminder). Mauri, AG1LE, is now active as E51DXX on a holiday/DXpedition from Rarotonga (OC-013) until April 13th. Activity will be on the HF bands. QSL via his home callsign.

FT5Z, AMSTERDAM ISLANDS (Press Release). Ralph Fedor, K0IR, sent out the following on April 3rd, to the 'The DX Community' [edited]: "I am pleased to announce a major DXpedition scheduled to occur during January and February of 2014.
An international team of 14 experienced DXpedition operators, led by K0IR, will depart from Fremantle, Australia, in early January of 2014. Their destination will be Amsterdam Island (FT5Z).
Amsterdam Island is under the administration of Terres Australes et Antarctiques Francaises (TAAF). There are strict rules and environmental regulations in place on Amsterdam Island and access is limited. Representatives of this DXpedition team met with TAAF officials on Reunion Island in November and in Paris in early March. The team's plan and credentials were reviewed at those meetings, and resulted in TAAF's final, written authorization to land on Amsterdam Island and conduct this DXpedition.
The team has been granted an 18 day access to the island to occur between the dates of January 15th and February 20th of 2014.
The team will sail from Fremantle, Australia aboard the MV Braveheart. The voyage to Amsterdam Island will take them through the 'roaring 40s' of the Indian Ocean and last about 8 days, depending on the wind and weather. TAAF has reviewed the Braveheart's specifications, environmental precautions, and emergency response plan and has designated anchorage

conditions for the vessel. Landing at Amsterdam must be timed according to sea conditions as there is no natural harbor to shield the landing area from the open sea. This may necessitate waiting off shore until the sea conditions are suitable. But, our 18 day window does not start until we step onto the island.
Once ashore, the team will move to two station positions assigned by TAAF. The two locations are about 2 kilometers apart. Each location will allow a full complement of antennas. The separation will allow simultaneous CW/RTTY and SSB transmission on the open bands. The group plans on eight stations; four at each location. Elecraft K3's, a full complement of antennas, and 500 watt and 1.5 KW amplifiers will be the backbone of the station configurations.
The operators are well known in the DXing and contesting world and include: 9V1YC, EY8MM, FM5CD, HK1R, K4UEE, K9CT, LA6VM, N4GRN, N6HC, VE3EJ, VE7CT, W6IZT, WB9Z, and yours truly K0IR.
Our website is in the final stages of preparation. When it is complete, you may access it at: http://www.amsterdamdx.org
The website will be password protected until it is ready.
As with past DXpeditions to 'Top Ten' countries, this is a costly venture. The expenses total just over $400,000 (U.S.). Each operator must contribute a minimum of $10,000 of his own money, pay his own way to Fremantle, Australia, be away from home and family for six weeks, spend 16 to 18 days at sea, and be prepared for the financial and physical risks inherent in a major DXpedition of this magnitude.
The group needs your financial support to successfully complete this major project and is asking all DX'ers to contribute what they can to make this happen. We know that clubs and major sponsors will help us; INDEXA has already made an extremely generous contribution to the project and the NCDXF has honored with a very large grant. But we also need the help of individual DX'ers, not only from North America, but also from Europe, Asia, Africa, South America, and Oceania. Let's make this happen!
Then, let's enjoy the chase of a new country, a new band country, or working a rare one! 73 &#65533; Ralph Fedor &#65533; K0IR"
ADDED NOTES:
* Since the press release, it was announced by Stan, SQ8X, that the callsign of the 2014 Amsterdam Island DXpedition will be FT5ZM.
Also, both Facebook and Twitter pages at now available at:
https://www.facebook.com/FT5ZM
https://twitter.com/FT5ZM
* NCDXF PRESS RELEASE (Major Grant to Amsterdam Island DXpedition):
"FOR IMMEDIATE PUBLICATION - April 4, 2013 -- The Northern California DX Foundation is pleased to announce a grant of $50,000 to the FT/Z Amsterdam Island DXpedition planned for Jan-Feb 2014. Amsterdam is #4 on the DX Magazine's Most Wanted List for 2013.
This is the second largest grant in NCDXF's history. Without major financial support from NCDXF, DXpeditions like this to challenging or rare locations would not be possible.
<www.amsterdamdx.org/> will soon post the DXpedition details.
For the past 41 years the NCDXF has funded major DXpeditions to many

Most Wanted Entities. The credit for these large grants goes to the
NCDXF contributors, individuals and clubs, who make DX like this
possible. Have you contributed yet?
... 73, Glenn Johnson, W0GJ
NCDXF Vice President
<http://www.ncdxf.org>"

IDXC 9TH (PAESTUM CONVENTION) NEWS. Oreste, IZ8EDJ, reports that details (program info and official schedule) for the 9th International DX Convention 2013, held on April 28th, in Capaccio-Paestum (SA), Italy, are now available at: http://www.dxitalia.it/web/paestum/9th-idxc-2013 Reservations must be made no later than April 13, 2013 (to allow them to organize everything) via E-mail at: iz8edj@gmail.com, by telephone at 3342575485. Offical Web site is: http://www.dxitalia.it

IDXC 64TH (VISALIA CONVENTION) NEWS.....
* (Last Call IOTA Dinner). Ray, N6VR, reports that he has less than two weeks before he has to turn in his IOTA Dinner meal count. If you would like to attend the IOTA Dinner, he needs your check for 32 USDs as soon as possible. Please check the Int'l DX Convention Web page, Friday evening dinner, IOTA dinner, for details at: http://www.dxconvention.com Their featured guest is, Don, G3XTT. He is the Manager of the RSGB IOTA Contest. Don is also member of the RSGB IOTA board and will talk about the latest with the RSGB program and will make a presentation on his RECENT OJ0 operation. Other presenters are Fred, PY2XB, presenting on his SA-041 operation. They also have Rick, K6VVA, with C6AVA. Rick is full of surprises, he will have more! It will be an exciting and enjoyable Dinner! Ray needs your check by April 10th.

* The Intrepid-DX Group will be making a big announcement at the IDXC 2013 in Visalia on April 20th.

* The Intrepid-DX Group will honor a famous DXpeditioner with our "Intrepid Spirit Award" at IDXC 2013 on April 20th.

IOTA (Philippines) TOUR (Update to OPDX.1105). Dindo, DV1UD, has announced the dates to activate three of the 'most wanted' Islands in the DU area. Dindo will visit Bongao Island (OC-174) and Tawi-Tawi Island (OC-174) between April 9-11th. Activity from Taganak Island (OC-225) will be between April 13-15th. His callsign will be DX8DX, and activity will be on CW and SSB. Suggested frequencies are:
CW - 3530, 7030, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14280, 18128, 21260, 24950, 28460 and 28560 kHz

QSL via M0OXO OQRS. For more details, visit his Blog page at: http://www.m0oxo.com/dx8dx.html

IOTA NEWS.....
EU-008. (Update) Members of the Camb-Hams will once again activate the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p between May 10-16th. The Camb-Hams have been activating the Scottish Isles each year since 2008. Look

for thirteen operators to be active on all bands and many modes
from 160-2 meters as well as 472 kHz. The HF bands will be
covered by five simultaneous stations, while 6m, 4m and 2m
stations will have a great take-off towards the UK and Europe
from the island's south-east coast in IO76 square. They will
have an antenna elevation system for 2m EME activity and will
also be on many of the VHF/UHF satellite passes. WSPR beacons
will be operating on most of the inactive bands to help find
the best propagation. Contest operations will take place in
70 MHz CW on May 12th and 432 MHz UKAC on May 14th. The group
will be active on the major social networks before, during and
after the trip. You can check on progress or interact with the
operators via their blog at <dx.camb-hams.com> or through
Twitter <twitter.com/g3pye>, Facebook <facebook.com/CambHams>
and YouTube <youtube.com/CambHams>. Previous trips have generated
some great audio and video recordings of the GS3PYE/P signal
from around the world. Check their previous blogs and their
YouTube channel and see if you can post a better recording.
Please E-mail <skeds-2013@camb-hams.com> to arrange skeds on
the more challenging bands and modes. VHF and EME skeds will
also be made via ON4KST and N0UK's EME Chat. All links are
available via <dx.camb-hams.com>.

EU-041. Operators Tony/IZ2ESV, Bruno/IW3HXR, Mauro/IK3VUU and Luciano/
I3CLZ will be active as IM0MA from La Maddalena Archipelago
(IIA OT-008, MIA MIS-013, WLOTA 1632, WWFF IFF-004) between
April 21-24th. This activity is intended as a spring-break
expedition, aimed firstly to relax and have fun on the air.
Operations will be during their spare time on 80-10 meters
using CW, SSB and the Digital modes. QSL Manager is Antonello,
IK2DUW.

EU-049. Five members Sands Contest Group from Morecambe, England, will
be visiting the Island Samos (GIOTA SAS-006, MIA MG-099, WLOTA
4163), for a holiday and DXpedition between May 16-30th. The
group will be using the callsign SZ8S (kindly loaned to them
by the Aegean Radio Association), and operating from the Radio
House at Zervou Point above Samos town. They mention that the
actual days for operation are uncertain, but hope to start on
Saturday May 18th. Operators mentioned are Barrie/G1JYB, Ian/
G0VGS, Stephany/G1LAT, Hughie/G4UME and Bob/G1OCK. QSL "ONLY"
direct via G1LAT the QSL Manager in the UK (w/SASE and outside
the UK w/SAE + 1 IRC or 2 USDs). QSLs by the Bureau or eQSL
are via M0SCG. PLEASE DO NOT SEND ANY QSLS TO THE LISTED ADDRESS
FOR SZ8S (FOR THIS DXPERDITION), AS YOU WILL NOT GET A REPLY.
AS THIS IS THE AEGEAN RADIO ASSOCIATION&#65533;S SPECIAL CALLSIGN.

EU-057. Helmut, DL5BUT, will be active as homecall/p from Ruegen
Island (DID O-007, WLOTA 1712) between now and April 17th.
Activity will be holiday style on 160/80/40/20 meters using
CW, SSB, and the Digital modes. Depending on the weather and

conditions, look for a possible two day WWFF (World-Wide Flora Fauna) operation from the National Park Jasmund (DLFF-007). QSL via his home callsign, by the Bureau or direct.

EU-057. Operators Friedrich/DL4BBH, Matthias/DK7LV, Klaus/DL7UXG, Henning/DB5BZ, Peter/DJ4RU and Ric/DL2VFR will be active as DM50IOTA from Hiddensee Island (DID O-005, WLOTA 2371) between September 28th and October 4th. Activity will be on all HF bands using CW and SSB. This activation will also count for the Vorpommern Lagoon Area National Park WWFF (World-Wide Flora Fauna) reference DLFF-014. Also the lighthouse Dornbusch (DLTD_GLHA #17, ARLHS FED-026, WLOTA 2371). QSL via DL2VFR, by the Bureau or direct. For more details and updates, visit the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the fourth German Island group activated by DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate all German IOTAs during that time. If you have worked DM50IOTA from all German IOTA by the end of 2013 you can apply for a special award.

EU-110. Nikola, AC6DD, will be active as 9A/AC6DD from Oprtalj-Portole, Sveti Nikola, Croatia, in the Istra IOTA Group, during the RSGB IOTA Contest (July 27-28th) as a Single-Op/CW-Mode/ 24HRS/High-Power entry. QSL via AC6DD.

EU-121. Andy, G7SQW, will be active as EJ/G7SQW from Arranmore Island [aka Aran] (WLOTA 1189) between May 27-29th. Activity will be on 40-6 meters. A radio, possibly with a yagi, will be dedicated for 6 meters and will activate two WW Loc. grids IO54 and IO55. This will be Andy's first IOTA activation. QSL via his home callsign, direct or by the Bureau.

EU-121. Gerard, EI5KF, will once again be active as EI5KF/P from Lohehort Battery, Bere Island [aka Bear] (WLOTA 2983), during the RSGB IOTA Contest (July 27-28th), possibly as a Single-Op/ 12HRS/CW-Mode/Low-Power entry. QSL via EI5KF.

EU-127. Operators Friedrich/DL4BBH, Klaus/DL7UXG, Matthias/DK7LV, Henning/DB5BZ, Peter/DJ4RU, Helmut/DL1BGC and Ric/DL2VFR will use the special callsign DM50IOTA from Neuwerk Island (DID N-012) and lighthouse (DLTD_GLHS #38, ARLHS FED-165, TWLHD WLH DL-01, WLOTA 2311 and Admiralty B 1344) between April 12-14th. Activity will be on all HF bands using CW and SSB. This activation will also count for the National Park and Nature Reserve Hamburg Wadden Sea (WWFF reference DLFF-005). QSL via DL2VFR, by the Bureau or direct. For more details and updates, visit the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the third German Island group activated by DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate all German IOTAs during that time. If you have worked DM50IOTA from all German IOTA by the end of 2013 you can apply for a special award.

NA-180. (Update) Operators Hernan/V31HU, Ismael/XE1AY (V31MV) and
Enrique/XE2AA (V32EE) will be active from Twin Cayes in the
South Water IOTA Group, Stann Creek district, Belize, between
now and April 12th. Activity will be on all bands including
6 meters. QSL all callsigns via IT9EJW. Visit their Website
at: http://www.it9ejw.it/v31

T48K QSL ROUTE. For stations who worked T48K during the 2013 CQWW WPX SSB Contest, DK1WI is not the QSL Manager for this callsign any longer. Erhard will manage all T48K's operations from 1999 until last year's CQWW VHF Contest and will stop his services. The QSL Manager for the last CQWW WPX is Hugo, F5FYO. Please, send your cards, including SASE to: PO BOX 50033, La Reole, Cedex, 33191, France , or via REF Bureau.

QSL RECEIVED VIA LoTW: 3Z8T, 4Z4DX, 9M2/R6AF/P, BD2OB/7, C6ANM, CX3AL, DL3GD, EA3IN, EF5Y, FS/UA4CC, GW100C, HA8JV, II9P, J34G, J38A, JA8CMC, KH0/R0FA, LN8W, LZ9W, OK1AWZ, OZ1BTE, PJ2T, PJ7AA, PY2KJ, RU4LM, SN2M, SV1OZ, T2GM, TM6M, TN0INT, TK1INT, TK2INT, V31LJ, V44KAI, V47JA, V84SMD, VK9CZ, VP2EC, VP2V/KE2VB, VP9/WA1Z, VP9I, YB8Y, YE0M, YU1FJK and ZL3NB

QSLS RECEIVED VIA MAIL: 7O6T, E51E, EU3DN, H40FN, KH2/G3ZEM, RI1FJ, RV3EFH/0, S21XV, TZ6BB, V25A, V63ZM, XT2TT and ZB3R

QSLS RECEIVED VIA THE BUREAU: F5CQ, G3TXF, RK3DXW, VK5PAS and YB0NDT

S7, SEYCHELLES (Reminder). Nobby, G0VJG, is now active S79VJG from the Seychelles (AF-024) until April 16th. Activity will be on the 40-10 meters using SSB only and HF verticals on the beach (QRO). QSL via G4DFI.

SU, EGYPT. "After almost 9 Moons the License has been received", states Andy "Sparky", RW3AH. He is now active as SU9AF near Cairo, and his license is good for 160/40/20/17/15/12/10 meters (80/75/30m not allowed for use in Egypt). His equipment is an Icom IC-718, delta-loop for 20/10m and a vertical for 30/17/15/12m. He currently does not have a 160m antenna. Suggested frequencies (his favorites) are:
CW - 7002, 14002, 18070, 21002, 24895 and 28002 kHz
SSB - 7155, 14155, 14195, 18155, 21295, 24940 and 28495 kHz
6m/VHF/UHF/Satellite: Not permit for Amateur radio activity from Egypt.

The length of his stay is not known, but his license is good until the end of the 2013. QSL via UA3DX. He does have a survey for "modes and bands needs" on the following Web page at: http://www.CQDX.ru/su9af

S21XV VIDEO AVAILABLE ON YOUTUBE (9:08 mins.). This is the March 1-7th, 2013, S21XV Dhaka, Bangladesh, DXpedition by Vadym, UT6UD. See the video at: http://www.youtube.com/watch?v=rW0eW1SmU

TS8, TUNISIA (Update). An Italian group, along with the Association des Radio Amateurs Tunisiens (ARAT) and the Engineering University of Gabes, are planning a second IOTA DXpedition to Djerba Island (AF-083, WW. Loc. JM53KT, WFF 3VFF-007, WLOTA L-1394 and ARLHS TUN-022), as TS8TI between April 29th and May 6th (see OPDX.1100, OPDX.1101 & OPDX.1102). Activity will be on all HF bands, including the 30/17/12/6 meter bands using CW, SSB, RTTY and PSK31/63/125 modes. Operators mentioned are Ashraf/KF5EYY, 3V8SA (ARCS of Tunisian Scout), 3V8ST (ARC of Tunis), 3V8ESG (Department

of Communications and Networking National Engeneering School of Gab&#65533;s), 3V8SF (Scout Radio Club of Sfax), Fred/IK7JWX (Team Leader), Antonello/ IK2DUW (QSL Manager), Ampelio/IS0AGY, Rosy/IW2NLC (YL), Stefano/IK6JRI, Vincenzo/IZ8LFI, Heathem/YI1UNH. QSL via IK2DUW, direct or by the Bureau. Logs will be available on LoTW, <http://www.ik2duw.it> or <http://www.mdxc.org/TS8TI/log-on-line>. The team is still in need of sponsors and individual contributions. Contact: ik7jwx2003@yahoo.it
For more info updates and pictures, watch the following Web pages:
http://www.qrz.com/db/TS8TI/
http://www.arilimbiate.it/
https://www.facebook.com/alfredo.denisi

V6, MICRONESIA (Reminder). Haru, JA1XGI, is once again active as V63XG from Pohnpei Island (OC-010) until April 11th. Activity will be on 160-6 meters (especially 30/17/12m) using mainly CW, with some SSB and the Digital modes. Also JT65. Suggested frequencies are (no 80m) listed in OPDX.1094. QSL via JA1XGI, direct or by the Bureau. QSOs will be uploaded to LoTW. Look for updates and details on Haru new Web page or Blog page at: http://island.geocities.jp/v63xg/index.htm
http://ja1xgidxvacation.blogspot.com

VK9C, COCOS KEELING ISLANDS (Update). Operators Chris/GM3WOJ (ZK2V) and Keith/GM4YXI (ZK2X) are now active as VK9CZ from Cocos Keeling Island (OC-003) until April 13th. Activity will be on SSB and CW, with some RTTY. QSL via N3SL. For more details and updates, see their Web page at: http://www.vk9cz.com
Log is being uploaded to LoTW and is also available on ClubLog at:
http://www.clublog.org/charts/?c&#65533;9cz

VP9, BERMUDA. Eric, K9GY/T6MO, announced that he will be active possibly as VP9/K9GY or K9GY/VP9 in the Worked All Europe CW Contest in mid-August. He informs OPDX that he plans to be there between August 8-15th. Activity will probably be mainly CW on 40-10 meters. He also mentions, "Might be late in the season for 6m propagation, but it would be great to work Europe :-)". Activity will be from Ed's, VP9GE, Hamilton apartments QTH <see the Web page at: http://vp9ge.com >. QSL via K9GY.

XR86, CHILE (Special Event). Look for special event station XR86PL to be active until April 30th. Activity is to commemorate the 86th Anniversary of Carabineros de Chile (Chilean Police). Operations will be on all bands using SSB, RTTY and PSK. QSL via the home callsign (see QRZ.com) or CE3ETE.

YJ0, VANUATU. Bill, K2PO, will be active as YJ0PO from Efate Island (OC-035), one of Vanuatu's 82 islands, during the CQWW WPX CW Contest (May 25-26th). He states that his activity will start a few days before and end a few days after. Operations will be on 80-10 meters. QSL via his home callsign. Logs will be uploaded to LoTW promptly after his return to the USA in early June.

YN, NICARAGUA. Eric, K9GY/T6MO, will be departing Afghanistan in about three weeks (shut down the T6MO station on April 28th). He informs OPDX, "Hope to be at Dayton if I can process through Ft Benning quick enough,

hah!" In late May, Eric will once again be active as YN2GY from Octavio's, YN2N, QTH in Grenada. He states that he will be there May 22nd (probably more like May 23rd with the late flight) until early May 28th. While there he will also be in the 2013 CQ WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. Outside of the contest, look for CW activity on 30/17/12 meters. Also look for him on 6 meters (he's hoping for some good 6m propagation). QSL via LoTW or to his home callsign, direct or by the Bureau.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 7th April 2013

IRTS AGM, Dinner and Radio Rally

This year the 81st IRTS AGM is hosted by Shannon Basin Radio Club. The event takes place in the Shamrock Lodge Hotel in Athlone, Saturday April 27th and Sunday April 28th 2013. Tickets for the Dinner on Saturday night (8.00 for 8.30pm) will be available at 30 Euro each from Brian EI8IU QTHR and through IRTS Committee Members. Dress code, as usual, is smart/casual. Menu details is available from the IRTS website. Please visit www.irts.ie for more details.

Echo Ireland - March

The March edition of Echo Ireland, the IRTS journal, was mailed to members during the week. It has reports on a number of recent events, including the Limerick, Lough Erne and Coolmine rallies as well as a presentation on all aspects of the Summits On The Air programme to the Dundalk club by Graeme MI0WGM.

This is AGM season, and Echo Ireland includes reports from the AGMs of Cork Radio Club, South Eastern Amateur Radio Group and Limerick Radio Club, along with the formal notice of the IRTS annual general meeting, which takes place later this month.

Cork-based Edwin van Mierlo EI2HEB recounts the journey from his introduction as a young boy in the 1970s to the "magical" world of amateur radio by an uncle, to passing the exam and obtaining an amateur station licence in 2011. CW and QRP enthusiast Tom EI2AJ tells us how someone with a small garden and budget can get on the air with a low-cost commercial vertical antenna. Staying with verticals, Tony EI4DIB gives the results of SWR tests on a range of rubber duck antennas for 2 metres and 70 cms.

"HF Happenings" by Anthony EI2KC includes some suggestions for achieving DXCC on individual bands. Anthony also covers recent and forthcoming DXpeditions. In the "Excerpts from the HX files" Pat EI2HX talks about his efforts to fit a telescopic sight to a 10 Gigahertz dish, so that it can be used to line up two portable stations. Pat's experience while using an angle grinder on an aluminium block is worth noting!

---

2 Metres Counties Contest

Our listeners may remember that Monday last, Easter Monday, was another cold and windy day. Nevertheless, quite a few stations braved the elements to operate in the portable sections of 2 metres counties contest. Those heard operating portable included David EI7GEB, who was on Slieve na Calliagh - the highest point in County Meath and part of a prehistoric complex of passage tombs in the county - the South Eastern Amateur Radio Group who were in Carlow on Mount Leinster, and the Shannon Basin Radio Club on the Leitrim hills. Another portable station heard was Joe EI7GY, who pitched his tent on the Slieve Blooms in County Laois.

There was also good support from the fixed stations, with most counties represented. The deadline for logs is Monday 15th April.

Youngsters on the Air

Last weekend, a team of 14 young operators participated in the CQ WPX contest from Sweden using the call sign SH3Y in the Multi/Multi section. 5 stations were active using up to 3 antennas on each band. This is the youngest multi operator, multi transmitter team operated in Sweden for the last 13 years. Most of the team from outside Sweden met at the Youngsters On The Air program in Belgium last year and a total 12.22 Million points were gained over the weekend.

Limerick Radio Club

Limerick was well represented for last weekends IRTS 2M Counties contest, and members are requested to send their logs to contestmanager /at/ irts.ie , deadline April 15th.

The next club meeting will take place on Wednesday next 10th April in LIT at 7.30pm.

Liam Rainford EI7DSB will give a talk on WSJT Modes and Simon Kenny EI7ALB will talk on VHF DX.

International Marconi Day Saturday 20th April 2013

The Hurdy Gurdy Museum of Vintage Radio will be celebrating International Marconi Day, and the tower will be open from 11 AM to 4 PM at least, and probably longer. The Call Sign is EI0MAR. The tower was the site for an experimental Marconi Station in 1905. All visitors are welcome, licenced amateurs, SWLs and anyone with an interest in radio. The museum is located in the Martello Towel, Howth Harbour, Fingal, County Dublin. The web link is http://bit.ly/QXkBTi

---

South Eastern Amateur Radio Group

The next monthly meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 29th April at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp and as always new members are very welcome.

Bangor & District ARS Rally

The BDARS Annual Rally is on 6th July this year in the usual venue of Donaghadee Community Centre, Donaghadee, County Down, BT21 0HB - Doors open at 11:30.

West Tyrone Amateur Radio Club

The West Tyrone Amateur Radio Club recently held their AGM. The following were elected to the club's committee Chairman - Eddie Mc Crystal GI7FHZ Vice-Chairman- Frank Kearney 2I0FPK Secretary- Paul Rafferty-Floyd 2I0LDC Treaurer- Sean Rafferty GI0EJT Pro - John Martin 2I0OMA Committee Member - Eric Barker GI4SXV Committee Member - James McCann GI3YBZ

DX News

Maurizio IK2GZU will be back in Tanzania from 7 April until 8 May. He will be working on electrical installations in the local hospital and orphanage. In his spare time he plans to reactivate his 5H3MB callsign. QSLs go via his home call.

Mario CT1FTR will be in Khartoum, Sudan until June. He is signing ST2FT.

Rick AI5P is off to the Caribbean and will firstly visit Dominica from 6 - 20 April. While there he will use the callsign J75PX. Then he travels to Martinique until 30 April where his call will be TO5PX. QSLs are via the home call.

Two Mexican operators, XE1AY and XE2AA, will sign V31NV and V32EE from Belize from now until 12 April. They will be joined by V31HU. Operation will take place from South Water Cay which counts as NA-180 for the Islands on the Air Award. QSL Manager is IT9EJW.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in

the following Sunday's bulletin.

Purdue's West Tower Home to Longest-Standing Club:

Posted: 06 Apr 2013 05:06 PM PDT
http://www.eham.net/articles/29992

Thanks to his involvement in Purdue's longest-standing club, one student was able to communicate with his family during a natural disaster. The west tower of the Memorial Union, otherwise known as "The Shack," is the official meeting place of W9YB. The shack's walls are covered with computers, radios, other electronics and postcards from around the world. By a large window on the far wall sits a large satellite antenna, almost as long as the room itself. After spending some time with the club, members can earn "call numbers," which act as a username over the radio. Mat Amore, call number KD2CMJ and a freshman in the College of Technology, is involved with the W9YB, or the Purdue Amateur Radio Club. "I live in New Jersey, and when Hurricane Sandy came through, I tried to call (my family)," Amore said. "I was freaking out because I was seeing pictures on Facebook ... I was seeing the worst of it." Luckily, Amore and his father both had experience using amateur radio. "If any type of emergency happened, we had a set frequency to communicate," Amore said. "It was a relief to hear from them."

GB2RS NEWS

Sunday 7th April 2013

The news headlines:

Spectrum Pressure Continues

STRaND-1 Signal Reports Requested

GJ100RSGB goes on air this week

The Ofcom 4G auction has now concluded and raised ?2.4bn. However inexorable demand now requires further spectrum for 5Gand one of the topics for WRC-15 is additional spectrum for mobile broadband. Ofcom is consulting on potential bands for this, largely within the 400MHz to 6GHz range, with a deadline of 29 April. The RSGB is liaising with Ofcom in order to enhance their familiarity with amateur microwave activity and protect ATV and narrowband users. The recruitment of Noel Matthews, G8GTZ from BATC to RSGB-ETCC for ATV matters adds to our volunteer base for the effort involved. A background article on `Spectrum Release' was featured in the January edition of RadCom and is now available as a download on the RSGB band plan web page.

Dr Chris Bridges, M0GGK, from the Surrey Space Centre, has advised that the amateur radio beacon on their STRaND-1 CubeSat became intermittent over the Easter weekend. Both DK3WN and ST2NH have reported that no signals have been heard since Sunday. Radio amateurs are asked to listen for STRaND-1 over the next few days and report any positive results, by e-mail, to C.P.Bridges@surrey.ac.uk. Listen for a 9k6 bps AX.25 signal around 437.568MHz, plus or minus the Doppler shift.

G100RSGB, the special event callsign celebrating the RSGB Centenary stays in Region 11 this week. GJ100RSGB will be on the air today, Sunday 7, and Monday from Jersey with Jersey ARS running the station from La Moye Signal Station. They are planning to use the 10m to 160m bands as well as 2m and 70cm. On Tuesday, Dartmoor Radio Club take over with a station running on the 80, 20, 15 and 6m bands as well as 2m and 70cm. Wednesday and Thursday is the turn of Appledore & DARC with HF and VHF from Northam. On Friday, Poldhu ARC is running the station from the Marconi Centre in Mullion using the 20 and 40m bands. Next weekend, 13th and 14th, Torbay ARS are running the callsign from Newton Abbott and plan to be on air for 24 hours on the 13th. They will have an HF station on the air running SSB, digimodes and FM. Details of how to get your QSL card are on the website, www.rsgb.org.uk.

The RSGB Centenary dinner will take place at Horwood House in the evening of 5 July, the anniversary day. As well as this being a voluntary black tie event to recreate the dinners held in the early days of the Society, it is intended to re-create a menu based on one of these early dinners, including a souvenir menu card. Tickets and overnight accommodation are still available, although numbers are limited and are selling quickly. Visit the RSGB shop for your tickets and don't forget we are planning to re-create the early days with a commemorative photograph.

Eddie Bennett, G3ZJO, may now hold a QRP distance record for a micro power transmission using a Raspberry Pi microcomputer as a transmitter. He used the 10 milliwatts of RF that can be generated from the Raspberry Pi computer board to be heard at over 2000km on the 7MHz band as the Pi can be made to operate as a WSPR mode transmitter. Among the stations who received his WSPR signal on 40m was LA9JO in JP99 at a distance of 2124km. Details of how you could try this is available at tinyurl.com/raspberry-pi-transmitter.

OE13M is an official International Marconi Day station and will be on the air from 0000UTC on 19 April to 2400UTC on 21 April, although only contacts made on 20 April are valid for the IMD award. Run by the Austrian Broadcasting Corporation and the Documentary Archives Radio Communications /QSL Collection, you can QSL via OE1WHC. Details are on QRZ.com.

The RSGB's Centenary AGM will take place at the IET, Savoy Place, London on the 20th April at noon. If you are intending to attend, it would be appreciated if you could let the RSGB know by filling in the very short form at www.rsgb.org/attendagm.

A new 70cm beacon based upon the Next Generation Beacon platform has come to the airwaves from Denmark. The OZ7IGY beacon on 432.471MHz became operational on 30 March and is expected to remain very stable in frequency as the transmitter is locked to a GPS receiver. The transmission sequence is timed to start at 00 second sending PI4 followed by a short pause then CW ID sending callsign and locator. It's then is in carrier only mode until next cycle begins. The beacon joins its counterparts on 6, 4 and 2 meters operating from the same location and running the same transmission sequence. All four use the PI4 digital modulation system that was specifically designed to work with beacons and propagation studies in mind. You can download the PI-RX to decode PI4 at tinyurl.com/pirx-beacon-software.

And now for the details of rallies and events for the coming week

The Cambridge Repeater Group Rally will be held at Foxton Village Hall, Hardman Road, Foxton, Cambridge CB22 6RN today, 7 April. Doors open at 10am and admission is ?2. There will be trade stands and a Bring & Buy. More details can be obtained from M0LCM on 01223 711 840.

Also today, 7 April, the Northern Amateur Radio Societies Association Exhibition will take place in the Norbreck Castle Exhibition Centre,

Blackpool FY2 9AA. Doors open at 10.30am, 10.15 for disabled visitors and there will be trade stands, special interest groups a Bring & Buy and an RSGB bookstall. More information from Dave, M0OBW on 01270 761 608.

Finally for today, 7 April, the South Gloucestershire Amateur Radio Rally will be held at the Scout Activity Centre, Woodhouse Park, Almondsbury, Bristol BS32 4LX. Doors open at 10am and there will be a Bring & Buy at this rally. More details from Mike, M1DPB, on 07806 310 095.

A WW2 Air Forces Radar Reunion will be held at Blackpool from Friday, 12 April to Monday 15 April. Operators, mechanics, filter room and airbourne radar visitors welcome. Day visitors are also welcome. For further details please contact Jim Ward, G0DGG, 17Valley Walk, Croxley Green, Rickmansworth, Hertfordshire WD3 3TA.

There are no rallies next weekend, 13 and 14 April. The West London Radio and Electronics Show, also called the Kempton Rally, will take place on 21 April as will the RADARS rally and surplus equipment sale in Ripon. More details next week

Now for the news of special events

As part of its 100th anniversary events, Northampton Radio Club is operating a special event station at a model exhibition weekend at Windmill Primary School in Raunds, Northamptonshire today, 7 April. As well as there being an exhibition of model boats and hovercrafts, helicopters, aircraft and trains, Northampton Radio Club will be operating HF, VHF, UHF and D-Star. Everyone is welcome to attend and further information including the school address can be seen at the clubs' website at www.nrc1913.clubbz.com.

>From 9am on Friday 12 April to 5pm on 13 April, Sheffield Amateur Radio Club will be operating as GB5SWW for Sheffield Wireless Worlds from the Sheffield Hallam University Cantor Building in the centre of Sheffield. The station is part of an exhibition of art and film by Esther Johnson, a talented artist, film maker and Reader in Media at the Hallam University. GB5SWW hopes to be active on all bands from 80m to 10m as well as D-Star and the local 70cm repeater GB3US. QSL cards should go via the GB sub bureau or direct to G3PHO with appropriate return postage and SAE. The exhibition features radio memorabilia, QSL cards and two interesting films screened at intervals throughout the period. Entry to the exhibition is free.

Cleddau ARS will be operating a special event station, GC0SYG/MM, from on-board the Stena Europe Irish Sea ferry in memory of the 101st Titanic remembrance weekend from 0200UTC on 13 April to 2359UTC on 14 April. The ferry will travel between Fishguard in Wales and Rosslare in Eire and the station will operate on 40m and 20m primarily using CW and SSB with and some PSK31. Spots will be made via clusters.

The Radio Society of Harrow will be running GX3EFX and displaying period radio equipment at the 1940's Family Experience Weekend on 13 and 14 April at the Lincolnsfield Centre, Bushey Hall Drive, WD23 2ES.

A CW only special event station, GB4RPI, will be on the air from 11 April. Operation will be on Top Band, 80m, 40m, 30m and 20m to commemorate those who lost their lives in Trident Tragedy at Staines in 1972. Details are on qrz.com.

And now the DX news compiled from 425 DX News and other sources

A team of 15 German operators will be active as 5W0M from Le Lagoto, Samoa until 18 April. Operation will be on the 6 to 80m bands using CW, SSB and RTTY plus 2m EME. They plan to have four stations active simultaneously. QSL HF and 6m via DL4SVA, direct or by the Bureau and EME QSOs to DL9MS.

CT1FTR is now active from the Sudan as ST2FT operating both the HF and VHF bands using a Yaesu FT-857 and a loop antenna. QSL via CT1FTR.

Paul, 2E1EUB will be operational as 2M1EUB from the eastern side of Scotland in the Cairngorms National Park until 13 April. Activity will be on 160, 80, and several satellites as well as 2m SSB. Check out QRZ.com under 2M1EUB for more information.

Rob N7QT will be on the air from St Lucia in the Caribbean until 16 April. Using the callsign J6/N7QT with battery power and lightweight antennas.

Chris, GM3WOJ and Keith, GM4YXI are operating as VK9CZ on Cocos Keeling until 13 April. They are active on all bands from 10 to 160m using SSB, CW and some RTTY. QSL manager is N3SL and logs will be uploaded to Logbook of the World.

Now the contest news

The SSB leg of RoPoCo takes place on the 80m band today, 7 April, from 1900 to 2030UTC. Both RoPoCos are HF Championship events, with the maximum output power limited to 100 watts. The exchange is signal report and the full postcode received.

In the 3-hour 1st 70MHz contest taking place from 0900 to 1200UTC today, 7 April, there are no multipliers. It's a straight race to accumulate as many kilometres worked as possible. The exchange is signal report, serial number and locator.

The CW/SSB leg of the SPDX Contest runs for 24 hours until 1500 today, 7 April. Using the 1.8 to 28MHz bands. Work Polish stations only, giving them a signal report and serial number. Expect a signal report and a single-letter province code in return.

9 April sees the 432MHz UK Activity Contest take place from 1900 to 2130UTC. Using all mode the exchange is signal report, serial number and locator.

The SSB leg of the 80m Club Championships takes place on 10 April from 1900 to 2030UTC. The exchange is the usual signal report and serial number.

The EU Spring Sprint takes place on 13 April from 1600 to 2000UTC using the 3.5 to 14MHz bands. You should exchange callsigns, serial number and name. There's no need to exchange a signal report.

The First 50MHz Contest is on Sunday 14th. This event has multipliers for countries, Postcodes and locator squares, which means continually turning the beam and searching for new multipliers if you want to be successful. Running from 0900 to 1200UTC and using all modes the exchange is signal; report, serial number, locator and postcode.

Now the solar report for the period from Friday March 29th to Thursday the 4th of April, compiled by Martin Harrison, G3USF, on Friday April 5th.

Solar activity was again very low. During the entire period only four small C-class flares were reported and these had no impact on propagation. The solar flux level rose from 105 on the 39th to 129 on the 4th to average 116 over the week - an increase of 20 points on the previous week. However, the 90-day average dropped one point to 114. The X-ray flux rose steadily to average B2.6. The weel began with the geomagnetic field was at minor storm level. This was the result of a high-speed coronal wind stream that sent the Ap index for the 29th to reach 23 units. That was enough to trigger bright Arctic auroras and radio auroras at 50 and 144MHz lasting several hours on the afternoon an early evening of the 29th. But, as so often happens, these were almost wholly restricted to stations at high latitudes. HF propagation was below par for much of the day as a result. The disturbance died down during the 30th and, for the rest of the period geomagnetic activity stayed low, with the daily Ap in single figures. Solar wind speeds recorded by the ACE spacecraft reached 540km/second during the disturbance on the 29th, then declined to 274km/second on the 3rd of April. Particle densities were generally low. Bz - that's the interplanetary magnetic field - varied between plus and minus 4 nanoTeslas on quiet days and between minus 10 and plus 8 nanoTeslas during the disturbed days.

Now the forecast for the coming week. Solar activity is expected to remain low or very low, with only occasional flares, mostly of modest C-class dimensions. There are no indications of any highly active areas currently on the far side of the Sun rotating into view. Solar flux levels appear likely to fall back from the level of recent days but are expected to remain above the 100mark. Geomagnetic activity should stay low. MUFs at equal latitudes will be around 24MHz in the south and 21MHz in the north. Darkness lows will stay in the region of 10MHz. Paths to Japan should have a maximum usable frequency of about 25MHz, where there should be a 50 per cent chance of a contact. There should be a 90 per cent success rate at the Optimum Working Frequency of 20MHz. The path should be its best between 1000 and 1300UTC.

And that's all for another week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

Today, 7 April, Gloucester Amateur Radio & Electronics Society members are attending the South Gloucestershire Amateur Radio Rally. On Monday there is a talk on A day in the life of an air traffic controller. More details from Anne, 2E1GKY on 01242 699595 during the day.

Today, Sunday 7 April, Lincoln Short-Wave Club is taking part in the 1st 70MHz Contest and on Tuesday they are operating in the 432MHz UK Activity Contest. On Wednesday there is a used equipment sale in Aisthorpe Village Hall starting at 8pm promptly, with booking in from 7pm. On Thursday there is a Club Net on 145.375MHz starting at 8pm.On Saturday there's a surgery and mentoring in the shack from 9am. For more information contact Pam Rose, G4STO on 01427 788 356.

Wythall Radio Club has a club net today, 7 April, on 145.225MHz at 8pm and is taking part in the RoPoCo contest. On Tuesday there is a Morse Class at 7.45pm and a committee meeting at 8.30pm. Wednesday sees the club taking part in the RSGB 80m Club Championships SSB Contest and on Friday there is a shack social. On Saturday and Sunday the club is operating a Special Event Station at Stoke Prior Steam Fair finishing with a 145.225MHz net on Sunday at 8pm. Details from Chris, G0EYO on 07710 412 819.

On Monday 8 April Friskney and East Lincolnshire Communications Club has a VHF SSB club net on 144.165MHz USB using vertical polarisation and starting at 7.30pm. On Wednesday there is an M3+M6 club net on the GB3FR repeater starting at 8pm, with a VHF net on 145.450MHz on Friday at 8pm. Non members are welcome to join in on all nets. Contact the FELCC Information Line on 07554 362 020 for more information.

On Monday 8 April South Birmingham Radio Society Contest has a planning meeting and Tuesday sees the coffee morning running from 11am to 1 pm. On Thursday there are training classes with Dave Murphy, G8OWL and Friday sees the club doing some shack and aerial work. Full details from Mick Cleary, G7RRP on 07595 696 359.

> radio equipment at the 1940's Family Experience Weekend on 13 and 14
> April at the Lincolnsfield Centre, Bushey Hall Drive, WD23 2ES.
>
> A CW only special event station, GB4RPI, will be on the air from 11
> April. Operation will be on Top Band, 80m, 40m, 30m and 20m to
> commemorate those who lost their lives in Trident Tragedy at Staines in
> 1972. Details are on qrz.com.
>
> And now the DX news compiled from 425 DX News and other sources
>
> A team of 15 German operators will be active as 5W0M from Le Lagoto,
> Samoa until 18 April. Operation will be on the 6 to 80m bands using CW,
> SSB and RTTY plus 2m EME. They plan to have four stations active
> simultaneously. QSL HF and 6m via DL4SVA, direct or by the Bureau and
> EME QSOs to DL9MS.
>
> CT1FTR is now active from the Sudan as ST2FT operating both the HF and
> VHF bands using a Yaesu FT-857 and a loop antenna. QSL via CT1FTR.
>
> Paul, 2E1EUB will be operational as 2M1EUB from the eastern side of
> Scotland in the Cairngorms National Park until 13 April. Activity will
> be on 160, 80, and several satellites as well as 2m SSB. Check out
> QRZ.com under 2M1EUB for more information.
>
> Rob N7QT will be on the air from St Lucia in the Caribbean until 16
> April. Using the callsign J6/N7QT with battery power and lightweight
> antennas.
>
> Chris, GM3WOJ and Keith, GM4YXI are operating as VK9CZ on Cocos Keeling
> until 13 April. They are active on all bands from 10 to 160m using SSB,
> CW and some RTTY. QSL manager is N3SL and logs will be uploaded to
> Logbook of the World.
>
> Now the contest news
>
> The SSB leg of RoPoCo takes place on the 80m band today, 7 April, from
> 1900 to 2030UTC. Both RoPoCos are HF Championship events, with the
> maximum output power limited to 100 watts. The exchange is signal report
> and the full postcode received.

>
> In the 3-hour 1st 70MHz contest taking place from 0900 to 1200UTC today,
> 7 April, there are no multipliers. It's a straight race to accumulate as
> many kilometres worked as possible. The exchange is signal report,
> serial number and locator.
>
> The CW/SSB leg of the SPDX Contest runs for 24 hours until 1500 today, 7
> April. Using the 1.8 to 28MHz bands. Work Polish stations only, giving
> them a signal report and serial number. Expect a signal report and a
> single-letter province code in return.
>
> 9 April sees the 432MHz UK Activity Contest take place from 1900 to
> 2130UTC. Using all mode the exchange is signal report, serial number and
> locator.
>
> The SSB leg of the 80m Club Championships takes place on 10 April from
> 1900 to 2030UTC. The exchange is the usual signal report and serial
> number.
>
> The EU Spring Sprint takes place on 13 April from 1600 to 2000UTC using
> the 3.5 to 14MHz bands. You should exchange callsigns, serial number and
> name. There's no need to exchange a signal report.
>
> The First 50MHz Contest is on Sunday 14th. This event has multipliers
> for countries, Postcodes and locator squares, which means continually
> turning the beam and searching for new multipliers if you want to be
> successful. Running from 0900 to 1200UTC and using all modes the
> exchange is signal; report, serial number, locator and postcode.
>
> Now the solar report for the period from Friday March 29th to Thursday
> the 4th of April, compiled by Martin Harrison, G3USF, on Friday April
> 5th.
>
> Solar activity was again very low. During the entire period only four
> small C-class flares were reported and these had no impact on
> propagation. The solar flux level rose from 105 on the 39th to 129 on
> the 4th to average 116 over the week - an increase of 20 points on the
> previous week. However, the 90-day average dropped one point to 114. The
> X-ray flux rose steadily to average B2.6. The weel began with the
> geomagnetic field was at minor storm level. This was the result of a
> high-speed coronal wind stream that sent the Ap index for the 29th to
> reach 23 units. That was enough to trigger bright Arctic auroras and
> radio auroras at 50 and 144MHz lasting several hours on the afternoon an
> early evening of the 29th. But, as so often happens, these were almost
> wholly restricted to stations at high latitudes. HF propagation was
> below par for much of the day as a result. The disturbance died down
> during the 30th and, for the rest of the period geomagnetic activity
> stayed low, with the daily Ap in single figures. Solar wind speeds
> recorded by the ACE spacecraft reached 540km/second during the
> disturbance on the 29th, then declined to 274km/second on the 3rd of

> April. Particle densities were generally low. Bz - that's the
> interplanetary magnetic field - varied between plus and minus 4
> nanoTeslas on quiet days and between minus 10 and plus 8 nanoTeslas
> during the disturbed days.
>
> Now the forecast for the coming week. Solar activity is expected to
> remain low or very low, with only occasional flares, mostly of modest
> C-class dimensions. There are no indications of any highly active areas
> currently on the far side of the Sun rotating into view. Solar flux
> levels appear likely to fall back from the level of recent days but are
> expected to remain above the 100mark. Geomagnetic activity should stay
> low. MUFs at equal latitudes will be around 24MHz in the south and 21MHz
> in the north. Darkness lows will stay in the region of 10MHz. Paths to
> Japan should have a maximum usable frequency of about 25MHz, where there
> should be a 50 per cent chance of a contact. There should be a 90 per
> cent success rate at the Optimum Working Frequency of 20MHz. The path
> should be its best between 1000 and 1300UTC.
>
> And that's all for another week from the propagation team.
>

# http://www.swpc.noaa.gov/weekly.html
#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
01 - 07 April 2013

Solar activity began the period at very low levels on 01-02 April.
By 03 April, solar activity increased to low levels and continued at
low levels through 04 April due to several low level C-class flares
from Regions 1708 (N11, L=190, class/area Dao/090 on 29 March), 1711
(S19, L=158, class/area Cko/580 on 04 April), and 1713 (N10, L=175,
class/area Dai/130 on 06 April). By 05 April, solar activity reached
moderate levels with an isolated M2 flare at 05/1748 UTC from Region
1719 (N08, L=076, class/area Dsi/150 on 07 April). Earlier on 05
April, a long duration C2 flare was observed at 05/0650 UTC, also
from Region 1719 as it began to rotate onto the east limb. An
associated coronal mass ejection (CME) was observed off the east
limb in SOHO/LASCO C2 imagery beginning at 05/0712 UTC, but was not
Earth-directed. By 06-07 April, solar activity returned to low
levels with the majority of the C-class flares from Regions 1718
(N20, L=109, class/area Dai/140 on 07 April) and 1719. No
Earth-directed CMEs were observed during the reporting period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels on 01-05 April and decreased to moderate levels by 06-07
April. The maximum weekly flux value of 5166 pfu was observed at
02/1735 UTC.

Geomagnetic field activity was at quiet levels with isolated active
periods at high latitudes mid-day on 01 and 07 April. Solar wind
speed began the period decreasing from approximately 480 km/s to a
low near 250 km/s by late on 05 April while the total field strength
slowly increased from 2 nT to 6 nT. By Early on 06 April, solar wind
speed started to increase to 340-370 km/s while total field strength
increased to 5-7 nT. Solar wind speed was relatively constant near
the 330-350 km/s range through the end of the reporting period. Phi
angle was mostly negative (towards) through approximately 07/1500
```

UTC when a change to a more positive (away) sector occurred.

Forecast of Solar and Geomagnetic Activity
08 April - 04 May 2013

Solar activity is expected to be at very low to low levels with a chance for M-class flaring from 08-19 April as Regions 1713, 1718, and 1719 continue to transit across the visible disk. From 20 April until the end of the forecast period, very low to low levels are expected.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at normal to moderate levels with a chance for high levels on 24 April-02 May due to recurrent coronal hole high speed stream (CH HSS) effects.

Geomagnetic field activity is expected to be quiet to unsettled on 08-09 April due to weak CH HSS effects. Mostly quiet conditions will prevail until another CH HSS moves into geoeffective position on 23 April. Quiet to unsettle conditions with a chance for isolated active periods are expected on 23 April with quiet to unsettled levels on 24 April. Another CH HSS is expected to become geoeffective on 25-26 April causing unsettled to active conditions with minor storm periods possible. Conditions are expected to return to mostly quiet levels by 27 April through the end of the forecast period.

782. QRZ Forums - Contests, DXpeditions and Special Events for Monday 8 April 2013

WW8OH - COOKEN ARC - 9/7/13 1600-2400Z OSPOTA Contest Multi-Multi.

Posted: 07 Apr 2013 11:53 AM PDT
http://forums.qrz.com/showthread.php?386698-WW8OH-COOKEN-ARC-9-7-13-1600-2400Z-OSPOTA-Contest-Multi-Multi&goto=newpost

The guys at COOKEN ARC have decided to activate WW8OH at DILLON State Park
for this year's OSPOTA event, being held on Saturday, Sep. 7th, from
1600-2400z. (Noon til 8 [pm EDST) This "fun" contest is open to anyone,
anywhere.

Dillon SP is located in Muskingum County, for you county hunters.

Your/our goal is to work all 75 Ohio state parks during this 8 hr event.
You can make only one contact per station per band, regardless of mode.

WW8OH will operate three stations:

- 80/75m ssb,

- 40m cw/ssb, and

- 20-15-10m ssb.

In the spirit of getting to know our Ohio State Parks, we will be staying
at two cabins and one camp site for the entire weekend. Before and after
the contest WW8OH will be on the air for rag chewing/county hunting
purposes, as well as taking time to enjoy the park's many hiking,
camping, fishing and boating opportunities.

Hope to see you there, or in our log book!

The Guys at COOKEN

PS This new contest is catching on like wildfire. Indiana also has their own contest this very same day. Other states are organizing their own state parks contest. See the OSPOTA and INSPOTA websites for details.

Or better yet, take a spin and check out the SPs nearest to you!

783. [DXNL] DXNL 1827 (Apr 10, 2013)

Newsgroup: rec.radio.amateur.misc

DXNL 1827 - April 10, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Oliver Bock, DJ9AO
(e-mail: dj9ao@darc.de)

3D2, Fiji:
Wes, ZL3TE, will stop on his way to Visalia and operate as 3D2SE
between the 12th and 16th of April. Plans are for CW, some
digi-modes and a part-time operation in the Japan International DX
Contest. QSL direct via h/c, LotW.

9G; Ghana:
Eltje, PA3CEE, and Rene, PE1L, bring Ghana on the air via EME
between the 12th and 24th of April, signing 9G5EME.
QSL via PA3CEE. http://www.emelogger.com/ghana/

CE, Chile:
The special event station XR86PL celebrates the 86th year of the
"Carabineros de Chile" all through April on all bands in SSB, RTTY,
and PSK. QSL via CE3ETE.

CT, Portugal:
CR5IARU, a special call belonging to Portugal's national radio club
REP, celebrates the World Day of Amateur Radio (18th of April)
between the 13th and the 19th. ClubLog will serve as online log,
QSL via CT1REP.

DL, Germany:
DL75KUE, special event station of the radio club of Bad Doberan
(DOK V06) commemorates the diamond jubilee of the seaside resort
Kuehlungsborn, located at the coast of the Balic Sea. Operations
started in March and will continue until the end of February next
year, their special DOK 75KUE runs until 22nd of April 2013.
QSL via bureau, eQSL.

G, England:
GB2GKR takes part in the Maritime Radio Day (14th-15th of April)
from the location of the closed down former coastal radio station

Wick Radio (former call GKR). QSL via GM3ZDH, eQSL.
http://maritimeradio.pro/
http://maritimeradio.pro/uk/gkr/index.htm

HB0, Liechtenstein:
A large team of hams from the Netherlands (Mans, PA2HGJ, Hugo, PA2HW, Robert, PA2RDK, Frank, PA3CNO, Paul, PA3DFR, Henny, PA3HK, Gert, PE0MGB, and Piet, PE1FLO) is due to appear on the bands from Liechtenstein (various SOTA-relevant locations included) between the 13th and 20th of April on all bands 160 - 10m in SSB, CW, and PSK31. Calls follow the CEPT-style HB0/. QSLs via PE1FLO.

I, Italy:
The Radio Club Vercelli puts II1MGY on the air around the 14th of April in an effort to keep the memory on the Titanic-disaster alive. QSL automatic via bureau, direct via IW1EHL.

JA, Japan:
Japanese amateurs celebrate the sucessful transition from analogue to digital terrestric TV with the call 8N1TW. Activity continues till the the 28th of July, QSL via bureau. http://www.dtvstatus.net/

8J1TK will get active between the 6th of April and 14th of October in the context of the following sports events:
- Sports Festival
- 68th National Athletic Meet
- 13th Special Athletes Sports Competition
QSL via bureau

Furthermore, the following special event calls from Japan are to expected on the bands:
8J1IC Golden Jubilee of Ichihara-City till 31st of March 2014
8J1ITAKO 62. Suigo Itako Ayame Matsuri till 30th of June
8J4FF Hiroshima Flower Festival till 5th of May
8J4M13OO 1300 years Mimasaka-koku Nation-Building till 30th of September
8J4ROSE46 Fukuyama Bara Festivaltill 19th of May
8J7JUMP Sendai-Miyagi Destination Campaign till 31st of March 2014
8J7YAE Yae and Aizu Expotill 31st of July
QSLs via bureau

EA, Spain:
Celebrations around the World Day of Amateur Radio will also be held in Spain. Until the 18th of April the station EH7DMR is active in that regard and also in the memory of the first emergency communication via amateur radio in 1913 by the youngster (15) Herbert Vestner "H.V." Akerberg, who helped during a severe flood in Columbus. See also qrz.com. QSL via bureau, eQSL.
http://ea7urj.ure.es/
http://www.findagrave.com/cgi-bin/fg.cgi?page=gr&GRid=92808720

LY, Lithuania:
LY95X (Op. Vilmantas, LY3BY) operates in honour of OM B. Talutis

(later LY1X) in Siauliai who conducted first radio experiments at a wavelength around 300m. QSL via LY3BY, LotW, eQSL.

PA, Netherlands:
Queen Beatrix will step down as reigning monarch at the end of this month in favour of Prince Willem-Alexander. The following special event stations have made their appearance so far:
Dates Callsign Manager
02. April - 30. April PA13KING PA9JO
03. April - 30. April PB13ROYAL PB5X
11. April - 08. Mai PB200KING PA1TX
15. April - 12. Mai PB2013KING PA9LUC
18. April - 05. Mai PA200KING PD5ROB
20. April - 01. Mai PB33Q PA7DA
20. April - 11. Mai PG6KING PD9ND
22 .April - 02. Mai PC13KING PA1DV
26. April - 23. Mai PA33KBX PA0ABM

SP, Poland:
HF55OP (till 5th of June) looks back on 55 years of organized radio activity in the Polish region Opole, accompanied by 3Z55O (till 31st of May). QSL via SQ9CWO (HF55OP) and SP6PNZ (3Z55O).
http://www.hf55op.strefa.pl/
http://www.sp6pnz.republika.pl/

3Z80SPC celebrates the 80th anniversary of the SP DX Contest.
QSL via 3Z6AEF. http://spdxcontest.pzk.org.pl/en/index.php

SU, Egypt:
After almost 9 months Andy, RW3AH, finally received his operating license and signs SU9AF from near Cairo. His operating privileges include 160, 40, 20, 17, 15, 12, and 10m (80, 75, 30m are not permitted in Egypt). At the moment he works with an IC-718, a delta loop for 20 and 10m, and a vertical for 30, 17, 15, and 12m. No antenna for 160 yet. Preferred QRGs:
CW: 7002, 14002, 18070, 21002, 24895 and 28002 kHz
SSB: 7155, 14155, 14195, 18155, 21295, 24940 and 28495 kHz
6m/VHF/UHF/Satellite: not permitted
The duration of his stay is unknown, his license remains valid until the end of the year. QSL via UA3DX. http://www.cqdx.ru/su9af/

SV, Greece:
J49C celebrates the union of Crete and Greece's centennial until the 30th of June, maybe even 2 or months longer. QSL via SV9COL (d), LoTW. https://secure.clublog.org/logsearch/J49C

TI, Costa Rica:
The special call TE1856 refers to the marching feat of a part of the Costa Rican army, known as "La Ruta de los Heroes". Activity on 10, 15, 20, 40, and 80m in SSB, CW, and PSK.
QSL only direct to Box 18-4400, San Carlos, Costa Rica.

ZK3, Tokelau:
Hans, DL6JGN and Guenter, DL2AWG activate the Nukunonu-Atoll (OC-048) between the 15th and 30th of April on 80 -6m in CW, SSB, and digital modes. QSL via DL2AWG, LotW. http://www.tokelau2013.de/

Upcoming Contests
==========
13.04. DIG QSO Party
13.04. European Sprint Contest
13./14.4. Japan International DX Contest
13./14.04. Yuri Gagarin International DX Contest
14.04. DIG QSO Party

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island Activities

EU-038; PA; Noord Holland/ Friesland/Groningen Province group: PA0HFT (Henk/PA0HFT and Gert/PA5TS) is still QRV until the 14th of April. QSL via PA0HFT (d/B).

EU-088; OZ; Kattegat group: Harry/PA1H and Nico/PA7PA will appear on the air from Laeso Island (DIA NK-003; WLOTA 2820) between the 13th and 26th of April as OZ/... . Plans include bands 80 - 10m in SSB and digital modes, probably also on 160m. A short trip to Hornfiskrom Island (EU-088) is also on their agenda. QSL via Homecall (d/B).

EU-094; F; Bretagne (Finistere South) Region group: Gil/F4FET announces a two-day activity as F4FET/p from Moutons Island (DIFM AT-009, WLOTA 0002, ARLHS FRAU-043; FFF-700) and Ile de Guiriden (DIFM AT-067, FFF-700) sometime between the 11th and 18th of April, the preferred window is the 13th/14th. Focus will be on 10, 15, 17, and 20m. QSL via F4FET (d/B). http://f4fet.webs.com/

EU-127; DL; Schleswig-Holstein State South group: DM50IOTA (Ops Friedrich/DL4BBH, Klaus/DL7UXG, Matthias/DK7LV, Henning/DB5BZ, Peter/DJ4RU, Helmut/DL1BGC and Ric/DL2VFR) is QRV between the 12th and 14th of April. All QSOs also count for the light-house Neuwerk (GLHS #38, ARLHS FED-165, TWLHD WLH DL-01, WLOTA 2311, Admiralty B 1344) and the WFF area "Hamburgisches Wattenmeer" (DLFF-005). QSL via DL2VFR (d/B). http://www.iota-expedition.com/

NA-025; J8; The Grenadines: Brian/GW4DVB undertakes a mini-DXpedition to Palm Island (WW Loc. FK92ho), signing J8/G4DVB between the 13th and 20th of April on 80 - 6m. QSL via GW4DVB (d/B). http://www.g4dvb.co.uk/

OC-004; VK9; Lord Howe Island: Oliver/W6NV visits Lord Howe Island (VKFF-295) between the 10th and 14th of April. He is teaming up with Seppo/OH1VR. They will use VK9LT and VK9/OH1VR (11th to 16th of April). Operations might include the JIDX CW Contest and the Yuri Gagarin DX Contest. QSL for VK9LT direct via W6NV, and

VK9/OH1VR direct via OH1VR.

OC-010; V6; Pohnpei Island: Sho/JA7HMZ (V63DX) and Kei/JA7GYP
(V63T) will appear on the air between the 15th and 20th of April
from Pohnpei Island (WW Loc. QJ96) on 40 - 6m in CW, SSB und RTTY.
QSLs direct via their homecalls (d).

SA-001; CE0; Easter Island: Pipe/CE3SX remains QRV until the 11th of
April from Easter Island (WW Loc. DG52) as XR0YX, solely on 6m.
QSL only direct via CE3SX.

IOTA
The following operations in the period February/March 2013 have
provided acceptable validation and are therefore approved for
IOTA credit: HK0/F6BFH (NA-033 & NA-049), T47RRC (NA-086),
VY0/VE3VID (NA-174), T46RRC (NA-204), T48RRC (NA-218) and
HK1/F6BFH (SA-040).

Washington County Emergency Operations Center Installs Backup Radio Antenna

Posted: 07 Apr 2013 05:06 PM PDT
http://www.eham.net/articles/29994

Members of the Washington County Amateur Radio Emergency Service teamed up with the St. George Fire Department to install the new antenna on a 70-foot flagpole. The antenna gives the Emergency Operations Center the ability to communicate via direct radio waves with all of Utah and neighboring states in the event of an emergency in which the Internet, cell phones and other infrastructure-reliant systems are not available.

Scientists Discover Sun's 'Magnetic Heartbeat' Causes Solar Flares:

Posted: 07 Apr 2013 05:06 PM PDT
http://www.eham.net/articles/29993

Scientists claim to have discovered a magnetic "solar heartbeat" in the Sun's deep interior, that generates energy which leads to solar flares and sunspots. Researchers developed a new supercomputer simulation to probe the Sun's periodic magnetic field reversals. According to the model, every 40 years the Sun's zonal magnetic field bands switch their polarity. Scientists say that cycle is about four times longer than the 11-year sunspot cycle that governs the level of solar activity, 'SPACE.Com' reported. The new study, led by the University of Montreal's Paul Charbonneau, described that modelling the Sun has been a sticky problem for decades. The first attempts in the 1980s captured only a rough approximation of the turbulence inside of the Sun. Turbulence happens at both large and small scales.

NEW MEXICO QSO PARTY 4-13-2013

Posted: 09 Apr 2013 05:38 AM PDT
http://forums.qrz.com/showthread.php?386935-NEW-MEXICO-QSO-PARTY-4-13-2013&goto=newpost

I received this yesterday ..... perhaps of interest to folks.

73 All,

Old Senile Don WD5JOY

Fellow New Mexico Hams --A final reminder about the New Mexico QSO Party, which occurs THISSaturday, April 13 from 8:00am MDT until 8:00pm MDT. Every Hams acrossNew Mexico is invited and encouraged to participate. Amateur radiooperators from across the United States -- and the world -- willliterally be seeking New Mexicans on the HF bands and 6 meters duringthe event period, looking particularly to contact hams from as many NewMexico counties as possible. The Land of Enchantment will essentiallybe the "DX" on this day, making for a great time for all whoparticipate. Last year's event saw the participation of well over 100hams, plus 13 New Mexico amateur radio clubs that, through theirparticipating members, were in the running for a special club award.We are looking for hams residing in (or able to set up temporarilywithin) each and every one of New Mexico's 33 counties to participatein the 2013 New Mexico QSO Party, whether for just a few convenienthours or for the entire 12 hour period.This is a super event for new and experienced hams alike, and you DONOT need to be a contester to participate -- just join the airwaveswith a desire to make enjoyable ham radio contacts. Operate from thecomfort of your home, or make it a club activity and combine forceswith your fellow members. Invite a group of friends to your shack. Hitthe road as a mobile station and activate multiple counties which createmuch needed -- and appreciated -- point multipliers for everyone whoparticipates in the QSO Party. Use this event as an opportunity tointroduce a neighbor or friend to ham radio. Or rally friends and clubmembers to set up, Field Day style, as part of this year's brand-new NewMexico Expedition category.ATTENTION HAM CLUBS AND CLUB MEMBERS: The New Mexico QSO Party is agreat club-building activity, and there are two special awards beingoffered just for clubs. The first is a plaque that will be awarded tothe New Mexico club with the highest aggregate score submitted by itsmembers. Another plaque will be awarded to the New Mexico Club whosemembers activate the highest aggregate number of New Mexico counties.It doesn't matter what operating category your members

participate in,or for how long; each entrant just needs to clearly mark their clubname on their individual logs and your club will be automaticallyentered. Complete details in the New Mexico QSO Party rules. Talk thisup within your club!This year's event is hosted by the Albuquerque Amateur Radio Club.Great-looking plaques will be awarded and participation certificateswill be available for those desiring one. Complete details, rules,award information, and more can be found on the New Mexico QSO Partywebsite at http://pages.swcp.com/~n5zgt/nmqsopartyIf you are interested in joining the fun, please let us know whatcounty (or counties) you may operate from so we can list you, even iftentative, on the New Mexico QSO Party website athttp://pages.swcp.com/~n5zgt/nmqsopa...tionplans.html. Thereare still counties needing to be activated by permanent, mobile, orportable stations -- can you help?Please help spread the word about the 2013 New Mexico QSO Party and,more importantly, plan on a fun day on the HF bands and 6-meters withmany hams looking for your contact during the 2013 New Mexico QSO Party-- Saturday, April 13 from 8:00am MDT until 8:00pm MDT.Thanks and 73,Brian N5ZGT

Special Event Station N4G in GQP 2013

Posted: 08 Apr 2013 05:46 PM PDT
http://forums.qrz.com/showthread.php?386889-Special-Event-Station-N4G-in-GQP-2013&goto=newpost

The Southeastern Underground Radio Fellowship- W4SL- would like to announce the activation of the special event callsign N4G for the 2013 Georgia QSO Party, April 13-14.

N4G will be activated from historic DeKalb County and will be active on all the contest bands (160, 80, 40, 20, 15, 10 and 6 Meters) using CW, Phone and Data. Please look for N4G and spot us when you find us!

N4G operators plan to be active for the entire event (1800Z Saturday until 0359Z Sunday/1400Z-2359Z Sunday); however, we will have periods of downtime due to breaks, band switchovers and operator rotation. Please bear with us during these times.

All QSL requests should be submitted to W4TI either direct or via bureau. Our paper QSL policy is as follows:

Direct SASE/SAE+$2 or IRC Direct Return

Bureau/Int. SAE + no funds Bureau Return

QSL Card as postcard/States SAE + no funds Postcard Return

We will also upload our logs to LoTW. We will try to update everyone on our activity via my website, address below.

On behalf of W4SL, we look forward to working you during the 2013 GQP as N4G!

--

Chase Turner

Special Event Station W5T / Train Mobile - Saturday, 13-April-2013

Posted: 08 Apr 2013 11:04 AM PDT
http://forums.qrz.com/showthread.php?386826-Special-Event-Station-W5T-Train-Mobile-Saturday-13-April-2013&goto=newpost

W5T - ☐Train Mobile☐

Special Event Station, 13 April 2013

Springdale, AR ☐ The ARKAN Radio Club will activate a special event ☐Train Mobile☐ station, W5T, on Saturday, April 13, 2013, from 14:00 to 23:00 UTC (08:00-17:00 CDT). W5T will operate in motion on an excursion passenger train traveling round trip from Springdale, AR, through the scenic Boston Mountains of Northwest Arkansas to Van Buren, Arkansas.

On-air operations will be on 20 Meters, using both SSB and CW modes, on 14.240 and 14.030 MHz (+/-), respectively. Tracking for W5T, as it rolls through Washington and Crawford counties, will be available via an APRS beacon at: www.aprs.fi

Special W5T QSL cards may be requested by enclosing a #10 business-sized SASE to AA5AR, the ARKANHAMS club call, (not the W5T address on QRZ.com).

The ARKAN Ham Club also organizes and sponsors the annual Arkansas QSO Party, to be held this year on 14-September-2013. It also sponsors the ☐Worked All Arkansas Award,☐ for working all 75 counties. Additional info may be found online at www.ArkanHams.org and http://arkanhams.org/WorkedAllArkansas.pdf .

Photos of the excursion train can be seen at: http://www.amrailroad.com .

For more info, Contact: Scott Anderson, K5SAA - ARKAN Radio Club

Dufferin's Hams Put the Call Out for New Recruits:

Posted: 09 Apr 2013 12:25 AM PDT
http://www.eham.net/articles/30000

Despite the Internet, cellphones, email and modern communications, regions can find themselves in the dark during disaster events. In many cases, the one consistent service that never fails is amateur radio. These radio operators, often called "hams," can provide vital backup communications. The Dufferin Amateur Radio Emergency Services is looking for new recruits. Dufferin's hams will offer a basic qualification course to anyone interested in gaining their amateur radio operator certificate. Starting on April 22, the course, which will run for about 10 weeks, will be held at the W & M Edelbrock Centre on Centre Street in Orangeville from 7 to 9 p.m.

//
Radio Buffs 'Ham' It Up in Denville Township:

Posted: 09 Apr 2013 12:25 AM PDT
http://www.eham.net/articles/29999

You don't need the internet. You don't even really need an electric outlet. When disaster strikes, amateur radio is one form of communication that will persevere against all odds. And for the Radio Amateur Civil Service (RACES), a standby emergency radio group that meets every month in the Senior Center in Denville, the only equipment needed to blast an emergency signal is a small antenna and a low-power radio. For members, many of them electronic hobbyists, the fact that their work can benefit the community if the worst occurs is definitely an added perk. "When there's a loss of power, and other means of communication aren't working, we can call and ask for supplies," member Matthew Morely said. In fact, the group had a radio repeater on Beacon Hill during hurricanes Sandy and Irene when northern New Jersey experienced widespread power failure. Many operators and operator services were in fact instituted after the events of 9/11. in the United States as emergency backup, Morely added. He explained that every hospital, including Saint Claire's Hospital in Denville, has a ham operator who can tap the airwaves for help just in case all else fails.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 10, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- Drift Up to the High Plains - ND, SD, NE QSO Parties
- But Wait - There's More! MT, NM, GA, ON QSO Parties
- Chinese DX Contest Hits the Airwaves
- All-new 3830 Score Reporting Website
- How Close is Too Close?
- Your Mug Shot - Comin' Right Up!
- Buffer that SDR
- Free of Bias?
- Any Category Imaginable

NEW HF OPERATORS - THINGS TO DO

If you got your license in the past three years - the ARRL Rookie
Roundup <http://www.arrl.org/rookie-roundup> is for you and April 21st
is the SSB edition. Grab a microphone and have at it! Thanks to Bruce
WA7BNM, results will be compiled and published automatically on the
online web page <http://www.b4h.net/arrlrr/index.php> immediately
following the score submission deadline. If you aren't a Rookie - find
somebody who is and show them how to give HF a try! Clubs - here's a
great pre-Field Day training opportunity for a multi-op or a team
challenge - how about a PVRC team versus an NCCC team?

BULLETINS

There has been a frequency shift for the ARRL Frequency Measuring Test
<http://www.arrl.org/frequency-measuring-test> (FMT) taking place this
evening (April 10th in North America) as announced by event manager,
Connie K5CM: "I have been monitoring the 80 meter FMT frequency and it
seems the frequency I chose is problematic for QRM...the new reference
signal will be exactly on 3598 kHz and the FMT signal near 3600 kHz."
If you're not doing anything this evening, why not test your frequency
measuring capabilities? It begins on 20 meters at 10:30 PM EDST.

BUSTED QSOS
```

Nothing particularly terrible was reported from the previous issue.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

- North Dakota QSO Party
- Ontario QSO Party
- Feld-Hell New Member Sprint
- YU DX Contest--CW

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

>From the Daily DX <http://dailydx.com/>, "K7SO, Doc, makes note of the upcoming April 20/21 Worked All Provinces of China <http://www.mulandxc.org/144#more-144> (WAPC) Contest as "a good opportunity to pick up some new China provinces". This first full running of the contest follows last October's initial test and places China front-and-center on the international radiosport roster. Results <http://www.mulandxc.org/110#more-110> from the October contest are posted and this is a great opportunity to meet a lot of new contest call signs on the air!

Congratulations to Terry Zivney, N4TZ who was just named <http://cqnewsroom.blogspot.com/> the new Director of the CQ WPX Contest program! Terry is a very active contester, including as a

competitor in WRTC2010. Terry says in his CQ press release, "As a long-time low power contester I especially appreciate the WPX contest because its unique mix of exotic DX and plentiful domestic contacts ensures that great fun will be had by all participants regardless of the propagation conditions. I look forward to harnessing the momentum this contest has developed under the leadership of K5ZD and respecting the legacy of former directors K6AW, N8BJQ, and W8IMZ." Thanks, as well, to Randy K5ZD for managing both the WW and WPX contest programs until a new WPX Director could be named.

Pete N4ZR needs a volunteer, too: "I've been running the World HF Contest Station Database <http://www.conteststations.com/> since 1999. Thanks to donated server space from W2QO and programming help from NF4L, my duties as admin have been limited to the updating process (entries are changed manually based on input from stations). Recently, however, my other interests and involvements are such that I have not been able to keep up with the flow of additions and changes, much less work on improvements to the site. Instead of feeling guilty, I've decided to see if someone would like to take over for me." Contact Pete <n4zr@contesting.com> if you're interested in helping - he estimates it would take about 15 minutes per week of on-line effort.

To QNZ or not to QNZ? There's no need to dither about it because wiggling the Big Knob has been automated! Effective with version 13.04.02, the N1MM logging software <http://n1mm.hamdocs.com/tiki-index.php> team has "added a Telnet Window option to "Add small random offsets to incoming CW spots". This will add or subtract 30 or 60 Hz randomly to incoming CW spots to help spread out pileups for the running stations that you call. THE DEFAULT IS ON. You can turn it off permanently by toggling the option."

Here's an interesting event coming up at the Dayton Hamvention: The Friday morning TAPR Forum <http://www.hamvention.org/files/2013_Forum_Details.pdf> will include a presentation by KD2BMH <http://tinyurl.com/KD2BMH-SDR-Handheld> on the handheld Software Defined Radio (SDR) Whitebox transceiver project. The low-power 144 and 440-MHz radio supports a variety of digital modes, as well as AM, FM, and SSB. Chris will be showing the radio from 9:15-11:00 AM in Room 1.

If you aren't making the trek to the Dayton Hamvention <http://www.hamvention.org/> from the West Coast, the San Mateo edition of the wildly popular Maker Faire <http://makerfaire.com/> could serve as a substitute - although without all the cool radio bargains. Held on the same weekend as the Hamvention, the event attracts many thousands of people to the more than 1000 "maker" booths and demonstrations of Do-It-Yourself - everything from home cooking to giant Tesla coils and the like!

James W. Cutler, KF6RFX, Assistant Professor, Department of Aerospace Engineering at the University of Michigan (developers of the successful RAX cubesat mission) invite amateur satellite operators to participate

in the Ground Station Survey <http://gs.engin.umich.edu/gs_survey/>.
The engineering team is collecting information on global ground station
availability to improve satellite communication capabilities. Their
goal is to survey existing and underutilized ground antennas to improve
satellite communication opportunities. (From AMSAT <http://amsat.org/>
bulletin ANS-090)

QRP To The Field (QRPTTF) <http://www.zianet.com/qrp/qrpttf/2013.htm>
is about three weeks away and the theme this year is "Happy Trails".
That is, operating from some historic trail. Contest sponsor, Paul
NA5N, reports that there will be several Summits On the Air
<http://www.sota.org.uk/> (SOTA) activations and other interesting
stations on the air during this outdoor event.

Just how did we get our original ham bands? Back before WARC was a
gleam in our eyes, A. L. Budlong, W1BUD wrote a couple of articles
explaining it all - the August and September 1959 issues of QST tell
the tale in "Geneva - 1959" in the online QST archives
<http://www.arrl.org/arrl-periodicals-archive-search>.

Hams were recently credited with the "un-discovery" of an island. Huh?
Gene N7EO found this interesting article
<http://www.radiolab.org/blogs/radiolab-blogland/2013/mar/15/pacific-island-bigger-manhatt
an-vanishes/>
about how some hams looking for a DXpedition location determined that
the intended destination...wasn't!

Web Site of the Week - There is a brand-new score reporting service at
the improved and upgraded 3830scores.com <http://3830scores.com/>
website constructed and managed by Bruce Horn, WA7BNM. Instead of
waiting for emailed score summaries, it just takes one click to get a
full report. (A final summary will still be emailed out to the 3830
reflector.) Not only is there a new format, but you can set your
preferences so you don't have to enter your email address, club, call
sign, operator, etc every time. You can also view a summary of contest
activity from any call sign, including for the operators of multi-op
entries, for the past few years, and compare activity from
contest-to-contest, too. This has been in the works for a while. As
Bruce relates, "It's something that I had thought about doing for the
last 5 or more years, but never had found the time to finish it." I can
hardly believe that 3830 started 15 years ago and can't imagine
radiosport without it, not being able to share and compare claimed
scores within minutes of the contest! A big tip of the contester's cap
to WA7BNM.

WORD TO THE WISE

Deadline - something not to be missed, particularly when it applies to
your hard-won contest logs. Log submission deadlines are tightening up
"considerable" all around the radiosporting world so don't
procrastinate! The 5-day deadline for WPX SSB logs doesn't seem to be
hurting participation, though - the CQ WPX Logs Received Page

<http://www.cqwpx.com/logs_received_ssb.htm> shows 5219 in the database at publication time!

==> SIGHTS AND SOUNDS

How much does not being zero-beat in a pileup matter, anyway? Listen to these four short samples and see which pairs of tones are easier to separate: 0 Hz separation <http://www.kkn.net/~n2ic/zerobeat.wav>, 20 Hz <http://www.kkn.net/~n2ic/20hz.wav>, 40 Hz <http://www.kkn.net/~n2ic/40hz.wav>, and 60 Hz <http://www.kkn.net/~n2ic/60hz.wav>. Now imagine sorting those tones for 48 hours straight! Where do you think your signal would be the easiest to copy?

AMSAT-NA <http://www.amsat.org/> has also announced a dedicated YouTube channel <http://www.youtube.com/AMSATNA> for videos on and about amateur satellite operations. These will include demonstration videos as well as presentations at the AMSAT-NA Dayton Hamvention Forum and yearly General Membership Meeting and Symposium. The channel also links to the AMSAT-UK and AMSAT-DL channels for additional views and perspectives. (From AMSAT bulletin ANS-097)

I can identify with the sentiments expressed in this remix of "I Want To Be An Engineer <http://www.wimp.com/beengineer/>" by Only Won. (Thanks, Tim K3LR)

==> RESULTS AND RECORDS

Participation pins and Clean Sweep mugs for the 2012 ARRL Sweepstakes contest were shipped on April 2nd. Look for them to start arriving soon! (Thanks, ARRL Contest Branch Manager, Sean KX9X)

With the arrival of April CQ Magazine comes the results from CQ WW SSB 2012 - months earlier than in previous years! That means the updated WRTC-2014 event scores <http://www.wrtc2014.org/qualifying/qualification-standings> are now posted, adding scores from over 10,000 operators! In other scoring news, 41 scores in the "Junior" and "Silver" categories for 2011 All Asian DX CW and 24 scores for 2011 All Asian DX SSB were revised along with an operator change in the RDXC 2012 contest. Official results for 47 of the 55 qualifying events are now included and over 29,000 different operators have submitted scores in those events. (Thanks, WRTC-2014 Team Selection Director, Dan, K1TO)

CQ WW Director, Randy K5ZD checks in to let us know that, "The final log checking reports for all entries in the CQ WW DX CW Contest 2012 are now available. An email with a link to the report has been sent to everyone who submitted a log with more than 25 contacts." If you didn't receive your report, it might be due to a bad email address (or check your spam filter's quarantined messages) so contact Randy <k5zd@cqww.com> with the year, mode, and call sign of your entry. By the way, more participation records for CQ WW were also set with 8,181 logs submitted for SSB and 7,214 for CW! With the SSB results are now

in the April issue of CQ Magazin <http://www.cq-amateur-radio.com/>e, CW WW results will be in the May issue.

The Rochester DX Association <http://www.rdxa.com/> is pleased to publish the results of the 2012 New York QSO Party, held last October. Thanks for all the hard work, Bruce KC2QLJ and Paul K2DB, NYQP Coordinator and Advisor.

OPERATING TIP

Back up! It's not so much an operating tip as a management tip so you don't lose the results of your operating. Larry K8UT presents an aggressive strategy for backing up your data in the April 2013 issue of the PVRC Newsletter <http://pvrc.org/newsltrs.htm>.

==> TECHNICAL TOPICS AND INFORMATION

The use of an external SDR receiver as a panadapter requires acquiring the IF signal from the main radio. To isolate the two radios and prevent loading of the main IF, it's a good idea to use a buffer amp as shown in this modification for the IC-910H VHF/UHF radio by VK2DAG <http://www.vk2dag.com/Docs/IC-910%20SDR%20Mod.pdf>. (Thanks, Les N1LF)

It's bug-nest-building season again north of the Equator and the wee beasties will be investigating every suitable home, including antenna traps and other outdoor enclosures with drain holes. Keep the little buggers on the right side (that would be the OUT side) of your electronics by covering the hole with a little piece of window screen. Electrical tape or an outdoor glue will hold it securely. (Thanks, Brian K3KO)

Talk about hand tools - here's the pump drill <http://blog.makezine.com/2013/02/26/tool-tales-the-pump-drill/> - one of the oldest of all and it still might have an application in the field!

For building that new receiving array, Frank W3LPL recommends these inexpensive 24-volt microwave SPDT RF relays <http://www.goldmine-elec-products.com/prodinfo.asp?number=G16510> sealed in a DIP package from Electronic Goldmine as having superb isolation. It takes only 8 milliamps to drive the coil.

Roger VE3ZI notes that he uses some surplus hardline with an aluminum outer and a solid copper inner conductor. In the cold temperatures of the Ontario winters, the different thermal expansion characteristics of the two metals causes the copper conductor (which expands and contracts more) to pull a contact completely out of a connector! To keep this from happening, form the hardline into an S-bend next to the connector. If there is a joint between two cable runs, make one bend on each side of the joint.

"Antenna 4 Has No Base Current <http://www.designnews.com/author.asp?section_id=1368&doc_id=248351&dfpPParams=ind_184,bid

_272,aid_248351&dfpLayout=blog>"
is the title of a recent Design News magazine "Sherlock Ohms" column.
Anyone who has wrestled with technical problems will enjoy reading
through these engineering detective short stories.

As camping, fishing, and gardening take off, watch for sales and
specials of materials that also make good "ham stuff". For example,
fishing tackle boxes, fencing wire, rope, and other outdoor recreation
supplies are all useful around the shack and antenna farm!

Technical Web Site of the Week - A bias tee allows you to send dc on a
coax feed line without affecting RF signals on the same feed line. The
general design parameters are discussed in this Wikipedia article
<http://en.wikipedia.org/wiki/Bias_tee>. For use with Beverages, Les
W2LK recommends using 0.1 µF capacitors and 100 µH inductors rated for
the load current. If you want to use ac current instead of dc, check
out the Ameritron RCS-4
<http://www.ameritron.com/support.php?productid=RCS-4> remote coax
switch circuit.

==> CONVERSATION

Any Category Imaginable

Recent exchanges on the CQ-Contest Reflector
<http://lists.contesting.com/mailman/listinfo/CQ-Contest> have mulled
over the possibilities of less than full-time categories in major
contests. Would that encourage more participation? Would it hurt
participation by reducing the incentive to operate longer? Would the
usual competitive operators jump on the opportunity to win yet another
category? It's hard to say without trying.

Doug KR2Q posted some statistics from a recent CQ WW CW:

- ~50% operated for < 10.5 hours
- ~75% operated for < 19 hours
- ~90% operated for < 30 hours
- ~95% operated for < 36 hours

In addition, Chris DL8MBL (with the help of KD6MHW) reviewed open logs
<http://www.dl8mbs.de/40984/45289.html> to see how long people actually
operated and tried different methods
<http://www.dl8mbs.de/40984/47701.html> of calculating what is
considered "on" and "off" time. As you can see, most contesters don't
enter even the big contests for anything close to full-time.

This could be because we are getting older and less able to park our
rear ends in the shack chair for long periods. It could be because
everyone is busier and has less time to devote to contesting. Who
knows? Yet there certainly seemed to be a lot of interest in the
short-term categories. I'm sure contest sponsors watched the discussion
with interest.

Adding categories to a contest is not free - even if all of the administrative effort is volunteered. Software needs to be rewritten and debugged. Reports and results tables get changed, along with records which now have before-and-after dates. New certificates and any other awards need to be generated and delivered. So adding a category requires some consideration of practicality. And then there is the inevitable follow-up, "If you created THAT category, why not MY category?"

Trey N5KO came up with the idea of the "extended line score" some years ago in which, along with the data used by the sponsor to populate the existing categories, additional data would be published as information. No awards would be based on the extra data but it would be public if anyone was interested. With today's online publishing tools, making the data available as a downloadable table has never been easier. We already see some great things being created from public logs, as well, by websites such as cqcontest.ru <http://www.cqcontest.ru>.

The extended line score already exists for some contests - take a look at recent results <http://www2.darc.de/ukw-funksport/ukw/Ergebnis/mai-2012a.txt> of a DARC VHF+ contest. The data for each score includes:

- Call Sign
- DOK Location ID
- Grid Square (6 char)
- QSOs
- Points (Score)
- Best DX Call Sign
- Best DX Grid Square
- Best DX Points
- Power Used
- Height of Antennas
- Elevation of Station
- Antennas Used
- Operator Call Signs

The result tables are published in order of just one of those bits of data - Score. The rest is available to the contesters to sort and arrange however they wish. Operating time would be just another column in the table. If public logs were available, operating time could even be calculated from the logs.

We have "contests within a contest" that play by the existing rules to compete in a new way. Isn't that just about the same thing as a new category, anyway? Why not compromise? Most contest sponsors are already short of administrative resources so why not just publish more data - at zero cost beyond creating the table - and let the contest community create the categories? WRTC has used this approach to qualify the participants based on published scores. If there turns out to be sufficient interest, the sponsors may consider adding the category.

How can you tell if there is sufficient interest? I suppose the tongue-in-cheek response would be to watch for arguments about it - then you have a category. What categories could you create? With the fertile minds and programming skills in the contest community, the sky is truly the limit if given the data - any category you can imagine.

73, Ward N0AX

==> CONTESTS

10 April through 23 April

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

ARRL Rookie Roundup--Phone, from Apr 21, 1800Z to Apr 21, 2359Z. Bands (MHz): 3.5-28. Exchange: Both calls, name, check, S/P XE# or "DX". Logs due: See web. Rules <http://www.arrl.org/contests>

NAQCC Monthly QRP Sprint--CW, from Apr 10, 0030Z to Apr 10, 0230Z. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Bands (MHz): 3.5-14. Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/>

CWops Monthly Mini-CWT Test--CW, from Apr 10, 1300Z to Apr 10, 0400Z. Multiple operating periods, twice monthly on 2nd and 4th Wed. Bands (MHz): 1.8-28. Frequencies (MHz): 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

EU Spring Sprints--CW, from Apr 13, 1600Z to Apr 13, 1959Z . Bands (MHz): 3.5-14. Frequencies (MHz): 3.550, 7.025, 14.040. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Montana QSO Party, from Apr 13, 0000Z to Apr 15, 0000Z. Bands (MHz): 1.8-28, 50-432. Exchange: S/P/C or MT county. Logs due: 7 days. Rules <http://www.fvarc.org/>

Japan International DX Contest--CW, from Apr 13, 0700Z to Apr 14, 1300Z . Bands (MHz): 1.8-28. Exchange: RST, JA prefecture or CQ Zone. Logs due: 30 days. Rules <http://jidx.org/>

New Mexico QSO Party, from Apr 13, 1400Z to Apr 14, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.815, 7.26, 14.28, 21.38, 28.38, 50.13. Exchange: Call sign, name, and NM county or S/P/C. Logs due: May 4. Rules <http://www.swcp.com/~n5zgt>

Georgia QSO Party, from Apr 13, 1800Z to Apr 14, 0359Z. Multiple operating periods. Bands (MHz): 1.8-28, 50. Frequencies (MHz): CW

1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone 1.865, 3.810, 7.225, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T), S/P/C or GA county. Logs due: May 15. Rules <http://www.georgiaqsoparty.org/>

Yuri Gagarin DX Contest--CW, from Apr 13, 2100Z to Apr 14, 2100Z . Bands (MHz): 1.8-28. Exchange: RST, ITU Zone. Logs due: May 14. Rules <http://gc.qst.ru/en>

International Vintage Contest, from Apr 14, 1200Z to Apr 14, 1800Z. Bands (MHz): 3.5,7. Frequencies (MHz): Multiple operating periods. Exchange: RS(T), grid square. Logs due: May 30. Rules <http://www.contestvintage.beepworld.it/>

Run For the Bacon--CW, from Apr 15, 0200Z to Apr 15, 0400Z. Monthly on 3rd Sunday night (local). Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

Holyland DX Contest, from Apr 19, 2100Z to Apr 20, 2100Z. Bands (MHz): 1.8-28. Exchange: RS(T), serial or Israel district. Logs due: May 31. Rules <http://www.iarc.org/>

TARA Skirmish Dig Pfx Contest--Digital, from Apr 20, 0000Z to Apr 20, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: Name, prefix. Logs due: May 17. Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

ES Open HF Championship, from Apr 20, 0500Z to Apr 20, 0859Z . Bands (MHz): 3.5,7. Exchange: RS(T), serial, dupes OK once/hour. Logs due: May 21. Rules <http://www.erau.ee/>

Worked All Provinces of China--Phone,CW, from Apr 20, 0600Z to Apr 21, 0559Z. Bands (MHz): 3.5-28. Exchange: RS(T) and serial or province abbreviation. Logs due: 7 days. Rules <http://www.mulandxc.org/144>

CQMM DX Contest--CW, from Apr 20, 1200Z to Apr 21, 2359Z. Bands (MHz): 3.5-28. Exchange: RST, continent, and category. Logs due: Jun 30. Rules <http://www.cqmmdx.com/>

EU Spring Sprints--Phone, from Apr 20, 1600Z to Apr 20, 1959Z . Bands (MHz): 3.5-14. Frequencies (MHz): 3.730, 7.050, 14.250. Exchange: Both call signs, serial, name. Logs due: 15 days. Rules <http://www.eu-sprint.com/>

Michigan QSO Party, from Apr 20, 1600Z to Apr 21, 0400Z . Bands (MHz): 3.5-28. Frequencies (MHz): CW 45 kHz from band edge, Phone 3.825, 7.200, 14.250, 21.300, 28.450. Exchange: Serial and MI county or S/P/C. Logs due: 30 days. Rules <http://www.miqp.org/>

EA QRP Contest--CW, from Apr 20, 1700Z to Apr 21, 1300Z . Bands (MHz): 3.5-28. Exchange: RST, category, M if EA QRP member. Logs due: 30 days. Rules <http://www.eaqrp.com/>

Nebraska QSO Party, from Apr 20, 1800Z to Apr 21, 1800Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW: 1.805 and 35 kHz above band edge,Nov/Tech--10 kHz above band edge; Phone--1.915, 3.865, 7.265,

14.265, 21.365, 28.465, 146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.qcwa.org/chapter025.htm>

South Dakota QSO Party, from Apr 20, 1800Z to Apr 21, 1800Z. Bands (MHz): 1.8-28. Frequencies (MHz): CW - 3.58, 7.035, 14.07; Phone - 1.845, 3.855, 7.180, 14.255, 21.355, 28.455 on SSB; RTTY - 3.585, 7.038, 14.075, 21.075; PSK - Clg Freq. Exchange: RS(T) and SD county or S/P/C. Logs due: Jun 1. Rules <http://www.w0blk.org/>

North Dakota QSO Party, from Apr 20, 1800Z to Apr 21, 1800Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs due: May 15. Rules <http://www.w0nd.com/>

Ontario QSO Party, from Apr 20, 1800Z to Apr 21, 0500Z. Multiple operating periods. Bands (MHz): 1.8-28, 50,144. Frequencies (MHz): CW 30 kHz above band edge; Phone 1.870, 3.735, 3.860, 7.070, 7.260, 14.130, 14.265, 21.260, 28.360; VHF-SSB: 50.130, 52.540, 144.205, 146.550. Exchange: RS(T), S/P/C or Ontario QTH. Logs due: May 18. Rules <http://www.va3cco.com/>

Feld-Hell New Member Sprint--Digital, from Apr 20, 2000Z to Apr 20, 2200Z. Monthly on 3rd Saturday. Bands (MHz): 1.8-28. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

YU DX Contest--CW, from Apr 20, 2100Z to Apr 21, 0500Z. Multiple operating periods. Bands (MHz): 1.8-28. Exchange: RST and ITU zone. Logs due: 30 days. Rules <http://www.yu1srs.org.rs/dl/yudx/yudxmain.html>

VHF+ CONTESTS

VHF Spring Sprints, from Apr 16, 7 PM to Apr 16, 11 PM. Bands (MHz): 222. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

Worldwide EME Contest, from Apr 13, 0000Z to Apr 14, 2400Z. Bands (MHz): 10G+. Exchange: TMO/RS(T) and "R". Logs due: Jul 14. Rules <http://www.dubus.org/>

Montana QSO Party, from Apr 13, 0000Z to Apr 15, 0000Z. Bands (MHz): 1.8-28, 50-432. Exchange: S/P/C or MT county. Logs due: 7 days. Rules <http://www.fvarc.org/>

New Mexico QSO Party, from Apr 13, 1400Z to Apr 14, 0200Z. Bands (MHz): 1.8-28, 50, Frequencies (MHz): CW-1.85, 3.55, 7.045, 14.05, 21.05, 28.05, 50.095; SSB-1.85, 3.815, 7.26, 14.28, 21.38, 28.38, 50.13. Exchange: Call sign, name, and NM county or S/P/C. Logs due: May 4. Rules <http://www.swcp.com/~n5zgt>

Georgia QSO Party, from Apr 13, 1800Z to Apr 14, 0359Z. Multiple operating periods. Bands (MHz): 1.8-28, 50. Frequencies (MHz): CW 1.815, 3.545, 7.045, 14.045, 21.045, 28.045, 50.095; Phone 1.865, 3.810, 7.225, 14.250, 21.300, 28.450, 50.135. Exchange: RS(T), S/P/C or

GA county. Logs due: May 15. Rules <http://www.georgiaqsoparty.org/>

TARA Skirmish Dig Pfx Contest--Digital, from Apr 20, 0000Z to Apr 20, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: Name, prefix. Logs due: May 17. Rules <http://www.n2ty.org/seasons/tara_dpx_rules.html>

Nebraska QSO Party, from Apr 20, 1800Z to Apr 21, 1800Z. Bands (MHz): 1.8-28, 50,144, Frequencies (MHz): CW: 1.805 and 35 kHz above band edge,Nov/Tech--10 kHz above band edge; Phone--1.915, 3.865, 7.265, 14.265, 21.365, 28.465, 146.460. Exchange: RS(T), NE county or S/P/C. Logs due: May 31. Rules <http://www.qcwa.org/chapter025.htm>

North Dakota QSO Party, from Apr 20, 1800Z to Apr 21, 1800Z. Bands (MHz): 1.8-28, 50,144. Exchange: RST and ND county or S/P/C. Logs due: May 15. Rules <http://www.w0nd.com/>

Puerto Rico on-the-air on World Amateur Radio Day 2013

Posted: 10 Apr 2013 03:03 AM PDT
http://forums.qrz.com/showthread.php?387048-Puerto-Rico-on-the-air-on-World-Amateur-Radio-Day-2013&goto=newpost

KP4FD2_log_inc.jpg

Puerto Rico once again on-the-air during World
Amateur Radio Day 2013

To make echo of this year's theme "Amateur Radio: entering its Second Century of Disaster Communications", the Puerto Rico Field Day Group will be operating KP4FD to celebrate World Amateur Radio Day on the Municipal Emergency Management Agency Office (OMME) on the city of Cataño. There will be a presentation about Amateur Radio in the premises. Operation will be on the HF bands.

Confirmations will be via LoTW and there will be an electronic certificate available, make your petition with info on QSO to wp3gw@arrl.net . If you would like to receive a printed one, please send a large SASE or envelope with sufficient USA postage. More info via

www.qrz.com/db/KP4FD

Remember that our friends from PZK in Poland issue a yearly WARD Award. Info on how to obtain one is via
http://qtc.suchacz.eu/articles.php?article_id=5

Puerto Rico otra vez en el aire durante el Día Mundial Del Radioaficionado 2013

Para hacer eco del tema de este año "La Radioafición: iniciando su segundo siglo en Comunicaciones de Desastres". el Puerto Rico Field Day Group estará operando KP4FD para celebrar el Día Mundial del Radioaficionado en la Oficina Municipal de Manejo de Emergencias (OMME) de la ciudad de Cataño. Habrá una presentación sobre la Radioafición en los predios. La operación será en las bandas de HF.

Confirmaciones serán vía LoTW y habra un certificado electrónico disponible, solo haga su petición con información del contacto a wp3gw@arrl.net . Si desea recibir uno de forma impresa, favor de enviar un

SASE largo o sobre con suficientes sellos de USA. Más información vía

www.qrz.com/db/KP4FD

Recuerden que nuestros amigos de PZK en Polonia expiden un Certificado anual del DMR. Información de cómo obtener uno es vía

W5T will operate in motion on an excursion passenger train traveling round trip from Springdale, AR, through the scenic Boston Mountains of Northwest Arkansas to Van Buren, Arkansas.

//
Ham Radio Thwarts Zombie Apocalypse:

Posted: 09 Apr 2013 05:04 PM PDT
http://www.eham.net/articles/30007

TORONTO, April 9, 2013 /PRNewswire/ - The threat of a zombie pandemic, commonly known as a zombie apocalypse, is ever present in today's world of widespread genetic engineering and frequent international travel. Fortunately, Amateur Radio can help minimize the impact of such a catastrophe and as such, the Central Toronto Amateur Radio Club (aka CenTor) will be offering an Amateur Radio licensing course starting May 1, 2013. Often called "ham radio", Amateur Radio is a non-commercial radio service that allows licensed operators to use various types of radio communications equipment to communicate with one another, both locally and around the globe, for both public service and recreational purposes. Amateur Radio operators, often referred to as "hams", are federally licensed by Industry Canada and are allowed to use specially allocated radio frequencies to carry out their operations. Hams come from all walks of life and are located all over the world. "During a zombie apocalypse, the only reliable form of communication would be using Amateur Radio, as cellphones and the Internet will become useless", said Don Trynor , President - CenTor, and licensed Amateur Radio operator with the call sign of VA3XFT. "By teaching people to use Amateur Radio, we can provide them with a valuable skill that they can use in times of emergency or natural disaster to stay in communication with one another," Trynor added. He further noted that while the likelihood of a zombie apocalypse actually occurring is very low, people who are prepared for one would also be prepared for any disaster that might actually occur.

//
Just Explain It: Solar Storms:

Posted: 09 Apr 2013 05:03 PM PDT
http://www.eham.net/articles/30006

You've probably heard of or seen photos of the Aurora Borealis - a natural light show in the northern night sky. But did you know this phenomenon is actually caused by solar storms, happening on the Sun's surface 93 million miles away? As it happens, the storms aren't just in the business of putting on a great show. They can also interfere with GPS and satellites, and even cause major power outages. Later this year, solar activity is expected to increase, and so will the likelihood that these storms will affect our everyday lives on Earth. Travel, communications, phone service and basic power are all vulnerable to solar storms. So, what causes these solar storms? How do they affect us here on Earth? And what can we do to protect infrastructure and ourselves? That's the topic of today's "Just Explain It." Let's start by going straight to the source: the Sun. On the Sun's surface, turbulent magnetic activity creates what are called sunspots. If the sunspots are powerful enough, they can cause bursts of light known as solar flares. Sunspots and other solar activity can also release charged particles and plasma from the Sun's surface. The ejection of these particles is known as a coronal mass ejection, or CME.

==> + NEW LEGISLATION IN IDAHO CLARIFIES EXEMPTION FOR GUYED AMATEUR
RADIO TOWERS

On April 1, Idaho Governor C. L. "Butch" Otter (R) signed Senate
Bill 1065 into law. This new law is an amendment to a current Idaho law
regarding guyed towers, which states that guyed towers "shall be
lighted, marked and painted or otherwise constructed to be visible in
clear air during daylight hours from a distance of not less than 2000
feet." With the passage of SB 1065, both guyed Amateur Radio and CB
antenna support structures are exempt from these regulations.

According to ARRL Idaho Section Manager Ed Stuckey, AI7H, Governor
Otter signed the original legislation into law in 2012, but there was
an exemption for telecommunications towers. "This year, we went back
[to the legislature] to specifically define Amateur Radio towers as one
of the types of telecommunications towers," he said, "ARRL Idaho
Section Government Liaison Rex Green, K7DMV, put a huge amount of
```

effort into firming up the groundwork behind the legislation. We also had the good fortune to have Idaho State Senator Lee Heider, KE7GAG, take an interest in the legislation, and he acted as the Senate sponsor for the bill." Read more <http://www.arrl.org/news/guyed-tower-legislation-in-idaho-to-exclude-amateur-radio-towers>.

==> + JULIE N. ZOLLER, KJ4EMJ, NAMED TO SENIOR STATE DEPARTMENT TELECOM POST

Julie N. Zoller, KJ4EMJ, has succeeded Richard C. Beaird at the Department of State as Senior Deputy Coordinator of the Office of Multilateral Affairs, Communications and Information Policy Directorate, Economics and Business Affairs Bureau. In this position, she will serve as principal advisor to the United States Coordinator for International Communications and Information Policy. Beaird retired at the end of January after a distinguished career in government service. Read more <http://www.arrl.org/news/julie-n-zoller-kj4emj-named-to-senior-state-department-telecom-post>.

==> + AMATEUR RADIO IN THE CLASSROOM: APPLICATIONS FOR TEACHERS INSTITUTE, ETP GRANTS DUE IN MAY

Attention, teachers who are thinking about using Amateur Radio and wireless technology in their classrooms to help facilitate hands-on learning opportunities. The ARRL's Education & Technology Program offers two programs that can help make this happen, but the application deadlines are fast approaching: The deadline for the 2013 Teachers Institute on Wireless Technology is May 15, while the deadline for equipment and resource grants is May 1. Read more <http://www.arrl.org/news/applications-for-teachers-institute-etp-grants-due-in-may>.

==> + ON THE AIR: THE 2013 SSB ROOKIE ROUNDUP IS HERE!

The weather's getting warmer and that means the bands will be hot for the ARRL SSB Rookie Roundup, Sunday, April 21, 1800-2359 UTC. Created to give the budding operator a place to learn about contesting at an easier pace, the ARRL Rookie Roundup is a six hour contest open to all amateurs who first got their ticket in 2011, 2012 or 2013. Even if you were licensed prior to 2011, you can still get on the air and work Rookies, help a Rookie get on the air or help your club members put together a team of Rookies. The contest exchange is easy: send both call signs, your first name and your location, either your US state, Canadian province or Mexican call area. If you're not in one of those areas, send "DX" for your location. Remember: Rookies can work anybody, but non-Rookies can only work Rookies. Read more <http://www.arrl.org/news/the-2013-ssb-rookie-roundup-is-here>.

==> + DAYTON HAMVENTION® AWARDS COMMITTEE WITHDRAWS 2013 AMATEUR OF THE YEAR AWARD

The Dayton Hamvention Awards Committee announced on April 7 that it would be withdrawing its Amateur of the Year Award for 2013. According to Dayton Hamvention General Chairman Charles Kaiser, KD8JZR, the committee had received "conflicting information from credible sources regarding the accuracy of the winning nomination." After verifying these reports, Kaiser made the decision to withdraw the award for 2013. "Unfortunately, this changes the way we score for the Amateur of the Year Award," Kaiser said in a statement <http://www.hamvention.org/awards.php> on the Hamvention website. "Since the competition was close with other nominees, the outcome would have been different." Kaiser then made the decision to not award the Amateur of the Year Award for 2013 to any of the other nominees. The other awards for 2013 -- the Technical Excellence Award, the Special Achievement Award and the Club of the Year Award -- are not affected by Kaiser's decision.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Both the average daily sunspot numbers and the solar flux were up this week, with the sunspot numbers rising nearly 57 points to 138.1, and the average daily solar flux up more than 25 points to 138.8. Paired with the average daily planetary A index dropping from 9.4 to 4.1, this is great news for HF propagation. On April 8, the daily sunspot number reached 162; two days later, it was at 163. This is the highest level since January 11 when it was 166. The solar flux prediction from the USAF and NOAA sees flux values of 150, 145, 140 and 130 on April 11-14, 125 on April 15-16, 120 on April 17, 100 on April 18-19, 95 on April 20-23, and then rising to a peak of 138 through May 5. The predicted planetary A index is 5 on April 11-22, then 12, 8, 18 and 15 on April 23-26, 5 on April 27-May 4, and rising to 8 on May 5. Look for more information on the ARRL website on Friday, April 12. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: ARRL ANNOUNCES WINNERS OF 2013 VIDEO CONTEST

In November, the ARRL invited members to shoot and submit a ham radio-related video in its third annual video contest. After much deliberation, we are pleased to announce the first, second and third place winners. Levi Maaia, K6LCM, took first place and $500 for his outstanding video that highlighted the activities of the Near Space Exploration Club at the Anacapa School in Santa Barbara, California. Second place (and a prize of $250) goes to Kevin Thornton, K5KVN, for his video of the 2012 first-time "activation" of Horseshoe Island, located on Beaver Lake in Northwest Arkansas as part of the US Islands Awards program. David Fugleberg, W0ZF, won third place and $100 for his video showcasing the techniques and excitement of VHF contest "roving" in the Midwest. Watch the winning videos on the ARRL's channel on YouTube <http://www.youtube.com/user/ARRLHQ> or on the ARRL website <http://www.arrl.org/winners>.

==> THIS WEEK IN RADIOSPORT

This week:

- April 12 -- NCCC Sprint Ladder

http://www.eham.net/articles/30011

In November, the ARRL invited members to shoot and submit a ham radio-related video in its third annual video contest. After much deliberation, we are pleased to announce the first, second and third place winners. Levi Maaia, K6LCM, took first place and $500 for his outstanding video that highlighted the activities of the Near Space Exploration Club at the Anacapa School in Santa Barbara, California.

INTERNATIONAL MARCONI DAY APRIL 25

WIA NATIONAL FIELD DAY ON THIS WEEKEND

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR
WEEK COMMENCING APR 14 2013.

Digital radio gains an audience

Commercial Radio Australia claims more than 1.5 million or 11 per cent of
people listen to digital radio in capital cities each week.

The Digital Radio Industry Report has total DAB+ sales in the last Christmas-New
Year period, the highest for any four-months, and a 13 per cent year-on-year
increase.

The report predicts a dramatic increase if digital radio becomes a new vehicle
standard and a timetable for a roll-out to regional areas in announced.

Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

Discover - 14 April 2013, 0'42"

Have you prepared for the last weekend in May;
the 2013 WIA AGM and Conference?

Once you've made it to Western Australia, you should take the opportunity to extend your stay and visit the vast country that represents this state, from a million acres in El Questro Wilderness Park, to the Karri Forests in the South West, from the dolphins in Monkey Mia to the Super Pit in Kalgoorlie, from the beaches in Broome, to the wineries in Margaret River, Western Australia is an enormous place and you should take the time to meet it head on.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net.

WIA National Field Day - this weekend

On Saturday the 13th and Sunday the 14th of April 2013, Amateur Radio enthusiasts from all over Australia are showcasing Amateur Radio in prominent locations throughout their local area.

This activity, now in it's third year, will be a good opportunity to break out your field day equipment, demonstrate emergency preparedness, but most importantly engage the public.

Most people in the general public would give our hobby a second thought if they knew a little more about it. This is the opportunity to showcase our capabilities.

On show a rather poor show except for 4 clubs in VK.

Central Coast ARC are at Gosford Waterfront near boat ramp, Woy Woy lions park and also at Terrigal Haven, Terrigal NSW.

Townsville Amateur Radio Club are at Jaycar, West End.

CQARA at Rockhampton Heritage Village North Rockhampton

And in Victoria, Eastern and Mountain District Radio Club at Vermont South Oval in Vermont South.

We have been provided by Trent Sampson WIA Director news of a brand new award

The Contest Champion Trophy

W.I.A. Contest Champion - VK4PJ Peter Brown Trophy

The W.I.A. Contest Champion is awarded annually for the best combined effort in W.I.A. Sponsored Contests.

To qualify for the trophy

You must be a member of the WIA and submit a log to at least 3 of the qualifying contests

The score is taken from the best performance in each category in a contest and there are 7 different W.I.A. contests.

The qualifying contests are;

Ross Hull Contest
John Moyle National Field Day
Harry Angel
Remembrance Day Contest
Oceania DX Phone
Oceania DX CW
VHF/UHF Field Days * (Best Score from one only)

Check wia.org.au for current rules.

HADARC VK2IMD Activation

The Hornsby and Districts Amateur Radio Club Inc, is once again activating VK2IMD to mark International Marconi Day on Saturday 20 April. IMD marks Marconi's Birthday on April 25. Several dozen stations worldwide take part, from countries including Wales, Cornwall, Scotland, England, Ireland, Canada, USA, Iceland, Uruguay, Italy and the Vatican.

These stations each have some link with Marconi. In VK2IMD's case this is the fact that the receiving station for Marconi's first official radio message from Great Britain to Australia was the Fisk House in leafy Wahroonga, in northern Sydney. The house remains, although not the antenna structures. The message was sent from North Wales on behalf of Australian PM Billy Hughes who was visiting Europe in 1918, as part of the War effort.

As the event runs on the UTC day, HADARC will be operating from 10:00 am Sydney time on Saturday 20th until 10:00 am on Sunday 21st. Special VK2IMD QSL cards will be available, and those working further stations will be eligible for an award. For more search for GB4IMD.

For VK1WI National News, this is Julian Sortland VK2YJS.

HAMS ACROSS AUSTRALIA.

web service:- http://www.amateurradio.com.au/news/

EMDRC

EMDRC Foundation Licence Course

Places are still available for the next EMDRC foundation course is being held next Saturday at the EMDRC clubrooms Burwood

The course is run 9:30am- 5:00pm on the Saturday and assessment on the Sunday morning.

Courses are free to EMDRC members. Interested applicants are invited to join the EMDRC or pay the equivalent amount as a course fee.

Exams cost are as follows, $70.00 for all exams or $35 if you are under 18 years old.

Licenses cost $72.00 and Variations to licenses cost $49.00, Callsign (next available) $5.00 or a requested Callsign $20.00, which are pass on to the WIA.

Check out the clubs website http://www.emdrc.com.au

VK3SN Stephen says the blokes on XC skis will be hoping for good snow again this winter as preparations commence for the 2013 winter trip up to the roof of Victoria.

The team will ski out across icy wilderness to explore this amazing region each day and play radio each night using solar QRP gear.

Tents, huts and igloos will provide shelter at elevations of around 1800m ASL.

Make contact on 40m each afternoon and 80m each evening.

Local 2m & 70cm repeaters will also be worked during each day.

Let's hope for cold weather & decent snow!!

VK5

Andrew Macmichael VK5FMAC tells us that WICEN SA UHF Commercial repeater & handhelds will be supplied & supported to co-ordinators of the 'ANZAC Youth Vigil in the South' at Morphett Vale, Adelaide.

Radios will be used to mitigate risk for 180 youths maintaining vigil at the memorial gardens overnight in honour of defence force personnel.

Est 7,000 will attend dawn service.

DISCUSSION POINT

What use is an f-call?

In my travels across the country, I come in touch with new amateurs on a regular basis. It's an exciting way to find out what brings people to Amateur Radio and it regularly provides brand new insights and ideas about things that people are doing and trying. Often their passionate explanation is accompanied by photocopies of articles, or a website, or a magazine, or a library of information that holds the key to some insight they experienced and went on to expand on.

As you might know, I'm a member of the Wireless Institute of Australia. It's an organisation that's been around for over a hundred years and is the oldest Amateur Radio Society in the world. I became a member because I was broadcasting the news in VK6 to help out another amateur who was going on leave and I figured that it would behove me to become a member. Until then I'd asked around about the WIA and was given mixed messages about the benefits of becoming a member. I'm telling you this, not because I want you to become a WIA member, that's up to you. I'm telling you this, because for me, at the time, that's where my interest in Amateur Radio Societies stopped.

Being introduced to other amateurs and seeing the articles and magazines they were using as a source made me consider that there were other societies, associations and clubs around that I'd never heard of. The ARRL seems to be the loudest, but there is the RSGB, and no doubt other such institutions around. There are clubs of Morse operators, QRP clubs, 10m clubs, beacon clubs and associations and many other. Many I've only come in contact with as a direct result of wanting to learn, try or test something.

If you've had a license for years and know about all the clubs that you could ever deal with you may want to share some of that with others who are just learning; alternatively you might just have started with a new license or project and be on the look-out for some other shared experience.

Becoming a member of a club or association has the opportunity to expose you to other skills and knowledge and that can only be good for Amateur Radio.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

World Amateur Radio Day

This Thursday April 18 we'll celebrate World Amateur Radio Day on the 88th Anniversary of the founding of the International Amateur Radio Union.

This theme for this year World Amateur Radio Day is:

"Amateur Radio: Entering Its Second Century of Disaster Communications"

The REP-Rede dos Emissores Portugueses with the group the operators, will activate the special callsign CR 5 IARU from April 13 to 19.

Puerto Rico Field Day Group will be operating KP 4 FD to celebrate from the Municipal Emergency Management Agency Office in the city of Cata�o.

Branch 74, The Wellington VHF Group, has been granted the special callsign ZL2WARD for World Amateur Radio Day 2013, Thursday 18th of April.
The station will be active on The National System, and possibly on other bands. An email QSL Card will be sent to all stations requesting one

Mexico - FMRE, with the help of Grupo DXXE, will activate a unique prefix for the first time: 4 A 8 DMR (DMR = D�a Mundial del Radioaficionado).This station will be active from April 18 to 21 on all bands.

The SARL will celebrate Amateur Radio's century of involvement in disaster communication on World Amateur Radio Day 18 April at the National Amateur Radio Centre. The callsign ZS 9 DCC - Disaster Communication Century will be operational from the NARC.

International Marconi Day Saturday 20th April

In Ireland the Hurdy Gurdy Museum of Vintage Radio will be celebrating International Marconi Day, and the tower will be open from 11 AM to 4 PM and probably longer.

The Call Sign is EI 0 MAR.

The tower was the site for an experimental Marconi Station in 1905.

All visitors are welcome, licenced amateurs, SWLs and anyone with an interest in radio.

The museum is located in the Martello Tower, Howth Harbour, Fingal, County Dublin.

The web link is http://bit.ly/QXkBTi

Floods in Argentina - we help out

A report on RAYNET-HF says:

The flooding rains have been very strong in the city of Buenos Aires and surrounding areas, and in the city of La Plata, which is the capital of the Province of Buenos Aires, located 60 kilometres south of the City of Buenos Aires. So far 57 people have died, 51 of them in La Plata.

The frequencies used on 40 meters have been 7070 and 7120.

There is also a lot of communication activity through the Facebook Emergenciaslu Amateur group, maintained by the Amateur Radio Emergency Service of Argentina.

HTTPS://www.facebook.com/emergenciaslu.radioaficionados

RAYNET-HF
http://raynet-hf.net/

Jim Linton VK3PC, Chairman IARU Regional 3 Disaster Communications Committee said it was the heaviest April rainfall since records began in 1906.

There was heavy traffic last weekend on the 40 metre band, coordinating communications for the movement of food, clothing, medicine and other items.

Jorge Sierra LU1AS of Buenos Aires reports that amateur radio played an important role including providing information on road closures and collection centre locations.

The efforts included the Amateur Radio Emergency Service of Argentina, plus radio club La Plata LU8DZE.

Half of the La Plata homes were underwater. It was the worst hit area where phone and power lines were cut. Roadways became raging rivers. The damage bill is expected to be $5 billion.

Argentina declared three days of national mourning.

The RSGB's Centenary AGM

The RSGB's Centenary AGM will take place at the IET, Savoy Place, London on the 20th April at noon.

If you are visiting, or in fact a local listening to this broadcast in the UK, it would be appreciated if you could let the RSGB know by filling in the very short form at RSGB.ORG

www.rsgb.org/attendagm

==========

NEWS FROM ARNEWSLINE USA

NEW HEADPHONES SCAN YOUR BRAIN AND PLAY THE MUSIC IT WANTS TO HEAR

A new scientific communications breakthrough of sorts is being reported by Discovery News. It says that the task of building a perfect play-list for your smart phone or other private listening device has just gotten a lot easier thanks to a new brainwave scanning device called the Mico headphones.

Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

Mico (pron miko) headphones are a development of a company called Neurowear. The rather interesting looking headphones have what the company calls a electroencephalograph sensor that protrudes to scans the wearers brain patterns to match a person's mood with an appropriate song.

When plugged in to a smart device running Mico's app, its claimed that the headphones will detect the wearer's state of mind and select a "neuro-tagged," mood-fitting song from Neurowear's database and play it. The sides of the ear pieces illuminate when music plays and even show symbols correlating to the wearers state of mind such as if the user is sleepy, stressed or highly focused.

Currently, the headphones are still in the prototype phase. They made their debut at the recent South by Southwest® Conferences and Festival in Austin, Texas, but the Mico

Headphones inventor was optimistic they'll be on
the market in what they term as the near future.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

You can read more about this latest development
in wearable consumer electronics at
tinyurl.com/brain-scanning-headphones.

The company's website is simply
http://neurowear.com

And before you ask, no, these new earphones cannot locate that rare DX
station you are hunting for on 20 meters. Well, at least not yet.

2000 KM USING 10 MILLIWATTS FROM A RASPBERRY PI

Eddie Bennett, G3ZJO, of Northampton in the
United Kingdom is not making any claims. Even so
he may now hold a Q-R-P distance record for a
micro power transmission using a Raspberry Pi microcomputer as a transmitter.

Bennett reportedly used the 10 milliwatts of RF
that can be generated from the Raspberry Pi
computer board to be heard at over 2000 km on the
7 MHz band. The Raspberry Pi board can be made
to operate as a WSPR mode transmitter covering
Low, High and VHF frequencies up to 250
MHz. G3ZJO connected the board via a low pass
filter to a dipole for the 7 and 14 MHz bands. A
small Marconi inverted L at a height of only 6 meters was used on 472 kHz.

Among the stations who received his WSPR signal
on 40 metres was LA9JO in grid square JP99 at a
distance of 2124 km. On 20 meters he was heard
by LY2BOS in grid KO24 at a distance of
1736km. 472 kHz did not fare anywhere near as
well.
Even so he was heard some 80 kilometres away by G4KPX in grid JO02.

If you want to give micro power Raspberry Pi
DXing a try, the PE1NNZ code and binary to turn
the minicomputer into a super QRP signal emitter
is available at
tinyurl.com/raspberry-pi-transmitter. And we
will have some more traditional DX news later on
in this weeks newscast.

APRS EXPERIMENT EXTENDS UNDERGROUND COMMUNICATIONS

APRS works to extend communications range underground.
So says the modes developer Bob Bruninga, WB4APR, who

reports on an experiment that took place on March 2nd . One where he and several other hams tested the use of APRS as a means to extend radio communications underground in Mammoth Cave, Kentucky. Amateur Radio Newsline's Stephan Kinford, N8WB, reports:

--

According to Bob Bruninga, WB4APR, typically, VHF and UHF radio in underground caves are limited to only a few hundred feet and strictly line-of-sight making their routine use of little value. But with APRS radios acting as packet digipeaters, these few hundreds of feet can be extended by an order of magnitude.

Bruninga says that in the test a total of 14 APRS equipped radios were used in the cave to establish a network almost a mile long providing real-time position and text message communications along the route. Cavers carried a map of the cave marked with a Latitude and Longitude grid so they could manually enter their position into their handheld APRS-equipped transceivers. Texting via APRS provided communications end to end.

Among the interesting findings were that UHF worked about 13% better than VHF with an average link distance of about 450 feet even in the large subway sized passages of Mammoth Cave. Also power did not seem to matter much. The Kenwood TH-D72 walkie-talkie performed as well as several portable 10 watt mobile radios housed in boxes.

Another advantage of using UHF for this APRS network was that individual links in other caves can just as easily be pre-tested by unlicensed cave explorers using inexpensive FRS radios. This way, all cavers can plan and individually test the topology of an APRS network before actually gathering the required APRS equipment and setting up the actual expedition.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

Bruninga says that the system could even include e-mail into the topside global APRS system.

==========

OPERATIONAL NEWS - DATELINE 2013

HOLYLAND CONTEST 2013 - APRIL 19 - 20

The Day of the YLs will be held 18 and 19 May.

We made mention last broadcast of not being made aware of any upcoming WIA contests, well from Trent VK4TS comes word that VK SHIRES is always held on the June long weekend, which is the weekend prior to the second Monday of June each year..
Now although the Queensland Government had abolished that long weekend it has been re-instated in VK4 so 'good luck in the contest" which runs
0600 UTC Saturday, June 8, 2013 and ends: 0600 UTC Sunday, June 9.

WW International Museums Weekends June 15/16 and 22/23

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

CT 1 FTR is now active from the Sudan as ST 2 FT operating both the HF and VHF bands using a Yaesu FT-857 and a loop antenna. Word is that he will be there until June. QSL via CT1FTR.

A group of at least fourteen operators and growing are expected to be on the air from Amsterdam Island for 18 days beginning on January 15th of 2014. Further information will be released as things progress toward the operations start-up date.

Japanese amateur radio operators celebrate the successful transition from analogue to digital terrestrial TV with the call 8 N 1 TW.
Activity continues till the 28th of July, QSL via bureau.
http://www.dtvstatus.net/

Lastly, members of Mexico's Club de Radio Experimentadores de Occidente are celebrating the 80th anniversary of the founding of their organization using the special callsign 4 A 1 TD.

Look for this call during various contests as throughout the year.

The QSL Manager is XE 1 GZU.

AWARDS

The Michael Owen Plaque.

A Plaque will be presented by the WIA to the Highest Point Scoring single operator station in IARU region three (3) in the IARU HF Championship.

Regardless of mode or bands used the Michael Owen plaque shall be awarded annually to the Single Operator scoring the most points in the IARU HF Championship.

This is to encourage excellence in Region 3 contesting in memory of the work and dedication of Michael Owen former president of the Wireless Institute of Australia

(vk4ts)

VK5 National & Conservation Parks Award.

There is a new amateur radio award originating in South Australia.

The VK5 National and Conservation Parks Award sponsored by the Adelaide Hills Amateur Radio Society.

The aim of the Award is to encourage portable operation by amateur radio operators from within South Australia's 21 National Parks and 262 Conservation Parks.

The Award is open to Activators, Hunters (those who work Activators) and Short Wave Listeners.

And the award is not limited to VK5 operators solely. Applications for the award are welcomed from interstate and overseas amateurs and Short Wave Listeners.

Contacts made after the 14th of April, 2013 are valid for the Award.

There are five levels of the Award: Bronze, Silver, Gold, Platinum and Diamond, with a certain number of points being required for each level.

Separate certificates are available for all 5 levels and an optional glass etched trophy is also available for those attaining Diamond status.

More information can be found on the Adelaide Hills Amateur Radio Society website at

www.ahars.com.au

And there is also a VK5 National & Conservation Parks Award Yahoo Group site which can be found at

au.groups.yahoo.com/group/sanpcpa

And a link to this Yahoo group site can be found on the AHARS website.

Thanks Paul, and listeners, Paul VK5PAS is also well known for his activity that includes use of the AX alternative prefix, and as VI5CW Cape Willoughby Lighthouse, Kangaroo Island in August last year.

And he is not only out and about himself but has recently worked intrepid backpacker Pete Turner G 6 UOI near Liverpool.

The contact was on April the 5th, on the 20m band long path, while Pete G 6 UOI walked about with a QRP rig on his back.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

7330 km contact on FO-29

On Monday last Hector Martinez CO 6 CBF achieved a 7330 km contact on the amateur radio satellite FO-29, the closest to the theoretic maximum for the satellite.

Hector, who is in grid square EL92sd, worked David, EA 4 SG in IN80cp using SSB.

(southgate)

WW SPECIAL INTEREST GROUPS --- ILLW

Interest turns to the ILLW

With more than 190 registrations from 28 countries so far in the International Lighthouse and Lightship Weekend held annually in August, things are starting to heat up.

Germany remains in the lead on 39 closely followed by Australia with 37, then the USA (22), England (15) and Argentina (11).

The fun event is virtually at the half-way point with twice as many registrations and individual countries expected in the coming weeks.

What lighthouse, lightship or maritime beacon will be the prestigious 200th to be registered this year?

Set up a portable amateur station at a lighthouse, lightship or maritime beacon.

The basic objective is public awareness about the historic structures, the need for their preservation, and to promote amateur radio goodwill.

For the guidelines or to register online for the 16th annual International Lighthouse and Lightship Weekend on August the 17th and 18th, visit the website

REWIND

The role played by a Selkirk UK man in monitoring secret radio transmissions being broadcast from occupied Europe has finally been revealed.

The late John Blair grew up in Selkirk, living above the family grocery businesses in the town's Market Place.

Years later it emerged that John, a veteran of the First World War who served in the Royal Navy, had spent the conflict against Hitler running a listening station in the flat above the shop, tuning in to receive coded messages from the under﷿ground in the occupied Low Countries.

"The Southern" press said that John was always very interested in radio and a small part of the shop was given over to selling radios and carrying out

radio equipment repairs.

There seems to have been a wee bit of talk and gossip in the town about why he was never called up for the Second World War, but years later said that he had been contacted and asked if he would do some secret official work.

This involved monitoring certain broadcasts coming  out of occupied Europe. Once he had taken it down, he had to take the message immediately to the police station. He never knew what the information contained was.

After the war, he managed to get back in touch with several of those who had been responsible for broadcasting the coded information from Europe.

No-one in Selkirk knew he was doing this secret work except the police.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only

be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========

WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia and participation in the activities of local clubs.

Opinions expressed in "WIANews" are those of the writers who submit material and do not necessarily reflect those of the rebroadcasters, nor the National WIA, but are broadcast in the spirit in which they were submitted.

Material may be reproduced in whole or in part, in any form, a credit to WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Amateur Radio Newsline(tm) Report 1861 - April 12 2013

Amateur Radio Newsline report number 1861 with a release date of April 12 2013 to follow in 5-4-3-2-1.

The following is a QST. Ham radio developed software is now a part of an ongoing NASA solar observation mission; hams in Hawaii appear safe from a new distracted driving law; Over the Horizon is back on the ham bands; the Dayton Hamvention withdraws its 2013 Radio Amateur of the Year award and a nice place for senior citizen hams to retire. Find out where on Amateur Radio Newsline(tm) report number 1861 coming your way right now.

HAM RADIO IN SPACE: AMSAT-DL TURBO CODE NOW ON NASA STEREO SPACECRAFT

Ham radio is now contributing directly to some vital space research. This with the announcement that Turbo Code software written by AMSAT-DL is now in use on the twin NASA STEREO spacecraft. Amateur Radio Newsline's Norm Seeley, KI7UP, has the rest of the story:

--

According to AMSAT-Germany, on April 2, the two NASA STEREO space-based solar observatories permanently switched to Turbo Code to transmit their real-time space weather data back to Earth. A network of four ground stations, located at Germany, France, Japan and amateur radio station DL0SHF in Germany receives the data, and uses software also written by AMSAT-Germany to decode it.

The switch to Turbo Code has reportedly improved reception capabilities of the ground stations by about 2 dB. This is a very welcome improvement given that the two STEREO spacecraft are currently 269 and 286 million kilometers respectively away from Earth.

STEREO which stands for the Solar Terrestrial Relations Observatory is a solar observation mission using two nearly identical spacecraft. They were launched in 2006 into orbits around the sun that cause them to respectively pull farther ahead of and fall gradually behind the Earth. This enables stereoscopic imaging of the Sun and other solar phenomena, such as coronal mass ejections and the like.

For the Amateur Radio Newsline, I'M Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More on the NASA STEREO solar observatory mission is on the web at tinyurl.com/stereo-in-space. (AMSAT-DL)

**

PROPAGATION: INCOMING SOLAR STORM MAY AFFECT RADIO TRANSMISSSIONS AFTER APRIL 13

A strong M6-class solar flare has hurled a Cornal Mass Ejection or CME toward Earth. This after the magnetic field of sunspot AR1719 erupted at 0716 UT on April 11th.

Geomagnetic storms and high-latitude auroras were being predicted when the fast-moving ionized cloud was to reach our planet, on April 13th. Solar forecasters believed that radio, television, satellite and other communications would likely be affected for several days afterward. Keep an eye on spaceweather dot com for the latest updates. (Spaceweather)

**

RESCUE RADIO: HAMS ASSIST IN ARGENTINA FLOODING

Hams in Argentina are reported to be providing communications support in response to the recent flooding to hit that nation. A statement provided by RAYNET-HF on April 6th said that High Frequency nets are currently operating on 7 dot 070 MHz and 7 dot 120 MHz. This is in addition to VHF and UHF repeaters that are being kept on alert by the Radio Club La Plata operating as LU8DZE. There is also a lot of emergency communication taking place through the Facebook Emergenciaslu Amateur group page that is maintained by the Amateur Radio Emergency Service of Argentina. (RAYNET-HF)

**

INTRUDER WATCH: RUSSIAN AND IRANIAN OTH RADAR CAUSING INTERFERENCE ON HF

The dreaded sound of Over the Horizon Radar is again interfering with communications on or near several ham radio bands. Amateur Radio Newsline's Bill Pasternak, WA6ITF, is here with the details:

--

The latest Region One International Amateur Radio Union Monitoring System newsletter reports a Russian Over the Horizon Radar has been transmitting between 3.555 to 3.590 and 3.750 to 3.785 MHz. The signal is always 35 kHz wide with its location believed to be in the area of Makhachkala, in the Caspian Sea.

Amateur radio as well as many other services are being interfered with in the evening hours by this annoying signal source. A letter has been sent to the Russian Radio Society
-- the SRR -- asking for assistance in ending the operation

of this Radar system.

Meantime an Iran based Over the Horizon Radar has been interfering with ham radio operations on the 10 meter band. This Radar is on the air daily on 28.000 to 29.700 MHz transmitting bursts that are 60 kHz wide. The splatter from the signal often covers spectrum 500 kHz or more in bandwidth. The German Department of Post and Telecommunications has sent an official complaint to its counterpart in Iran.

Lastly, the Dutch Datawell buoys are still operating illegally on 10 meters. The Datawell Company was informed that the transmissions are illegal by DK2OM and PA2GRU way back in March of 2012, but so far the company has not responded and the interference continues.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in the newsroom in Los Angeles.

--

If you happen across signals in the ham radio bands that you know do not belong there, please send a report to the Intruder Watch Coordinator for the nation that you live in. (IARU R-1 IARUMS Newsletter)

**

RADIO LAW: HAWAII DISTRACTED DRIVING LAW EXEMPTS HAM RADIO

Some good news for hams in Hawaii. A new distracted driving law making its way through the state legislature contains a full exemption for radio amateurs.

Hawaii State Legislature House Bill 980 involving mobile electronics has passed the Senate and has been transmitted back to the House. Testimonies by amateur radio operators have kept the exemption intact to allow hams to operate their radio gear while driving.

This bill is expected to pass, as the State of Hawaii needs a state-level cellular telephone law banning text messaging in order to receive Federal highway safety funds. It lost the funds in 2012 by not having such a law.

>From here, the remaining steps are that a joint conference committee will get together to work out the differences between the House and Senate versions. That whats called the CD1 draft and will have to be ratified in both the Hawaii House and Senate, before finally being transmitted to the Governor for signature. The text of the new mweasure and any updates will be available on-line on Ron Hashiro, AH6RH web page at tinyurl.com/hawaii-cell-law, (AH6RH)

**

HAMVENTION 2013: HAMVENTION RESCINDS RADIO AMATEUR OF THE AWARD TO DL1BDF

The Dayton Amateur Radio Association, sponsor of the annual Dayton Hamvention (R), has withdrawn its 2013 Radio Amateur of the Year Award. Amateur Radio Newsline's Stephan Kinford, N8WB, is in near-by Wadsworth, Ohio, with whats known so far:

--

In early March the Dayton Hamvention Awards Committee announced that it had selected Captain Mustapha Landoulsi, DL1BDF, as its choice for 2013 Radio Amateur of the Year. But on April 4th the Hamvention announced that Landoulsi would not be getting the award after all. In fact, this year, nobody will.

The announcement of the decision to rescind the award came in a posting to the Hamvention website and also distributed on the Hamvention's Yahoo Groups remailer. Both said and we quote:

"We have received conflicting information from credible sources regarding the accuracy of the winning nomination. The General Chairman of Hamvention this year, Charles Kaiser, received these reports and followed up to verify their accuracy. Unfortunately these changes the way we score for the Amateur of the Year award and since the competition was close with other nominees the outcome would have been different. Based on all of this research the decision has been made by the Hamvention General Chairman not to award the Amateur of the Year for 2013."

Captain Landoulsi is a retired Lufthansa airline pilot, had been named recipient of the award for his ongoing work in promoting and developing amateur radio in the Middle East and for organizing delivery of emergency medical equipment and medication to countries in Africa. There was no indication from the Hamvention or its Awards Committee as to the nature of the "conflicting information" or any additional details regarding this action.

In reply to our request for comment on the situation, Captain Landoulsi responded in part that is not the awards cancellation that made him sad. He notes that he already has a number of awards but that collecting awards has not been his goal in life. Rather giving to others and helping every one he can is what his life is all about. DL1BDF added that he will have a more in depth statement for release shortly.

It should be noted that the decision by the Hamvention to rescind the Radio Amateur of the Year Award will have no impact on this year's Technical Achievement, Special Achievement and Radio Club of the Year recipients. These three awards will be presented as originally announced.

For the Amateur Radio Newsline, I'm Stephan Kinford, N8WB, in Wadsworth, Ohio.

--

This is the first time since the Radio Amateur of the Year Award was created back in 1955 that it has been withdrawn after being announced. And as far as we can determine, it's also the first time that this award will not be presented. (Dayton HamventionT, CQ, ARNewsline(tm), others)

RADIO BUSINESS: NEW YAESU FT-400DR DIGITAL DUAL BAND MOBILE

Big news in the world of digital VHF and UHF voice communications that the Yaesu FTM-400DR dual band mobile transceiver has received FCC approval, but when it will be available for sale is not known.

According to the Universal Radio website, the new 2 meter and 70 centimeter radio is power selectable at 50, 20 or 5 watts on either band, features wide band receivers covering 108-470 and 800-999 MHz minus the cellular band four scan modes and 500 memories per band and all the other bells and whistles you would expect in a top of the line dual bander. But it's Kevin Sanders Amateur Radio and Scanning Blog adds that reveals the most important aspect of this new rig. That of it being capable of full C4FM FDMA digital voice operation as well as conventional FM. This means it will be the base and mobile radio that will compliment Yaesu's long waited FT1D digital voice hand-held.

How much will the FTM-400DR set you back? At airtime there is no manufacturers suggested price listed. All the Universal Radio website says is that the information shown is preliminary and may be subject to change without notice or obligation. You can take a look at the new Yaesu offering at tinyurl.com/yaesu-digital-mobile. A video of the radio taken at last years Tokyo Hamfair can be seen at tinyurl.com/ftm400. (ARNewsline(tm), Universal Radio, Kevin Sanders

Sanders Amateur Radio and Scanning Blog)

**

CALIFORNIA CB OPERATOR CITED FOR TALKING TO MUCH TO NOBODY

A California CB operator has been cited by the FCC for what amounts to having been long winded while talking to nobody on 11 meter CB. Here's Amateur Radio Newsline's Bruce Tennant, K6PZW, with the details.

--

Talking to nobody on 11 meters but taking a long time to say it is the crux of a Notice of Violation issued on March 12th to Joseph Loiacono who lives in the Los Angeles suburb Lakewood.

According to the FCC, back on January 29th the FCC received a complaint of interference to CB radio communications on 27.165 MHz. In response agents from the Los Angeles Office Enforcement Bureau T-hunted the signal and determined that they were coming from an antenna at a residence owned by Mr. Loiacono.

While monitoring the frequency the agents observed someone whom they allege to have been Joseph Loiacono engaging in extended one-way transmissions which resulted in intentional interference to other CB stations. Some of these transmissions the FCC says lasted up to twenty minutes in length.

This in led to the FCC issuing the Notice of Violation seeking additional information concerning the violations and any remedial actions that Loiacono had since taken. Specifically his response had to fully explain each violation, including all relevant surrounding facts and circumstances. It was also was to contain a statement of the specific actions he had so far taken to correct each violation and preclude any recurrence.

But it did not end there. In accordance with Section 1.16 of the Rules, Loiacono was directed to support his response with an affidavit or declaration made under penalty of perjury, verifying the truth and accuracy of the information that he provided to the FCC. He was also warned that to knowingly and willfully make any false statement or conceal any material fact in reply to the Notice of Violation was punishable by fine or imprisonment under Title 18 of the U.S. Code.

Joseph Loiacono was given 20 days from the release of the Notice of Violation to submit his written statement concerning this matter. That date is now past but at airtime it's not known what information he had in his reply to the FCC.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, monitoring this one from Los Angeles.

--

For what its worth, this is the first time in years if not decades that we have heard of anyone on the 11 meter Citizens Band being issued a Notice of Violation for making a one way transmission that was far to long. In fact its one of the few instances of any real enforcement action on 11 meters in a long, long time. (FCC, CGC)

**

ENFORCEMENT: MOJAVE CA RESIDENT ISSUED WARNING AFTER FCC LOCATES AV TRANSMITTER INTERFERING WITH NASA TELEMETRY

The FCC has issued a Notice of Unlicensed Operation of an audio-visual transmitter used in the home of a Southern California resident. This after receiving a complaint from NASA that it was receiving interference to a telemetry receive site from radio transmissions centering on 2390 MHz.

In its March 26th release the FCC said that its investigators from the Los Angeles office used direction finding to locate the interfering device at the home of Julius Magos in the city of Mojave, California. This is not far from the NASA receive site. The FCC says that when the power was disconnected from the transmitter, the interference to the NASA telemetry operations ceased.

Now in issuing Magos the Notice of Unlicensed Operation the FCC says that its records show that no license was issued for operation of a transmitter on 2390 MHz from his home location. As such operation of the device must cease immediately.

Magos was also warned that operation of radio transmitting equipment without a valid FCC authorization constitutes a violation of the Federal laws and could subject the operator to severe penalties. These include but are not limited to a substantial monetary forfeitures, seizure the offending radio equipment, and criminal sanctions including imprisonment. Magos was also told that the FCC will determine what if any further enforcement action is required to ensure his compliance with the agency's rules. (FCC, CGC)

**

ENFORCEMENT: FM TRANSLATOR FINED FOR INTERFERING WITH AVIATION COMMS

The FCC has reaffirmed a $4,000 Notice of Apparent Liability issued against Playa Del Sol Broadcasters which is the licensee of FM translator K238AK in Palm Desert, California. The commission said the translator that operates on 109.5 MHz interfered with the VHF aviation band communications three times in 2008 resulting from the broadcaster's failure to properly attenuate the translator emissions. Interfered with specifically was Riverside California County sheriff's helicopter communications,

Playa Del Sol uses the translator to re-transmit KRCK- FM in Mecca, California. The broadcaster didn't dispute the facts, but argued it shouldn't be fined because its violation was not intentional. But the

commission backed up the Enforcement Bureau findings. It said even though Playa Del Sol didn't intend to break the law, it still did. It also gave Playa Del Sol Broadcasters the customary 30 days from the date of its decision to pay the $4000 fine. (FCC, RW)

**

CRIME AGAINST HAM RADIO: NAURYZ DX CONTEST SITE HACKED

The Nauryz DX Contest website owned by the Kazakhstan Amateur Radio Club was hacked the morning of April 9th. According to the Southgate news, vistors to the site were treated to a picture of a warrior with a scrolling text telling that said "Admin I hacked your site."

Laying claim to the hacking was made by a group called "Team Haxorsistz" and "Bl4CK System". It followed the deadline of log submissions to the contest committee by Sunday April 7th.

The hackers say that all information was retained. By late in the day a visit to the site showed that it had been restored. (G0SFJ, Southgate)

**

RADIO HAPPENINGS: HIGH SCHOOL RADIO DAY - APRIL 24

High school radio stations in the United States will come together April 24 for High School Radio Day 2013. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

Following the inaugural event last May, a website has been created at www.highschoolradioday.com to publicize the activities planned by participating stations. The day's activities will include live broadcasts from different high school stations around the country streamed on the High School Radio Day website. There also will be links to station streams and schools can register with a link to their own station website.

High School Radio Day was created following the successful launch of College Radio Day in October of 2011. Founder Pete Bowers, the station manager of WBFH-FM in Bloomfield Hills, Michigan decided to hold High School Radio Day last year on May 16th because it is the anniversary of the first U.S. high school radio station WNAS-FM in Albany, New York's inaugural broadcast in 1949.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH

--

Organizers of High School Radio Day 2013 hope that this gathering will raise the profile of the limited number of high school radio stations still broadcasting in the United States. (RW)

**

HAM HAPPENINGS: WEBINAR RECORDING FIRST TRANS ATLANTIC SHORTWAVE MESSAGE NOW ON LINE

A Webinar archive presentation surrounding the story of the first trans-Atlantic short wave message which involved several Radio Club of America members and station 1BCG is now available for viewing on-line. To access the recording, take your web browser to tinyurl.com/rca-atlantic-message and click on the title The First Top Band DX Contest - the 1921 Transatlantic Test by Frank Donovan W3LPL. This Webinar recording is being hosted at the website of the World Wide Radio Operators Foundation. (RCA)

**

NAMES IN THE NEWS: 2013 MARCONI PRIZE TO BE AWARDED TO HANDLELD PHONE DEVELOPER MARTIN COOPER The Marconi Society has announced that wireless visionary and entrepreneur Martin Cooper is the recipient of the 2013 Marconi Prize. Cooper is credited with developing and popularizing the concept of the handheld mobile phone. He led the team that put Motorola at the forefront of a new industry and in the process, he helped reshape and point the global telecommunications industry in a new direction.

Martin Cooper will receive the $100,000 Marconi Prize at an awards dinner in his honor being held on October 1st in Bologna, Italy. He also will deliver the keynote address for a three-day conference preceding the awards gala, jointly sponsored by the Marconi Institute for Creativity and the Marconi Society The Marconi Prize is considered the pinnacle honor in the field of communication and information science. (Published News Reports)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

RADIO IN SPACE: SPACELAB II PROPOSED BEYOND THE MOON

NASA has propose a concept for a deep space station that has been dubbed Skylab 2. It placing such a station on-orbit at the Earth/Moon L2 point in space. Here's Amateur Radio Newsline's Cheryl Lasek, K9BIK, with the details:

--

According to Space.com, the Skylab 2 concept would consist of a single-piece habitat based on the Space Launch System's upper-stage hydrogen tank. The resulting space station would be the equivalent of a two-story house. That would be enough to accommodate a crew of four astronauts and several years of provisions with comfort. Solar arrays, radiators, and a module that contains equipment for assembly, repair, and propellant transfer would be attached.

The advantage over using International Space Station modules is that in the latter case, some assembly would be required. Skylab 2 would be ready for occupancy by a four-person crew launched separately in an Orion Multi-Purpose Crew Vehicle.

The news that NASA was considering using the Space Launch System heavy lift launcher to deploy a deep space station 38,000 miles beyond the moon's far side, was first reported in the Orlando Sentinel in September. Such a space station would be human tended, hosting crews for weeks and then months at a time. It would serve as a way station for expeditions into deep space or back to the lunar surface. Astronauts on the deep space station could remotely operate radio controlled robots on the lunar surface and would study the effects of deep space, which includes microgravity and radiation, on the human body.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois

--

L Points also known as Lagrange points, are the five positions in an orbital configuration where a small object affected only by gravity can theoretically be part of a constant-shape pattern with two larger objects such as a satellite with respect to the Earth and Moon. The Lagrange points mark positions where the combined gravitational pull of the two large masses provides precisely the centripetal force required to orbit with them. (NASA, Published News Reports)

**

WORLDBEAT: CELEBRATING THE 75TH ANNIVERSARY OF THE FIRST CLASS CW OPERATORS CLUB

To commemorate their 75th anniversary of the First Class CW Operators Club this coming May the organization is holding a month-long on-air event featuring more than 20 special FOC suffix calls. This will include GB75FOC which is a special anniversary callsign for their club station.

There will also be other FOC callsigns operating from the USA and Canada as well as some exotic locations such as VQ9, HZ1 and 5T. Stations will gain points for contacting any First Class CW Operators Club member and a certificate will be presented to stations who reach certain point levels.

Founded in 1938 with its roots, history and management in the United Kingdom, the First Class CW Operators' Club promotes good CW operating, Morse activity, friendship and socializing via its worldwide membership of approximately 500. Complete details of the group and this event is on-line at tinyurl.com/first-class-morse. (Via e-mail)

**

WORLDBEAT: BBC WORLD SERVICE REDUCES SHORTWAVE BROADCASTS

A new schedule with reduced shortwave transmissions began on the BBC World Service on April 1st. As part of the change shortwave and medium wave transmissions in the English language will be reduced by a minimum of 6 hours each day. Also shortwave Arabic language broadcasts ceased complexly. You can read the full schedule change announcement at tinyurl.com/BBC-World-English. (Southgate)

**

WORLDBEAT: BBC WORLD SERVICE OVER TO YOU ON CHINESE JAMMING

The BBC World Service program Over To You has presented a program that explores the way that the stations shortwave transmissions are being affected by jamming in parts of Asia. This is the result of an e-mail from a listener in West Bengal who was having problems listening to the service.

With the help of the World Service's head of business development, the show discovers how jamming of its shortwave transmissions inside China is spilling over into neighboring countries. It also explores what the BBC can do to remedy the situation through various international organizations. You can hear the program on-line at tinyurl.com/bbc-against-jamming. (Southgate, BBC)

**

WORLDBEAT: TWO RADIO STATIONS ATTACKED IN GUINEA

A journalists' association in Guinea says that two privately-owned radio stations have been attacked, as political tensions rise before Guinea's legislative elections on May 12. The Union of Free Radio and Television of Guinea says Renaissance FM and the Planet FM were both shot at when Faya Millimo who is the leader of the opposition Liberal Bloc was being interviewed. Also, two civilians and one police officer have been killed in a series of anti-government demonstrations that rocked Guinea's capital in recent weeks. (UFR via Facebook)

**

WORLDBEAT: ALGERIAN AMATEUR RADIO ASSOCIATION CELEBRATES 50TH ANNIVERSARY

The Algerian Amateur Radio Association recently celebrated its fiftieth anniversary.

The current president of the association is Afif Benlagha, 7X2RO. During a press conference held to mark this anniversary he recalled the various stages the association went through since its creation on March 23, 1963.

Also present at the event was International Amateur Radio Union, Region 1 president Hans Blondeel Timmerman whose call is PB2T. Timmerman highlighted Algerian expertise in this area of communications. (Algeria Press Service)

**

ON THE AIR: CS250CLE CELEBRATES THE BELL TOWER OF CLERIGOS CHURCH

On the air, word that Portuguese amateurs will be operating through the end of the year with the call CS250CLE. This to celebrate the 250th anniversary of the final construction of the Torre dos Clerigos bell tower of the Church of Clerigos. Since its completion the tower has overlooked the city of Porto as the highest bell tower in Portugal. If you contact CS250CLE please QSL via CS5RPT. (DXNL)

**

ON THE AIR: FRENCH CW SOCIETY - SPECIAL EVENT

Look for special event callsign TM28UFT to be active during the 28th annual meeting of the French CW Society which will be held in Panazol Center, France, through April 21st. Activity will be on the HF bands and possibly others for this Morse only operation. The QSL Manager is F9IE. More information is on-line at www.uft.net. (UFT.net)

**

DX

In DX, GM0OBX will be running the special event call of GB1PC during April from Stirling and District Amateur Radio Society in the United Kingdom. This to celebrate the new Police Service of Scotland. Please QSL to GM0OBX either direct or via the bureau.

LY5A will be on the air as LY23A until through April 23rd to celebrate the anniversary of the restoration of Lithuanian independence. No times or frequencies have been announced. If you work him QSL via LY5A.

IK2GZU will be in the southern region of Tanzania through May 8th working on electrical installations of the local hospital and orphanage. He hopes to find time to erect a 3 element yagi and operate as 5H3MB. If you make contact please QSL via his home call.

SN0MD to be active in celebration Poland's 40th Debno marathon. Operation of this station continues through April 22nd. QSL via SP1PNW.

Lastly, RW3AH is currently on the air from Egypt as SU9AF. He's reportedly operational on all of the HF bands. QSl via UA3DX .

(Above from various DX sources)

THAT FINAL ITEM: RETIREMENT PROPERTIES INSTALLS HAM RADIO SHACKS

And finally this week the story of some retirement villages that not only approve of ham radio, but they even provide places from where residents can get on the air. Here's Amateur Radio Newsline's Mark Abramovich, NT3V, with the details:

--

The Marshalltown, Iowa, Times-Republican newspaper reports that 81 year old Tom Morgan, W4UTK, has use of three operating ham radio stations complete with a 500-watt amplifier in a comfortable ham shack at the Embers Retirement Community.

The location and equipment were all made possible by Brad Lee, W0VFT, of Phoenix, Arizona. Lee is identified as the CEO of Trilogy-Embers. That's the company that owns Embers and a number of other retirement centers in the United States.

Embers Executive Director is Vicki Bogner. She is quoted as saying that Brad Lee picked up interest in short-wave from his father whom his QRZ dot com page as the late C. W. "Lee", and the first holder of the W0VFT callsign.

She went on to say that Brad Lee began by installing ham shacks for residents in his Phoenix area properties. This after he learned some had been ham operators in their own homes but had given up the hobby after moving in to one of the Embers properties.

The full story is on the web at tinyurl.com/retirement-ham-shack. We say this is a great way to support the senior citizens of ham radio who have contributed so much to this nation and to the hobby.

For the Amateur Radio Newsline, I'm Mark Abramowicz, NT3V, in Philadelphia.

--

The Times-Republican story notes that Marshalltown resident Tom Morgan, W4UTK, has been a ham radio enthusiast much of his life. Also that he knew he wanted to become an electrical engineer by the time he was age 12. (Southgate, Times-Republican)

Special Event Station K1C / CT DX Association 30th Anniversary QSO Party 20 April

Posted: 11 Apr 2013 08:03 PM PDT
http://forums.qrz.com/showthread.php?387305-Special-Event-Station-K1C-CT-DX-Association-30th-Anniversary-QSO-Party-20-April&goto=newpost

On Saturday, 20 April, from 1300-0100 UTC, the Connecticut DX Association will be holding its 30th Anniversary QSO party.

Also in honor of our 30th anniversary, we will be operating a special event station, K1C, during the QSO party and for several days after.

The CTDXA QSO parties are not contest events (although our members may give out Q's to our friends in Michigan and Ontario having their contests that weekend). They are mostly an excuse for our members to get on the air and make a few contacts, as well as providing an opportunity for interested hams to qualify for the prestigious CTDXA Award.

What's the CTDXA Award, you ask? Well, if you work a minimum number of current or former CTDXA members (5 CTDXA contacts required for US stations, 3 for DX station), send evidence of the contacts and three green stamps for printing and postage, and we will happily award you a serialized award certificate to commemorate the achievement. Requests should be sent to the club PO Box 277, Windsor, CT 06095, USA.

A list of some current and former members can be found at the club web page, www.bridgefacts.com/CTDXAHOME.html

We hope to see you on the air next Saturday.

Out-of-this-World Chat at SGS:

Posted: 11 Apr 2013 05:13 PM PDT
http://www.eham.net/articles/30023

Students at a local junior high school got an out-of-this-world experience this week. Nearly 180 students at Sir George Simpson Junior High School gathered in their cafeteria Tuesday afternoon to listen in as the school was connected to the International Space Station and some of them had a chance to ask questions of Canadian astronaut and station commander Chris Hadfield via a ham radio connection. Faith Gault, a Grade 7 student at Sir George Simpson Junior High, uses a cellphone to ask a question to Canadian astronaut and International Space Station commander Chris Hadfield on Tuesday afternoon. (GLENN COOK, St. Albert Leader) The questions ranged from the effects of pressure in space to what Hadfield would bring back with him if he had the chance. One student even asked how Hadfield was spreading Canadian culture among his fellow astronauts. "I've been playing Canadian folk music," Hadfield replied. "I've been playing Stompin' Tom Connors and music from a bunch of different writers, [like] Gordon Lightfoot." Students managed to get in about eight questions in English, French and even Russian. "It was pretty cool," said Grade 9 student Charlea Erickson. "It was very interesting, a once-in-a-lifetime opportunity."

//
Almonte Amateur Radio Club Conducts Emergency Communication Tests:

Posted: 11 Apr 2013 05:12 PM PDT
http://www.eham.net/articles/30022

EMC News - "VE3XZT, VE3XZT this is VA3HSP". This was a typical call that was made many times over the weekend of March 16 when the emergency preparedness group of the Almonte Amateur Radio Club (AARC) conducted a comprehensive coverage check of its radio communication systems. The group provides emergency communications in time of need for, Red Cross, municipal or other agencies as requested and comprises licensed amateur radio operators and other volunteers who will respond to training, exercises and public service activities that require radio communications, including declared emergencies. Control of the exercise was conducted from the emergency operations centre (EOC) located at the Almonte General Hospital (AGH) hence the callsign VA3HSP. The coverage test objectives were to determine the quality and feasibility of communicating with the AGH EOC across Lanark County using the AARC digital and analog radio network. The

approach taken was to split the County into areas with defined routes along which the vehicles, equipped with various radios, would travel. Along the routes waypoints were pre-selected and from each one a communication test was carried out with the EOC. Each of the four vehicles was on its assigned route for at least six hours such was the vastness of the area covered. Some roads on the routes were only minimally snow plowed and presented some challenges increasing the time taken to proceed between waypoints.

//
Volunteers Vital to Weather Service During Severe Storms:

Posted: 11 Apr 2013 05:12 PM PDT
http://www.eham.net/articles/30021

With the forecast calling for possible severe weather Thursday, the National Weather Service expects to call on its team of weather spotters. They include Roane County ham radio operator Phil Newman. For 16 years, Newman has communicated to fellow operators around the region and the world. That expertise comes in handy during severe weather, especially since Newman is a trained volunteer weather spotter for the National Weather Service's Skywarn program. "Many times touchdowns or reports of damage do come from weather spotters," Newman said. Meteorologists depend on the spotters to see what radar can't: a view of what's actually happening on the ground as a storm strikes. "They give us the criteria they're looking for with clouds or hail, different things we should look for in severe weather," Newman said.

//
Disaster Preparedness for the Rest of Us: Ham Radios Not Over or Out:

Posted: 11 Apr 2013 05:12 PM PDT
http://www.eham.net/articles/30020

Ever since Marconi was tinkering with wireless transmissions in the early 1900s, people have been fascinated with communicating via the airwaves. Today there are more than 700,000 amateur radio licenses issued to private individuals in the U.S. In Coos County alone there are approximately 300 license holders. Granted, not all of those are active -- some haven't touched their radio in years and some are simply no longer with us. Amateur radio operators (also known as "hams") have played a vital role in disaster response for decades. Groups such as A.R.E.S (Amateur Radio Emergency Services) and R.A.C.E.S. (Radio Amateur Civil Emergency Service) are well established and have good working relationships with other local disaster planners. In Bandon alone there are ham radio stations set up at Southern Coos Hospital, the City Hall and the Fire Department. In the event of an emergency, this equipment is designed to operate free from the electrical grid and would be manned by personnel from A.R.E.S/R.A.C.E.S. Emergency communications networks can keep the local responders informed of developing events, while having the capability of communicating on a global basis. Other cities have similar setups with their amateur radio folks. One might think that making video calls to loved ones all over the planet using Internet technology, such as Skype or Facetime, amateur radio would be

relegated to the dustbin of "last millennium technology." Quite the opposite is true. Over the past five years the Federal Communication Commission reports issuing nearly 25,000 new licenses. Digital radio equipment is less expensive and more powerful than ever before. When an earthquake or similar event could sever fiber optic cables and bring down electrical grids, a battery-powered ham radio can still transmit and receive vital messages throughout the county and around the world. Even to outer space.

//
Large Solar Flare Erupts from Sun Surface:

Posted: 11 Apr 2013 05:12 PM PDT
http://www.eham.net/articles/30019

The sun continues an active solar cycle of emitting coronal mass ejections into space with a spectacular release early Thursday morning. NASA's Solar Heliospheric Observatory (SOHO) captured the eruption of a mid-level coronal mass ejection that was directed toward earth beginning at 3:36 a.m. E.D.T. on April 11th. This solar phenomena often sends billions of tons of solar particles into space at incredible speeds of over 600 miles per second. Earth directed eruptions like this one can cause geomagnetic storms when the particles hit the earth's magnetic envelope for an extended period of time.

SARL NEWS SUNDAY 14 April 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

ICASA COUNCIL APPROVES TWO 5 MHZ FREQUENCIES FOR SARL

IT IS NOT TOO LATE TO BOOK FOR THE SARL NATIONAL CONVENTION

YOUTH SPRINT RESULTS

REGISTRATION FOR THE SA AMSAT SPACE SYMPOSIUM IS NOW OPEN

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ICASA COUNCIL APPROVES TWO 5 MHZ FREQUENCIES FOR SARL

The ICASA Council has last week approved two 5 MHz frequencies for the South African Radio League to carry out propagation research. This is in response to the SARL's application for two channels to collect information about country wide propagation conditions on 5 MHz. The SARL expects the licenses to be issued next week.

The SARL applied for access to 5 MHz in 2010, 2011 and again in 2012. The licences are being issued for an 8 month period at a license fee of R2 900. At the end of the period the SARL can apply for an extension.

In the application the SARL told ICASA that while the propagation of signals are fairly well known for high power broadcasting, there is still quite a lot that can be learned by radio amateurs, especially on "inland" work away from the coastline.

Some years ago the then SOEKOR observed that on the Cape South-coast seawards of Mossel Bay in the late afternoon and early evenings 5 MHz

will provide E-layer propagation for about an hour or two. This also occurred "up and down" the Outeniqua coastline. Propagation modelling showed that the E-layer at those times was between 110 and 80 km above the Earth, much lower than the F layer. As the signal path was much shorter, very strong signals could be obtained with relatively low ERP (effective radiated power). It would be interesting to see how far and wide this propagation mode does actually occur in South Africa.

The SARL is in the process of creating a special webpage for the project. It is planned to schedule transmissions on one channel from various parts of South Africa at various times and radio amateurs will be requested to send in reception reports. The SARL is looking for volunteers in all parts of South Africa to transmit Amateur Radio Today at various times. If you like to be a transmitting station please send your details to artoday@sarl.org.za.

The second channel will be available for individual QSOs. To use the 5 MHz band, it will be required to register with the SARL. Details will be available on the web by next weekend.

There is an item on the WRC15 agenda requesting a permanent secondary allocation for amateur radio in the 5 MHz band. The SARL hopes through its propagation research project to contribute to the body of knowledge and to lobby for support by the delegations of South African, SADC and African Union countries to support the call for the new allocation.

IT IS NOT TOO LATE TO BOOK FOR THE SARL NATIONAL CONVENTION

The closing date for booking for the SARL National Convention is 21 April. No late fee booking fee will be charged. At the AGM the SARL legal adviser will report on the status of the Antenna Defence project and there will a discussion on proposals to change the SARLNEWS transmission to a weekday evening. The SARL will also launch a new standard QSL card available to members and launch the theme for the coming year.

There are still a few places available on the SANSA Hartbeeshoek visit. The SA Amateur Radio Development Trust books store will open during registration and the refreshment break.

The Annual Dinner with its award presentations and guest speaker, Anthony Turton, as well as the lucky number draw for a number of prizes, including an ICOM handheld donated by Radio Accessories and Data Modems, is something not to be missed. Getting you into the mood of a weekend of Amateur Radio is the welcoming event at the West Rand amateur radio club house on Friday evening. Just don't miss the SARL National Convention! Book today!

Get all the details from www.sarl.org.za and from the landing page follow the links, or call Geoff Levey, ZS6GRL, on 082 546 5546.

YOUTH SPRINT RESULTS

The Youth Sprint results have come to hand, here they are. It was a busy miring for many of the participants. The winner of the event is 23 year old Dirk van Vuuren, ZS6DVV, who scored 103 points. Besides the certificate he also wins a 2012 ARRL Handbook. Fifteen year old Mitchell Mynhardt, ZS6YH, took second place with 101 points. He wins a 40 metre Receiver Kit and in third place came Hendrik Veldman, ZU6LD. He is 16 years old and scored 95 points.

The winners of the lucky draw are Eduan Leighton who operated ZS6BNE who will receive an ARRL Antenna Book and Renier de Jager, ZU1K, who will win a SARL Student membership as well as a RTA SDR Kit and CD.

The contest manager, Geoff Levey, ZS6GRL, said that it was a great show and thanks all amateurs who made it possible for young people taking part in the event. For 2014 greater things are in store when the SARL will hold a youth week around mid-February. Stay tuned for more information soon.

REGISTRATION FOR THE SA AMSAT SPACE SYMPOSIUM IS NOW OPEN

Here is another great amateur radio event. SA AMSAT will hold its annual space symposium in Pretoria at the Innovation Hub on Saturday 18 May 2012. The keynote speaker will be by McLean Sibanda, the CEO of the Innovation Hub with the subject "Innovation is everyone's business". The agenda is packed with interesting presentations and demonstrations. The symposium is sponsored by Telkom.

Make your booking now to benefit from the early registration package. Full details and the registration form are available on www.amsatsa.org.za.

SARL and SA AMSAT members enjoy preferential rates. The registration fee includes a CD of all the papers as well as refreshments and a light lunch.

CONTEST NEWS

The SARL Autumn QRP Contest takes place on Saturday 20 April 2013 from 12:00 to 15:00 UTC. The QRP contests are intended to be fun activities to promote QRP operation between radio amateurs. Using homebuilt equipment or operating as a portable / field station and using temporary antennas is encouraged, but is not a requirement.

You may use SSB and CW with 5 watts (PEP) output or less and a station may be worked once per band per mode; there are no antenna restrictions. The first hour is limited to the 40 m band only, the remaining two hours the contesters are free to use any HF (non-WARC) band as they see fit. Comply with the contest-preferred segments as detailed in the general rules. It would be advantageous to use the standard QRP calling frequencies as the starting point.

The exchange is a RS or RST report and Grid locator. Please consider exchanging realistic RS or RST signal reports. Please use the full 6-character grid locator. e.g. KG10xw. If the station's grid locator is

unknown, then use some other means that identifies the station's location: E.g. the name of the closest town or city e.g. Bedford, or 25 km NW of Maseru. With DX contacts the locator information can be omitted, the RS(T) will suffice as the minimum required exchange as per the general rules.

Read the complete rules on page 33 of the 2013 SARL Contest Manual.

The ARRL Rookie Roundup. If you got your license in the past three years, the ARRL Rookie Roundup is for you and 21 April is the SSB edition. Grab a microphone and have a go at it! Thanks to Bruce, WA7BNM, results will be compiled and published automatically on an online web page immediately following the score submission deadline. If you are not a Rookie - find somebody who is and show him or her how to give HF a try! Get all the details at www.arrl.org/rookie-roundup.

The Day of the YLs. For the third time in the world, 'The Day of the YLs' will be held on 18 and 19 May 2013. This weekend is intended to be an on-the-air gathering of amateur radio women around the world and of course, all men are invited to participate. A worldwide meeting that you cannot miss, so please participate! For more information, please visit www.eurao.org/en/node/472.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the strongest solar flare in quite some time took place on 11th April around Sunspot 1 719. Geomagnetic storms can be expected as well as further M- or even X-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 81.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today onwards - Book for the SA AMSAT annual space symposium in Pretoria at the Innovation Hub on Saturday 18 May 2012, visit www.amsatsa.org.za. 18 April - World Amateur Radio Day and ZS9DCC on the air. Operators required, email Geoff to contest@sarl.org.za or call him on 082 546 5546. 20 April - SARL Autumn QRP Contest from 12:00 to 15:00 UTC. 21 April - ARRL Rookie Roundup. April 20-May 1 - Commemorative station PB33BQ on the air, see pa7da.jouwweb.nl/pb33q for more information. 26- 27 April - SARL National Convention, register now, get details on www.sarl.org.za. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 025, and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Great Reception for Trowbridge Radio Club's Achievements:

Posted: 12 Apr 2013 05:09 PM PDT
http://www.eham.net/articles/30027

Members of the Trowbridge and District Amateur Radio Club have won this
year's Radio Society of Great Britain's Region 10 Club of the Year
competition. In the process, the club beat four other clubs from the Region
10 Districts of Oxfordshire, Hampshire, Isle of Wight, East and West Sussex
and Wiltshire. The competition entry comprised a 1,000-word submission,
which highlighted the club's activities and achievement during 2012.

Propagation Forecast Bulletin #15 de K7RA:

Posted: 12 Apr 2013 01:28 PM PDT
http://www.eham.net/articles/30026

With sunspot numbers and solar flux up, geomagnetic indices down,
and it being Spring time, what could be better for HF propagation?
That was the case this week, until Thursday when a magnitude 6.8
X-ray flare and CME erupted, and it seems to be aimed toward Earth.
Expect it to arrive on Saturday, April 13.

2 Metres Counties Contest

The Deadline for the submission of logs for the 2 Metres Counties Contest is Monday 15th April 2013.

IRTS Technical Panel

The IRTS Technical Panel is a group of volunteers who have expertise in, or experience of, different aspects of amateur radio. The e-mail address irtstech /at/ irts.ie is a single point of contact for communicating with the Panel. Our aim is to help radio amateurs with technical or operational problems.

Send your question to irtstech /at/ irts.ie. Provide as much information as possible, including details of attempts already made to deal with the issue in question.

IRTS Committee and Officer Nominations

Members are reminded that the closing date for nominations for the posts of President, Vice President & Committee, under rule 23.2 of the IRTS Constitution is 14 days before the AGM, which is today, Sunday 14th April 2013, under rule 23.3 of the constitution. The list of nominations is in the latest edition of Echo Ireland. If you have any nominations please get them in now.

First for EI5EV

Congratulations to Joe EI5EV who completed the first satellite QSO between EI and Cuba by working Hector CO6CBF on 3 April via FO-29. The distance involved was 6955 km and there was a window of only 66 seconds to establish the contact and pass the necessary reports. The short window means that the satellite was at a very low altitude for both stations and of course Doppler shift is always a problem. They used a feature in the SatPC32 tracking software to determine where exactly in the passband they would be heard and it worked exactly as predicted. FO-29 is a mode J transponder with the uplink on 2metres and the downlink on 70 cms. This was quite an achievement given the very narrow time window so well done to Joe and Hector.

Cork Radio Club on Brow Head for Marconi Day 2013

Cork Radio Club members will be QRV for 24 hours on Saturday, 20 April as Ei5IMD from Brow Head near Crookhaven in West Cork for this year's International Marconi Day activation. Two stations are planned, one CW and the other SSB, and maybe a third operating PSK31. Bands to be covered will include 80 through 10 meters including WARC bands, and operations will be from the AREN command trailer. Ei5IMD is an award station acknowledged by the IMD sponsors as operating from the actual site of a former Marconi station. Information about Brow Head and its Marconi history can be found on the Ei5IMD page on QRZ.com. Parking is tight on top but all are welcome to visit operations on the day.

North Cork Radio Group

The North Cork Radio Group would like to thank Dave EI6AL and the IRTS for offering us the use of the EI13CLAN callsign over the period 28th March - 7th April. Our members had great fun with the call and it was highly in demand with our DX counterparts. We operated both voice and data modes on all bands and made some great contacts. We will miss the pile ups created by it.

NCRG also wish to thank those of you who contacted us at our recent activation at Ballynamona Beach on the 18th March, we had great fun and many an antenna was assembled and tested. We will be active from Mizen Head Visitors Centre for Marconi Weekend being 20th - 21st April using the callsign EI0IMD. We are one of the listed stations for the Marconi Award for those of you wishing to collect it.

Finally, the Group will also be operating a new callsign EI75GP for the upcoming event of the celebration of the 75th anniversary of the Cork Grand Prix which is to be held on 22nd - 23rd June 2013. We will also be active for another new initiative involving Fort Camden and the "Rescue Camden" effort, which aims to help in the restoration and development of Fort Camden, Crosshaven, with our members active through the months of June - September 2013, as well as taking part in the ILLW (Lighthouse & Lightship) weekend in August using the reference IE0010 from Roches Point. More details in relation to these activations will be available nearer the dates

---

Cork Repeater Group

The Cork Repeater Group AGM will be held at the SMA Community Hall Wilton on Tuesday night April 16th, 8pm. Everyone are welcome.

RSGB Centenary AGM

The Radio Society of Great Britain Centenary AGM will be held at 12.00 noon on 20th April, IET, Savoy Place, London.

DX News

Two Japanese operators, Shoji JA7HMZ and Kei JA7GYP, will be QRV from Micronesia from 15-20 April . They will be on Pohnpei Island and use the callsigns V63DX and V63T. Activity will be on all bands 40 - 10m. QSLs go via the home calls.

Hans DL6JGN and Guenter DL2AWG will activate Nukunonu Atoll in the Tokelau Islands from 15-30 April. They will use the call ZK3N and be active on CW, SSB and RTTY. This one counts as OC-048 for the Islands on the Air Award.

DXers will remember contacting Bodo 5N0OCH during 2009 when he was working in Nigeria and again as 5N7Q in 2011. His home call at the time was DL3OCH but he has since received the German call of DF8DX. He plans to be active as 5H1DX from Tanzania later this month. During his time there he will operate from Pemba Island AF-063 and Zanzibar Island AF-032. Main activity will be on CW on the IOTA frequencies.

Prefix hunters will be interested to work XR86PL. This station is QRV from Chile until 30 April. It marks the 86th Anniversary of the Chilean Police. QSL Manager is CE3ETE.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1108
BID: $OPDX.1108
April 15, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, WP3GW, N4AA & QRZ DX, N4JF, KH6BZF, W6VW, K8GI, K8YSE, W8GEX & 60m News, K9GY, W9ILY, K0IR, 9M2PJU, 9M6DXX, AT International, DK8JB & The DX News Letter, DL1SBF, DxCoffee.com, DX-World.Net, EA3BDE, ES1CW, F5JYD, F5NQL, F6AJA & Les Nouvelles DX, Green Russia, HA0HW, HP1AC, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK2XDE, JQ2GYU, ON4ZD, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, PY4WAS, RSGB IOTA Web Site, Sixitalia Weekly, UN6QC, VA3RJ & ICPO, VE1BVD, the VHF-DX-Portal (MMMonVHF) and YO3JW for the following DX information.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 7th-April, through Sunday, 14th-April there were 229 countries active. Countries available: 3A, 3B8, 3B9, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5V, 5W, 5Z, 6W, 6Y, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JY, K, KH0, KH2, KH6, KH9, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ5, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VP2E, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZL, ZL9, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5H, TANZANIA. NODXA member Byron, KF8UN, will be active as 5H3BB from here between August 2-20th. He will be there on a safari with his YL

Sandy, K8FUN. Activity is possible on 40-15 meters, but mostly 20 meters and on SSB with some CW. He will use an IC-706 into a mag mount vertical and/or dipole. QSL via his home callsign direct.

5T1, MAURITANIA (Special Event). Look for Jean, 5T0JL (ON8RA), to be active as 5T1FOC during the month of May. Activity is to celebrate the 75th anniversary of FOC (First Class CW Operators' Club). The special license was issued by the l'Autorit&#65533; de R&#65533;gulation, National Council of Regulation in Mauritania (ARE) on March 10th. For more details on the FOC, visit: http://www.g4foc.org
There will be other special FOC callsigns on during the month of May, as well as a special award available. See the Web page above for more details.

8Q, MALDIVES. Jim, G3VDB, will be once again active as 8Q7EJ, but this time from Komandoo Island (AS-013) between May 13-26th. Activity will be holiday style mainly on 20 meters using CW and SSB. QSL via his home callsign. The 2009/2010/2011/2012 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

9H, MALTA. Operators Olaf/DL4HG and Holger/DL5XAT will once again be active as 9H3OG and 9H3TX, respectively, from Gozo Island (EU-023) between November 17-25th. Activity will be on the 30/17/12 meters using CW and RTTY. Operations will also include the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry using the callsign 9H3TX. QSL 9H3OG via DL4HG, by the Bureau or direct. QSL 9H3TX via DL5XAT, by the Bureau, direct or LoTW.

A3, TONGA (Update to OPDX.1107). As mentioned last week, Masato "Masa", JA0RQV, a member of a DX group in region zero of JA known as JA0-DX-GANG, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan govern-ment, so look for him possibly every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. QSL via his home callsign, by the Bureau or direct. For more info, see OPDX.1107 or visit Masa new Web page at: http://www.sato3.com/a35jp/index.html

AFRICAN TOUR. Roger, LA4GHA, is now in Africa on work assignment for the United Nations Office on Drugs and Crime (UNODC) in East Africa, until December 2014. He has been active as 5Z4/LA4GHA from Nairobi, Kenya, and is expected to be active as 6O0LA sometimes from Garowe, Somalia. Activity will be on 160-10 meters using CW, SSB and the Digital modes, as time permits. QSL via LA4GHA, by the Bureau or direct.

CQMM DX CONTEST/2013 (Reminder)! Ed, PY4WAS, CWJF President, wants to invite everyone to participate in the CQMM DX Contest which is held April 20-21st. For more details, see: http://www.cwjf.com.br

CT9, MADEIRA ISLANDS. Operators Costantino/IW2NXD and Antonio/IK2ZJR will be active as CT9/homecall from Madeira Island (AF-014) between May 12-20th. Activity will be "holiday style". If time permits, they will operate CW, SSB and PSK31. QSL via the Bureau to their home callsign.

EE8, CANARY ISLANDS. Luis, EA8AY, will be active as EE8X from Tenerife Island (IOTA AF-004, DIE S-012, WLOTA 1276, EAA TF) during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-band entry. QSL via W2GR. Visit his Web site at: http://www.ea8ay.com/ef8x2/index.html

EG3, SPAIN (Special Event). Members of local section of URE (Union Radioaficionados Espa&#65533;oles) in Tarragona, together with the Radio Club del Tarragones, will activate the special event callsign EG3FTV between May 13-26th. Activity will take during the "Festival Tarraco Viva" (see <http://www.tarracoviva.com>). QSL Manager is EA3BDE. QSL via Bureau.

FT5Z, AMSTERDAM ISLANDS. The Amsterdam Island DXpedition Web site is now active and available on-line at: http://www.amsterdamdx.org

IDXC 64TH (VISALIA CONVENTION) NEWS (IOTA Dinner News Flash). Rick, K6VVA, reports: "For any folks making late reservations for the Visalia DX Convention, there may still be a few a few seats left for 'walk-ins' at the IOTA Dinner on Friday evening, April 19th. Tnx to Phil Parton (National Sales Manager) and Kenwood Communications, I am thrilled to announce that the Grand Prize for the IOTA Dinner Raffle will now be a new Kenwood TS-480HX (200 Watt) TXRX. This is the perfect IOTA Expeditioner rig, and I now carry two of these on all my IOTA Expeditions. Having the extra 3dB signal gain from a 200 Watt radio can sometimes make the difference between a QSO being made or not when it is not possible to take along an amplifier."

IOTA NEWS.............
AS-073. Members of the Malaysian Special Expedition Team will be active as 9M2SE from Perhentian Besar Island between May 1-3rd, to promote Malaysia's beautiful island and also IOTA activities. Operators mentioned are Piju/9M2PJU, Khairul/9M2KRZ, Rizal/ 9M2RDX and their special guest from Poland, Jacek/SP5APW. Jacek will continue to operate until May 7th, as 9M2/SP5APW. Their operating equipment will be two 100 watts transceivers, a vertical antenna and a tribander yagi. Activity will be on 40-10 meters using CW, SSB and the Digital modes. For QSL information, please read info carefully on QRZ.com. ADDED NOTES: The Perhentian Islands (Pulau Perhentian in Malay) lie approximately 10 nautical miles (19 km) off the northeastern coast of West Malaysia in the state of Terengganu, approx- imately 40 miles (64 km) south of the Thai border. The name "Perhentian" means "stopping point" in Malay, referring to the islands' traditional role as a waypoint for traders between Bangkok and Malaysia. The islands were sparsely inhabited by fishermen for centuries, although tourism now accounts for most economic activity. The Perhentian Islands appear on many maps of the nineteenth and twentieth century as 'The Station Islands'. This arises from the British colonial period, as an English translation of "stopping point".

EU-068. Members of the Charente DX Group (CDXG) will be active as TM0SI from Ile de Sein between April 27th and May 4th. They will operate on CW, SSB and the Digital modes on 80-10 meters.

Operators mentioned are Eric/F5LOW, Laurent/F5MNK, Alain/F6ANA,
Bertrand/F6HKA and Leon/ON4ZD/OS0S. All QSOs will be confirmed
automatically via the Bureau. QSL route for direct cards are
via F5LOW. A log search will be available on ClubLog.

EU-088. Operators Harry/PA1H and Nico/PA7PA will be active as OZ/homecall
from Laeso Island (DIA NK-003, WLOTA 2820) between now and April
26th. Activity will be on 80-10 meters, if possible also on 160m,
using SSB and the Digital modes. QSL via his home callsign,
direct or by the Bureau.

EU-127. German operators have once again activated the special callsign
DM50IOTA from Neuwerk this past week between April 12-14th.
This opertaion also counts for the World-Wide Flora and Fauna
(WWFF) as DLFF-005 and for lighthouse chasers as ARLHS FED-165.
QSL via DL2VFR, by the Bureau or direct. For more details and
updates, visit the Web site at: http://www.iota-expedition.com
ADDED NOTE: This is the fourth German Island group activated by
DM50IOTA during the 50th IOTA Marathon. DM50IOTA will activate
all German IOTAs during that time. If you have worked DM50IOTA
from all German IOTA by the end of 2013, you can apply for a
special award.

EU-136. Three Hungarian operators will once again activate Rab Island
(CI-096), Croatia, starting on April 21st, signing 9A/homecall.
Operators mentioned are Pista/HA5AUC, Karl/HA7PC and Ed/HA5BWW.
They will stay there for a week and operate on the HF bands
and 6 meters using mainly CW. Their rigs are an IC-746 and
IC-756PRO with vertical antennas and a FD-4. QSL via the HA
Bureau or direct.

OC-186. Only a few more days to work YB3MM/2 (Adhi) and YB2TET/P (Teti)
from Karimunjawa Island. They are expected to go QRT on April
16th. Activity is between 1700-0600 local time on 15 meters
SSB using low power and a ground-plane. QSL via IZ8CCW.

J8, ST. VINCENT. Brian, GW4DVB, will be active as J8/G4DVB from Palm
Island (NA-025) between now and April 20th. Activity will be on 80-6
meters using a Elecraft KX-3 and HLA300 amp into a HW-40HP dipole. QSL
via GW4DVB. For more details, see the Web site at: http://www.g4dvb.co.uk

KP2, U.S. VIRGIN ISLANDS. Yuriy, N2TTA, will once again be active as KP2MM during the CQWW WPX CW Contest (May 25-26th) and the CQWW DX CW Contest (November 23-24th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW. For more details, see: http://www.n2tta.info

KP4, PUERTO RICO. Members of the Puerto Rico Field Day Group will be on the air April 18th to celebrate "World Amateur Radio Day 2013" from the Municipal Emergency Management Agency of the city of Cata&#65533;o, to make echo of this year's theme: "Amateur Radio: entering its Second Century of Disaster Communications". They will use the callsign KP4FD on the HF bands. Confirmations will be via LoTW and there will be an electronic certificate per request. More info on QRZ.com.

MJ, JERSEY. Kazunori, M0CFW/JK3GAD, will be active as MJ5Z during the CQ WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via LoTW or via M0CFW. Look for activity before and after the contest using the callsign MJ0CFW.

MJ, JERSEY. A Belgium team will be active as MJ/OT9Z from the "Jersey Amateur Radio Society" (JARS) Headquarter on Jersey (EU-013) between August 2-9th., 2013. Activity will be on all HF bands and 6 meters using CW, SSB, PSK and RTTY. They plan to have two stations on during the day (Not at night but late in the evening). Operators mentioned are Frederik/ ON8ZL (Team Leader, CW/SSB/6m), Peter/ON8ZZ (PSK/RTTY) and Frank/ON5NQ (SSB). QSL Manager is ON8ZL. For more details, see: http://dxpeditionchannelislands.weebly.com

NH0, MARIANA ISLANDS. Operators Yutaka/JQ2GYU/WS2Y and his wife Miho/ JJ2VLY/WS2M will be active as NH0J from Tinian Island (OC-086), Northern Mariana Islands, the special commemorative Tinian station of the "J-Tinian Radio Space Club, between April 27th and May 1st. Activity will be on 80-10 meters including the 30/17/12 meter bands, using CW, SSB and RTTY. QSL via JJ2VLY, direct (SAE + 2 USDs) or by the Bureau. Please don't send your QSL request to Tinian Island. For more details and updates, see: http://jq2gyu.blogspot.jp

VP2V/KE2VB QSL/LoTW STATUS. Rex, NR6M, reported on April 7th: "QSL cards for VP2V/KE2VB arrived yesterday. All QSL request I have received will be in Monday's, April 8th, outgoing mail. Also logs have been uploaded to LoTW. I am looking for more DX stations to manage."

QSL RECEIVED VIA LoTW: CT8/PA4N, CU2CE, DL3GD, EH7H, HZ1SK, JA1LZR, T2T, T46RRC, T48RRC, V31WA, VE3VHB, VK9CZ and Z21BB

QSLS RECEIVED VIA MAIL: 3D2MF, 4L8A, 5B8AD, A5A, A63HI, CT9/DL5AXX, CW5X, E51E, E51WL, EX/UA4WHX, EY8/UA4WHX, HA30S, HC2/UA4WHX, HG1S, JX5O, L22D, LX1HD, T6LG, TT8TT, UK/UAWHX, VP2V/KE2VB, VP8ROT, YB26SEAG and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 3D2OP, 3D2OU, 3D2RO, 4L1FP, 5Z4HW, 9L0W, 9U4U, B3C, CP8/DF7NX, CT3/DF8AA, EA8/DF8AA, EA8/DK5AN, EP3SMH, HI3EPR, HU2DX, I2VRN, J6/DL7AFS, J79ZG, JW/DF8AN, JW/LZ2HM, JY8VJ, LX0SAR, TC3A, TJ3AY, VU3SIG, YB8Y, Z38Z, ZV2HQ and ZV13HQ

R40, EUROPEAN RUSSIA (WAO and RAO Ops). A group of Russian operators will activate the special callsign R40AST during a complex WAO, RAO and TV DXpedition in the Astronomical Observatory of the North Caucasus. Activity will take place between April 18-22nd, in celebration of the 40th anniversary of the "International Day of Astronomy" (April 19th), one of the oldest scientific disciplines of the Earth, in the framework of the world diploma program Astronomical Observatories (WAO) and National diploma program Astronomical Observatories of Russia (RAO) from the following Astronomical Observatories of the North Caucasus:
April 19th - Remote astronomical Observatory of the Scientific Centre (Ka-Dar); RAO-041.
April 19th - BTA (Big Telescope Alt-Azimuthal); RAO-007.
April 20th - Caucasian mountain Observatory astronomical Institute, Moscow University; RAO-042.
April 20th - Radio astronomy Observatory, (Zelenchukskaya); RAO-027.
April 20th - RATAN-600 - Special astrophysical Observatory; RAO-011.
April 21st - North-Caucasus astronomical station KFU; RAO-028
April 21st - Station optical observations of the satellites of the Earth (Arkhyz); RAO-044.
April 22nd - The Kislovodsk mountain astronomical station; RAO-022.

Operations will be on various HF bands using CW and SSB. Watch around the WFF frequencies. Operators mentioned are Oleg/UA6GG, R7TU, Andy/RN7G, Yuri/RA6EE, Andrei/RK7A, Oleg/R3FA, Valery/RW3GW and TV-operator. Awards are available with 5 QSOs with different RAO expeditions making it possible to automatically fulfill the terms of the WAO EU 3 class (5 QSO, more details: at <http://www.wff44.org/program/wsp/wao/rules>) and RAO class 3 (5 QSO, more details <http://www.greenrussia.travel/RAO>). You may receive an e-Diploma for WAO and RAO. The expedition will be filmed for a documentary (Green Russia) showing the participation by radio amateurs. A special QSL can be obtained via UA6GG (direct, by the Bureau or Green LogSearch).

SILENT KEYS.....
VE1AL - Alan Leith, became a Silent Key (SK) on the afternoon of April 11th, of an apparent heart attack. His daughter found him when she came home from work in his shack. Al achieved the ARRL DXCC #1 Honor Roll before North Korea (P5) was added to the DXCC list, but was waiting for a chance to work that elusive P5. He had 334/353 confirmed on the ARRL DXCC Mixed standings. Col, MM0NDX, states, "CY9M 2012 would not have happened without Al's enthusiasm and help. All the team is shocked and saddened at Al's passing. On behalf of the CY9M team, it was a pleasure to meet Al and spend some time with him."
See: http://www.cy9m.com/al-leith-ve1al-silent-key

VK6HD - Mike Bazley became a Silent Key (SK) on April 12th, after a long fight with cancer. He was noted for being many station's first 160 and 80 meter contact. Mike was the top Australian operator on the current DXCC Honor Roll.

OPDX and its readers would like to send out our deepest sympathy to the family and friends of the above mentioned.

TM114, FRANCE (IMD Op). Look for the Marconi special event station TM114M to be on the air during the weekend of April 20th. The station is celebrating the 114th anniversary of the first wireless radio link between Wimereux, France, and South Foreland, England, on March 27th, 1899. QSL via F5JYD, by the Bureau or direct.

TO4, MARTINIQUE (IPA Op!). Operators Paul/FM5AM, Jean-Baptiste/FM5GI, Valere/FM5CW, Claude/FM5CY and Henri/F6FLO (all members of the International Police Association [IPA]) will use the special callsign TO4IPA from St. Pierre between April 18th and May 2nd. Activity will be on CW, SSB, RTTY and PSK. QSL via HA3JB. QSOs are valid for IPA Award.

UP44, KAZAKHSTAN (WFF/UNFF expedition). Members of the "Traveling Radio Amateurs Group" plan to travel to the area of Tian-Shan Astronomical Observatory between April 20-21st. During the group's expedition, they plan to take part in the "International Astronomy Day" celebration and activate the following reference numbers as UP44WFF:
•WAO/UNAO-01 - Tien-Shan Observatory (2700 m)
•WMA/UNM-037 - Tien-Shan Observatory (2700 m)
•WFF/UNFF-005 Ile-Alatau national Park

•KDA: Q - 13 (Talgar region)
•WW Loc.: MN83LB.
Operators mentioned are Arthur/UN6QC, Sergey/UN6GAO and Victor/UN7GIT.
Activity will be on 40-10 meters including the WARC bands using SSB and
the Digital modes. Suggested SSB frequencies are: 7144, 14144, 14244,
18144, 21244, 24944 and 28544 kHz (+/- QRM). Digital frequencies will
be on the "Band Plan 1 Region". QSL via info and details on special
awards is available on QRZ.com.

VE3, CANADA (CISA Op/OQP). Team VE3ZF will be active from Twilight Island (CISA ON-018), Manitoulin Island district, on April 20th and 21st, in the Ontario QSO Party. The team will consist of Pat/VE3HZQ, Ron/VE3NDI and Igor/VE3ZF. QSL via the Bureau or direct. Rules for the Ontario QSO Party contest are posted at: http://cco.ve3xd.com/oqp/rules.htm

VP2E, ANGUILLA. Operators Rich/KE1B and YL Anna/W6NN will be active as VP2EAQ and VP2EAR, respectively, from Anguilla between May 9-16th. Activity will be "holiday-style" using a single station with 100w and a Buddipole antenna system directly adjacent to the sea. Operations will be on all bands 40-10 meters (including 30/17/12m), and all modes (CW/SSB/RTTY). They expect to have Internet access, and plan to upload logs to ClubLog daily. You can check your QSO status and request a QSL card via the Online QSL Request System (OQRS). Direct QSLs are via their home callsign (see QRZ.com for details).

VQ9/VQ93/VQ975, CHAGOS (Special Event). Jim, ND9M, is once again active as VQ9JC from Diego Garcia until sometime in July. He is expected to use the special callsign VQ975FOC during the month of May to celebrate the 75th anniversary of the FOC (First Class CW Operators' Club). Also, look for Jim to be active as VQ93JC between June 22nd and July 7th. He usually activates a unique/special prefix each year (last year it was VQ92JC). As mentioned several months ago, Jim is operating Field Day style from a recreational park using a FT-857 at 100 watts to a dipole at a height of 10 meters because the VQ9 club station has been shut down. Jim reports that he has to set up the station each time and then break it down each day which further limits his operating time typically to 1230-1615z on most days. Sometimes he is on Fridays starting as early as 0830Z. QSL via ND9M.

WARD CERTIFICATE (Free!). For those who participate during the "World Amateur Radio Day" on April 18th, 2013, and make a minimum of 200 QSOs, can obtain a certificate. It is issued free of charge if requested in electronic format (pdf). To get this certificate, you must send by May 18th, 2013, a log in ADIF format with 200 QSOs to: fenyo3jw (at) yahoo.com More info is available at: http://wff-yo.blogspot.com

XW, LAOS. Steve, 9M6DXX, informs OPDX that a multi-national, multi-operator, DXpedition to Vientiane, Laos, is being planned for September 6-16th, 2013. Team members are Steve/9M6DXX, James/9V1YC, George/EA2TA, Christian/EA3NT,

Raul/EA5KA, Vincent/F4BKV, Don/G3XTT and Col/MM0NDX. They plan to operate five stations from 160-6 meters using CW, SSB and RTTY. A Web site is

currently under construction and will be available soon. The callsign
and more details will be announced later.

ZK3, TOKELAU (Reminder). Operators Hans/DL6JGN and Guenter/DL2AWG will be
active as ZK3N from Nukunonu Atoll (OC-048) between April 15-30th. Activity
will be on 80-10 meters using CW, SSB and the Digital modes. They will be
using a TS590 with a Tokyo Hy-Power solid state amp; K3 with a 500 watt
solid state amp; AV640 and Tripod Leg for 40-10 and GP for 80m. QSL via
DL2AWG. Subject to a reliable Internet connection, they will upload their
log to ClubLog on a daily basis. Otherwise, the complete log will be
uploaded upon their return. There is a ZK3N Web page available at:
http://www.tokelau2013.de

ZS8, MARION ISLAND (More Ops Possible). Operators Carson/ZR6CWI (ZS8C)
and David/ZS1BCE (ZS8Z) reportedly have departed Cape Town on April 10th,
to head to Marion Island. It was announced this week that there may be
two more operators onboard the ship to Marion. Nadia (Carson's girlfriend)
and Marius (the team's diesel mechanic) are writing to the "Independent
Communications Authority of South Africa" (ICASA) for a RAE (Radio Amateur
Examination) to obtain a licence. Pierre, ZS1HF/ZS8M, has arranged with
the South African Radio League (SARL) to invigilate ['proctor'] the exam.
This means there will eventually be four active hams on Marion Island
during the next year. Carson and David are expected to be active around
mid-May once the ship departs with the old team back to Cape Town. As
mentioned in previous bulletins, activity will be on 40-10 meters (NO
160/80m) using mainly SSB and the Digital modes. QSL Manager is ZS1HF.

F. Gardiner Pearson, Research Chemist, W3IM (SK):

Posted: 13 Apr 2013 05:13 PM PDT
http://www.eham.net/articles/30028

F. Gardiner Pearson, 98, of Strafford, a longtime research chemist and amateur radio enthusiast, died Wednesday, April 3, of a heart attack at home. Born in 1914 in the Philadelphia suburbs, Mr. Pearson graduated from Episcopal Academy and Haverford College and in 1941 earned a doctorate in chemistry from the University of Pennsylvania. bAfter graduation, he was hired as a research chemist for the American Viscose Corp., in Marcus Hook, which was later absorbed by FMC Corp., a chemical manufacturing company in Philadelphia. The pastime that most fascinated him, however, was amateur radio. He preferred "continuous wave," a mode of communication in which the operator interrupts a continuous transmission with "dits" and "dahs." He became so skilled in sending and receiving Morse code, that he qualified for his extra class license and membership in the Society of Wireless Pioneers.

Tarcfest Tampa ARC. Ham Festival Saturday April 20

Posted: 12 Apr 2013 01:43 AM PDT
http://forums.qrz.com/showthread.php?387324-Tarcfest-Tampa-ARC-Ham-Festival-Saturday-April-20&goto=newpost

Tampa Amateur Radio Club Set up for tailgaters begins at 7:00am and trading opens up at 8:00am for the buyers. The tailgate runs usually until about 1:00pm or until the last lie is told or last boat anchor sold.

All are welcome.

This will be the spring edition of our tailgate and each one has been fun and exciting. Each TARCFest continues to get bigger with record numbers of sellers and buyers. This April the traders will once again gather under the shade trees at the clubhouse to wheel and deal.

Admission will be $3 per person with children 12 and under free. Those who wish to set up for tailgating will be charged an additional $3. Plenty of spaces will be available in the tailgate area for sellers. And of course, free parking for the buyers. There are a limited number of spaces inside with indoor tables at $15.00 in advance. For table reservations or for further information, please contact:

WWW.hamclub.org

We look forward to the same big crowds we had last TARCFest and, as always, hamburgers, hot dogs, specialty sandwiches and liquid refreshments will be available throughout the morning.

Come for the fun, come for the deals. Come to TARCFest!

Directions: From I-4 Take the Hillsborough Avenue (US 92) exit west to 22nd Street and turn North on 22nd Street, AROC is located at on the right at the end of 22nd Street.

From I-275 take the Sligh Avenue exit east to 22nd Street and turn North on 22nd Street, AROC is located at on the right at the end of 22nd Street.

From I-75 take I-4 west to Hillsborough Avenue (US 92) exit west to 22nd Street and turn North on 22nd Street, AROC is located at on the right at the end of 22nd Street.

GB2RS NEWS

Sunday 14th April 2013

The news headlines:

World Amateur Radio Day

New RSGB website to go live

GU100RSGB on the air later this week

On 18 April, World Amateur Radio Day celebrates the forming of the International Amateur Radio Union (IARU) on 18 April 1925. This year the theme is Entering Its Second Century of Disaster Communications. This commemorates the first known use of amateur radio in a disaster situation when, in March 1913, the Scioto River in Columbus, Ohio flooded its banks, killing more than 100 people. According to local newspapers, Herbert Akerberg, a 15-year-old from Hilltop, Ohio used his home radio transmitter to send SOS calls via Morse code for nearly 72 hours. His actions were highly commended by the city authorities and his achievement widely heralded over the country as a new contribution to the comparatively new science of radio.

After almost a year of planning and building a new site by a small team led by Alan, G0TLK, we are pleased to announce the new RSGB site will be going live at the end of this week at www.rsgb.org. It's not yet complete and development work will continue. We need authors, particularly for the technical section, and good quality pictures. If you want to help please contact the RSGB General Manager, Graham Coomber, G0NBI by e-mail at graham.coomber@rsgb.org.uk.

G100RSGB, the special event callsign celebrating the RSGB Centenary, stays in Region 11 again this week. Today, 14 April, Torbay ARS are running a 24 hour HF station in Newton Abbot using SSB, digital modes and FM. Monday sees Taunton & District ARS running CW and SSB on the 10 to 40m bands. Tuesday the callsign moves to Sidmouth where Norman Lockyer Observatory will be running HF, 6m and 70cm using SSB, PSK31 & ROS. Wednesday sees Exmouth ARC putting the callsign on the air. On Thursday 18 April, West Devon RC will be running CW and SSB on 70cm, 2, 6, 10, 20 and 40m from Plymouth. Friday 19 April and Riviera ARC will be on the air from Torquay using the 2, 10, 12, 15, 17, 20, 40 and 80m bands on CW, SSB, PSK and SSTV. Next weekend, 20 and 21 April, the callsgin moves to Guernsey and changes to GU100RSGB. The club will be on the HF bands as well as 6m to 70cm using SSB, RTTY, PSK, Satellite, WSJT and SSTV. Details of how to get your QSL card are on the website,

www.rsgb.org.uk.

On Thursday, the RSGB gave a presentation to staff at Ofcom entitled the RSGB's first 100 years. It celebrated the history of the Society, its relationship with the regulator and what amateur radio can achieve in today's world. After the talk, which was presented by Jim Lee, G4AEH, Ofcom's Head of Business Radio, Paul Jarvis, thanked the Society for the presentation and said it showed the amateur hobby in an excellent light.

On Tuesday 9 April, the count took place for the re-establishment of the RAIBC committee. The ballot was overseen and conducted by the RSGB. Brian Tuffill was elected Chairman and Terry Baldwin was appointed equipment manager with Mr Maunder and Mr Watts elected as Committee Members. The count was conducted by Carlos Eavis, G3VHF and Mark Allgar, M1MPA from the RSGB staff and an independent scrutiniser Bill Pyle, G8IAY. The RAIBC were represented by Terry Baldwin who took no part in the count process.

The latest Region One IARU Monitoring System newsletter reports a Russian over the horizon radar has been transmitting between 3.555 to 3.590 and 3.750 to 3.785MHz. The signal is always 35kHz wide with its location believed to be in the area of Makhachkala in the Caspian Sea. A letter has been sent to the Russian Radio Society asking for assistance in ending the operation of this radar system. An Iran based over the horizon radar has been interfering with amateur radio operations on the 10m band. This radar is on the air daily on 28.000 to 29.700MHz transmitting bursts that are 60kHz wide. The splatter from the signal often covers spectrum 500kHz or more in bandwidth. The German Department of Post and Telecommunications has sent an official complaint to its counterpart in Iran. The Dutch Datawell buoys are still operating illegally on 10 meters. If you happen across signals in the amateur radio bands that you know do not belong there, please send a report to the Intruder Watch Coordinator for the nation that you live in, see www.iaru-r1.org for more information.

The Hurdy Gurdy Museum of Vintage Radio will be celebrating International Marconi Day and the tower will be open from 11am to 4pm. The callsign will be EI0MAR. The tower was the site for an experimental Marconi Station in 1905. All visitors are welcome, licensed amateurs, SWLs and anyone with an interest in radio. The museum is located in the Martello Towel, Howth Harbour, Fingal, County Dublin.

And now for the details of rallies and events for the coming week

A WW2 Air Forces Radar Reunion will be held at Blackpool from Friday, 12 April to Monday 15 April. Operators, mechanics, filter room and airbourne radar visitors welcome. Day visitors are also welcome. For further details please contact Jim Ward, G0DGG, 17Valley Walk, Croxley Green, Rickmansworth, Hertfordshire WD3 3TA.

On 21 April, the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames TW16 5AQ.

Doors open at 10am and there will be trade stands, a Bring & Buy and special interest groups Details from Paul, M0CJX on 08451 650 351.

On 21 April the RADARS Rally And Surplus Equipment Sale will be held in The Hugh Ripley Hall, Ripon, North Yorkshire HG4 2TP. Doors open at 10.30am and entry is ?2. There will be trade stands and a Bring & Buy. Details from rally@ripon.org.uk.

Now for the news of special events

Gordano Amateur Radio Club will be operating GB5IMD, an International Marconi Day special event station, on all bands from 10 to 80m from Flat Holm Island in the Bristol Channel on 20 April. On the 19th and 21st the club will be operating as GW0GRG/P.

Telford and District Amateur Radio Society will be operating from the old Marconi receive only station at Tywyn, on the west coast of Wales, on 20 April. Using GB100TMD they will be on the air from 0001 until 2359UTC on all bands from Top Band to 28MHz using both SSB and CW. They will also be using CW only around 474kHz. Visitors are welcome and may operate too. For more details contact Simon Taylor, 2E0CHV on 01588 673053, evenings only.

Cleddau ARS will be operating a special event station, GC0SYG/MM, from on-board the Stena Europe Irish Sea ferry in memory of the 101st Titanic remembrance weekend until 2359UTC on 14 April. The ferry will travel between Fishguard in Wales and Rosslare in Eire and the station will operate on 40m and 20m primarily using CW and SSB with and some PSK31. Spots will be made via clusters.

The Radio Society of Harrow will be running GX3EFX and displaying period radio equipment at the 1940's Family Experience Weekend on 14 April at the Lincolnsfield Centre, Bushey Hall Drive, WD23 2ES.

On Saturday 20 April, Halifax & District Amateur Radio Society will be running a special event station during the St George's Day Youth Festival in the Piece Hall, Halifax. The callsign GB4HPH will be active between 10am and 4pm on 40m. It is also hoped to activate the callsign on Friday 19th on 2m. QSL cards will be issued via the RSGB's QSL bureau only if requested.

On 20 April, Southport and District Amateur Radio Club will be operating an International Marconi Day special event station under the club callsign G2OA on various HF and VHF bands using CW, SSB and FM. The station will be located at the club house in Scarisbrick. Visitors are very welcome to attend and for directions see www.sadarc.org.uk.

And now the DX news compiled from 425 DX News and other sources

Rob, J6/N7QT and Frans, J69DS will be active from St Lucia, IOTA reference NA-108 until 16 April. They will operate CW, SSB and RTTY or PSK on the 10 to 80m bands with field portable activity and lightweight antennas from beaches or mountain tops. QSL J6/N7QT via his home

callsign either direct or via the bureau, LoTW and eQSL and QSL J69DS direct only.

Brian, GW4DVB will be active as J8/G4DVB from Palm Island, which is IOTA reference NA-025 until 20 April. [

The ZK3N DXpedition to Tokelau has been brought forward and Hans, DL6JGN and Guenter, DL2AWG will now be active on 15 to 30 April. They will operate CW, SSB and digital modes on the 10 to 80m bands. QSL via DL2AWG.

Maurizio, IK2GZU will be back in Tanzania until 8 May. He will be working on electrical installations in the local hospital and orphanage. In his spare time he plans to reactivate his 5H3MB callsign. QSLs go via his home callsign.

Mario CT1FTR will be in Khartoum, Sudan until June. He is signing ST2FT.

Rick AI5P is off to the Caribbean and will first visit Dominica until 20 April. While there he will use the callsign J75PX. Then he travels to Martinique until 30 April where his call will be TO5PX. QSLs are via his home callsign.

Now the contest news

On 16 April the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

The data leg of the 80m Club Championships takes place on 18 April from 1900 to 2030UTC. The exchange is signal report and serial number.

The Spring EU Sprint Contests SSB leg takes place on Saturday 20th. Running from 1600 to 2000UTC on the 3.5 to 14MHz bands, the exchange is both callsigns, serial number and name. Note there is no signal report in this exchange.

On Sunday 21st the second of five UK Microwave Group Low Band contests takes place between 1000 and 1600UTC. The bands for this one are 23cm, 13cm and 9cm and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 5th to Thursday the 11th of April compiled by Neil Clarke, G0CAS on Friday the 12th of April.

During the period many sunspot groups were visible with up to ten groups on the 5th, some of these groups were large and looked rather threatening. Right at the start of the period, an impulsive M2 solar flare took place and then, at the end of the period, a much larger M6 solar flare occurred. An Earth directed coronal mass ejection was associated with this flare. Solar flux levels increased from 134 units on the 5th to 148 by the 10th. The average was 140 units. The 90 day solar flux average on the 11th was 113 units, that's one unit down on

last week. X-ray flux levels increased from B3.6 units on the 5th to B7 by the 10th. The average was B5.1 units. Geomagnetic activity was quiet everyday with an average of Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase erratically from a slow 250 kilometres per second on the 5th to 500 by the 11th. Particle densities were low everyday except for the 10th, which increased to 20 particles per cubic centimetre. Bz never varied more than minus 7 and plus 8 nanoTeslas for the entire period.

And finally the solar forecast for the coming week. Later this week the quiet side of the Sun is expected to be rotating into view. Solar activity is expected to be low but activity could increase to moderate levels with the occasional M class solar flare taking place. Solar flux levels should decline and be around the 100 mark later in the week. Geomagnetic activity could be at 'storm levels' due to the coronal mass ejection that departed the Sun on the 11th. Activity should then decline for the rest of the period to quiet levels. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 1600 and 2100 hours UTC.

And that's all for another week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS

Northampton Radio Club is arranging an intensive Foundation level training course weekend for anyone interested in becoming involved in amateur radio. Further information can be obtained from Bob, M0HAF, by e-mail to kenvee2@gmail.com.

On Sunday 14 April Wythall Radio Club is running a Special Event Station at Stoke Prior Steam Fair, then at 8pm there's a club net on 145.225MHz. On 16 April there is a Morse class at 7.45pm and then at 8.30pm Callum, M0MCX will talk on Knots for Beginners. On Thursday the club is taking part in the 80m Club Championships Contest. On Friday is a shack social at 7.30pm. Next Sunday, the 21st, the club is visiting the Kempton rally setting off at 8am. Details from Chris, G0EYO, on 07710 412 819.

On Monday 15 April Friskney and East Lincolnshire Communications Club has VHF SSB club net on 144.165MHz USB, using vertical polarisation,

starting at 7.30pm. On Wednesday there's an M3+M6 club net on GB3FR repeater at 8pm and Friday a club net on the GB3FR repeater at 8pm. Non members are welcome on all nets. Contact the FELCC Information Line on 07554 362 020 for more information.

On Monday 15 April Lincoln Short-Wave Club is holding a committee meeting at 7.30pm followed by participation in the 1.3GHz UK Activity Contest on Tuesday from 8pm. On Wednesday the club has a formal meeting and on Thursday there's a club simplex net on 145.375MHz at 8pm. On Saturday 20 April it's the shack morning and mentoring from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 15 April Northampton Radio Club is holding its weekly club net on 145.4625MHz starting at 8:00pm, then on Thursday it's the club meeting. Anyone interested in taking up amateur radio is welcome to attend. More information from John, G4CZB by e-mail to g4czb@hotmail.com

On Monday 15 April South Birmingham Radio Society has an open meeting with the shack on the air. Tuesday sees the coffee morning talking place from 11am to 1 pm. On Thursday there are training classes with Dave Murphy, G8OWL and on Friday there's work to be done in the Shack and on the aerials. Details from Mick Cleary, G7RRP on 07595 696 359.

On Monday 15 April Welland Valley Amateur Radio Society is holding the Annual General Meeting. On Thursday the club is taking part in the 80m Club Championship from 1900 to 2030UTC. For more information contact Peter D Rivers, G4XEX on 01858 432 105.

On Monday 15 April Gloucester Amateur Radio & Electronics Society has an evening of VHF operating and construction. More information from Anne, 2E1GKY on 01242 699595 daytime.

On Monday Sutton Coldfield Amateur Radio Society has an open net on 145.250MHz from 7 30pm, all are welcome. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

On Tuesday 16 April Derby & District Amateur Radio Society has an illustrated talk on the work of the RAIBC. Contact Richard Buckby, by email to radio@dadars.org.uk for more information.

On Tuesday Dudley and District Amateur Radio Society has a 23cm contest night. Details from Miles Hall, G4GSB by e-mail at g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club is on the air from the club room. More information from Chris, G1ETZ on 01509 504 319.

On Wednesday 17 April Midland Amateur Radio Society has a general meeting when the shack will be open and training classes available. Details from Norman, G8BHE on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is having an on the air and natter night. More information from Terry, M0RIA on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society has a talk on what 472kHz & 5MHz is all about. Contact Mike, G3JKX, on 01952 299 677 for more information.

On Thursday 18 April Cheltenham Amateur Radio Association has a talk on the GJ6YB IOTA Expedition by G4FKA. Details from Derek Thom, G3NKS on 01242 241099.

On Thursday Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Friday 19 April Coventry Amateur Radio Society is taking part in the 2nd Round of the 2m DF trophy. Contact John, G8SEQ, on 07958 777 363 for more details.

On Friday Hucknall Rolls Royce Amateur Radio Club starts a 3 day camping and caravan weekend with a fox hunt on Saturday starting at 10am. Details from Dave Wilde, G1YAI, by e-mail to treasurer@hrrarc.com.

On Saturday 20 April Rugby ATS has a talk on valves and classical electronics. More information from Steve, G8LYB on 01788 578940.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 14 April North Cheshire RC is looking at loft antennas on 21 April they are taking part in Maritime Radio Day. More information from Jill Gourley, by e-mail to jillgourle@aol.com.

On Tuesday 16 April Halifax & District Amateur Radio Society is holding the first /P evening of the year at Blackshaw Head above Hebden Bridge. On Saturday 20 April GB4HPH will be on the air from the St George's Day Youth Festival in The Piece Hall, Halifax. Details from Martin, M0GQB, on 01422 341 317.

On Monday 15 April Angel of the North Amateur Radio Club is having a demonstration of D-star Equipment by John Cranston. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is holding an open forum on club activities and what do members want in the future? More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

On Monday Workington and District Radio and IT Group Club will be on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday 16 April Chester & District Radio Society will have a talk on Software Defined Radio by Chris Seward G0PJX. Contact Bruce Sutherland, M0CVP, on 01244 343 825 for more information.

On Tuesday Stockport Radio Society has a talk on Collecting Military Radio Gear with John Kay. Details from Nigel Roscoe on 07973 312 699.

On Wednesday 17 April Denby Dale Radio Club is having a talk on Mobile Antennas by Richard, G3UGF. Details from Richard, M0RBG, on 07976 220 126.

On Thursday 18 April South Manchester Radio and Computer Club will be hearing from Elaine, 2E1BVS on A Chance Encounter, A DXpedition to the Shetlands. Details from Ron, G3SVW, on 01619 693 999.

On Friday 19 April East Cleveland Amateur Radio Club is holding a components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 19 April Tynemouth Amateur Radio Club has a talk in the RF noise bridge. More details from Bob, M0KLO, by e-mail to mail@g0nwm.com.

NORTHERN IRELAND

On Sunday 14 April the normal Mid Ulster Amateur Radio Club meeting has been postponed until the 21st at Navan Fort Caf&#65533; to coincide with the Marconi Day event. On Tuesday there is a shack night and on Saturday MN0VFW will be on the air for two days for International Marconi Day. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday 16 April Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 18 April Aberdeen Amateur Radio Society is holding a construction night. Contact Fred Gordon, MM0ODL, on 01975 651 365 for more information.

On Friday 19 April Cockenzie & Port Seton Amateur Radio Club is taking part in the Vulcan Weekend at the Museum of Flight running GB2VEF. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 19 April West of Scotland Amateur Radio Society has a talk from Derek Kozel AG6PO on Software Defined Radio. He will demonstrate the use of a ?10 USB receiver that covers 24MHz to 1766MHz and compare a variety of software packages capable of decoding a myriad of different voice and data modes. Details from Sam, GM4BGS on 07771 554 035.

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 15 April Farnborough & District Radio Society is running 80m slow speed CW at 1pm on 3.57MHz and a Top Band net on 1.995MHz at 8pm. On Wednesday there is more slow speed CW on 1.995MHz. More information from Neville, G4SPD on 01252 404 816.

On Monday 15 April Felixstowe & District Amateur Radio Society has a talk on 473kHz by Alan, G3NYK. On Saturday the club is at the volunteering festival. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 16 April Bromley & District Amateur Radio Society has a talk on ADS-B. On Saturday 20 it's the Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

On Wednesday 17 April Norfolk Amateur Radio Club has a talk that deals with questions on VOIP, limited antenna space and talking to amateurs using your computer when Mark, G0LGJ talks about Echolink and D-Star. On Saturday the club is taking part in International Marconi Day. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 18 April Shefford & District Amateur Radio Society visit Bedford School Planetarium and on Saturday it's the club dinner at Stratton House Hotel. Details from John Burnett, 2E0OAK on 07860 804 793.

On Sunday 14 April Basingstoke Amateur Radio Club is looking at Technology in Retail Stores with Bob, M0KER. Details from Tim, G3PJD on 07754 132859,

On Monday 15 April Braintree & District Amateur Radio Society has a visit from the RSGB Regional Manager. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club has a talk from Don, G3XTT on how to work DX. Contact Dave, G4XDU, on 01628 625 720 for more information.

On Monday 15 April Maidstone YMCA Amateur Radio Society has a normal club meeting. Details from Ian Hope, 2E0IJH, by e-mail to info@g3trf.org.

On Tuesday 16 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Stevenage & District Amateur Radio Society has a talk on the kilo as a standard by Martin, G8KDF. Contact Martin Juhe, M0XJP, on 07973 793 770 for more information.

On Tuesday Verulam Amateur Radio Club has a talk by Rod G0IAL and Roger M0RKB on nuts. screws, washers and bolts. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 17 April Chesham & District Amateur Radio Society has a members forum where members can bring along their radio equipment. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Dover Radio Club is looking at operating from difficult locations with Ian, G3ROO. More information from Pete, M0PKH by e-mail to peter.halloway@sky.com.

On Wednesday Worthing & District Amateur Radio Club has a talk by Mike, G3LHZ, on a small high power, wide band un-tuned loop monopole. Contact John, G8FMJ, on 01273 593 232 for more details.

On Thursday 18 April Bredhurst Receiving and Transmitting Society has a club night. Details from Charles G4VSZ on 07982 244 788.

On Thursday Colchester Radio Amateurs has a talk on film archives by Vic, 2E0CHX. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Cray Valley Radio Society is holding its AGM. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a surplus equipment sale/auction evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships. Contact Rob, G4LMW, on 01635 862 737 for more information.

On Thursday Sutton & Cheam Radio Society has a talk on the Sun and HF propogation by Dr Colin Forsyth from the Mullard Space Science Laboratory. Details from John, G0BWV on 020 8644 9945.

On Friday 19 April Farnborough & District Radio Society has a 2m net on 144.675MhHz FM at8pm.

On Friday Mid-Sussex Amateur Radio Society has Morse revision with Mike, G3VAK. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Saturday 20 April Chelmsford Amateur Radio Society will be operating GX0MWT from Sandford Mill for International Marconi Day. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday Hastings Electronics and Radio Club has a Spring Auction Sale. Details from Gordon on 01424 431 909.

On Sunday 21 April East Kent Radio Society will be at the Kempton Park Radio Rally. Details from Karl Davies, M1DFM, on 01227 710 120.

On Sunday Radio Society of Harrow will be on the air with GX3EFX/P from Old Redding. More information from Linda, G7RJL on 02083 868 586.

NEWS FOR THE SOUTH WEST

On Monday 15 April Exeter Amateur Radio Society has a Monday HF net on 3.675MHz at 7.45pm. On Tuesday it's the turn of 2m on 145.575MHz at 7.45pm then on Thursday the 4m net is on 70.425MHz at 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 16 April Riviera Amateur Radio Club will put MX0RIV on the air. On Wednesday there is a 2m net on 145.425MHz at 8pm. On Friday the club will put G100RSGB on the air. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 15 April Weston Super Mare Radio Society is holding a construction and natter night. The on Saturday they are taking part in International Marconi Day on Brean Down with GB0IMD. Details from Paul, G3SDH, on 01761 221 206.

On Thursday 18 April Cornish Radio Amateur Club has cancelled the usual workshop evening. On Friday it is set up for GB4IMD at Perranworthal Church Hall. The station will be on the air on Saturday and dismantled

on Sunday. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday 17 April Thornbury & South Gloucestershire Amateur Radio Club has a video night. On Friday there is a 2m net at 8pm. Contact Tony, G0WMB, on 01454 417 048.

On Sunday 14 April Poldhu Amateur Radio Club has a talk by Des Prouse on The future of Goonhilly. Further details from Keith Matthew, G0WYS by e-mail to g0wys@yahoo.co.uk

On Monday 15 April Appledore & District Amateur Radio Club has a talk on integrated data logging for RAYNET by Steve, G6SQX. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Thursday 18 April Saltash & District Amateur Radio Club is planning to activate the local repeater on VHF and UHF from the club room. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club has a Cheese and Wine Evening. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 18 April Swindon & District Amateur Radio Club has an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 18 April Yeovil Amateur Radio Club is holding its AGM. Details from Rodney Edwards, M0RGE on 01935 825791.

On Friday 19 April Torbay Amateur Radio Society is having a natter night with an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 20 April Plymouth RC is taking part in International Marconi Day from 0001 to 2359UTC . More information from Robert Goodhall on 01752 777888.

On Sunday 21 April Flight Refuelling Amateur Radio Society has a talk on high altitude balloons by Jules G0NZO. Details from John, G4POF by e-mail to g4pof@hotmail.com

NEWS FOR WALES

On Monday 15 April Dragon Amateur Radio Club has a talk on First Aid with Neil Adam, MW6BKS from the Ogwen Valley Mountain Rescue Team. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 16 April Carmarthen Amateur Radio Society has an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 16 April Wrexham Amateur Radio Society has a talk on my shack. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

Highlights of Solar and Geomagnetic Activity
08 - 14 April 2013

Solar activity was at very low to high levels during the period. The
period began at low levels that persisted until early on 11 April.
At 11/0716 UTC, solar activity reached high levels as Region 1719
(N11, L=077, class/area Eki/290 on 12 April) produced an M6/3b flare
with Type II (estimated speed 1370 km/s) and Type IV radio sweeps, a
Tenflare (470 sfu), and an associated asymmetric full halo coronal
mass ejection (CME) with an estimated plane-of-sky speed of 1142
km/s. On 12 April, solar activity reached moderate levels as Region
1718 (N21, L=109, class/area Dkc/510) produced an M3 flare at
12/2038 UTC. Solar activity decreased to low levels on 13 April with
a further decrease to very low levels on 14 April as the majority of
the regions on the visible disk decreased in either area or
complexity.

Greater than 10 MeV and greater than 100 MeV proton events were
observed during the period associated with the 11 April M6/3b flare.
The greater than 10 MeV proton event began at 11/1055 UTC, reached a
peak flux of 114 pfu at 11/1645 UTC, and ended at 12/2210 UTC. The
greater than 100 MeV proton event began at 11/0940 UTC, reached a
peak flux of 2 pfu at 11/1400 UTC, and ended at 11/1955 UTC.

The greater than 2 MeV electron flux at geosynchronous orbit was
normal to moderate levels through the period.

Geomagnetic field activity was at quiet levels until late on 13
April when a geomagnetic shock was observed in ACE/SWEPAM data
associated with the 11 April CME. At 13/2215 UTC, the total field
(Bt) increased from 4 nT to 10 - 13 nT, while the solar wind speed
increased from approximately 365 km/s to 480 km/s. An associated
geomagnetic sudden impulse was observed in the Boulder magnetometer
(29 nT) at 13/2255 UTC. This produced an unsettled period to end the
UTC day on 13 April. By 14 April, the geomagnetic field continued to
be under the influence of the 11 April CME. Total field was variable
```

between 4 and 14 nT while the Bz component of the interplanetary magnetic field was mostly positive between 1 - 12 nT with brief southward deflections to a maximum of -7 nT. Solar wind speed reached a maximum of 558 km/s at 14/0443 UTC before slowly decreasing to end the period near 460 km/s. The geomagnetic field responded with quiet to unsettled conditions on 14 April with a brief period of active to minor storm conditions mid-day at high latitudes.

Forecast of Solar and Geomagnetic Activity
15 April - 11 May 2013

Solar activity is expected to be at very low to low levels with a chance for an M-class flare from 15 April to 18 April when Regions 1718 and 1719 depart the visible disk. Very low to low levels are expected from 19 April to 28 April. From 29 April to 11 May, solar activity is expected to be at very low to low levels with a chance for M-class flaring as Regions 1718 and 1719 return to the visible disk.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels on 16 - 18 April due to CME effects. Moderate to high levels are expected again on 25 April - 02 May due to coronal hole high speed stream (CH HSS) effects. Normal to moderate levels are expected for the rest of the period.

Geomagnetic field activity is expected to be quiet to unsettled on 15 April due to residual effects from the 11 April CME. Mostly quiet conditions are expected from 16 - 22 April. On 23 April, a recurrent CH HSS is expected to move into geoeffective position causing unsettled to active conditions with continuing quiet to unsettled conditions on 24 April. From 25 - 26 April, another recurrent CH HSS is expected to become geoeffective causing unsettled to active conditions. From 27 April until the end of the forecast period, mostly quiet conditions are expected to prevail.

RAC Bulletin 2013-015E - Ontario South ARES leaders to meet (Correction)
2013-04-11

On April 20, 2013, ARES leaders representing groups throughout Ontario South will meet at the Emergency Operations Center in London, Ontario.

The meeting will be chaired by Ontario South Section Manager Ian Snow, VA3QT.

For further information contact Ian at VA3QT4@gmail.com.

K6KPH on the air for International Marconi Day - Public Invited

Posted: 14 Apr 2013 07:33 AM PDT
http://forums.qrz.com/showthread.php?387589-K6KPH-on-the-air-for-International-Marconi-Day-Public-Invited&goto=newpost

K6KPH, the amateur station of the Maritime Radio Historical Society, will be on the air 20 April for International Marconi Day. This year our participation will be unique. We will be using the former KPH transmitters at the historic Marconi site in Bolinas, CA as usual. But our receive site will be at the original Marconi receiving station in Marshall, CA, now the Marconi Conference Center. Vintage receiving equipment and our house built remote control console will be installed in one of the original Marconi cottages that was occupied by the station manager. This should make us one of the most authentic Marconi station on the air! K6KPH will guard its usual frequencies of 3550.0, 7050.0, 14050.0, 18097.5 and 21050.0kc. The specific frequencies in use will depend on conditions and time of day. We plan to run a "wheel" (repeating announcement of availability as in commercial service) on our active channels. Our coast station KSM will be on the air as well. Why not join us? You can sit the circuit at K6KPH or, if you have a commercial radiotelegraph license, you can have it endorsed for operation at KSM. We'll be in McCargo Hall at the Marconi Conference center located at 18500 State Highway One Marshall, CA 94940. GPS or on line programs like Google Maps will lead you there from your location. We'll be there from 10:00am to 4:00pm on 20 April. The area is spectacularly beautiful so you can make a day of it and have radio fun too! For more information see our Web site at http://www.radiomarine.org or email ddillman@igc.org VY 73, MRHS

May 11 Amateur-Military Cross Band Test

Posted: 10 Apr 2013 02:54 PM PDT
http://forums.qrz.com/showthread.php?387120-May-11-Amateur-Military-Cross-Band-Test&goto=newpost

ANNUAL ARMED FORCES DAY CROSSBAND MILITARY/AMATEUR RADIO COMMUNICATIONS TEST

(11 MAY 2013)

The Army, Air Force, Navy, Marine Corps, and Coast Guard are co-sponsoring the annual military/amateur radio communications tests in celebration of the 63rd Anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on Saturday, May 18, 2013, the AFD Military/Amateur Crossband Communications Test will be conducted 11 May 2013 to prevent conflict with the Dayton Hamvention (17-19 May 2013), which is the same weekend as the actual Armed Forces Day.

The annual celebration features traditional military to amateur cross band communications SSB voice and Morse Code tests. These tests give Amateur Radio operators and Short Wave Listeners (SWL) an opportunity to demonstrate their individual technical skills, and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to those stations making contact with the military stations.

PART I. MILITARY-TO-AMATEUR CROSS BAND SSB & CW TEST CONTACTS.

Military-to-Amateur cross band operations will take place on the dates/times in ZULU (UTC), and frequencies listed below for each station. Voice contacts will include operations in single sideband voice (SSB). Some stations may not operate the entire period, depending on propagation and manning. Participating military stations will transmit on selected Military MARS frequencies and listen for amateur radio stations in the Amateur bands indicated below. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The following stations will be transmitting on MARS frequencies listed below which are provided as "Window/Dial Frequency" in kHz. Some stations will use CW to provide the opportunity to check in by Morse Code.

SUBMISSION OF SECRETARY OF DEFENSE TEST MESSAGE ENTRIES.

Transcripts of the RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 receiving test should be submitted "as received". No attempt should be made to correct possible transmission errors. Provide time, frequency and call sign of the military station copied, including name, call sign, and address (including zip code) of individual submitting the entry. Ensure this information is placed on the paper containing the test message. Each year a large number of acceptable entries are received with insufficient information, or necessary information was not attached to the transcriptions and was separated, thereby precluding issuance of a certificate. Entries must be sent to the appropriate military address as follows:

A. STATIONS COPYING SECRETARY OF DEFENSE MESSAGE TRANSMITTED FROM AAZ/WAR/AAC SEND ENTRIES TO:

The introduction of the Fools' and Idiots' Licences has been a disaster, but
hardly anything to want to celebrate.

A year to set up a website and it's still not complete?

Bloody 'ell.

Perhaps it should stay under wraps for another 13 years because the RSCB did
not
come into being until 1926?

//
Floods in Argentina:

Posted: 14 Apr 2013 05:00 PM PDT
http://www.eham.net/articles/30032

Record flash floods have killed several dozen people and destroyed thousands of homes in the Buenos Aires Province, Argentina, that suffered its heaviest April rainfall since records began in 1906. On Saturday there was heavy traffic on the 40 metre band, coordinating communications between the Radioclub La Plata and other areas who were sending food, clothing and other items to the flooded area. Jorge Sierra LU1AS of Buenos Aires reports that relief efforts are being coordinated by radio clubs that have played an important role during the disaster. Net Control Stations were local radio clubs who told of road closures, the location of the collection centres in the area and planned transportation and reception. The province's capital of La Plata was badly hit. The frequencies used are 7070 and 7120 MHz, with activity by Emergenciaslu Amateur (Amateur Radio Emergency Service of Argentina) plus VHF and UHF repeaters maintained by the Radioclub La Plata LU8DZE. Communication was helped by the use of the Internet, email and SMS which made it easier to locate someone or make it known that radio support was available.

Beaver Valley Amateur Radio Association 'Hamming It Up' for 90 Years:

Posted: 14 Apr 2013 05:00 PM PDT
http://www.eham.net/articles/30031

The Beaver Valley Amateur Radio Association, a "ham radio" club in Beaver County, is turning 90 years old this month, and radio operators from all over the world are invited to join in on the celebration. In honor of the anniversary, the club will be holding an on-air "Special Event Station" under the ham radio call sign W3SGJ from 9 a.m. to 6 p.m. Saturday on the 80, 40, 20, 15 and 10 meter ham radio bands. Club members will receive many on-air calls from other amateur radio operators, or hams, throughout the United States and Canada and, if atmospheric conditions are favorable, they expect to receive calls of congratulations from around the world.

Ham Radio Deluxe Update April 2013

Posted: 15 Apr 2013 01:56 PM PDT
http://forums.qrz.com/showthread.php?387752-Ham-Radio-Deluxe-Update-April-2013&goto=newpost

HRD Software, LLC ,Tampa, FL 04/15/2013.

HRD Software LLC will be attending the International DX Convention in Visalia, CA this coming weekend. HRD 6 will be available for our first west coast hamfest since the release of 6.0 in February 2013. Come by and say hello to Rick (W4PC) and Erin (KJ4MFO) as they make the cross country journey to one of the premier conventions of the year.

Rick (W4PC) and Erik (KC0WWC) are hard at work on the next release of HRD 6. The beta team has the first build of the new version and are doing a great job on reporting issues while testing. The next release will be free to customers who have or will purchase 6.0. The price for the next release will remain at $99.95 for one year of support and upgrades. After the first year, the optional renewal with be ½ of retail, currently $49.95.

HRD Software LLC has joined forces with Microsoft and their anti-piracy group. During their support of the product, the HRD Support team has discovered many issues that some hams are running is the result of using pirated or leaked copies of Microsoft Windows. Since these copies come from peer-to-peer sites, many hams are not aware that the copies of Microsoft Windows may contain viruses and spyware as well as Trojan horses that can steal personal information. HRD Software LLC recommends that all hams have a genuine copy of Microsoft Windows, otherwise the support team may not be able to help you with issues you may have with HRD on those platforms.

HRD Software LLC also has been accepted into the Microsoft Bizspark program. This gives the team access to the latest information from Microsoft as well as being featured in their program listings. At this time, HRD Software LLC is the only Ham Radio company in the program.

Finally, April 15th (yes tax day) is Erin□s birthday, so she decided to celebrate by doing her own coupon for new purchasers of HRD. Put in erin31 (all lower case) in the coupon code at checkout and find out what she did without telling the owners (Rick, Randy and Mike)!

You can purchase and download the product at
http://www.ham-radio-deluxe.com.

WAQP

Posted: 16 Apr 2013 09:14 AM PDT
http://forums.qrz.com/showthread.php?387842-WAQP&goto=newpost

No, that's not West African QSO Party, but rather "Worked All QSO
Parties." Most of us OTs are aware that QSO parties are great ways to pick
up some of those elusive states. As I recall QSO parties were originally
designed to facilitate WAS pursuers. But there's never been an official
WAQP award, where you get recognition for working every statedduring their
respective QSOparties. I believe I have accomplished this, sort of by
default, but I think it would be a neat award to formalize
this....'specially with all the noobies who haven't done much on H.F. yet.

Eric

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Oliver Bock, DJ9AO
(e-mail: dj9ao@darc.de)

5H, Tanzania:
Bodo (DF8DX) will be QRV between the 20th and 28th of April as
5H1DX. His itinerary includes visits to three islands:
Bongoyo Island AF-075 5H1DX/3
Pemba Island AF-063, WLOTA 1437 5H1DX
Zanzibar AF-032 5H1DX
Activity covers all bands 160-10m, mainly
CW plus EME on 70cm and 23cm (JT65, CW). QSL via h/c.

6O, Somalia:
As a member of the UNODC-mission in Kenia Roger (LA4GHA) has been
active from Nairobi as 5Z4/LA4GHA. He has now received a operating
license for his trips to Somalia as 6O0LA. QTH is Garowe (LJ48fi),
where Roger is active during his free time on bands 160-6m in CW,
SSB, and digital modes. QSL via h/c, LotW.

CX, Uruguay:
"Radiogrupo Spur" participates in the International Marconi Day
(IMD) as CW1GM. QSL via CX2ABC, direct only.

DL, Germany:
Borkum Island sees DA0IMD as part of the IMD activities with 3 Ops.
One of their stations will be dedicated to VHF. QSL via DL1BFE.

EA, Spain:
The coastal radio station Finisterre will be put on air as AO0IMD
for the IMD. QSL via EA1NW.

EA8, Canary Islands:
EH8WDX celebrates the World Amateur Radio Day (18th of April)
between the 17th and 20th. QSL via EA8ED, eQSL.

EI, Ireland:
Marconi's former station in Ireland (Brow Head, 1901-1914) will appear on the air under EI5IMD. Cork Radio Club will set up two stations for HF operations in CW and SSB, with a possible third station for PSK31. QSL via EI2KA.

Likewise North Cork Radio Group will represent the Mizen Signal Station in Goleen/West Cork as EI0IMD. QSL via EI1NC.

Last but not least EI0MAR will occupy the Howth Martello Tower (WLOTA 2484), an early experimental site of Marconi's. Today the tower houses the Hurdy Gurdy Museum of Vintage Radio.
http://ei5em.110mb.com/museum.html

F, France:
Also during the IMD TM114M will commemorate the first radio contact between France and England. QSL via F5JYD.

FM, Martinique:
Paul, FM5AM, Jean-Baptiste, FM5GI, Valere, FM5CW, Claude, FM5CY, and Henri, F6FLO, all members of the International Police Association (IPA) will sign as TO4IPA from St. Pierre between the 18th of April and 2nd of May in CW, SSB, RTTY, and PSK.
QSL via HA3JB.

G, England:
GB4RPI operates in memory of a tragic aeroplane accident of 1972. 118 persons died when a British European Airways flight from Heathrow to Brussels chrashed after the start. Operation continues till the 29th of April, CW only. QSL via bureau.

The following stations will take part in the IMD:
GX0MWT from Sandford Mill; CW and SSB on HF
GB4M from Daventry; QSL via bureau, direct via M0DOL
GB2MT from Writtle; 40,20,15,10m in SSB; QSL via bureau
GB0IMD from Brean Down by members of the Weston super Mare Radio Society; QSL via bureau http://www.wsm-ars.co.uk/
GB4MBP from Bass Point; QSL via bureau

GM, Scotland:
The Orkney Wireless Museum plans to make a showing as GB2OWM during the IMD. http://www.orkneywirelessmuseum.org.uk/

GW, Wales:
Likewise for the IMD: GB5IMD from Flat Holm Island; QRV 19th till 21st; QSL request via email: <lynsowen[at]blueyonder.co.uk>
http://www.g4kpm.co.uk/flat-holm-expedition-april-2013.html

GB4MDI from Lavernock Point; QSL via GW0ANA http://bars.btck.co.uk/
GB100TMD from Tywyn; up to 4 stations on HF, one of them dedicated to CW; QSL via bureau, direct via M0PNN
http://www.tdars.org.uk
http://www.youtube.com/watch?feature=player_embedded&v=58BoDvvCdEQ

GU, Guernsey:
Guernsey ARC plans to put St. Andrew's (EU-114, WLOTA 0013) on the air on the 20th and 21st of April. Operations will include the HF bands, VHF from 6m to 23cm and satellites, modes: SSB, RTTY, PSK, WSJT, and SSTV. QSL via M0VFC, LotW, log available on ClubLog. http://www.rsgb.org/aboutrsgb/rsgbcentenary2013/?id=rsgb-centenary-home

HA, Hungary:
HG50NOHAB celebrates a modernisation of the Hungarian Railway 50 years ago. Pisti, HS5STS (SSB and digital modes) and Sanyi (CW) will use the call till the 31st of March 2014. QSL via bureau. http://www.HG50NOHAB.hu/2013/04/10/cq-de-HG50NOHAB-2/

HV, Vatican:
Luciano brings the Vatican on air for the IMD as HV5OVR/IMD.

I, Italy:
Italian stations QRV for the IMD are:
II0LET from the Muso Poste e Telecommunicazioni in Rome;
QSL via bureau http://www.radiomarconi.com/
IY4FGM from Griffone; QSL via I4KMW, eQSL http://www.ari-bo.it
IY5PIS from Coltano (Pisa); QSL via IZ5DMC
http://digilander.libero.it/aripisa/

JA, Japan:
8J4SIP celebrates the new didactic centre at the Museum of Human and Science's Future in the Okayama prefecture (WLOTA 2376) till the 31st of May. QSL via bureau.

JARL's jubilee of 40 years on Hokkaido is the occasion for 8J88RL (WLOTA 2967) on all bands and modes. QSL via bureau.

KP4, Puerto Rico:
The Puerto Rico Field Day Group will participate in the World Amateur Radio Day on the 18th from the disaster control office of Catano. QSL via LotW, eQSL.

LZ, Bulgaria:
The Thracian Rose Club celebrates its founding 20 years ago in the town of Kazanlak. Operations under LZ20TRC will continue till the year's end. QSL via LZ1YE.http://www.trcdx.org/

A group of Russian amateurs celebrates the 40th International
Astronomy Day from several observatories (RAO-041, RAO-007, RAO-042,
RAO-027, RAO-011, RAO-028, RAO-044, RAO-022) in the Northern
Caucasus Mountains on HF, in CW and SSB. QSL via UA6GG.
http://www.wff44.org/program/wsp/wao/rules
http://www.greenrussia.travel/RAO

UR, Ukraine:
Kryvyi's school of Radio Technologies was founded 45 years ago.
Serge, UR0EF, Gennady, UT0EM, Igor, UT0EK, and Mikhail, UR5EPM will
work as EM45ERS till the 31st of July. QSL via UT0EK.

VE, Canada: A team around Igor, VE3ZF (Pat, Ve3HZQ, Rom, VE3NDI), will
visit Twilight Island (CISA ON-018) on the 20th and 21st of April
to participate in the Ontario QSO Party. QSL via bureau.

VK, Australia:
Hornsby and Districts Amateur Radio Club will appear on the air as
VK2IMD for the IMD.

W, USA:
The following stations from the US of A will be QRV for the IMD:
W2RC/IMD from Rocky Point (NY) http://www.rcarc.org/im_day.htm
N2MO from Belmar (NJ); QSL via N2LXM
K6KPH from Marshall (receivers) and Bolinas (transmitters)
(both in CA); QRGs: 3550, 7050, 14050, 18097, 21050. QSL only direct.
http://www.radiomarine.org/

XE, Mexiko:
The World Day of Amateur Radio doubles also as a day of celebrating
the founding of the IARU (88 years ago). The Mexican Grupo DXXE has
applied for the special callsign 4A8DMR and plans activity on all
bands 160-6m and satellites from locations all over Mexico for the
time 18th of April till 21st. QSL via N7RO, LotW, online log on
ClubLog. http://www.dxxe.org

YN, Nicaragua:
H70ORO, alias Bengt, YN9SU, directs attention to the publication of
"El oro de Mallorca", a short fictional piece by Nicaraguan writer
Ruben Dario 100 years ago. QSL via TI4SU, direct only.

International Marconi Day:
In addition the the calls already mentioned, the following stations
will also be QRV for the IMD:

Silent Key:

Hermann Sachse (5Z4RT), passed away on 4 April. "He had been in
Kenya for decades", says Ted Alleyne, 5Z4NU, Chairman of the
Amateur Radio Society of Kenya, "was a Life Member of ARSK and ran
our Sunday morning nets for many years as well as being involved in
a medical net based in Germany".

Nusret Abadzic E73N (ex T93N, YU4BN) passed away on 6 April after
a long illness at 82 years of age. For many years he was the IARU
liaison officer for ARABiH, Bosnia-Hercegovina's national amateur
radio society.

Alan R. Leith (VE1AL) passed away unexpectedly on 11 April,
apparently from a heart attack, at 66 years of age. Over the years
Al edited several DX publications, and in 1988-89 he participated
in the CY9DXX and CY0DXX DXpeditions to St. Paul and Sable islands.
In paying their tribute to "a true gentleman in every sense of the
word", the CY9M team says that last year's expedition to St. Paul
"would not have happened without Al's help and knowledge".

Mike Bazley, VK6HD passed away on 12 April. one of Australia's most
successful DXers, he was the first station from Oceania to obtain
DXCC on 160 metres.

Upcoming contests during the weekend 20th/21st of April:
==========
19./20.04. Holyland Contest
20.04. TARA Skirmish Digital Prefix Contest
20.04. ES Open Championship
20.04. European Sprint Contest (SSB)
20./21.04. CQ Manchester Mineira DX Contest
20./21.04. YU DX Contest

South Dakota QSO Party: http://www.dtdxcc.org/main2/SD_QSO_Party.html
North Dakota QSO Party: http://www.k0ln.com/ndqsop13.pdf
Holyland Contest:

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island activities:

AS-013; 8Q; Maldive Islands: Pai (VU2PAI) and Krish (W4VKU) are due to appear as 8Q7KP on the bands between the 23rd and 30th of April from Bodu Finolhu Island (WLOTA 3911; WW Loc. MJ63ru) with two stations. QSL via OQRS, eQSL, LotW.

AS-031; JD; Chich/ Haha/ Muko Islands: Once again Harry (JG7PSJ) will return to Chichi-jima (JCG #10007, WLOTA 2269) as JD1BMH, this time between the 22nd of April and 4th of May. QRV 40-10m, maybe also 80m, in CW, SSB, and RTTY. QSL via jd1BMH (bureau) or JG7PSJ (direct).

AS-117; JA1, etc.; Honshu's Coastal Is. (incl. Sado, as well as Is. in Sagami Gulf and Tokyo Bay): Toku, Ja6TNY, brings Awa Island on the air between the 20th of April (0700z) and the 21st (0300z). QRV from 160-10m in CW and SSB, with a focus on 20m. QSL via h/c (d/B).

EU-008; GM/MM; Inner Hebrides: Graham/MM0GHM, Gordon/MM0GOR, Allan/2M0VNW, Arthur/MM0DHQ, Jason/GM7VSB, Peter/GM7AAJ, Paul/GM0PJD, and Allan/GM3OZB, all Members of the Kilmarnock and Loudoun ARC are signing as MM0KLR from the Isle of Canna (IOSA NH01, SCOTIA DI21) between the 22nd and 27th of April. All HF bands, all modes. QSL via MM0KLR (B) or direct to MM0GHM.

EU-038; PA; Noord Holland/ Friesland/Groningen Province group: Wim/PA0WRS will be going to Ameland Island (WLOTA 1059) from the 19th to 26th of April and operate /p on HF. QSL via h/c.

EU-041; I*0; Maddalena Archipelago: Tony/IZ2ESV, Bruno/IW3HXR, Mauro/IK3VUU, and Luciano/I3CLZ hope for some relaxing time on the Isola La Maddalena (IIA OT-008, MIA MIS-013, WLOTA 1632, WWFF IFF-004) between the 21st and 24th of April. For optimal relaxation some HF activity is to be expected on 80-10m in CW, SSB, and digital modes. QSL via IK2DUW (d/B).

EU-136; 9A; Adriatic Sea Coast North group (Cres, Dugi, Kornat, Krk, Losinj, Molat, Pag, Rab): Pista, 9A/HA5AUC, Ed, 9A/HA5BWW, and Karl, 9A/HA7PC, will visit Rab from the 21st till 27th of April. They will be QRV on HF and 6m mainly in CW. QSL via h/c.

WWFF Activities
==========

National WWFF websites (part 5):
HAFF: http://wff.pannondxc.hu/en/index.php?p=haff
LUFF: http://www.luff.com.ar/bases.htm
SMFF: http://smff.sk6aw.net/menu/smffom/?lang=en

OH3I is the call of Jukka, OH8MSM and Raimo, OH3BHL for their visit of several national parks between the 11th and 19th of April. The following areas are on their route:

11./12. Oulanka National Park (OHFF-016)
12./13. Riisitunturi National Park (OHFF-026)
13./14. Syote National Park (OHFF-031)
15./16. Salamajarvi National Park (OHFF-028)
16./17. Pyha-Hakki National Park (OHFF-023)
17./18. Leivonmaki National Park (OHFF-011)
or Isojarvi National Park (OHFF-005)
18./19. Paijanne National Park (OHFF-017)
QSL via OH3BHL, direct only.

Vladimir, RA9LR, Boris, UA9LAC, Andrey, UA9LEW, Serge, UA9LP, DIMA, UA9LT, Yaroslav, UB9LAG, and Andrey, UB9LBS, activate the nature park "Bazhovskiye mesta" (RA RFF-213, NRP R9C) between the 17th and 21st of April as RT9L/8 on all bands 80 - 10m in CW, SSB and digital modes. QSL via UA9LP (also request via email: ua9lp@mail.ru).

Arthur, UN6QC, Sergey, UN6GAO, and Victor, UN7GIT, members of the "Traveling Radio Amateurs Group" bring several observatories (WAO/UNAO-01, WMA/UNM-037, WFF/UNFF-005) on the air as UP44WFF on the 20th and 21st of August. QRV on 40 - 10m in SSB and digital modes. QSL via direct, LotW, eQSL.

Ofcom Clarifies 472 kHz and 5 MHz NoVs:

Posted: 15 Apr 2013 05:04 PM PDT
http://www.eham.net/articles/30036

Clarifications have been added to the 472 kHz and 5 MHz NoV page on the Ofcom website. The main change is to state that only holders of a Full Amateur Licence may operate in these bands, so this includes Individual, Club and Reciprocal licences. Ofcom have also added some further clarification with regard to operating in the 5 MHz band, in particular that the NoV to operate in the 5 MHz band only applies in the United Kingdom, Isle of Man, Guernsey and Jersey, and that the band may not be used mobile or maritime mobile.

//
New RSGB Website to Go Live:

Posted: 15 Apr 2013 05:03 PM PDT
http://www.eham.net/articles/30035

After almost a year of planning and building a new site by a small team led by Alan, G0TLK, we are pleased to announce the new RSGB site will be going live at the end of this week at www.rsgb.org. It's not yet complete and development work will continue.

//
Rare Morse Code Photo Auction:

Posted: 15 Apr 2013 05:03 PM PDT
http://www.eham.net/articles/30034

Rosa Parks Handwritten Notes On Bus Boycott Along With Samuel Morse Photo Signed In Morse Code To Be Auctioned Online From April 18 - 28th, 2013 at morseparksauction.com Los Angeles, Calif - April 15, 2013 - Unique pieces from those who made history available to a worldwide audience, with proceeds being shared with African Millennium Foundation. What would you do if you developed a communication system that revolutionized the world? Samuel Morse Large 1870s Photograph Signed In Morse Code Samuel Morse was the inventor of the single-wire telegraph system and co-inventor of the Morse Code. This large 20" x 16" photograph (measuring 28" x 24.5" in frame) was signed by Morse on June 10, 1871, which coincides with the unveiling of a bronze statue of Morse in Central Park. His signature appears twice -- once beneath his image and once beneath the Morse Code.

Key Passages: Spelled out along the lower edge of the photograph in Morse Code is the message, "What hath God wrought", followed by Morse's holograph note, "first dispatch on the first completed public line between Washington and Baltimore. May 24, 1844. 8:45pm. Sam'l F.B. Morse." This is the only instance wherein he wrote out -- in both English and Morse Code -- the first message ever sent by public telegraph.

PhoneSat Launch planned on April 17, 2013

Posted: 16 Apr 2013 09:33 AM PDT
http://forums.qrz.com/showthread.php?387848-PhoneSat-Launch-planned-on-April-17-2013&goto=newpost

Engineers and interns at NASA's Ames Research Center, Moffett Field, California, are awaiting launch of Phonesat on a Antares rocket April 17, 2013. This small cubesat is one built under Ames Research Center's Small Spacecraft Technology Program.

Phonesat will transmit its health status on amateur radio frequency 437.425 MHz using packet (AX.25). Amateur radio operators have the great opportunity to contribute to the project by submitting them to Phonesat's packets page at http://www.phonesat.org/packets.php.

NASA's PhoneSat project will demonstrate the ability to launch the lowest-cost and easiest to build satellites ever flown in space - capabilities enabled by using off-the-shelf consumer smartphones to build spacecraft. NASA engineers kept the total cost of the components to build each of the three prototype satellites in the PhoneSat project to $3,500 by using only commercial-off-the-shelf hardware and keeping the design and mission objectives to a minimum for the first flight.

For more on PhoneSat, see

http://www.phonesat.org

> On 18 April, World Amateur Radio Day celebrates the forming of the
> International Amateur Radio Union (IARU) on 18 April 1925.

...so, an International union is set up which presumably expects to
interoperate with national societies.

But in 1925 there was no national society in Britistan, merely a motley
collection of localised groups, of which the London group was one, and the
Canatab society even older.

So, it seems that the London Wireless Club ceased in 1926 and the RSCB
was formed to meet their opiniated need for a national society, although
this might have only
been the London club giving itself airs and graces.

So, what more evidence is needed that 2013 is NOT the centenary of the RSCB?

Is this claimed centenary another political spin, just as telling the Fools'
Licensees
that they were the saviour of amateur radio?

What's that famous quote? ... "You can fool all of the people some of the
time but
you can fool anyone who is a member of the RSCB all of the time" ??

Just more Spin OM. My old school was founded in 1160 and carried on
until 1989 when Grammer Schools finally bit the dust. Now a Private
school has adopted the name and the badge and is also claiming the
history, although it has nothing to to do with the original. It just
looks impessive to hoodwink prospective customers into thinking it is
a fine upstanding establish ment. Just like the RSGB are trying to do.

FCC Rules Against Hams in BPL Decision:

Posted: 21 Apr 2013 05:03 PM PDT
http://www.eham.net/articles/30061

The FCC has upheld its Broadband over Power Line rules and rejected an appeal from ARRL, the national association for Amateur Radio, formerly known as the American Radio Relay League. The commission said its previous decisions regarding BPL strike the right balance between the need to provide Access BPL technology, which has potential implications for broadband and "smart grid" users, while protecting incumbent radio services against harmful interference. The agency this week denied the ARRL appeal, saying the amateur radio group raised no new arguments, nor proved previous FCC BPL decisions contained mistakes. Access BPL devices are mounted on overhead or underground power lines. Amateur radio supporters have said since the BPL rules came out in 2004 that the RF emissions from the devices interfere with some ham frequencies. They wanted the BPL rules changed to adopt mandatory, full-time notch filtering, which means turning down the power, of all BPL systems operating on all ham bands below 30 MHz from 20 dB to 25 dB. The FCC said throughout the proceeding and judicial appeal, that the ARRL has argued that more restrictive technical standards are needed to protect the amateur radio service from interference from BPL devices. "We have specifically rejected as unnecessary these repeated requests by ARRL for tighter emissions controls on Access BPL operations, more stringent interference mitigation measures and requirements for avoidance of BPL operations in the amateur bands," notes the FCC in its decision. ARRL CEO David Summer says in a story on the ARRL website he wasn't surprised at the decision, "although some of the rhetoric" used by the agency "in continuing to defend its wrong-headed promotion of the flawed BPL technology is disappointing."

//
Residents Sour on 80-Foot Radio Tower:

Posted: 21 Apr 2013 08:29 AM PDT
http://www.eham.net/articles/30059

Residents of Lawson Heights are up in arms about a local man's plan to erect an 80-foot radio tower in his yard. Ham radio enthusiast Sean Cavanaugh's equipment allowed students in Martensville to speak with Canadian astronaut Chris Hadfield aboard the International Space Station in March. He currently lives on Saskatoon's east side, and has a 55-foot radio

tower on his property. Cavanaugh said he uses the tower to compete in amateur radio competitions in which competitors try to contact as many other ham radio users in the world as they can within 24 or 48 hours. While he has won competitions and contacted as many as 1,300 people in 24 hours, he said the tower is not tall enough to reach the whole world. "There are places I have a great deal of difficulty contacting," he said. "Mostly in the south Indian Ocean, India, Thailand and that region." Cavanaugh will soon move to Dore Crescent in Lawson Heights, and he wants to build a bigger, better tower when he arrives. About six weeks ago, he circulated a notice to local residents informing them of his plans to build a transmission tower twice the height of a standard telephone pole. The plan has met with some fierce opposition. Sidney Hayes, 70, lives on Dore Crescent and started a petition to quash Cavanaugh's tower plans. He said 29 people, representing 21 local households, have signed it. "The main issue is people don't want this tower," he said. "They're just totally unsightly and noisy."

China earthquake report #3

Posted: 22 Apr 2013 12:37 PM PDT
http://forums.qrz.com/showthread.php?388611-China-earthquake-report-3&goto=newpost

China earthquake report #3

The rescue and relief efforts after Saturday's southwest China Ya'an earthquake is continuing with the number of lives lost officially at 188 people, 25 are missing and 11,460 injured.

While radio amateurs continue to help with relief efforts, Fan Bin BA1RB says that public communication is back to normal in the disaster area.

He said the CRSA/CRAC no longer required 3855kHz, 7050kHz and 14270kHz as emergency communication frequencies. It expressed thanks for the support from IARU member societies and others during the disaster.

It rained in the earthquake area last night. Effective traffic control has been very important to transport tents, water, foods and medicines into the area.

The rural communities around Ya'an city are along the same seismic fault where the Great Sichuan Earthquake killed more than 90,000 people five years ago, in one of China's worst natural disasters.

The latest earthquake on Saturday left tens of thousands of people in tents or cars, unable to return home or too afraid to go back as aftershocks continued.

Badly hit Lushan County is now a large refugee camp, with tents set up and volunteers providing meals.

Jim Linton VK3PC

Chairman of the IARU Region 3 Disaster Communications Committee

with help of Fan Bin BA1RB

First Class CW Operators Club 75th Anniversary Award and on-air activity

Posted: 23 Apr 2013 08:43 AM PDT
http://forums.qrz.com/showthread.php?388732-First-Class-CW-Operators-Club-75th-Anniversary-Award-and-on-air-activity&goto=newpost

Hundreds of members of the First Class CW Operators Club will take to the air in May, many using special calls, to celebrate the 75th anniversary of FOC.

Nearly 50 special "FOC" suffix calls, and 5 calls with special prefixes, will be on the bands throughout the month.

The special call GB75FOC will be activated by a schedule of English members each day in May and special versions of the club call G4FOC will be used in non-English U.K. countries: GP4FOC (GU), GN4FOC (GI), GS4FOC (GM), GT4FOC (GD). In addition, the call M0RSE (M Zero RSE) will be on the air.

Many of our members around the world have secured special *FOC suffix call-signs, including 4X, 5B, 5T, 7Q, A6, HZ, KH6 and VQ9. Many of these will be operated each day in May by teams of local operators, for example: N4FOC, S575FOC, W2FOC, W9FOC. Each member may operate pile-up or rag-chew style, as he chooses.

A beautiful □FOC75 Award□ certificate will be available at three levels, bronze, silver and gold. Points are accumulated by working FOC members, with extra points for working the *FOC stations. Members not using calls with an FOC-suffix will identify themselves by calling "CQ FOC 75." Special 75th anniversary QSLs will also be used by many stations.

Full information about the award and QSLing is available at: www.g4foc.org. Follow the link to "FOC 75th Anniversary."

This UK-based Club, founded in May, 1938, has some 500 members who passion is good CW operating. Our activity in May says "thank you" to those movers and shakers who, 75 years ago, kick-started this prestigious club. We invite CW operators around the world to join in the celebration.

CERT Volutneers, Amateur Radio Operators 'Leap' into Action:

Posted: 22 Apr 2013 05:05 PM PDT
http://www.eham.net/articles/30063

Volutneers use toy frogs to practice triage in an emergency: The San Ramon Valley Community Emergency Response Team (CERT) program along with local amateur radio operators participated in a mock communications drill on Saturday. Volunteers placed hundreds of stuffed "CERT green" frogs placed throughout the community to help simulate victims of a major disaster. "This drill is unique because it will exercise both the CERT volunteers and amateur radio operators," said Danielle Bell, CERT Coordinator for San Ramon Valley Fire. "It is vital that both of these groups work together seamlessly during an actual emergency." Attached to each frog was a tag listing their injuries; CERT volunteers triage the frogs, gather damage assessments from each of the six drill neighborhoods and then report all their findings to the emergency operations center, utilizing the amateur radio operators.

//
Local Hams Went to Church:

Posted: 22 Apr 2013 05:05 PM PDT
http://www.eham.net/articles/30062

Members of the St. Kitts Nevis Anguilla Amateur Radio Society (SKNAARS) worshiped at the Phipps Memorial Methodist Church in Half Way Tree on Sunday, April 14, 2013 to launch the 40th anniversary of the Radio Society. The Phipps Memorial Methodist Church was specifically selected as one of our members was preaching at the church at that time. Rev. Alberic Rohan is a member of the HAM/Amateur Radio Society with the call sign V44ALR. The Members of SKNAARS were well received by the Congregation and the service and sermon were fitting to our needs. We walked away with renewed energies and faith believing that as a group we can become fishers of men to further our worthy cause. President Selwyn Liburd (Rusty), V44RL, in his message stated two simple points. What is amateur radio and why we are called HAMs. Amateur Radio, also called ham radio is the use of designed radio frequency spectrum for the purpose of private recreation, non-commercial exchange of messages, wireless experimentation, self-training, and emergency communication.

5B, Cyprus:
Judith, G4IAQ (5B/G4IAQ/p), Dave, G4IAR (5B/G4IAR/p), and Steve,
G0SGB (5B/G0SGB/p and ZC4BS) are still QRV in SSB and CW from
Cyprus until the 28th. QTH are various light-houses and UK-bases
(MIA MCI-002, WLOTA 0051; MIA MCI-002, WLOTA 0892). Preferred QRG
is 14264. QSLs via h/c, direct only.
http://groups.yahoo.com/group/worked_all_britain
http://groups.yahoo.com/group/British-Amateur-Radio-Lighthouse-Society

5U, Niger:
Pierre, HB9AMO, continues his holiday-style activity as 5U9AMO till
the 30th of May on all bands 80-10m, using 100W in CW with a
longwire. QSL via M0URX, LotW, ClubLog.
http://www.hb9amo.net
http://www.m0urx.com/oqrs/

6V, Senegal:
Luc (F5RAV) returns to Somone on the atlantic coast and will appear
on the bands again a 6V7T between the 26th of April and 5th of May,
SSB and PSK. QSL via h/c, direct only. http://f5rav.free.fr/
http://www.le-calao.com/

EA, Spain:
EH7LU from Fuengirola (Malaga) celebrates May Day on the 29th and
30th of April on 40m. QSL via EA7JKL, direct only.

F, France:
12 operators are getting TM8BIRD on the air for the "Festival de
l'Oiseau et de la Nature" till the 29th. QSL via F5INJ.
http://www.festival-oiseau-nature.com/

I, Italy:
IY4MKD (Marconi Kite Day) will participate in the 34th

International Kite Festival "Vulandra" in Ferrara and utilise an antenna suspended from a kite, thereby commemorating Marconi's first transatlantic radio tests in 1901. QSL via IQ4FE.
http://www.ari-ferrara.it/

JA, Japan:
8J6DON is a special event station concerned with Fukuoka's port festivel "Hakata Dontaku". QRV till the 5th of May, QSL via bureau.
http://fukuoka-now.com/feature/hakata-dontaku-port-festival-2/

The following calls will put in an appearance on the air between the 26th of April and 30th of June for the QRP-day (17th of June): 8J1VLP, 8J4VLP, 8J6VLP, 8J8VLP und 8J9VLP. QSLs via bureau.
http://www.qrpday.org/
http://www.tohkaiqrp.org/
http://www.geocities.jp/ja4dqx/

KH0, Mariana Islands.:
Yutaka, JQ2GYU (WS2Y, M0LZP, T88YU, JF1LZQ) and YL Miho, JJ2VLY (JA1AJT, WS2M, T88LY, M0IHO) are due for another activity as NH0J from Tinian Island (OC-086, USi NI003S, WLOTA 3108, WW Loc. QK24tx), plans are for all bands 80-10m in CW, SSB, and RTTY. QSL via JJ2VLY. http://jq2gyu.blogspot.de/

PA, Netherlands:
PA30WO is yet another special event station in the context of the Netherland's impending royal changes. QSL via bureau.
http://www.whiskyoscar.com

SP, Poland:
The Polish club station call SP73VOT is on the air at least till 2016 and will be used for CW training sessions by its members. QSL via SP5PBE, LotW.

V6, Micronesia:
Takio, JH3QFL and Keizo, JH3AZC, will get Micronesia on the air between the 29th of April and 5th of May as V6H and V6S respectively from Pohnpei (OC-010, WW Loc. QJ96cx). QRV 80-6m in CW, SSB, RTTY, and JT65. QSLs via h/c.

VK, Australia:
Australian amateurs will honour the Australian and New Zealand Army Corps on the 25th of April by using the AX-prefix.

VU7, Laccadive Islands:
Krish W4VKU / VU2VKU received permission on short notice to operate as VU7KV from Kavaratti (AS-011). QRV between 23rd of April and 5th of May. QSL via W4VKU (bureau), LotW, eQSL.

W, USA:
The "QSY Society" celebrates the 222nd birthday of Samuel F.B. Morse on the 27th of April, setting up 3 CW-stations (call: W2M) between 1400z and 1900z from the historic Morse-villa's porch in

Poughkeepsie. QRGs are 7034 with 100W, 14061 and 18076 with 10W each. QSL via WB2LQF, direct only, see also qrz.com.
http://www.qsysociety.org/
http://www.lgny.org/

K4F is one of the numerous special calls operating in the Florida QSO Party during the upcoming weekend. K4F and similar K4 1x1 calls count towards the FQP Spelling Bee award (spell F-L-O-R-I-D-A). QSL for all those calls via WB4OMM.
http://www.floridaqsoparty.org
http://www.floridacontestgroup.org

YA, Afghanistan:
Douglas, ND9Q, remains active as T6DA till August 2013. Pending an antenna improvement he hopes to increase his tx power up to 100W on all bands, using PSK31 and other digital modes. QSL via h/C.

Upcoming Contests

International Marconi Day
2013-04-23

The Marconi Radio Club of Newfoundland (MRCN) will join its sister club, the Poldhu Amateur Radio Club (PARC) and the Association of Italian Amateur Radio (ARI) in international events on the 25th to 28th of April to commemorate the birthday of Marconi. For further details, please see the MRCN web page by searching for VO1MRC on the internet.

http://www.ucs.mun.ca/~jcraig/mrcn.html

73 and thanks!

//
Early Post for IRA Hamfest for JUNE 1,2013

Posted: 22 Apr 2013 06:55 PM PDT
http://forums.qrz.com/showthread.php?388661-Early-Post-for-IRA-Hamfest-for-JUNE-1-2013&goto=newpost

I decided to post this early as possible June 1st is over somewhat a month
away and I know we are all busy.

here is the weblink http://www.w8ira.org/

Good time for meeting eyeball QSOs , VE Exams, Trunk Sales, etc.

Also please visit in planning http://www.michigan.gov/drive for 2013
Construction.

I-196 Hudsonville Exit 62 fuel and food nearby.

US 31 from Holland to Muskegon is going to be crazy this year! :eek:

I wanted to do this as early as possible after looking at the drive map!
Last year Blue Star Highway was crazy also.

Rest Area Mile Marker 58 also Airport Ottawa Executive Airport managed by
Blue Sun Air S of Rest Area

See You there!

NCDXF DX University and Contest University Scholarships

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/2m_Eg5AaeKg/ncdxf_dx_university_and_contest_university_scholarships.htm?utm_source=feedburner&utm_medium=email

NCDXF is committed to bringing younger DXers and Contesters into our hobby.
NCDXF will provide full tuition scholarships for hams 25 years of age and
younger at all DX University and Contest University sessions held in North
America for the next year. This includes those held at the Dayton
Hamvention next month

//
PhoneSat team thank Radio Amateurs

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/1meOC5YRrwU/phonesat_team_thank_radio_amateurs.htm?utm_source=feedburner&utm_medium=email

The Team behind the three PhoneSats deployed April 21 have thanked radio
amateurs for their response so far and request further telemetry reports

//
Preliminary results for the Nauryz DX Contest published

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/jJwY53OjvF0/preliminary_results_for_the_nauryz_dx_contest_published.htm?utm_source=feedburner&utm_medium=email

The contest committee has published the preliminary results at the contest
website for all the participants to verify their entry category and, if
necessary, make changes

//
Thursday 25 April 2013 ARISS contact with school in Nunavut, Canada.
Downlink audible in Europe

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/ng37EjcKan8/ariss_event_2504.htm?utm_source=feedburner&utm_medium=email

An International Space Station school contact is scheduled with
participants at Maani Ulujuk High School, Rankin Inlet, Nunavut, Canada.
The astronaut will be Chris Hadfield KC5RNJ/VA3OOG

//
Warwick University satellite team radio interview

Posted:
http://feedproxy.google.com/~r/AmateurRadioNews/~3/KvNHN_KJ8uI/warwick_university_satellite_team_radio_interview.htm?utm_source=feedburner&utm_medium=email

The team behind the UK WUSAT CubeSat project will be interviewed on Radio Warwick – RaW 1251AM – the show will also be available world-wide on the web

The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

April 24, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- The Largest, Littlest, and In Between - 7QP, NEQP, and INQP
- Short and Sweet - 432 and Microwave Sprints
- Earn Your Stripes!
- Watching the World Turn with ViewProp
- Revitalizing Meetings with Webinars
- Watch the Mailbox - ARRL DX Certificates
- Buffer Amplifiers for SDRs
- Giving New Life to a Dinosaur
- Conversation

NEW HF OPERATORS - THINGS TO DO

Here's a thought - did you know that the ARRL offers a Code Proficiency
Certificate <http://www.arrl.org/code-proficiency-certificate>? True!
Copy some text at gradually-increasing speeds to get a series of
endorsement stickers to the basic award. They go as high as 40 wpm! The
next W1AW Qualifying Run <http://www.arrl.org/qualifying-run-schedule>
is on May 7th and a West Coast run is on May 16th. Do a few CW
contests, sharpen up that #2 pencil, and - are you QRV?

BULLETINS

No bulletin, but here's an assignment - tell your friends and club
members about the free Contest Update newsletter and how to get it by
using the Edit Your Profile link on the ARRL home page!

BUSTED QSOS

The PVRC newsletter <http://pvrc.org/Newsletters/apr13.pdf> for April
was not yet available at the time of the last issue - it is available
online now. (Thanks, Dennis ZS4BS)

The New York QSO Party Coordinator is Brent KC2QLJ, not Bruce. (Thanks,
Duane K2SI)
```

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

April 27-28

- VHF Spring Sprint - 432 MHz (Apr 24)
- Ten-Ten Spring Digital Contest
- SP DX RTTY Contest
- Helvetia Contest
- QRP To The Field--CW
- Florida QSO Party
- BARTG 75 Sprint--Digital

May 4-5

- NS Weekly Sprint--CW (May 3)
- 2 GHz and Up World Wide Contest
- Microwave Spring Sprint
- Ten-Ten Spring CW Contest
- ARI International DX Contest
- 7th Area QSO Party
- Indiana QSO Party
- Radio Club of America QSO Party
- New England QSO Party
- Worked All Britain - LF Phone (May 5)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

Let's be honest - you always wanted to wear a "zebra shirt" and blow a whistle - here's your change! WRTC2014 is now accepting applications for referees <http://www.wrtc2014.org/wrtc2014-accepting-applications-for-referees/%20%20)>. Unique in all of radiosport in that it places an on-site referee with every operating team, WRTC needs qualified contesters to keep an eye and an ear on the proceedings. "With the rules allowing both operators to transmit simultaneously the challenge for each referee is greater than ever," says Dan Street, K1TO, manager of the Team and Referee Selection Committee. The application period lasts until Dec 1st - check out the referee requirements on the WRTC2014 website. <http://www.wrtc2014.org/>

Rovers and mobile station aficionados of state QSO parties should check out Chuck NO5W's CQ/X <http://www.no5w.com/> logging software that integrates directly with a GPS to keep track of your county and grid as your move around. Another issue unique to the state QSO parties and county-hunter contests is operating from a county line. New versions of N1MM <http://n1mm.hamdocs.com/tiki-list_file_gallery.php?galleryId=15> software (version 13.04.01 and later) support several variations on the rules for operating astraddle jurisdictional boundaries, as well. (Thanks, Chuck NO5W and Craig K9CT)

RTTY contesters take note - Larry K8UT is preparing a presentation for the Dayton Hamvention <http://www.hamvention.org/> "RTTY Contesting Forum" in which he'd like to report opinions about the new RTTY decoder 2Tone's strengths and weaknesses. He has prepared a very short survey <http://survey.hamdocs.com/index.php?sid=67243> for both users, and non-users, of 2Tone RTTY software. Take a minute and add your perspective.

It's only about a month until Saturday night at Dayton's Crowne Plaza where you can test your CW pileup skills on the latest competition concocted by Russ K0VXU for the Kansas City DX Club's <http://www.kcdxclub.com/> hospitality suite. Chuck NO5W is the author of the superb "horse-race" viewer that keeps score and lets those in the suite cheer on the contestants as the test progresses. This year he's added a practice program <http://www.no5w.com/PileUpNetPractice.html> to let you warm up a little bit before the contest by choosing audio files from previous years and seeing how you do. Let the trash-talking begin!

The high-performance VHF/UHF antenna designs produced by Directive Systems <http://www.directivesystems.com/> (originally C3I) have a new owner. Terry W8ZN has purchased that product line and will be introducing some new 6 meter antennas in the near future. The new company was open for business as of April 1st. (Thanks, Chris W3CMP)

The new Radio-sport.net <http://feeds.feedburner.com/radio-sportnet?format=xml> seems to be off and running with lots of new stories and features. This would be a good contesting website to keep in your bookmark list.

Last week we lost a couple of contest veterans from opposite sides of the globe as Al VE1AL and Mike VK6HD both died on the same day. A frequent competitor in contests and in DX pileups from Halifax, Nova Scotia, Al was a competitive force from the Maritimes. Nearly at Al's antipode, Mike was a favorite source of Zone 29 QSOs for your editor and many others, including Top Band contacts over great distances to the Americas and Europe. Both will be sorely missed.

This coming Saturday, April 27th, is Morse Code Day <http://www.daysoftheyear.com/days/morse-code-day/>! Samuel Morse <http://en.wikipedia.org/wiki/Samuel_Morse> was born in 1791 and his invention of a telegraph and an effective coding method for text created the first "on line" medium, truly changing the world. The special event station W2M will operate from Locust Grove <http://www.lgny.org/>, Morse's villa, from 1400Z to 1900Z. (Thanks, Paul W0RW)

Pete N4ZR checks in to say, "Thank you to everyone who offered to help with the World Contest Station <http://conteststations.com/>Database <http://conteststations.com/>. In response to my recent e-mail seeking a new home for it, I'm delighted to report that Bruce, WA7BNM has offered to incorporate the database into the offerings of his enhanced 3830 <http://www.3830scores.com/> score reporting website. The move

will be made in several weeks."

An announcement from the Northern California DX Foundation <http://www.ncdxf.org/> (NCDXF) at the recent International DX Convention in Visalia, CA bodes well for bringing younger DXers and contesters into our hobby. NCDXF Director, Glenn K6NA announced, "NCDXF will provide full tuition scholarships for hams 25 years of age and younger at all DX University <http://www.dxuniversity.com/> and Contest University <http://contestuniversity.com/> sessions held in North America for the next year. This includes those held at the Dayton Hamvention next month." Thanks, NCDXF!

For those of you geographers out there (and what contester isn't at heart a geography nut?) take a gander at this interesting online puzzle <http://gmaps-samples.googlecode.com/svn/trunk/poly/puzzledrag.html>. Drag the shapes around the map and watch the Mercator distortion change them - they look so...so...familiar! Place the shapes on their actual location to complete the puzzle. (Thanks, Randy K5ZD)

Web Site of the Week - Speaking of maps, Rick ZL2HAM has created ViewProp <http://zl2ham.wikispaces.com/> a terrific new mapping program that takes a stream of spots or Reverse Beacon Network reports and plots them on any of a collection of maps from DX Atlas. Not only are the receiving stations displayed but the path between them, with color indicating the band and variable persistence, among other interesting options. It's fascinating to see the different bands opening and closing as the Earth rotates. Both globe and flat map presentations are available in this beta test version. If you'd like to help complete the test process before ViewProp 1.0 is released, check in on the software's website or join the online discussion group <http://groups.yahoo.com/group/viewprop/>.

WORD TO THE WISE

Quality control shouldn't stop at the factory. (Thanks, Roger K8RI)

==> SIGHTS AND SOUNDS

The article "Revitalize Your Club Meetings" by Tom Field in the March issue of Sky and Telescope <http://www.skyandtelescope.com> suggests planning a meeting around an online webinar. That sounds familiar - we have been enjoying the webinars hosted by the Potomac Valley Radio Club <http://pvrc.org/> and archived by the World Wide Radio Operators Foundation <http://www.wwrof.org/>. Why not re-schedule a meeting to occur on webinar night? All it takes is one person to register and a PC projector - voila! - instant meeting speaker!

Photographs were taken by the boatload at the recent International DX Convention. You can see the faces behind some of those big West Coast signals in this great Picasa photo album <http://bit.ly/Visalia2013> by Bob N6TV. He's taken the time to add many call signs so you're not guessing!

Here are two Contest University video presentations - an online webinar <http://wwrof.org/category/webinar-archive/> and this recent Ham Nation <http://twit.tv/show/ham-nation/94> online show. Are you ready for class? (Thanks, Tim K3LR)

Ultimate Frisbee and Battlebots - what could be a more imaginative mix? Watch the fun in this video <http://tv.slashdot.org/video/?embed=9qdXEwYjoG37xL6MdiN4IP2FYhBSLOOX> from the recent FIRST competition. It reminds of 20 meter phone for some reason...

Dave K1TTT has put one of those unmanned video drones to an excellent purpose - checking out the antenna farm <http://www.youtube.com/watch?v=KIfhRzGo8uI> without a climbing belt! Dave is using a Parrot AR-Drone 2.0 <http://ardrone2.parrot.com/usa/>. It's hard to tell who is having more fun with the drone - Dave the operator or Pablo the excited dog! (Thanks, Tim N3HX)

NASA has compiled three years of images from the Solar Dynamics Observatory (SODO) satellite in a four-minute time-lapse video <http://www.space.com/20778-three-years-on-the-sun-time-lapse-video.html> on the space.com website. Following a short ad, the view at the 171 angstrom wavelength is shown, taking up about half the video. Then a faster series of images is presented that include the more familiar visible-light wavelength of 4500 angstroms and two others. The image can be enlarged to full-screen for a better view. (Thanks, Bob N6TV)

More about Morse with Morse Code Day <http://www.daysoftheyear.com/days/morse-code-day/> coming up - if you are interested in Morse Code in baseball, here's an audio file <http://www.morsetelegraphclub.org/files/WU-Pgh1-BB.mp3> from KCMO on the early days of baseball reportage (featuring an ex-President) and there is some secret Morse <Morse%20code%20at%20Fenway%20Park%20-%20http:/www.bostonguide.com/boston_confidential/fenway%20secrets.aspx> at Fenway Park in Boston. (Thanks, Rich K8MEG)

Here's a new and tasty variation <http://n1ta.com/rbn1.html> of the RBN by Mike N1TA. (Thanks, Doug K1DG)

For viewers receiving this issue while it's still April 23rd, on this day in tech history, YouTube co-founder Jawed Karim uploaded a 19-second video to the new video-sharing website and started a new era in information sharing, watching cute pet videos, and generally occupying a huge amount of time.

==> RESULTS AND RECORDS

Certificates for U.S. and Canadian Single-Operator and Multioperator stations in the 2012 ARRL International DX Phone Contest have left the building - watch your mailbox! (Thanks, ARRL Contest Branch Manager, Sean KX9X)

Records and high scores have been updated through 2012 for the June and September ARRL VHF contests <http://www.arrl.org/contest-records> and the July CQ WW VHF Contest <http://www.cqww-vhf.com/records.htm>. If anyone spots errors or omissions, please let Curt K9AKS <croseman@usc.edu> know about it!

The preliminary results of last month's North American RTTY Sprint <http://www.ncjweb.com/sprintrttyprelim.php> are posted by contest manager, Ed W0YK <ed@w0yk.com>, and Log Check Reports are available upon request. Please let Ed know of any questions you have. Final results will be included in the National Contest Journal's July/August issue.

"Raw scores before checking for the CQ WPX SSB 2013 contest <http://www.cqwpx.com/claimed.htm?mode=ph> are now available," says new CQ WPX Contest Director Terry Zivney N4TZ. Let Terry know if you see anything wrong with your score.

Results of the 2012 running of the Alabama QSO Party <http://www.alabamaqsoparty.org/> (AQP) are now available online. (Thanks, Tim KT4TX)

The Florida Contest Group is pleased to announce the results of the 2012 Florida QSO Party <http://www.floridaqsoparty.org/results> are posted. There you will find the line scores for all entrants as well as the soapbox and results article with analysis. (Thanks, Chris WF3C)

Results of last fall's VHF+ Sprints <http://www.svhfs.org/sprints.html>, sponsored by the Southeastern VHF Society, are now available, as well. (Thanks, Darryl WW7D)

>From the March issue of Sky and Telescope <http://skyandtelescope.com> we learn that the jets from supermassive black holes carry the highest observed currents - on the order of 1 million trillion amps. That's a record of 1018 amps for those of you keeping score. Now where did I put that million trillion amp fuse?

OPERATING TIP

"Send at an appropriate speed (be cognizant of conditions) - I especially like the speed demons when the signal is going over the pole! Dude - if you want to send 35 wpm that's fine you just won't make it into the log!" - Eric T6MO/K9GY

==> TECHNICAL TOPICS AND INFORMATION

Adapting a transceiver for use with an external SDR requires careful treatment of the signal path. A buffer amplifier is often used to provide the necessary isolation. Pete N4ZR suggests the Clifton Laboratories Z10000B <http://cliftonlaboratories.com/z10000_buffer_amp.htm> buffer amplifier which is optimized for maximum strong-signal handling and other performance parameters.

How can you determine if an amplifier tube has high voltage faults without risking your amplifier? Jim W8ZR suggests a couple of simple tests (based on amplifiers using tetrodes such as the 8877): First, be very careful to observe safety precautions when you do any testing inside a tube amplifier. Before you do any HV tests, key the amp with the tube's anode disconnected and while monitoring grid current. Apply a small amount of RF drive, not more than a watt, and see if the grid current meter kicks up. If it does, then there's no grid short in the tube. Be careful not to apply too much RF drive if you do this, or you'll burn out the grid. Next, reconnect the tube's anode through an incandescent light bulb, so that the bulb will burn out and act like a fuse if there's an internal short in the tube. If it passes the test, repeat it, while activating the amp's transmit relay without any excitation at the input. The tube should draw normal resting current. If resting current is normal (typically about 100 mA) and the bulb glows dimly, then there's no short in the tube and you can then begin to apply input power. Again, "switch to safety" when working on an amplifier!

Jim W8ZR also weighs in on HV connectors in homebrew HV power supply construction. Modern design practice is always to use shielded cable (with grounded shield) for an HV interconnects between an external power supply and an RF deck. The best connector for amateur use is the SHV BNC connector, which is conservatively rated at 5000 V. The connectors, which will not mate with conventional BNC jacks, are designed so that the shield always makes connection before and breaks connection after the center conductor. They are normally used with RG-58, RG-59, and RG-6 cable, all of which are good for 5 kV dc (RG-58's 2500 V rating is for ac). HV BNC connectors with reverse polarity (another safety feature) are commonly available as imports for about $10 for a plug and matching jack or from Kings Electronics at a higher price. (See Jim's excellent article on deluxe HV power supplies in the May/June issue of QEX <http://www.arrl.org/qex>.)

Are rodents chewing on your cables and wires? Zack W9SZ recalls a PBS documentary that recommended a method to get rid of rodents by scattering dried hot pepper seeds around the area you want to clear. Once the rodents get a taste of them they will stay away. The seeds don't bother birds apparently.

Following the Boston Marathon bombing, mobile phone service was sporadic or unavailable, leading to all kinds of rumors. Norman W9VQ recommends this plain language article <http://boingboing.net/2013/04/17/why-is-it-so-hard-to-make-a-ph.html?utm_campaign=moreatbbmetadata&utm_medium=referral&utm_source=boingboing.net> about the limits of mobile telephone technology in emergency situations.

Magazine Review

- April/May Nuts and Volts <http://nutsvolts.com/> "How to Make Professional Looking Control Panels and Enclosures", parts 1 and 2, by Gordon McComb

- Electronic Design <http://electronicdesign.com/author/lou-frenzel>
"Millimeter Waves Will Expand The Wireless Future" by Louis Frenzel
W5LEF along with an interview with Prof. Ted Rappaport N9NB, "NYU
Wireless Director Theodore Rappaport Addresses Millimeter Waves And
Engineering Education"
- Electronic Design "Understanding Wireless Range Calculations
<http://electronicdesign.com/communications/understanding-wireless-range-calculations>"
by Chris Downey

Two technical references crossed my path this week, starting with the
Times Microwave Coaxial Cable Catalog and Handbook - 15th edition
<http://www.timesmicrowave.com/products/tl14/downloads/tl15_catalog.pdf>.
Another good source is the document Andrews Coaxial Cable Attenuation
Specifications
<http://www.highgain.co.kr/admin/Uploaded_Files/cable.pdf#page=1&zoom=auto,0,849>.
(Thanks, Frank W3LPL)

Technical Web Site of the Week - HF Packet has not been a stellar
performer in the ham's portfolio of protocols but UZ7HO has given the
mode new life through use of parallel decoders as described in the
article "Giving New Life to a Dinosaur
<http://www.westmountainradio.com/pdf/Spring2013Newsletter.pdf>" by
K7TMG. The PC sound-card TNC UZ7HO Sound Modem
<http://uz7ho.org.ua/packetradio.htm> is also compatible with AGW (a
popular packet engine that handles the TNC) in communicating with other
software through TCP ports.

==> CONVERSATION

Once in Your Life

I spent a pleasant - if very busy - weekend at the International DX
Convention <http://www.dxconvention.com/> in Visalia, California.
Hosted by the Northern California DX Club <http://www.ncdxc.org>, the
convention featured record attendance and was held at the Visalia
Convention Center for the first time, to very good reviews. There were
plenty of great presentations, vendor and exhibitors had big displays,
meals were tasty, and the hospitality suites were full until late.
(Thanks, NCDXC!) DX visitors were greeted from the far-flung corners of
the planet. But that's not really why we go.

The best part, by far, is getting together with friends and making new
ones. Nominally, ham radio is a communications service, but I assure
you that its reputation as the world's first social media is
well-deserved. Everywhere I looked were gatherings of hams catching up
on old friendships. The convention, known simply as "Visalia," has a
long and storied history going back to the days when it was held in
Fresno. A special bus ran from Marin County all the way through the Bay
Area and across the Central Valley. Oh, the tales that are told about
that bus ride! It's a good thing digital cameras were far in the
future...although there are a few blurry black-and-white snapshots
reported to exist.

Many of the attendees are decades-long Visalia veterans, although it looked to me like a youthful new group has started to appear. In the "Last Man Standing" DXCC totals competition, Dick W6KH took the prize with 388 confirmed entities to his credit. Yet, Val NV9L just received her DXCC and has been adding endorsement stickers in large gulps - she's at 225 "with a bullet" as they say. DX is and DX will be.

The hopefully not-so-hidden message in this report is that all of my readers should attend one of these major conventions at least once as a ham and the sooner, the better. There are gatherings for every specialty in ham radio - digital modes, QRP, weak-signal VHF+, emcomm - whatever your taste, there's a home for you.

Don't think you wouldn't be welcome just because you don't have the 400 DXCC sticker or a string of contest wins. I can tell you that the newcomer has just as much fun as the ham who has attended forty times in a row! Don't put it off because all you're putting off is a good time. Maybe you can combine your convention with a family vacation? It would sure make a good birthday present to ask for, wouldn't it? Dayton's Hamvention is coming up and so are a lot of other gatherings - big ones, too! How many times have we all thought, "Once in my life, I'd like to..." Start planning now and I'll bet that once you do go, it won't be the last time you do!

73, Ward N0AX

==> CONTESTS

24 April through 7 May 2013

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

Ten-Ten Spring Digital Contest--Digital, from Apr 27, 0001Z to Apr 28, 2359Z. Bands (MHz): 28. Exchange: Call, name, county & S/P/C, 10-10 number. Logs due: 15 days. Rules <http://www.ten-ten.org/>

SP DX RTTY Contest--Digital, from Apr 27, 1200Z to Apr 28, 1200Z . Bands (MHz): 3.5-28. Exchange: RST, serial, SP province. Logs due: May 5. Rules <http://www.pkrvg.org/aboutme.html>

Helvetia Contest--Phone,CW,Digital, from Apr 27, 1300Z to Apr 28, 1259Z . Bands (MHz): 1.8-28. Exchange: RS(T), serial or Swiss canton. Logs due: 15 days. Rules <http://uska.ch/amateurfunkpraxis/contest/info-kw>

Volunteers from Washington County ARES to Hold Drill at Bald Peak:

Posted: 23 Apr 2013 05:29 PM PDT
http://www.eham.net/articles/30065

The Washington County Chapter of Oregon Amateur Radio Emergency Service (ARES) will stage a practice drill from 9 a.m. to 3 p.m. Saturday at Bald Peak State Scenic Viewpoint, near Hillsboro. The drill is open to the public. This drill will establish radio communications with more than 100 locations in Oregon, including emergency operation centers, Citizen Emergency Response Teams (CERT), American Red Cross teams, fire departments and hospitals. Members will use radio frequencies with voice and digital modes. Operators will communicate with each other throughout the state of Oregon "without utilizing traditional cell phone, internet or land-line infrastructure," according to JD Fort, spokesperson for Oregon ARES.

to the next MMMonVHF Newsletter will be next wednesday 22.00 UTC ...

****
The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USERS of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USERS who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

WIANEWS WEEK COMMENCING APRIL 28 2013.

WIA DIRECTOR TRENT SAMPSON VK4TI TELLS US OF THE 'Michael Owen Plaque.'

WIA AGM VENUE HIGHLIGHTS - ONNO VK6FLAB

WIA NEWS REBROADCASTERS MUST SUBSCRIBE URGENTLY "we tell you why."

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING APR 28 2013.

International Disaster, Earthquake in China

Saturday April 20 a major earthquake hit China's southwest rural area of
Ya'an, which has now left 200 dead, injured about 12,000 and many more
people homeless.

Fan Bin BA 1 RB reported that amateur radio operators swung into action to
provide emergency communications and coordinate parts of the disaster
response.

With toppled houses everywhere, rescuers frantically began their search of
the rubble for survivors, while medical staff treated those hurt on the
ground and in make-shift hospitals.

Panic was evident with survivors sheltering in cars and tents. Badly hit Lushan County is now like a large refugee camp with volunteers providing meals.

Fan Bin BA 1 RB has recently reported that public communication was back to normal in the disaster area and the local repeater systems continued to work.

He said the Chinese Radio Sports Association, also known as the Chinese Radio Amateur Club, no longer required emergency communication frequencies. It expressed thanks for the support from IARU member societies and others.

A role for some radio hams was maintaining traffic control, with emergency supplies arriving including tents, water, food and medicine.

Rain hampered search and rescue efforts in the quake zone, and added to fallen trees and landslides making progress slower in some areas. After-shocks also occurred.

The Sichuan provincial government reported that 3,000 kilometres of road and 327 bridges had been damaged. The total repair bill from the earthquake was put at $3 billion.

The central government of China, local officials, rescuers, relief workers and radio amateurs are much better prepared to deal with disasters, than has been the case in the past.

Neighbouring Russia sent rescue teams, and the Red Cross from Hong Kong with an embedded radio amateur, are helping the on-going effort.

(Jim Linton VK3PC, Chairman of the IARU Region 3 Disaster Communications Committee with Fin Ban BA1RB, and Rudy Wong VR2USP)

Jason VK2LAW will be with us here on WIA National News shortly with more International News but to VK now where we find :-

GPS jammers used by taxi drivers

To track modern taxis by finding the closest one vacant to a job and for security reasons, cabs are fitted with satellite-based Global Positioning System (GPS) technology.

The supply and use of a GPS jamming device has been outlawed in Australia since 2004.

However intelligence indicates the devices may be used by some cab drivers to block signals.

In a joint initiative called Operation Signal, the ACMA joined with the Victorian Taxi Directorate at the Melbourne Airport taxi holding yard to re-educate drivers.

Armed with fact sheets and a spectrum analyser, the ACMA spoke to hundreds of them who should now know that GPS jammers are prohibited.

(Jim Linton VK3PC)

"GPS jammers create a bubble of interference or blocking around a taxi.

A few operators have used a GPS jammer to override taxi meters and trick the cab companies into giving them work when they're not in the immediate area or are vacant.

At the expense of their colleagues, those using a jammer could make up to $200 extra a week."

HORSE ENDURO - GIRARD STATE FOREST. 4-5 May

WICEN(NR) will assist with comms for the Tenterfield Equestrian Club.

20km, 40km 80km (2x40km) rides, first out early Saturday.

Base and two checkpoints required.

Est. 60 to 100 riders.

Terrain will probably mean comms on 80 or 40m, 2m liaison channel.

Depart early Fri morning, RV convoy at Casino 1030K
Set up by noon Fri., circuit recce and test in afternoon.

If you can assist, contact Ross VK2ARD, 040 880 6555
rossdowse@bigpond.com

VK3 Homebrewers meet Saturday May 4.

The next Homebrew Construction Group meeting will take place on Saturday May the 4th at 2pm, at Amateur Radio Victoria, 40g Victory Boulevard, Ashburton.

The group will have keen microwave enthusiast and Amateur Radio magazine columnist, David Smith VK3HZ, to talk about polarity protection on his 10 GHz transverter.

The meeting will also have a show ?n tell segment and discussion. All are welcome to attend on Saturday. The group has an email address for inquiries which is homebrew@amateurradio.com.au

(Jim Linton VK3PC)

MDRC HamFest 2013

The Moorabbin and District Amateur Radio club are pleased to announce the 2013 HamFest will be on Saturday 11th May, with doors opening at 10am.

This year's event will be at the Southern Community Centre, Rupert Drive, Mulgrave (Melways map ref 80 F4).

The Moorabbin Radio Club's annual HamFest is proud to be Victoria's biggest with displays and sales of new and preloved equipment. A must come must see event for anyone interested in Radio Communications and Electronics.

Major door prizes, free tea and coffee, light refreshments and a sausage sizzle will also be on offer.

Trader table bookings and general enquires can be made by emailing Graeme Lewis VK3GL (vk3gl@bigpond.com) or by phoning mobile 0418 171601.

A Must see, must come event!!

Club celebrates its 75th anniversary

The Eastern Zone Amateur Radio Club based in Victoria's LaTrobe Valley will hold a 75th Anniversary Dinner at the Morwell Bowling Club, on Saturday May the 18th.

A special event station VI3BEZ75 will be activated during May, to further celebrate the formation as the Eastern Zone of WIA Victoria in 1938.

(Jim Linton VK3PC)

HOME OF THE GOOD GUYS

50 YEAR WIA MEDALS PRESENTED AT RADAR CLUB ROCKHAMPTON TO 2 FINE WIA MEMBERS IN ROCKHAMPTON.

ON BEHALF OF WIA and RADAR CLUB ROCKHAMPTON HERE IS CLIVE VK4ACC

50 years continuous membership each
(A Life time!) 2 WIA Members from Rockhampton.

On Wednesday evening 17th April at Rockhampton And District Amateur Radio Club a celebration and presentation was given to two of our RADAR CLUB members.

Gordon Adams VK4GM and Doug Kraatz VK4DUG.

They both have had WIA continuous membership for 50 years to the day. They joined WIA in 1963 We hold copies of both original membership certificates .

Copy will be sent to WIA National.

During the presentation Gordon stressed to younger members the importance of being members of WIA.

First tho we will give a few pieces of history dealing with amateur radio in Rockhampton Central Queensland.

In March 1928 the first radio club was formed in Rockhampton.

CQ Branch of WIAQ was formed in November 1960. Yes! Every member had to have WIA membership. (And we all were!)

Rockhampton And District Amateur Radio Club was founded 15th May 1996. This was due to the WIA CQ Branch became too difficult to administer for the then state body WIAQ.

Clive VK4ACC a winner of a 75th WIA anniversary medal and Past Alternate Federal Councillor and Past member of WIAQ Advisory Committee made the presentation of the 50 year WIA membership medals on behalf of the WIA 17th April 2013.

WIA AGM Venue Highlights - Bcast on 28 April 2013, 0'37"

Have you prepared for the last weekend in May; the 2013 WIA AGM and Conference?

The Tradewinds Hotel overlooks the Swan River in Fremantle. The well-appointed rooms have a kitchenette and are grouped around the central facilities of the hotel. You'll make your own reservation and make sure you tell them it's for the WIA Conference, so you get the special room rate of $180 per night.

The 2013 WIA AGM and Conference, it's all about Engaging, Learning, Appreciating, Socializing and Discovering.

You'll find all the information online at the VK6 conference site, conference.vk6.net

DISCUSSION POINT

What use is an f-call?

Having a license, or rather, getting a license is an activity that is relatively simple. I've heard it said that people fear public speaking more than death and zombies.

Keying your microphone is about as public as you can get, but compared to public speaking, there is a pay-off. You don't actually have to look at your audience and you can do it from the safety of your bedroom if you so desire.

As I've said in the past, I've keyed my microphone many, many times. When you listen to me you might not realise that every time I key my microphone is a first time of sorts all over again. When I talk on air, for example, to start this segment today, I had to take a breath, compose myself and key my microphone and start talking.

As an added bonus, I'm reading from a script, so I know when I've made a mistake, even if you don't.

As I'm speaking to you now, I have butterflies fluttering through my stomach, I'm wired, and if I'm not careful, I'll sound like a speeding train, talking at a million miles an hour.

The flip-side of that, is that you normally don't hear any of the internal dialogue I'm having. I key my microphone and just start talking.

If you've never done that, then the idea of saying something on-air can be daunting. The more you hesitate, the harder it gets and the more you might fear the actual process, never mind the technical aspects of setting up your station.

There are a couple of things that you might do to make this a little less terrifying. First of all, you might consider that the process of keying your microphone for the first time is something that you've already done several times in your life. You spoke on the phone for the first time, you met a stranger, you were asked a question in a meeting. Keying your radio is the same thing.

Every amateur has had to go through the process, and, in addition, there are radio nets around where you can do this with people who have only just gotten their license too.

So, don't be afraid of your microphone, the trick is not to give in to whatever is holding you back, but to take a breath and give it a go. I look forward to hearing you on-air, Zombies notwithstanding.

I'm Onno VK6FLAB

INTERNATIONAL NEWS CONTINUES With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

The AMSAT News Service bulletins are a free, weekly news and information service of AMSAT North America, The Radio Amateur Satellite Corporation.

ANS publishes news related to Amateur Radio in Space including reports on the activities of a worldwide group of Amateur Radio operators who share an active interest in designing, building, launching and communicating through analogue and digital Amateur Radio satellites.

The news feed on http://www.amsat.org publishes news of Amateur Radio in Space as soon as volunteers can post it.

Please send any amateur satellite news or reports to:
ans-editor at amsat.org.

SARL TO GET A 472 kHz LICENSE

The SARL has secured a pilot license for experimentation on 472 kHz. The SARL has made payments for the two 5 MHz licenses, (made mention of several weeks ago here on VK1WIA National News) and the 472 kHz. A special web section is being created for the information of SARL members.

The final arrangements on how SARL members can take part in experimentations on 5 MHz and 472 kHz will be published on their.

REPEATER LOCATOR FOR IPHONE/IPAD

A free Repeater Directory App for the UK, Europe, Australia, New Zealand, South America and more is now available for iPhone and Android based smart devices.

Repeater Locator enables the traveling ham to easily find repeaters across most populated areas of the world using GPS or a Locator to find repeaters.

Also the Android version supports the BlueCAT, FT-857 and FT-817 Bluetooth CAT interface that allow a user to simply touch a repeater to instantly his or her radio.

You can find Repeater locator by searching for ZBM2 at the Apple App Store or the Play store

RADIO SCOUTING EVENT A MAJOR SUCCESS

A ham radio related Youth Workshop in Kirkland, Washington is being called a big success. This thanks to the hard work of the amateur radio support team

at the event.

According to planners, there were over 100 Electricity, Electronics and Radio Merit Badges completed by the 58 youngsters who were registered at the event.

14 adults and 14 scouts qualified for their amateur radio licenses.

Five of the adults were Scout Masters. Some of the others were from scouting troops and the Lake Washington Ham Club.

Another event of this type is in the planning stages for September 14th.

Young radio amateurs in South Africa have been invited to become interested in VHF and the frequencies above including the Square Kilometre Array (SKA).

We Radio amateurs started off on the medium frequencies with spark transmissions, then forced to relocate to the shorter wavelengths, the HF band, where we pioneered world-wide DX operation via the F and the F2 layers and even explored the more 'useless? sic' "Ultra High Frequencies" above 56 MHz

As radio communications progressed throughout the years it was discovered that there were many different modes of propagation present on VHF, UHF and SHF that made long distances possible, including DX, EME, satellite and space communications.

This is a great challenge for the younger generation of South African radio amateurs to explore the modern world of radio communications, and make their contribution to radio science.

After all it was a radio amateur Grote Reber, W9GFZ, at Wheaton, Illinois who originally mapped the radio sky on VHF (160 MHz) and became the first radio astronomer in the world.

==========

NEWS FROM ARNEWSLINE USA

CALIFORNIA CB OPERATOR CITED FOR TALKING TO MUCH TO NOBODY

A California CB operator has been cited by the FCC for what amounts to having been long winded while talking to nobody on 11 meter CB. Here's Amateur Radio Newsline's Bruce Tennant, K6PZW, with the details.

--

Talking to nobody on 11 meters but taking a long time to say it is the crux of a Notice of Violation issued on March 12th to Joseph Loiacono who lives in the Los Angeles suburb of Lakewood.

According to the FCC, back on January 29th the FCC received a complaint of interference to CB radio communications on 27.165 MHz In response agents from the Los Angeles Office

Enforcement Bureau T-hunted the signal and determined that they were coming from an antenna at a residence owned by Mr.Loiacono.

While monitoring the frequency the agents observed someone whom they allege to have been Joseph Loiacono engaging in extended one-way transmissions which resulted in intentional interference to other CB stations. Some of these transmissions the FCC says lasted up to twenty minutes in length.

This in led to the FCC issuing the Notice of Violation seeking additional information concerning the violations and any remedial actions that Loiacono had since taken. Specifically his response had to fully explain each violation, including all relevant surrounding facts and circumstances. It was also was to contain a statement of the specific actions he had so far taken to correct each violation and preclude any recurrence.

But it did not end there. In accordance with Section 1.16 of the Rules, Loiacono was directed to support his response with an affidavit or declaration made under penalty of perjury, verifying the truth and accuracy of the information that he provided to the FCC. He was also warned that to knowingly and wilfully make any false statement or conceal any material fact in reply to the Notice of Violation was punishable by fine or imprisonment under Title 18 of the U.S. Code.

Joseph Loiacono was given 20 days from the release of the Notice of Violation to submit his written statement concerning this matter. That date is now past but at airtime it's not known what information he had in his reply to the FCC.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, monitoring this one from Los Angeles.

--

For what it's worth, this is the first time in years if not decades that we have heard of anyone on the 11 meter Citizens Band being issued a Notice of Violation for making a one way transmission that was far too long. In fact its one of the few instances of any real enforcement action on 11 meters in a long, long time.

SPECIAL EVENT STATION TO HONOR CODE TALKERS

The Lawton Fort Sill Amateur Radio Club will be hosting a special event station from May 8th to the 11th at the Comanche National Museum in Lawton, Oklahoma. This to commemorate the work of the Comanche Code Talkers of World War II.

According to Wikipedia, the Code talkers were
people who used obscure languages as a means of
secret communication during wartime. The term is
now usually associated with the United States
soldiers during the world wars who used their
knowledge of Native-American languages as a basis
to transmit coded messages.

There were approximately 400 to 500 Native
Americans in the United States Marine Corps whose
primary job was the transmission of secret
tactical messages. Code talkers transmitted
these messages over military telephone or radio
communications nets using formal or informally
developed codes built upon their native
languages. Their service improved communications
in terms of speed of encryption at both ends in
front line operations during World War II.

==========

WEIRD AND WONDERFUL

Three hams were shipwrecked during a DXpedition. On was a W2
from New York, One was a G3 from London and on was an SP4 from Warsaw.

The little island was so tiny, it only had a single palm tree on it, and
the three guys just walked around and around it in circles.

After a few thirsty days, the SP4 stubs his toe on something, and
pulling it out of the sand, he sees it is an oil lamp. Right away
he starts to rub and shine it with his tattered shirt.

Poof! Out comes the Genie!

"Master, I am ready to grant you three wishes!" Says the Genie.

The SP4 says "Gee, can you make it one wish a piece for us three?"

The Genie thinks about this, and says "OK, I guess and can do that."

So, the W2 goes first. "I would like to be at 42nd, on times square,
sipping a cold Miller and watching the miniskirted girls parade by!'

Poof! and he is gone!

The G3 goes next. "I wish I was in Piccadilly Circus sipping me some
cold ale, and watching the lasses go prancing by with their long hair
swinging in the breeze!"

Poof! and he is gone!

Now it is the SP4's turn. "Gee, I don't know. Can't run a one
man DXpedition. I wish my buddies were back ....

The Wireless Institute of Australia is proud to announce the introduction of the Michael Owen Plaque for competitors in the IARU HF Championship Contest held in July every year.

A Plaque will be presented by the WIA to the Highest Point Scoring single operator station in IARU region three (3) in the IARU HF Championship.

Regardless of mode or bands used the Michael Owen plaque shall be awarded annually to the Single Operator scoring the most points in the IARU HF Championship.

This is to encourage excellence in Region 3 contesting in memory of the work and dedication of Michael Owen former president of the Wireless Institute of Australia.

Check wia.org.au FOR CURRENT RULES

The Michael Owen Plaque.

This TEXT ONLY item from the NZART was originally sourced to VK4TS,

"Who was Michael Owen ?

"IARU Region 3 Chairman Michael Owen, VK3KI, passed away September 22.2012. He was 75. Owen, who was also President of the Wireless Institute of Australia (WIA) -- that country's IARU Member-Society -- participated in many IARU committees and was a member of the IARU Observer Team at a number of World Radiocommunication Conferences. He is perhaps best remembered for his work on Article 25 -- a package of revisions to the international Radio Regulations that are specific to the Amateur and Amateur-Satellite Services -- at WRC-03.

Amateur Radio societies around the world have benefited from Owen's enthusiasm and experience; he was passionately involved with the Amateur Radio Service since the 1960s, and served as IARU Vice President from 1989-1999.

In 2004, Owen led the WIA through the progression from a federal structure with state divisions, to an efficient national organization with affiliated local clubs. Through Owen, the WIA became highly regarded by government agencies and the Australian Communications and Media Authority (ACMA) for its professionalism and efficiency, especially in relation to the WIA examination and call sign management service. He championed and guided the introduction of the Foundation License class in Australia, a move which bolstered the numbers of Australian radio amateurs, while other countries' numbers were declining.

ARRL Chief Executive Officer David Sumner, K1ZZ, recalled first meeting Owen 36 years ago:"IARU President Noel Eaton, VE3CJ, had called the first-ever meeting of representatives from all three IARU regions to coordinate global preparations for the 1979 World Administrative Radio Conference. WARC-79 is memorable primarily because it's where the Amateur Radio Service gained the bands at 10, 18 and 24 MHz, among other things. Michael came to that meeting in Florida in April 1976 as a Director of what was then called the IARU Region 3 Association, which had been formed just a few years earlier to bring together the IARU Member-Societies of the Asia-Pacific region. His day job was as an attorney, but he was also an active radio amateur and very involved in the WIA. I got to know Michael much better three years later, because we spent

11 weeks in Geneva together at WARC-79. He had found a place on the Australian delegation and I was part of the IARU team. He was not simply a colleague; he was a friend.

"Among the assignments that Michael drew at WARC-79 was to draft a resolution to exempt the Amateur-Satellite Service from coordination procedures that otherwise would have bogged us down in endless paperwork and great expense. As an attorney it was just the sort of thing he was good at. His work has stood the test of time, and it remains in effect to this day. No good deed goes unpunished, so in 2003, he was brought back to Geneva as a member of the IARU team to handle the rewrite of Article 25, the rules that apply specifically to the Amateur and Amateur-Satellite Services. That turned out to be as much an exercise in diplomacy as in drafting, but Michael was up to the task. I shudder to think what he would have billed a commercial client for the same sort of job but this, as all of his other contributions to Amateur Radio, was service performed as a volunteer.

"Michael did not go into hibernation between 1979 and 2003. From 1989-1999, he served as Vice President of the IARU. Later, as President of the Wireless Institute of Australia, he choreographed the transition of the WIA from a confederation to a truly national body. Today the WIA -- which celebrated its 100th anniversary in 2010 -- is one of the few other national Amateur Radio organizations in the world that is growing. Simultaneously, Michael served as Chairman of IARU Region 3 since 2006.

"Michael Owen was a strategic thinker; he saw past short-term pros and cons and could envision how decisions made today would affect the distant future. He also understood that working in the background -- doing one's homework -- was essential to success. There is simply no way to replace someone with Michael's experience and wisdom. His death is a searing loss for both the IARU and the WIA, but both organizations are stronger today because of the enormous contributions he made to their well-being."

OPERATIONAL NEWS - DATELINE 2013

The Day of the YLs will be held 18 and 19 May.

VK SHIRES June long weekend 0600 UTC Sat June 8, ends 0600 UTC June 9.

WW International Museums Weekends June 15/16 and 22/23

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

First D-Star repeater in Canaries

ED8ZAB is the first D-Star repeater in the Canary Islands.

It is rated at 10 watts and transmits on 438.462.5MHz from Gran Canaria at an altitude of 1,200m (3,650 feet).

A new CCS system consisting of a routing via DMTF has been installed; send the DTMF D-Star 40412 from your nearest repeater. Please send reports to ed8zab@yahoo.es.

MARION ISLAND

Two radio amateurs are part of the over-wintering team and will be active on Marion Island now to April 2014.

ZS 8 C - Carson, (ZR6CWI), and ZS 8 Z - David, (ZS1BCE).

Modes will mainly be SSB and digital modes and their QSL Manager is ZS 1 HF.

Japanese amateur radio operators celebrate the successful transition from analogue to digital terrestrial TV with the call 8 N 1 TW.
Activity continues till the 28th of July, QSL via bureau.
http://www.dtvstatus.net/

DXpedition to Isle of Mull (EU-008)

Steve Thomas, M 1 ACB and other members Camb-Ham group will be operating GS 3 PYE/P from the Isle of Mull 10-16 May from 2 metres to 160 metres as well as a station on 472 kHz.

More information can be found at http://www.camb-hams.com

(Steve Thomas, M1ACB via RAC)

DL 100 OUI CELEBRATES 100 YEARS SINCE FIRST DL - US RADIO CONTACT

Keep an ear open for the German special event callsign DL 100 OUI which will be on the air throughout 2013.

This in celebration of the 100th anniversary of the first commercial radio contact between that nation and the United States from Hannover.

O U I were the call letters of the German station at that time.

The US station was located in New Jersey.

CT 1 FTR is now active from the Sudan as ST 2 FT operating both the HF and VHF bands using a Yaesu FT-857 and a loop antenna. Word is that he will be there until June. QSL via CT1FTR.

RG 61 PP - celebrating the Day of the Cosmonaut (12 Apr) and the birthday of Yuri Gagarin (9 Mar 1934), on air now until 31 May

INS Kattabomman - VLF and soon ELF

Peter Ellis VK1PE reports on a third-of-its-kind transmitting station that is being built in India.

Amateurs have been enjoying the delights of 137kHz, 475kHz, and so on for a while now. However, the military use of VLF (and below) has been around for a lot longer, witness in Australia alone, Belconnen ACT on 44kHz in the 1940s, North West Cape WA on 19.8kHz in the late 1960s, the Omega station Gippsland VIC on 13 kHz and later 18.6kHz. And, investment in these really low bands is continuing.

For those in the know, Jane's has been the last word in published analysis of Defence matters for around 115 years.

Jane's Defence Weekly (6 March 2013) reports on recent photographic analysis of Indian Naval Station (INS) Kattabomman at South Vijaya Narayanam, Tirunelveli, Tamil Nadu, India. It currently has four frequencies between 16.3 and 19.2kHz (VLF), to communicate with submerged submarines. It is being expanded with two towers for "Even Lower Frequencies", immediately south of the VLF 13-tower array that is nearly 2.5km across.

The new transmitter is reported to be on ELF (3-300Hz), and related to the Russian ZEVS station near Murmansk on 82Hz with a wavelength of 3,660 kilometres, a significant proportion of the Earth's diameter. The new facility will supposedly feature nuclear-hardened bunkers and be operational in 2015. Yet, the two new 500m tall towers seem immaterial at these frequencies, that need long and low wires running out for tens of kilometres over a very 'poor' conducting soil, and use the Earth itself as the antenna. The now-decommissioned American "Seafarer" station in Wisconsin on 76Hz had feeder wires running 52km. The Russian system's feeders run for 60km in each direction. With an input of hundreds of Amps, their calculated emitted power is only a few Watts.

Maybe the new towers are to extend the VLF options for the Indian Navy, and the ELF is separate.

Time will tell.

For National Radio News, Peter Ellis VK1PE

CELEBRATING 75TH ANNIVERSARY OF THE FIRST CLASS CW OPERATORS CLUB

To commemorate their 75th anniversary of the First Class CW Operators Club this coming May the organization is holding a month-long on-air event featuring more than 20 special FOC suffix calls. This will include GB75FOC which is a special anniversary callsign for their club station.

There will also be other FOC call signs operating from the USA and Canada as well as some exotic locations such as VQ9, HZ1 and 5T. Stations will gain points for contacting any First Class CW Operators Club member and a certificate will be presented to stations who reach certain point levels.

Founded in 1938 with its roots, history and management in the United Kingdom, the First Class CW Operators' Club

promotes good CW operating, Morse activity, friendship and socializing via its worldwide membership of approximately 500. Complete details of the group and this event is on-line at tinyurl.com/first-class-morse

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

SPACELAB 2 PROPOSED BEYOND THE MOON

NASA has propose a concept for a deep space station that has been dubbed Skylab 2. Cheryl Lasek, K9BIK, from Amateur Radio Newsline said that Skylab 2 concept would consist of a single-piece habitat based on the Space Launch System's upper-stage hydrogen tank.

The resulting space station would be the equivalent of a two-story house.

Such a space station would be human tended, hosting crews for weeks and then months at a time. It would serve as a way station for expeditions into deep space or back to the lunar surface.

Astronauts on the deep space station could remotely operate radio controlled robots on the lunar surface and would study the effects of deep space, which includes microgravity and radiation, on the human body.

WW SPECIAL INTEREST GROUPS --- ILLW

International Lighthouse & Lightship Weekend

Registrations are higher than at this time last year, guaranteeing there will be plenty of activity from lighthouses and marine beacons in August, only 16 weeks away.

Some 40 per cent of all registrations are from Australia and Germany, with 40 each so far.

The 16th annual fun event has attracted 29 nations from Argentina through
to Wales.

For information about the International Lighthouse and Lightship Weekend
on August the 17th and 18th or to register online, visit the dedicated website
at illw.net

First Class CW Operators Club 75th Anniversary Award and on-air activity
(UPDATED)

Posted: 24 Apr 2013 11:52 AM PDT
http://forums.qrz.com/showthread.php?388882-First-Class-CW-Operators-Club-75th-Anniversary
-Award-and-on-air-activity-(UPDATED)&goto=newpost

Hundreds of members of the First Class CW Operators Club will take to the
air in May, many using special calls, to celebrate the 75th anniversary of
FOC.

Nearly 50 special "FOC" suffix calls, and 6 calls with special prefixes,
will be on the bands throughout the month.

The special call GB75FOC will be activated by a schedule of English members
each day in May and special versions of the club call G4FOC will be used in
non-English U.K. countries: GC4FOC (GW), GP4FOC (GU), GN4FOC (GI), GS4FOC
(GM), GT4FOC (GD). In addition, the call M0RSE (M Zero RSE) will be on the
air.

Many of our members around the world have secured special *FOC suffix
call-signs, including 4X, 5B, 5T, 7Q, A6, HZ, KH6 and VQ9. Many of these
will be operated each day in May by teams of local operators, for example:
N4FOC, S575FOC, W2FOC, W9FOC. Each member may operate pile-up or rag-chew
style, as he chooses.

A beautiful □FOC75 Award□ certificate will be available at three levels,
bronze, silver and gold. Points are accumulated by working FOC members,
with extra points for working the *FOC stations. Members not using calls
with an FOC-suffix will identify themselves by calling "CQ FOC 75." Special
75th anniversary QSLs will also be used by many stations.

Full information about the award and QSLing is available at: www.g4foc.org.
Follow the link to "FOC 75th Anniversary."

This UK-based Club, founded in May, 1938, has some 500 members who passion
is good CW operating. Our activity in May says "thank you" to those movers
and shakers who, 75 years ago, kick-started this prestigious club. We
invite CW operators around the world to join in the celebration.

May 15 Gary K2ITT gives talk on "Cosmic Snowballs" at West Essex Amateur
Radio Club

Posted: 24 Apr 2013 09:18 AM PDT
http://forums.qrz.com/showthread.php?388869-May-15-Gary-K2ITT-gives-talk-on-quot-Cosmic-Snowballs-quot-at-West-Essex-Amateur-Radio-Club&goto=newpost

The West Essex Amateur Radio Club located at the Essex Fells Service
Building, on
the 2nd floor, 307 Runnymede Road Essex Fells NJ
07021 will present Professor Gary Swangin K2ITT speaking on Comet
Snowballs. The event will take place on Wednesday, May 15, 2013 at 7:30
PM. Doors will open at 7:00 PM. All are invited.

They were once thought to be omens of disaster and
messengers of the gods.They have inspired dread, fear, and awe in many
different cultures and societies around the world and
throughout time. Unlike any other object in the night sky,
comets are still one the most intriguing celestial bodies in
the universe. Why did so many people cringe at the sight of
these ☐cosmic snowballs?☐

Professor Gary Swangin (K2ITT) will discuss the history and origin of
comets, and how these strange objects may yield important clues about the
formation of our Solar System. Among the other topics covered in the
presentation are: famous comets; tracking and observing ISON which may
become the brightest comet history; and meteor showers, the relatives of
comets.

Professor Swangin is the director and astronomer of the Panther Academy
Planetarium in Paterson, New Jersey and teaches astronomy at Passaic County
Community College. He produced the award-winning documentary, ☐Are we alone
in the universe?,☐ sponsored by the American Chemical Society and W.R.
Grace & Co. As a ham radio operator, he is primarily a CW operator and an
avid DX chaser on the HF bands with five DXCC awards.

==> + FCC ENFORCEMENT: FCC ANNOUNCES ENFORCEMENT ACTIONS FOR
JANUARY-MARCH 2013

In the first quarter of 2013 (January-March), the FCC issued 23
enforcement actions. These enforcement actions are in addition to the
$10,000 fine issued to Jared A. Bruegman, ex-KC0IQN, of Bolivar,
Missouri, and the $25,000 fine issued to Terry L. VanVolkenburg, KC5RF,
of Cocoa, Florida, as previously reported.

This past quarter, the FCC sent Warning Letters to 10 individuals
regarding unlicensed transmissions, interference and repeater-related
infractions. In addition, the FCC sent Warning Letters to four
commercial entities or individuals that had conducted commercial
operation on the amateur bands. The FCC also sent one letter to a power
company, as well as eight letters addressing RFI complaints regarding
```

interference from various electronic devices, including plasma television sets, electric fence chargers and grow light ballasts. Read more <http://www.arrl.org/news/fcc-announces-enforcement-actions-for-january-march-2013>.

==> + FCC ENFORCEMENT: RADIATING WELL PUMP LEADS TO FCC CITATION FOR INTERFERENCE TO AMATEUR RADIO

The FCC has issued a Citation and Order to Ruben D. Lopez Jr of Pomona Park, Florida. The Citation, issued April 23, was in response to several complaints concerning a well pump at Lopez's residence that was acting as an incidental radiator and causing harmful interference to local radio amateurs. In July 2010 and February 2011, the FCC received complaints from radio amateurs regarding interference on the MF and HF Amateur Radio bands. Upon investigation, the FCC found that a well pump at Lopez's residence was causing the interference, and advised Lopez of the complaints and of the rules regarding interference to licensed radio services. The FCC instructed Lopez to resolve any interference. In October 2012 -- in response to another interference complaint coming from Lopez's residence -- FCC agents used direction finding equipment to identify Mr Lopez's well pump as the source of transmissions on the frequency 1800 kHz. Read more <http://www.arrl.org/news/florida-man-cited-for-causing-harmful-interference-to-radio-amateurs>.

==> +PUBLIC SERVICE: CHINESE AMATEURS ASSIST IN EARTHQUAKE'S AFTERMATH

On the morning of Saturday, April 20, a powerful earthquake measuring 7.0 on the Richter scale struck Ya'an City in China's Sichuan province. The epicenter was near Lushan County. As of Wednesday, April 24, almost 200 people have been killed and more than 11,000 people are injured.

Radio amateurs in Sichuan province took immediate action. Liu Hu, BD8AAA, and BA8DX led a team to the disaster area to provide emergency communication services. Even in the aftermath of the earthquake, the FM repeater in Ya'an City was still functioning; BG8FUW in Lushan County and BG8EYD in Ya'an City used this repeater to coordinate local efforts.

According to IARU Region 3 Disaster Communications Committee Chairman Jim Linton, VK3PC, it has been raining in the earthquake area. "Effective traffic control has been very important to transport tents, water, foods and medicines into the area," he said. "The rural communities around Ya'an City are along the same seismic fault where the Great Sichuan Earthquake killed more than 90,000 people five years ago in one of China's worst natural disasters. The latest earthquake on Saturday left tens of thousands of people in tents or cars, unable to return home or too afraid to go back as aftershocks continued. Badly hit Lushan County is now a large refugee camp, with tents set up and volunteers providing meals."

Immediately after the earthquake, the Chinese Radio Sports Association and Chinese Radio Amateur Club asked all amateurs to avoid 3.855, 7.050 and 14.270 MHz, as these frequencies were being used for disaster relief communications. As of April 22, public communication is back to normal in the disaster area and amateurs are free to once again use these frequencies. -- Thanks to Fan Bin, BA1RB, and Jim Linton, VK3PC, for the information

==> + DAYTON HAMVENTION®: GET READY FOR THE 2013 ARRL EXPO AT THE DAYTON HAMVENTION

The Dayton Hamvention® -- the largest gathering of radio amateurs in the US -- is just around the corner, May 17-19. Held annually at the Hara Arena Conference and Exhibition Center in the Dayton suburb of Trotwood, Ohio, Hamvention is sponsored by the Dayton Amateur Radio Association.

This year's "ARRL Dayton Team" includes more than 100 people -- volunteers, officials and Headquarters staff. The centerpiece of the ARRL's participation is ARRL EXPO 2013, a large exhibit area in Hara's Ballarena Hall. First introduced in 2005, ARRL EXPO has become a popular mainstay at the event. "ARRL EXPO is a show-within-a-show, and the area will be filled with membership program representatives and exhibits that cover a variety of Amateur Radio topics and interest areas," explained ARRL Marketing Manager Bob Inderbitzen, NQ1R, who also serves as the ARRL EXPO Coordinator. "The ARRL has put together dozens of exhibits, programs and activities to help represent the very best of our programs, services and information. There will be something for every ham at ARRL EXPO."

This year's ARRL EXPO will include a spotlight on W1AW, the Hiram Percy Maxim Memorial Station. The world's most famous Amateur Radio station turns 75 in September. Dayton attendees will enjoy a special W1AW exhibit, including photographs of the station from over the years. Read more
<http://www.arrl.org/news/get-ready-for-the-2013-arrl-expo-at-the-dayton-hamvention>.

==> CELEBRATE 75 YEARS OF W1AW WITH COMMEMORATIVE GEAR

W1AW, the Hiram Percy Maxim Memorial Station, is celebrating its 75th anniversary this year, and what better way to show your support of Amateur Radio's flagship station than by sporting W1AW commemorative gear! The ARRL is pleased to present a limited edition T-shirt, key chain, pin and challenge coin to mark this milestone. Your purchase helps support W1AW -- $5 from every shirt purchased and 100 percent of the key chain and pin proceeds go directly to the W1AW Endowment Fund. Read more
<http://www.arrl.org/news/celebrate-75-years-of-w1aw-with-commemorative-gear>
.

==> + SEATTLE WILL HOST THE 32ND DIGITAL COMMUNICATIONS CONFERENCE

Digital communications enthusiasts will be heading to the Pacific Northwest this autumn for the 32nd annual ARRL/TAPR Digital Communications Conference (DCC), September 20-22, at Cedarbrook Lodge near Seattle, Washington. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results and practical applications. The DCC is for all levels of technical experience -- not just the expert. Introductory sessions are scheduled throughout the conference to introduce new technical topics for both beginners and experts. Read more
<http://www.arrl.org/news/seattle-will-host-the-32nd-digital-communications-conference>.

==> CHANGES TO FCC RADIOTELEGRAPH OPERATOR CERTIFICATES COMING MAY 20

Effective May 20, 2013
<http://transition.fcc.gov/Daily_Releases/Daily_Business/2013/db0419/DA-13-798A1.pdf>,
the FCC will no longer accept applications for First (T1), Second (T2) or Third Class (T3) Radiotelegraph Operator Certificates. In addition, the FCC has consolidated the T1 and T2 Radiotelegraph Operator Certificates into a new license class called the Radiotelegraph Operator License (T). According to the FCC, this change takes effect upon renewal: T1s and T2s that are renewed on or after May 20, 2013 will be renewed as Ts, but existing T1s and T2s will retain their current license class for the duration of the current license term. The Commission also consolidated theT3 with Marine Radio Operator Permits (MP); T3s renewed on or after May 20, 2013 will be renewed as MPs, but existing T3s will retain their current license class for the duration of the current license term. These new rules were first announced in a Report and Order (WT Docket No. 10-177
<http://apps.fcc.gov/ecfs/document/view?id=7022100656>), issued January 8, 2013.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity was quiet this week: The average daily sunspot number declined nearly 23 points to 90.6, while the average daily solar flux values were down nearly 13 points to 109.1. The most active day was April 24, with a planetary A index of 19 and mid-latitude A index of 15. The average daily mid-latitude A index was the same this week as last, 4.9. The predicted solar flux is 115 on April 25-27, 120 on April 28-29, 125 on April 30-May 5, 120 on May 6, 115 on May 7-8, 120 on May 9-11, 115 on May 12-13, 110 on May 14-15, and down to 105 on May 16-18. The predicted planetary A index is 18 on April 25, 12 on April 26, 5 on April 27 through May 4, 8 on May 5, 5 on May 6-18, and then rising to 8, 12, 12, 15, 12 and 5 on May 19-24. Look for more information on the ARRL website on Friday, April 26. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page

<http://www.arrl.org/propagation-of-rf-signals>.

==> +SILENT KEY: ANTENNALYZER INVENTOR WENDELL C. MORRISON, W7LLX (SK)

Wendell C. Morrison, W7LLX, of Waukesha, Wisconsin, passed away October 18, 2012. He was 97. An ARRL member for 66 years, Morrison is perhaps best known for the Antennalyzer, an early analog computing device for designing multi-tower AM directional arrays. Morrison worked for the Radio Corporation of America (RCA) all his life. While at RCA, he was part of the RCA Laboratory in Princeton, New Jersey, where in the early 1940s, Morrison, together with George H. Brown, developed the Antennalyzer. Read more <http://www.arrl.org/news/antennalyzer-inventor-wendell-c-morrison-w7llx-sk>.

==> THIS WEEK IN RADIOSPORT

This week:

- April 26 -- NCCC Sprint Ladder
- April 27-28 -- Florida QSO Party; SP DX RTTY Contest; 10-10 International Spring Contest (Digital); Helvetia Contest; QRP to the Field
- April 28 -- BARTG Sprint 75
- May 1 -- AGCW QRP/QRP Party

Next week:

- May 3 -- NCCC Sprint Ladder
- May 4 -- Microwave Spring Sprint (local time)
- May 4-5 -- New England QSO Party; Indiana QSO Party; 7th Call Area QSO Party; 10-10 International Spring Contest (CW); Araucaria VHF Contest; ARI International DX Contest
- May 7 -- ARS Spartan Sprint
- May 8 -- NAQCC-EU Monthly Sprint
- May 8-9 -- CWops Mini-CWT Test
- May 9 -- NAQCC Straight Key/Bug Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Amateur Radio Newsline(tm) Report 1863 - April 26 2013

Amateur Radio Newsline report number 1863 with a release date of April 26 2013 to follow in 5-4-3-2-1.

The following is a QST. Ham radio rallyes to assist in the wake of a killer quake that hits China; another loss in the ongoing fight against B-P-L; a number of new hamsats are now on-orbit; the latest news on Hamvention 2013; a new D-Star repeater where few might expect it and a new book to interest the new ham and non ham alike. All this and more on Amateur Radio Newsline(tm) report number 1863 coming your way right now.

RESCUE RADIO: HAMS ASSIST AFTER SICHUAN CHINA EARTHQUAKE

Amateur radio was there to provide emergency relief communications after a powerful earthquake killed more than 185 people and injured several thousand in China's rural south-west on Saturday, April 20th. Graham Kemp, VK4BB, of the WIA News has more:

--

Fan Bin, BA1RB, reported that amateur radio operators swung into action to provide emergency communications and coordinate parts of the disaster response. With toppled houses everywhere, rescuers frantically began their search of the rubble for survivors, while medical staff treated those hurt on the ground and in make-shift hospitals.

Panic was evident with survivors sheltering in cars and tents. Badly hit Lushan County is now like a large refugee camp with volunteers providing meals.

Fan Bin, BA1RB, has recently reported that public communication was back to normal in the disaster area and the local repeater systems continued to work.

He said the Chinese Radio Sports Association, also known as the Chinese Radio Amateur Club, no longer required emergency communication frequencies. It expressed thanks for the support from IARU member societies and others.

A role for some radio hams was maintaining traffic control, with emergency supplies arriving including tents, water, food and medicine.

Rain hampered search and rescue efforts in the quake zone, and added to fallen trees and landslides making progress slower in some areas. After-shocks also occurred.

The Sichuan provincial government reported that 3,000 kilometres of road and 327 bridges had been damaged. The total repair bill from the earthquake was put at $3 billion.

The central government of China, local officials, rescuers, relief workers and radio amateurs are much better prepared to deal with disasters, than has been the case in the past.

Neighboring Russia sent rescue teams, and the Red Cross from Hong Kong with an embedded radio amateur, are helping the on-going effort.

For the Amateur radio Newsline, I'm Graham Kemp, VK4BB, of the WIA News in Australia.

--

Five years ago a massive quake hit the same area. The 2008 disaster killed tens of thousands and left some five million people homeless. (WIA News, VK3PC,BA1RB, QRZ, BBC, others)

**

THE BPL FIGHT: FCC RULES AGAINST ARRL IN BPL APPEAL

Back here in the United States, word that the FCC rejected an appeal from ARRL and has upheld its current Broadband over Power Line rules. In denying the ARRL appeal the FCC said that the League had raised no new arguments, nor proved previous that FCC B-P-L related decisions contained mistakes.

The FCC went on to say that its previous decisions regarding B-P-L strike what it calls the right balance between the need to provide Access Broadband over Power Line technology while protecting incumbent radio services against harmful interference.

In a related story on the ARRL website ARRL Chief Executive Officer Dave Summer, K1ZZ, said that he wasn't surprised at the decision. However he also noted that some of the rhetoric used by the agency in continuing to defend what he termed as its wrong-headed promotion of the flawed BPL technology is disappointing. (ARRL)

**

HAM RADIO IN SPACE: ANTARES CARRYING PHONESATS MAKES IT TO ORBIT

The twice-delayed maiden flight of the Orbital Sciences Corporation Antares rocket carrying three CubeSats with amateur radio payloads has been called an overwhelming success as we hear from Amateur Radio Newsline's Bill Pasternak, WA6ITF, is in the newsroom with the details:

--

After a pair of delays due to technical and weather related problems the Antares rocket lunged skyward at 5 p.m. Eastern Daylight Time Sunday afternoon April 21st from a launch pad at NASA's Wallops Island Virginia Flight Facility. On board were three ham radio cubesats dubbed Phonesats because they were built using off the shelf smart phones.

All three of the Phonesat based cubesats carries an amateur radio payload downlinking on 437.425 MHz. Each cubesat will transmit during individual time slots using AFSK modulation at 1200 bps, AX.25 packet coding and have vertical linear polarization.

The two PhoneSat 1.0 satellites code named Graham and Bell transmit with a period of respectively 28 seconds and 30 seconds. The PhoneSat 2.0 beta satellite, Alexander, transmits with a period of 25 seconds. All of the tiny birds are using the callsign KJ6KRW.

The PhoneSat web page at www dot phonesat dot org provides access to the "Dashboard" allowing hams to track the location of the satellites in real time. Detailed information on the downlink packet telemetry format can be found on this page as well.

For the Amateur Radio Newsline, I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

The orbit of the PhoneSat satellites is very low and are expected to only remain on-orbit for two weeks. The satellites are battery powered with no additional charging from solar cells or any other source. (ANS, NASA, others)

**

HAM RADIO IN SPACE: OSSI-1 AMATEUR RADIO CUBESAT LAUNCHED

The OSSI-1 CubeSat along with three other satellites were launched to orbit from the Bikenour Cosmodrome in Kazikstan on Friday, April 19th. Also on-board the Soyuz-2-1A launch vehicle were some research and commercial satellites.

Korean artist Hojun Song, DS1SBO has spent 7 years developing his Open Source Satellite Initiative satellite that he named OSSI-1. He has designed and built it from scratch using readily available components rather than expensive space qualified hardware. The launch reportedly cost him a cool $100,000 and is believed to be the first one person privately constructed and launched ham radio bird.

We will have more ham radio space related news later on in this weeks Amateur Radio Newsline report. (ANS, Southgate)

**

RESCUE RADIO: CELLPHONE FAILURE AT THE BOSTON MARATHON

Neither the Federal government nor any Massachusetts state agency or the Boston police ordered a shutdown of cellular telephone service in the Boston area following the terrorist bombing of the Boston Marathon on Monday, April, 15th. The systems simply failed of their own accord because too many people trying to use them at the same time. Amateur Radio Newsline's Norm Seeley, KI7UP, explains:

--

On April 18th outgoing FCC Chairman Julius Genachowski said the FCC would follow up on cellular service issues at the Boston Marathon. This while emphasizing that broadband services had not been shut down after the bombings.

Genachowski conceded that the event again raised issues of communications and public safety like those the FCC has been working on for some time. However he went on to acknowledge that wireless networks were so overwhelmed by the temporary surge in traffic, that there were incorrect media reports that mobile services had actually shut down when they had not been.

What appears to be a fact is that most cellphone subscribers erroneously believe that the phone in their pocket should function perfectly 100 percent of the time. The reality is that the no cellular system currently in use can handle 100% of all of its subscribers at any one time. Or even 50% for that matter.

Most experts say that when most cellphone systems reach between 15 to 20 percent of its subscribers simultaneously using the service that it is at a point of limited network density. In other words it cannot handle any more subscribers more until those on-line hang up.

And that's what appears to have happened in Boston after the two bombs at the marathon finish line went off. It's also why the autonomous Boston Marathon ham radio communications networks continued to function flawlessly even when the cellphones failed.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

Genachowski said that the FCC will certainly pursue this issue along with other agencies. He called it an institutional imperative for the FCC. Meantime an excellent reference guide on what you can really expect from your cellphone including in emergency situations has been published on-line by the FCC. You can find it on the web at tinyurl.com/cellphone-reality. (FCC, Wikipedia, published news reports)

>From the United States of America, We are the Amateur Radio Newsline, heard on bulletin stations around the world including the KB5ELV repeater serving Erie, Pennsylvania.

(5 sec pause here)

**

RESCUE RADIO: WAS EAS USED FOLLOWING THE BOSTON MARATHON BOMBING

Emergency Alert System expert Richard Rudman, W6TIA, says initial feedback from the Boston area indicates emergency officials did not use the EAS to issue shelter-in-place warnings when authorities were looking for the bombing suspect.

According to Rudman, if reports from the greater Boston area show that EAS was not used to issue the shelter-in-place warning, it's time for the entire emergency management community to take to heart and put in practice FEMA's still new protocol known as the Integrated Public Alert and Warning System or IPAWS.

If you happen to know for certain whether or not Boston officials did or did not utilize the Emergency Alert System for public notification in the aftermath of the marathon bombings or to issue the shelter in place order, please let us know. We in turn will be happy to pass along the information to W6TIA.

More on this story is on-line at tinyurl.com/boston-eas-alerts (RW)

**

RESCUE RADIO: FCC ADOPTS RULES TO PROVIDE EMERGENCY INFO TO THE BLIND

The FCC has adopted rules requiring that emergency information provided in video programming be made accessible to individuals who are blind or visually impaired. It's also mandating that that certain apparatus be capable of delivering video description and emergency information these citizens.

Specifically, the rules clarify that the new emergency information requirements apply to video programming provided by entities that are already covered by Section 79.2 of the Commission's rules along with any other distributor of video programming for residential reception that delivers such programming directly to the home and is subject to the jurisdiction of the Commission.

The complete text in PDF format is on-line at tinyurl.com/emergency-alerts-for-the-blind. (CGC, FCC)

**

ENFORCEMENT: TWO BUSINESSES CITIED FOR CELL JAMMER USE

Two businesses have been told that they will have to pay some heavy duty fines for importing and using cellphone jamming devices. Amateur Radio Newsline's Steffen Kinford, N8WB, reports:

--

On April 9th the FCC issued a Notice of Apparent liability in the amount of $144,000 to The Supply Room in Oxford, Alabama. On the same day a $126,000 N-A-L was imposed on Taylor Oilfield Manufacturing in Broussard, Louisiana.

In both cases the FCC received anonymous tips that cell phone jamming was occurring at both businesses. Using direction finding FCC agents discovered strong wideband emissions in the cellular bands that they determined to be one or more signal jammers at each site. On inspection, both the Supply Room and Taylor Oilfield Manufacturing admitted to the agents that they had each purchased a number of cellphone signal jammers off of the Internet from overseas sources.

And here's where it really gets interesting. Not only did each business freely admit to purchasing and using the cellphone jammers but their excuses were interesting as well. In the case of the Supply Room, it's general manager admitted that the jammers were in place to prevent its employees from using their cellular phones while working. Not only that, but that the devices had been in operation for more than two years before they were caught.

Meantime, managers at Taylor Oilfield Manufacturing told FCC that the devices were also being utilized to prevent its employees from using their cellular phones while working, but in this case following a near-miss industrial accident. One that the company alleges was partially attributable to employee cell phone use.

While both companies voluntarily surrendered their jammers to the FCC, that did not help mitigate the penalties that have been imposed. In fact, the FCC told both companies that they must submit payment in full by May 9th or file a written appeal.

For the Amateur Radio Newsline, I'm Stephen Kinford, N8WB, in Wadsworth, Ohio.

--

Both businesses were also directed by the FCC to file a statement to be signed under penalty of perjury no later than May 9th that would provide the source or sources from were each purchased or received the jamming devices. (FCC)

**

ENFORCEMENT: FLORIDA RESIDENT ORDERED BY FCC TO ELIMINATE WELL PUMP INTERFERENCE TO HAM RADIO

The FCC has issued an Official Citation1issued to Ruben D. Lopez, Jr. of Pomona Park, Florida. This for operating an incidental radiator and causing harmful interference in violation of Section 15.5(b) of the Commission's rules. In this case the incidental radiator was of all things a well pump that was putting out a signal at 1800 Kilohertz and interfering with ham radio operations.

On July 15, 2010 and February 28, 2011, in response to complaints of interference to Amateur Radio Service reception of medium and high frequency radio signals, the Enforcement Bureau issued Lopez two letters informing him of the complaints. The letters summarized the relevant rules, instructed him to resolve any interference, and suggesting he install new AC line filters for his well pump.

On October 23, 2012, in response to another complaint of interference to Amateur Radio Service reception, agents from the Commission's Tampa Office of the Enforcement Bureau used direction finding techniques to identify Lopez's well pump as the source of transmissions on the frequency 1800 kHz. The agents from the confirmed that Mr. Lopez's well pump was the source of the interference by conducting on/off tests. The interference ceased when the well pump was turned off.

At that time the agents informed Lopez that he must cease operating his well pump until the interference could be resolved. After the October 23, 2012 inspection, the Tampa Office received information that Lopez tried to eliminate the interference by replacing the AC line filter for the well pump, but the new filter did not resolve the interference.

Now, in its April 23rd Citation the FCC has instructed Lopez to take immediate steps to come into compliance by repairing or replacing his incidental radiator and eliminating all harmful interference. It also directed Lopez to confirm within thirty calendar days after the release date of the Citation that he has ceased operating his incidental radiator or taken steps to eliminate all harmful interference. If he fails to do so, the FCC says that he could be subject to substantial monetary penalties, seizure of the offending equipment, and criminal sanctions. The entire text of the Citation is on-line as a PDF file at tinyurl.com/pump-qrm (FCC)

**

ON THE WEB: RADIO FOXTROT 100 INTERNET STATION FOR HAM RADIO

Tony Bond, EI9GMB, says he is again operating Radio Foxtrot 100. Foxtrot 100 is an internet radio station dedicated to ham radio and short wave listeners that has topics related to ham radio in addition to its music programming. More is on the web at foxtrot100.weebly.com (EI9GMB)

**

NAMES IN THE NEWS: OUTGOING FCC CHAIR TO JOIN ASPEN INSTITUTE

Outgoing FCC Chairman Julius Genachowski (PRON: GEN A COW SKEE) will likely become a fellow at the Washington D.C.-based Aspen Institute when he steps down from his current position. The move makes Genachowski the fifth former FCC Chairman in a row to become a Senior Fellow of the institute, following Kevin Martin, Michael Powell, William Kennard and Reed Hundt.

The Aspen Institute is an international nonprofit organization founded in 1950 and dedicated to fostering enlightened leadership, the appreciation of timeless ideas and values, and open-minded dialogue on contemporary issues. The institute and its international partners promote the pursuit of common ground and deeper understanding in a nonpartisan and non-ideological setting through regular seminars, policy programs, conferences, and leadership development initiatives.

HAMVENTION 2013: VHF WEAK SIGNAL GROUP BANQUET AT THE DAYTON HAMVENTION

The 18th VHF Weak Signal Group dinner to be held on Friday evening May 17th at the Dayton Grand Hotel in Dayton, Ohio. This, concurrent with the 2013 Dayton Hamvention.

The cash bar opens at 6:15 PM with dinner to be served at approximately 7:15 PM. This years guest banquet speaker is VHF Contester Jeff Klein, K1TEO.

Reservations are required with seating is limited to 125. Tickets are $40 per person from Tony Emanuele WA8RJF, 7156 Kory Court, Concord Township, Ohio 44077. For more information contact WA8RJF (at) arrl (dot) net. (WA8RJF)

**

HAMVENTION 2013: D-STAR TRAINING ON MAY 17

DSTARinfo.com and the Georgia D-STAR group will again conduct training for beginning and intermediate D-STAR users during 2013 Dayton Hamvention. The three hour instruction will be held Friday, May 17th at the Drury Inn Ballroom, conveniently located in the Hamvention hotel area at 6616 Miller Lane.

The class will begin promptly at 8:00am. This training will provide the basics for new D-STAR users guiding them through the registration process, getting on the air and get the most out of handhelds or mobiles.

Class size is limited and pre-registration is required at tinyurl.com/D-Star-Class. The cost of the class is $15.00 and attendees will receive all course materials. For more information please e-mail info (at) dstarinfo (dot) com. (WB9QZB)

**

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

HAM HAPPENINGS: FIRST DIGITAL D-STAR REPEATER ON FROM THE CANARY ISLANDS

D-Star is bringing some unexpected placed to the VHF and UHF bands. This with word that the first repeater using this mode has come on the air in the Canary Islands. Amateur Radio Newsline's Heather Embee, KB3TD, has the details on this one:

--

Sponsored by Radio Club Vecindario, the ED8ZAB D-Star machine is located on the island of Gran Canaria at an altitude of about 4,000 feet above average terrain covering most of the group's 7 islands.

The system currently runs 10 watts out on 438.4625 MHz and listens for signals on its input that is 7.6 MHz below. It has been reported as having been heard by stations in both Portugal and Spain during two recent tropospheric openings; a distance of more than 1,400 kilometers.

And for those who are not world travelers or DXers, the Canary Islands are a Spanish archipelago located just off the northwest coast of mainland Africa, 100 km west of the border between Morocco and the Western Sahara. They are one of Spain's seventeen autonomous communities and an outermost region of the European Union.

For the Amateur Radio Newsline. I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

If by any chance you happen to hear the ED8ZAB D-Star machine outside of its local coverage area, please send a report by e-mail to ed8zab (at) yahoo (dot) es. (EA8EE)

**

HAM RADIO IN SPACE: SA AMSAT SPACE SYMPOSIUM MAY 18

South Africa AMSAT will hold its annual space symposium on Saturday, May 18th. The venue is the Innovation Hub in the city of Pretoria with McLean Sibanda, the CEO of the Hub as its keynote speaker.

The symposium is sponsored by South Africa Telkom and features an agenda that is packed with interesting presentations and demonstrations. Full details and the registration form are available on the web at www.amsatsa.org.za. (SA-AMSAT)

**

WORLDBEAT: WEB SDR NOW AVAILABLE ON RSGB SITE

A web-based Software Defined Radio for the 5, 7 and 14 MHz bands is now available on the new Radio Society of Great Britain website. The "Web

SDR receiver" link can be found under the "My RSGB" drop-down menu. Also on the new site are "Live DX Cluster" and "Live solar data" pages under the "News" drop-down menu. Go to www.rsgb.org for more. (Southgate)

**

HAM HAPPENINGS: ILLW REACHES A MILESTONE OF 200

The honor of being the 200th registrant for this years International Lighthouse and Lightship Weekend goes to the Whitby High Light in England.

Built in 1858 the Whitby High Light helped ships avoid the Whitby Rock, on the North Yorkshire coast. Its well known as the place Captain James Cook became a seaman before leading his epic voyages of discovery.

The special event call GB2WHL will be operated from the lighthouse by the Denby Dale Radio Club. A special QSL card is available on request.

So far there are registrations from 29 countries. To read the guidelines for the International Lighthouse and Lightship Weekend slated for August the 17th and 18th or to register a lighthouse, lightship or maritime beacon on-line, please visit illw.net. (VK3PC)

**

RADIOSPORT: RESULTS OF THE NYQP POSTED

The final results of the 2012 New York QSO Party have been published. You can read them on-line by taking your web browser to rdxa.com/results/2012.

This year's plaque winners will be receiving the awards in the mail as soon as they are completed. Participants can also download and print their own paper awards and participation certificates or have the New York QSO Party print them for you. The latter requires a $3 donation sent via PayPal to af2k@juno.com.

Please include your name, callsign and mailing address with any on-line orders. (NYQP)

**

ON THE AIR: WB8BZK TO ACTIVATE GRID EO-40 ON 6 METERS

On the air, VUCC grid hunters who need Canadian grid E-Oh-40-ud may want to listen for WB8BZK Stroke VE3 who will be on the air from Seseganaga Lake in Ontario Province between May 26 and the 31. He will be operating only on 6 meters primarily on 50.135 MHz running SSB and CW only. Operating times are tentatively each morning at 12:30 UTC and then again between 22:30 and 23:00 UTC each evening. If you make contact, please QSL with a self addressed stamped envelope to WB8BZK at his address on QRZ.com (WB8BZK)

**

ON THE AIR: DUTCH NATIONAL WINDMILL AND WATERPUMP STATION WEEKEND

The special event call PD13MILL will be on the air May 10th to the 12th in honor of the Dutch Windmill and Waterpump weekend. Operators will be PD5JFK , PD0ME and PD7BZ and they will have three Stations active at the same time on 40, 20 and 10 meters using SSB and the digital modes. A 2 meter station for local contacts will be operational as well. QLL via PD7BZ,direct, via the bureau or electronically on Logbook of the World or eQSL. Information about Mills on the Air is on the web at www.pd6mill.com. (Southgate)

**

DX

In DX, a multi-national, multi-operator, DXpedition to Vientiane, Laos, is being planned for September 6th to the 16th. They plan to operate five stations from 160-6 meters using CW, SSB and RTTY. A Web site is currently under construction and will be available soon. The callsign and more details will be announced later.

The Malaysian Special Expedition Team operating as 9M2SE will be activating Perhentian Besar Island from May 1st to the 3rd. The group will use a pair of 100 watt transceivers on 40 through 10 meters running CW, SSB and some digital modes. For QSL information please check 9M2SE carefully on QRZ.com.

VU2PAI and W4VKU are on the air from Bodu Finolhu Island as 8Q7KP through April 30th. Their operation is using two stations on the various High Frequency bands. QSL electronically via OQRS, eQSL or Logbook of the World.

DL6JGN and DL2AWG should be operational as Zed-K-3-N from Nukunonu Atoll until April 30th. Modes being used are CW, SSB and RTTY. This one counts as OC-048 for the Islands on the Air Award. QSL as directed on the air.

Lastly, M0HLT will soon be off to the Falkland Islands on a 2 year work contract. Arrangements have been made to acquire a VP8 callsign and he will be operating from VP8LP when work commitments allow. QSL via his home call.

(Above from various DX news sources)

THAT FINAL ITEM: RADIO READING: RIDING THE SHORTWAVES: EXPLORING THE MAGIC OF AMATEUR RADIO

And finally this week, the story of a new book for new and potential hams. Amateur Radio Newsline's Cheryl Lasek, K9BIK, tells us all about it:

--

Riding the Shortwaves: Exploring the Magic of Amateur Radio is a new book by author Don Keith, N4KC, that contains material of special interest to newcomers to ham radio and those thinking of joining its ranks. This includes easy-to-understand chapters on antennas, choosing a first station, and a tour of the amateur radio high-frequency bands. There are also short fictional and satirical pieces that use humor or drama to show the various facets of the hobby. According to Keith, that's why he too the approach that he did:

--

N4KC: "I felt there was a need for a book for people who were just on the verge of either committing to ham radio or walking away from it. So I had to think about whats keeping people from entering the hobby and what would it take to push them over the cliff."

--

Keith also notes that it's just a matter of being in the right place at the right time and in the right situation for ham radio to become a part of someone's life:

--

N4KC: "That was my case. My dad was not a ham. He was a television repair and he had a shortwave receiver. We used to sit around and listen to hams; to Sputnick and all sorts of things line that and the bug bit."

--

Keith's book also counters the notion that Facebook, the web, Twitter, smart phones and other new technology have made amateur radio obsolete. On the contrary, the author maintains, in its 100th year, the hobby is more vibrant and exciting than ever.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Riding the Shortwaves: Exploring the Magic of Amateur Radio is available in both paper and electronic release from booksellers everywhere including Amazon.com.

You can hear more from Don Keith, N4KC, talking about this new book and his other writings on this weeks RAIN Report. Just take your web browser to www.therainreport.com and tune in. (Press release)

Propagation Forecast Bulletin 17 ARLP017
>From Tad Cook, K7RA
Seattle, WA April 26, 2013
To all radio amateurs

SB PROP ARL ARLP017
ARLP017 Propagation de K7RA

Solar activity quieted this week. The average daily sunspot number declined nearly 23 points to 90.6. Average daily solar flux values were down nearly 13 points to 109.1. The most active day was April 24, with a planetary A index of 19 and mid-latitude A index of 15. But that is still quite moderate activity. The average daily mid-latitude A index was the same this week as last, 4.9.

The predicted solar flux is 120 on April 26-29, 125 on April 30 through May 1, 130 on May 2-3, 125 on May 4-5, 120 on May 6, 115 on May 7-8, 120 on May 9-11, 115 on May 12-13, 110 on May 14-15, 105 on May 16-18, 110 on May 19 and 120 on May 20.

The predicted planetary A index is 12 on April 26, 5 on April 27 through May 4, 8 on May 5, 5 on May 6-18, and 8, 12, 12, 15, 12 and 5 on May 19-24.

F.K. Janda, OK1HH predicts the geomagnetic field will be quiet to active April 26, quiet to unsettled April 27 to May 10, quiet to active May 11-12, and quiet to unsettled May 13-19.

The Australian government's Ionospheric Prediction Service issued a geomagnetic disturbance warning at 0503 UTC on April 26. Increased geomagnetic activity is expected due to a high speed solar wind stream from a low-latitude coronal hole. Minor storm levels are possible. Active to minor storm levels are expected April 26, and unsettled to active levels are expected April 26-27.

See http://www.ips.gov.au/. You can go to http://www.ips.gov.au/mailman/listinfo/ to subscribe to their alert messages.

Bob Logan, NZ5A lives in Manor, a tiny town in central Texas. On Sunday, April 14 at 2032 UTC he was surprised to work HC2UA

(Ecuador) on 6 meter CW. Bob ran 4 watts with a Flex 1500. The antenna was unusual, an 80 meter inverted vee with the center at 35 feet, fed with ladder line and an HF antenna tuner, which Bob says "is not designed to tune 6 meters, but it does!" He also worked them at 2043 UTC on SSB, although they were not able to copy his report. "Quite exciting for me!" says Bob.

Jeff Hartley, N8II of Shepherdstown, West Virginia wrote on April 19: "10 and 12 meters have been quite poor with the recent solar activity decline, but 15 and lower continue to delight with 20 open to western EU and the middle East thru most if not all of their night. There were tremendous signals on 10 meters from south central and SE EU during the recent flux in 140s, the best days being April 10th and 11th.

"The highlight of propagation was working VK9CZ (Cocos-Keeling) on 10 CW easily around 1400 UTC and hearing JAs around 2230-2330 UTC on 10 one night with one JA QSO. I had a run of JAs on 12 meter SSB with the loudest over S9."

Scott Bidstrup, TI3/W7RI sent an article about a study with a pair of sounding rockets to see if turbulence in the E-region of the ionosphere at sunset could serve as a warning of disturbance in the F-layer an 1-2 hours later. Read it at http://phys.org/news/2013-04-rocket-mission-disrupts-radio.html.

NASA has a new video of the Sun showing three years of continuous images. In that time, if the Sun rotates relative to Earth about every 27.5 days, then this video should show 398 rotations of the Sun, in less than 4 minutes. Watch it at, http://www.nasa.gov/mission_pages/sdo/news/first-light-3rd.html.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for April 18 through 24 were 86, 101, 101, 76, 83, 95, and 92, with a mean of 90.6. 10.7 cm flux was 105, 99.4, 104.9, 109.3, 112.9, 117.5, and 114.7, with a mean of 109.1. Estimated

planetary A indices were 3, 2, 4, 3, 4, 7, and 19, with a mean of 6.
Estimated mid-latitude A indices were 2, 1, 2, 3, 5, 6, and 15, with
a mean of 4.9.

http://forums.qrz.com/showthread.php?389052-Pakistan-AP-Land-on-HF-VHFUHF-SSB-FM-April-27-28th&goto=newpost

AP land Pakistan Amateur Radio Society is planning to conduct a field day
on this coming weekend. We shall be operating 2 HF and 2 All mode radios
and would be available on the below set of frequencies. (SSB and FM)

(40 M,Band

7.060 MHZ)

,

(20 M,Band

14.222 MHZ)

,

(17 M,Band

18.160 MHZ)

,

(15 M,Band

21.222 MHZ)

,

(12 M,Band

24.990 MHZ)

,

(2 M,Band

145.500 MHZ)

,

(70CM Band

438.000 MHZ)

The weather is going to be clear and we would be camping on a mountain top near a town called Haripur. A total of 15 HAms would be participating which shall use their individual call signs.

Pls look out for AP2 hams.

L-A Students Chat with Orbiting Astronaut:

Posted: 25 Apr 2013 05:02 PM PDT
http://www.eham.net/articles/30086

LEWISTON -- The first six tries to make ham radio contact Tuesday with the International Space Station fetched only static. On the seventh try, astronaut Christopher Cassidy answered, "Yes."
The audience of Lewiston-Auburn eighth-graders stirred with excitement. Standing on stage in the Lewiston Middle School auditorium, the first student was told to ask his question. For as long as the space station was in radio contact range, students talked to Cassidy, an astronaut from York, Maine, as the station orbited the Earth at about 17,000 mph. Radio contact time Tuesday lasted long enough for students to ask 10 questions.

//
Club Makes Contact Across Oceans:

Posted: 25 Apr 2013 05:02 PM PDT
http://www.eham.net/articles/30085

There's a place in the electrical and mechanical engineering building called "The Shack." There you'll find a world from another time. The room is full of different radios, radio paraphernalia and contact cards dating back almost a century. This is the home of the Amateur Radio Club, one of the first university ham radio clubs in the world. "Old timers find out kids our age are getting more people into radio and they get excited," said Luke Renaud, a senior electrical engineering major and president of the club. The Amateur Radio Club was formally founded at WSU in 1911 by H.V. Carpenter, Homer Dana and Royal Sloan. "Our main goal is education and outreach," Renaud said. "We help teach people how the electronics and procedures for amateur radio work." The ham radio club at WSU is open to any students who have an interest in amateur radio. The club holds licensing classes at least once a year and more if there is interest. The club also participates in three different ham contests throughout the year. They also help out with the Whitcom Emergency Preparedness program and the Snake River jet boat races.

//
Solar Flares Erupt Toward Mercury, May Hit NASA's 'Stereo' Spacecraft:

Posted: 25 Apr 2013 05:01 PM PDT
http://www.eham.net/articles/30084

The sun has unleashed a trio of solar eruptions toward the planet Mercury in recent days, solar storms that may pass one NASA spacecraft while dealing a glancing blow to another, NASA officials say. The three flares erupted from the sun over the span of two days, and belched waves of plasma and charged particles -- called coronal mass ejections (CMEs) -- that are now heading toward Mercury, NASA officials said in a statement. The combined CMEs are expected to pass the agency's Messenger probe, which has been orbiting the planet closest to the sun since March 2011, but may deliver a glancing blow to the Stereo-A spacecraft, which circles Earth while training its eyes on the sun. "The Messenger and Stereo mission operators have been notified," NASA officials wrote in an update. "There may be some particle radiation associated with this event, which in the worst case scenario can impact computer electronics on board interplanetary spacecraft. If warranted, operators can put spacecraft into safe mode to protect the instruments from the solar material."

//
Florida Resident Cited for Ham Interference:

Posted: 25 Apr 2013 05:01 PM PDT
http://www.eham.net/articles/30083

In an unusual case, the FCC cited Ruben Lopez of Pomona Park, Fla. for harmful interference with amateur radio frequencies. He has 30 days to respond to the Enforcement Bureau or risk being fined up to $16,000 for each violation and having his equipment seized. In this case, the subject of the interference is a well pump, according to the agency. Responding to a complaint about interference to Amateur Radio Service reception of medium and high frequency (300 kHz-30 MHz) radio signals, the Enforcement Bureau wrote two letters to Lopez, instructing him to resolve any interference and suggesting he install new A/C line filters for his well pump. Last October, agents traced the source of interference, on 1800 kHz, by conducting on/off tests. The interference stopped when the pump was turned off, according to the commission.

Seemingly so as now Obama and Lilibet Windsor through her lapdog Cameron
are now talking up military action against Syria, despite that Yankland and
Britland
themselves use chemical weapons to blow innocent civilians to bits.

This begs the question that if Brit is to fund and support a violent
uprising in
another country, how about some support closer to home for the IRA and
offshoots in their
justifiable campaign against the Normano-Viking invader?

Crypto Transmission From KSM 4 May 2013

Posted: 26 Apr 2013 11:58 AM PDT
http://forums.qrz.com/showthread.php?389103-Crypto-Transmission-From-KSM-4-May-2013&goto=newpost

The MRHS, in cooperation with our good pals at the Military Radio Collectors Group (MRCG), will send an encrypted message via the facilities of KSM on Saturday 4 May 2013 as part of the annual MRCG meet in San Luis Obispo, CA.

The message will be encrypted using the famous military M-209. All Listeners are invited to try their hand at receiving and decrypting the message, which will be an actual message sent during WWII. Mislaid your M-209? In the military you'd have some explaining to do. But here, no problem. A link to M-209 simulator software is included in the Extra edition of our Newsletter. See:

SARL NEWS SUNDAY 28 April 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

PROJECTS FOR NEXT YEAR ANNOUNCED BY SARL PRESIDENT

AGM DECISIONS

BOOK NOW FOR THE SA AMSAT SPACE SYMPOSIUM

AWARDS PRESENTATION

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

PROJECTS FOR NEXT YEAR ANNOUNCED BY SARL PRESIDENT

The SARL President, Rassie Erasmus, ZS1YT, in his address at the annual dinner held last night, focused on the year ahead. He said that with the granting of two pilot licenses for propagation research, radio amateurs can make a valuable contribution on two fronts: to influence the South African delegation to support the World Radio Conference 15 agenda item 1.4 for a permanent secondary allocation on 5 MHz and to show the world that amateur radio is the most exciting of all technical hobbies. He said:"we have for the next 8 months two frequencies on 5 MHz to experiment with. We should grab this opportunity and show the world what we can achieve. What is particularly attractive about this 5 MHz pilot project is that just about everyone can become involved whether it is by just monitoring and reporting on reception of signals from various parts of the country, or becoming actively involved in designing and building antennas or even a small transmitter."

In preparation for WRC15, the South African Government sets up an industry preparatory group of which the SARL will be part. This group reviews the position South Africa should take on the various agenda items at WRC15. Furthermore this group also interacts with the SADC countries and ultimately with the African Telecommunications Union. Our input can be very valuable in getting support at WRC15.

"We also have acquired a pilot license for 472 MHz ahead of the frequency being made available through publication of the National Table of frequencies later this year. Here there are many challenging opportunities for antenna projects."

"Coupled with all these activities there is a growing interest in digital communication with many new developments in digital voice, weak signal communications by digital means, specialised software for amateurs radio, and cellphone applications for amateur radio, to mention a few of the interest areas. At our recently held strategy indaba councilors brain stormed various themes for the coming year and decided on "Amateur Radio embraces digital". This means that during the coming year we will look at what impact the digital world has on amateur radio and how this will attract the younger generation to or hobby. This however will not detract our focus from traditional amateur radio which will always remain our core activity but simply adding a further dimension".

"I am sure that you will agree with me that the SARL is living up to its slogan "Amateur Radio the greatest of all scientific hobbies". It is our diversity that makes it the greatest. Don't stay behind. Come on board and enjoy the SARL journey".

AGM DECISIONS

The AGM accepted the financial report, approved the budget and agreed on a 7.5% increase in membership fees for the new financial year.

There was a a fair amount of discussion on the motions.

Motion 1 was amended to include that the clubs should have at least 10 SARL Members. The motion as amended as carried.

Motion 2 was carried unanimously.

Motion 3 was carried. In future council will consist of 10 members.

Motion 4 was carried.

As only 13 members were proposed for council, no election was held. The following were declared as councillors for the ensuing year: Rassie Erasmus, ZS1YT, Geoff Levey, ZS6GRL, Fritz Sutherland ZS6SF, Riaan GreeffZS4PR, Hans van de Groenendaal, ZS6AKV, Laurie Devereux, ZS5DL, Fred Scheepers, ZS1FCS, Frik Wolff, ZS6FZ, Johann Marais, ZS1JM, Gideon Jannasch, ZS44GJA.

After discussion it was decided to keep the SARL badge.

The discussion to move the SARL News transmission to mid-week was discussed with mixed feelings. No change is currently contemplated.

Johann Marais, ZS1JM, updated the meeting on the status of the SARL Antenna Defence initiative. He reported on the progress made. His presentation will be made available on the SARL Web during next week.

ZS6AKV gave an update on the 5 MHz and 472 kHz project, The website giving all the details will be available from 1 May at www.amateurradio.org.za/propresearch.htm or click on the link on www.sarl.org.za.

ANNUAL REPORT NOW ON THE WEB

The annual report featuring some of the many highlights of last year was presented at the AGM yesterday and is now available on the web for downloading from the link on the www.sarl.org.za landing page.

BOOK NOW FOR THE SA AMSAT SPACE SYMPOSIUM

The next important date on the amateur radio calendar is the SA AMSAT Space Symposium to be held at the Innovation Hub in Pretoria on Saturday 18 May. Full details, programme and registration forms are available on www.amsatsa.org.za.

Follow the fascinating story of South Africa's DynaCube satellite built by engineering interns at Denel Dynamics. See a demonstration of the SA AMSAT CubeSat: 'KLETSkous' and learn more how to build a receiver for the CPUT ZACUBE 20 metre beacon. Book this week and benefit from the early bird special fee.

AWARDS PRESENTATION

At the annual award ceremony the following presentations were made:

SARL Honours.

Honorary Life Membershipthe SARL's highest honour to: Karl Heinz Canitz, ZS1KC.

Willie Wilson Gold Badge Awarded by Council to the amateur that gave exceptional and meritorious service to the League. David Reece, ZS1DFR.

Jack Twine Merit Award. It recognises qualities such as unselfishness, clean operating and a genuine interest in Amateur Radio and its affairs. This prestigious Award is made by the League's Council to the recipients on recommendation of their fellow amateurs. The recipients are: Pieter de Jager, ZS1SD Nasri Gasant, ZS1NAZ Pierre Holtzhausen, ZS6PJH Ian Pope, ZS1SX Johan Sevenster, ZS1A Alexander Smith, ZS1L Dirk van der Berg, ZS1VDB Jan van der Vyver, ZS1VDV Pierre van Deventer, ZS6A Paul van Spronsen, ZS1V Johan van Vuuren, ZS6JVV Gerhard Coetzee, ZS3TG Maurice Drinkwater, ZS1ACH Johan van Aarde, ZS2I.

The President's Award to: Graham Griggs, ZS2ABK.

Technical Awards.

Icom Excellence Award, the "premier" award of the SARL to: Frik Wolff, ZS6FZ.

SARL HF Contest Awards.

Silent Keys Memorial Trophy SSB For the highest score during the annual HF Phone Contest to: Hans Kappetijn, ZS6KR.

Silent Keys Memorial Trophy CW For the highest score during the annual HF CW Contest to: Roger Jones, ZS6RJ.

Joseph White Trophy. For the highest score on any one band, during the annual HF Phone Contest to: Pierre van Deventer, ZS6A.

ZS4BS Digital Trophy. For the highest score on any one band, during the annual HF Digital Contest to. Rohan Schreuder, ZS6RJS.

Fred Mills Trophy.

For the highest score during the annual HF Phone/CW Contest and who has never won a SARL HF Contest Trophy before to. Mitchell Mynhardt, ZS6YH.

Anon Trophy. For the amateur who achieves the highest score on any one band during the annual HF CW Contest to: Pierre van Deventer, ZS6A.

HOS Trough (Highest Operating Score) For the amateur who achieves the highest aggregate score in both annual HF Contests to: Pierre van Deventer, ZS6A.

The Club Participation Award (Branch Participant Trophy). For the Club who achieves the highest participation in both annual HF CW and Phone Contests to: The East Rand Radio Club.

The SARL Digital Trophy. For the amateur who achieves the highest score during the annual HF Digital Contest to: Noel Hammond, ZR6DX.

The SARL 80 m Club Contest Trophy. For the amateur radio club who achieved the highest score in the six SARL 80 m club contests to: West Rand ARC.

Operating Awards.

Arthur Hemsley 2 metre Trophy. For the radio amateur's individual achievements with transmissions in the 2 metre amateur band by extraordinary performance on EME or modes such as Tropospheric propagation. It is not for the longest distance worked but rather for persistence in achieving something special on 2 metres, to: Andre van Deventer, ZS2BK.

Barney Joel Trophy. To any member of the SARL for the best performance during the year whilst working HF mobile, also for performance by an individual in rally or other public event communication, etc. to: Douw Kruger, ZS1DGK.

Bert Buckley Six metre Trophy. To any radio amateur for his/her individual achievements with transmissions in the six metre amateur

band, it is not for the longest distance worked but for outstanding work or activity on six metres, to: Allan Saul, ZS1LS.

Radio ZS Two Metre Floating Trophy. To the amateur who achieved the longest distance on the 2 metre band during the year, to:

Shared by: Dick Coates, ZS6BUN, and Nasri Gasant, ZS1NAZ.

Radio ZS Awards.

Gary Immelman RA Heritage Floating Trophy. For the best article of an historic nature of an event that occurred more than 5 years previously or an interesting personality that has played an important part in the development of Amateur Radio in years gone by, to:

Colin Ewels ex ZS2IL (1952), ZS6AIV (1953/6), ZS5AE (1956/8), ZS7L (1959 - 1964), ZS9H (1965), A2CAH (1966 - 1978) and 7P8BJ (1979 - 1983), for: "I salute all radio amateurs" in March/April 2012 Radio ZS.

JJ Pienaar Trophy. Awarded by the Editor of Radio ZS for the best article published in Radio ZS during the past year, to: Pierre Tromp, ZS1HF/ZS8M, for: "A Radio Amateur on Marion Island" May/June 2012 Radio ZS.

Radio ZS Shield. Awarded by the Editor of Radio ZS to a SARL affiliated Club or member who best supported Radio ZS during the year to: Victor P du Preez, ZS6EA, for his series "Amateur Radio - the most versatile hobby on earth".

Hamnet Shield. The Hamnet Shield rewards an individual or group for excellent service in a particular area to the community, the authorities and to Hamnet in particular. Criteria include cooperation with disaster relief organisations and enthusiastic provision of emergency communications. The Shield is awarded by the National Director of Hamnet, normally based on nominations by the provincial directors, to: Hampie Findt, ZS6HJF.

RAE Awards. Arland Ussher Gold Pen Award for the highest marks in the two RAE's, to: Class A, to: ES van der Berg, ZS6LWK, and GP Castleman, ZS6GPC. Class B, to WC Botha. ZU6WC.

CONTEST NEWS

The ZS3 Sprint is a fun activity to promote contacts between radio amateurs in the Northern Cape and radio amateurs in Southern African countries. The Sprint is on the air on Sunday 5 May from 14:00 to 15:00 UTC or 16:00 to 17:00 CAT. It is a phone and CW contest on the 40 metre band. The exchange is RS or RST report and provincial or country abbreviation.

ZS3 stations score 1 point for contacts with stations in ZS3 and 2 points for contacts with stations in other ZS call areas or Southern African countries. All other stations score 2 points for a contact with a station in ZS3 and 1 point with a station in their own or other ZS

call areas (excluding ZS3) or Southern African countries. Contacts with the Northern Cape ARC, ZS3NC, Namaqualand Aero Sport Association, ZS3FLY, or the Kalahari Karoo ARC, ZS3ARK, are worth 5 points each. Only one contact per station is allowed.

Log sheets must be submitted by 13 May and sent by email to zs3nc@qsl.net. A certificate will be awarded to the 1st, 2nd and 3rd place in the competition.

PRETORIA AMATEUR RADIO CLUB ZS6PTA FLEEMARKET

The Pretoria Amateur Radio Club is hosting its winter bootsale on Wednesday 1 Mei 2013 at their usual place in Silverton in Pretoria. The starting time is 08:00. Everyone is welcome. If you need a table or more information please contact Almero ZS6LDP, on 083 938 8955.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at moderate levels. Old Sunspot 1 713 rotated back into view off the eastern limb. The returning active region was reassigned number 1 731 and already produced a low level C-Class flare. The rest of the visible sunspots are stable for now.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 67.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be a few good 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

Today onwards - Book for the SA AMSAT annual space symposium in Pretoria at the Innovation Hub on Saturday 18 May 2012, visit www.amsatsa.org.za. April 20-May 1 - Commemorative station PB33BQ on the air, see pa7da.jouwweb.nl/pb33q for more information. 1 May - ZS6PTA flea market starting at 08:00. 5 May - ZS3 Sprint 14:00 to 15:00 UTC. 13 May - Log sheets for ZS 3 sprint to be in to zs3nc@qsl.net. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays

on 7 082, 7 025, and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Branch Co. Emergency Management Officials, Club Host Weather Symposium:

Posted: 26 Apr 2013 05:15 PM PDT
http://www.eham.net/articles/30089

COLDWATER -- Branch County Emergency Management and The Branch County Amateur Radio Club sponsored a Branch County Weather Symposium Wednesday. Meteorologist Rob Dale presented the 53 in attendance with a PowerPoint about severe weather information. Most of those in attendance were Amateur Radio Club members and registered spotters. BCEM coordinator Tim Miner explained the importance of the newly-acquired Code Red program, which is available to all Branch County residents. "Part of our responsibility is the weather and that you know what resources are available in the community," said Miner.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 21st-April, through Sunday, 28th-April there were 225 countries active. Countries available: 3A, 3B8, 3B9, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9U, 9V, 9X, 9Y, A4, A5, A6, A7, A9, AP, BV, BY, C2, C3, C5, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, DL, DU, E3, E5/s, E6, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HI, HK, HL, HP, HR, HS, HZ, I, IS, J2, J3, J6, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S2, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZK3, ZL, ZP, ZS

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

3D2 & ZF2, FIJI AND CAYMAN ISLANDS. "The Daily DX" is reporting that Harry, AA2WN, will be active as 3D2WN from Fiji between June 1-7th. He will then travel to the Cayman Islands and be active as ZF2WN between

July 13-20th. The main purpose of both trips is scuba diving, but he "will be active when [he's] not diving. He'll be running 100 watts from an IC706MKII using a dipole mostly on 17 and 20 meters CW, SSB and possibly some digital modes. QSL via AA2WN and LoTW.

5B, CYPRUS. By the time you read this, Gabriele, I2VGW, will be active 5B4/I2VGW from four different QTHs along the coasts of Cyprus (AS-002) until May 2nd. Activity will be holiday style with a focus on the Digital modes and the 30/17/12 meter bands using his IC-7200 and Buddipole. QSL via I2VGW.

9H25, MALTA (Special Event). Members of the Dutch Society of Radio Amateurs (VRZA Afd. Kagerland)club station (PI4KGL) will be active as 9H25 (that is the whole callsign) from Qawra between May 20th and June 4th. Activity is to celebrate their 25th Holiday DXpedition to Malta. Operations will be on 80-6 meters using CW and SSB. Suggested frequencies are:
CW - 3530, 7025, 10115, 14040, 18098, 21040, 24920 and 28040 kHz
SSB - 3755, 7055, 14260, 18128, 21260, 24950 and 28460 kHz
6m - 50095/CW and 50130/SSB

Operators mentioned are Wim/PG9W (9H3ON), Marion/PD3MV (9H3MV), Floris/ PA1FW (9H3E), Rinus/PA2HEM (9H3MS), Andr�/PA3HGP (9H3S), Jasper/PB2JJ (9H3JN), Sjirk/PE1OFJ (9H3YM), Hans/PA0JBB and Aad/PA11137. QSL via PI4KGL.
A log search is available at the 9H25 Web page: http://members.ziggo.nl/9h25

E4, PALESTINE. Peri, HB9IQB, has been granted a renewed license by the Ministry of Telecommunications & Technology in Ramallah and plans to be active again as E44PM later in the year. For more details on his past operation and updates, visit the following Web page at:
http://www.hb9iqb.ch/palestine.html

E5, SOUTH COOK ISLANDS. Just a reminder that Bruce, ZL1AAO, will once again be active as E51AAO from Rarotonga Island (OC-013) between May 3-17th. Activity will be holiday style, and he will be operational on SSB only, 40-10 meters, using 100 watts to a dipole or 1/4 wave GP antennas. QSL via LoTW, eQSL and direct only; sorry no Bureau cards. He will upload the log when he returns home.

FO & FO/A, FRENCH POLYNESIA AND AUSTRAL ISLANDS. Yoshi, JJ8DEN/KH0PR, will be active as FO/KH0PR from two French Polynesian Islands starting at the end of the month as follows:
April 30th-May 7th - Pukapuka Island (OC-062); DXCC French Polynesia
May 8-15th - Raivavae Island (OC-114); DXCC Austral
Activity from both islands will be on 40-10 meters using CW, RTTY, PSK31 and JT65A. Suggested frequencies are:
CW - 7004, 10104, 14004, 18074, 21004, 24894 and 28004 kHz
RTTY - 7034, 10144, 14084, 18104, 21084, 24924 and 28084 kHz
AC Power on Pukapuka Island only runs between 0630-2400 LOCAL TIME. He will try using a car battery at night. This plan is dependent on gasoline at Pukapuka. On Raivavae Island, he will have AC power all day. His equipment is an IC-7000 w/100 watts into an inverted V. QSL via JJ8DEN, direct with SASE and 2 USDs or by the Bureau. There is a chance that his

plans might be cancelled due to the flights to the remote islands.

FOC SPECIAL EVENT. Just a reminder that starting May 1st, look for stations signing "FOC" in their suffix callsigns throughout the end of the month. Activity is to celebrate the 75th anniversary of the "First Class CW Operators' Club". List of "FOC" stations are available at: http://www.g4foc.org/Default.aspx?pageId37891
Complete details, as well as special awards are available, at the FOC Web page: http://www.g4foc.org

HB0, LIECHTENSTEIN. Operators Roman/DL3TU and Uwe/DL4AAE will be active as HB0/DL3TU and HB0/DL4AAE on the second or third full weekend of September. Weather permitting, they will attempt to operate from the summit Augstenberg (2359 meters A.S.L.) using CW only on the higher bands with an emphasis on Asia. QSL via their home callsigns, direct or by the Bureau. For updates and details, visit Roman's Web page at: http://www.mydarc.de/dl3tu

HH, HAITI. Tom, KC0W, will be active as HH5/KC0W from the extreme northern tip of Haiti for 18 days in July. Activity will be 80-6 meters using CW only. He will use a vertical antenna placed directly over salt water. Tom states, "My operating location in Haiti has unobstructed HF takeoffs to North America, Europe & Africa. Haiti has been underrepresented on CW so hopefully HH5/KC0W will go into many CW enthusiast's logbooks." QSL only direct to his home callsign. Look for more HH5/KC0W information as July approaches.

IOTA NEWS.....
AF-109. (New IOTA) Just a reminder that members of the Egyptian Radio Amateur Society for Development (ERASD) plan to be active as SU8N from Geziret Disuqi (aka Nelson's Island), an island in the Nile Delta and Sinai Region Group, during May for one week (May 3-10th). "Nelson's Island" is approximately 20 kilometers east of the Egyptian port of Alexandria, four kilometers north of Cape Aboukir. Nelson's Island is approximately 350 meters by 150 meters. Activity will be on most HF bands. Operators mentioned are Said/SU1SK, Ateff/SU1AO, Hossam/SU1HM and Ayman/SU1AR. Look for more info to be forthcoming. Also, watch the ERASD's Web page at: http://www.qsl.net/egyptham
Also, watch: https://www.facebook.com/events/441478712566533

AS-079. Take, JI3DST, will be active from Miyako Island between 0900z, April 27th and 0000z, May 7th. He states that he will use three different callsigns on the island: JS6RRR (Main), JI3DST/JS6 (Sub) and JA3YEC/JS6 (For JA). Activity will be on 160/80/75/40/30/20/17/15/12/10/6 meters using CW, SSB, FM, RTTY and PSK31. Operations may vary in case of heavy rains or other conditions. QSL routes are as follows: JS6RRR via JS6RRR, JI3DST/JS6 via JI3DST and JA3YEC/JS6 is only 1 way, and he does not need your QSL. Via bureau is best. Please check QRZ.com for more details.

EU-064. Members of the Radio Club Vend?en (F6KUF) will once again be active as F6KUF/p from the Sebastopol Polder (FFF-218) on Noirmoutier Island between May 18-20th. Activity will be on 80-2 meters on the usual WFF frequencies, +/- QRM permitting, and using CW, SSB and RTTY. QSL cards are via the Bureau; SWL cards are welcome.

EU-095. Members of the Castres DX Gang will be active as TM5FI from Ratonneau Island (DIFM ME003, DFCF 13-061) between May 15-22nd. Activity will be on the HF bands. QSL via F5XX.

EU-125. Operators Olaf/DL4HG and Andy/DL7AT will be active as OZ0TX from Mando Island (DIA NS-003, WWFF OZFF-004) between July 26-28th. Activity will be on all HF bands using CW and SSB. They also plan to be in the RSGB IOTA Contest (July 27-28th). QSL via DL7AT.

EU-129. Operators Gunter/DL4WA, Frank/DL1WA Joerg/DL3ARM will be active DL1WA/p from Usedom Island during the RSGB IOTA Contest (July 27-28th). QSL via his home callsign.

EU-064. Gil, F4FET, will be active as F4FET/P from Yeu Island (DIFM AT013) for 2 hours on May 5th. QSL via his home callsign.

EU-107. Gil, F4FET, will be active as F4FET/P from Petite Island (DIFM MA055) and Er Island (DIFM MA013) for 1-2 days between May 30th and June 5th. QSL via his home callsign.

EU-138. Fred, SM7DAY, will once again be active as SM7DAY/p from Senoren Island between May 25th and June 1st. Activity will be on all HF bands using CW and SSB. QSL via his home callsign, by the Bureau or direct (QRZ.com).

EU-157. Gil, F4FET, will be active as F4FET/P from Cezembre Island (DIFM MA008) during the RSGB IOTA Contest (July 27-28th) as a Single-Op/24-HRS/SSB-Mode/High-Power entry. QSL via his home callsign.

ISWL CALLSIGNS (For May). The following ISWL club callsigns will be used throughout the month of May 2013:

GX4BJC/A - Operated from Eastbourne, in East Sussex, by Peter, G0NQZ. (WAB Square TQ50, England, IOTA EU-005 and WLOTA LH-1841).

MX1SWL/A - Operated from Hove, in Sussex, by George, G3VBE. (WAB Square TQ20, England, IOTA EU-005 and WLOTA LH-1841).

ALL QSLs will be handled by Herbie, G6XOU, and NOT the individual operator. The I.S.W.L. is a member of the European PSK Club. All QSL info is on <www.iswl.org.uk> or <www.qrz.com> or via <www.eQSL.cc>. NO LoTW. I.S.W.L. Awards are available to all Hams and SWLs, see <www.iswl.org.uk> for full details. The eQSL.cc cards ARE welcomed for their awards.

KG4, GUANTANAMO BAY (6m Op). Operators Terry/K4RX (KG4RX), Ken/AC4TO (KG4TO) and Tip/N4SIA (KG4AS) will be active from GITMO for a 6 meter DXpedition in WW, grid FK29kv between June 22nd-29th. They will use a K3 with PR6 and KPA500 into a 6M5XHG optimized 6 element yagi. There will also be some simultaneous CW HF operations on all bands. KG4RX and KG4TO will have their logs on ClubLog. QSL to their respective home callsigns.

KH6BZF PROPAGATION FORECAST/REPORT (April 29th-May 5th)....

KH8, AMERICAN SAMOA (Update/Special Event). Operators Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN and Jacky/ZL3CW (F2CW/WE3B) will be active using the special event callsign N8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November 12-27th. Activity will be on the HF bands, 160-10 meters, with a significant effort on 160 meters. Focus will be on EU for the high bands. CW will be the primary mode with some SSB and RTTY possible. Their location will be well south of Pago Pago to limit mountain low angle blockage. Their operations will include the CQWW DX CW Contest but with extended pre-contest activity intended to make KH8 widely available. QSL via ZL3CW. The N8A Web page is now available online at: http://www.n8a.eu

LZ2013, BULGARIA (Special Event). Members of Bulgarian Federation of Radio Amateurs will activate special event station LZ2013KM between May 1-31st. Activity is to celebrate "National St. Cyril (Kiril) and Methodius Day (creators of Cyrillic alphabet). Operations will be on all bands and modes. QSL via LZ QSL Bureau to LZ1BJ (see details on QRZ.com for E-mail requests). The log will be uploaded into LoTW after the end of activity.

NCDXF PRESS RELEASES (Two - Visalia Report and NCDXF DX/Contest University Scholarships). Dated April 22nd:
1) NCDXF annual board meeting - The annual meeting of the Northern California DX Foundation board of directors was held during the International DX Convention in Visalia, California, on April 20, 2013. Officers will remain unchanged for the next year with Rusty Epps, W6OAT, President; Glenn Johnson, W0GJ, Vice President; Don Greenbaum,

N1DG, Treasurer; and Kip Edwards, W6SZN, Secretary. Reelected to NCDXF's board of directors were Ned Stearns, AA7A, Glenn Rattmann, K6NA, Steve Merchant, K6AW, Tom Berson, ND2T, John Miller, K6MM, Glenn Vinson, W6OTC and Ken Anderson, K6TA.
Contributions from clubs and individuals remain strong, helping NCDXF keep up with the increasing expenses of DXpeditions to rare, remote and dangerous entities. NCDXF officially presented a 50,000 USDs grant to the FT5ZM Amsterdam Island DXpedition. This is the second largest grant in the 41 year history of NCDXF. During this time NCDXF has supported over 500 DXpeditions with over 1.8 million US dollars.
See pictures from the Visalia DX convention where NCDXF gave out grants checks for over $60,000 to various DXpeditions:

https://sphotos-b.xx.fbcdn.net/hphotos-ash4/p480x480/399576_10151615197083210_1374193429_n.jpg

https://sphotos-b.xx.fbcdn.net/hphotos-prn1/48039_10151615197258210_1499237512_n.jpg

2) NCDXF DX University and Contest University Scholarships - NCDXF is committed to bringing younger DXers and Contesters into our hobby. NCDXF will provide full tuition scholarships for hams 25 years of age and younger at all DX University and Contest University sessions held in North America for the next year. This includes those held at the Dayton Hamvention next month.
Funding for this project comes from NCDXF's Scholarship Endowment Fund, which is separate from its General Fund used to support DXpeditions.
Credit for the success of NCDXF is made possible by our contributors, individuals and clubs.
Joining or renewing membership has never been easier. Please visit our website at : http://www.ncdxf.org
Glenn Johnson, W0GJ
Vice President, NCDXF
w0gj@arrl.net

OG0, ALAND ISLAND. Timo, OH6EI, will once again be active as OG0Z during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band/High-Power entry. QSL via W0MM.

P4, ARUBA. John, KK9A, will once again be active as P40A. Activity will be during the CQWW WPX SSB Contest (May 25-26th) as a Single-Op/All-Band entry. Outside of the contest, activity will be on all bands using CW and SSB. QSL via WD9DZV.

(e) eQSL only (d) direct only (B) Bureau only (L) LoTW only

H44KW QSL STATUS. Phil, G3SWH, reported on April 22nd: "Just to let you know that I have processed all the H44KW direct QSL requests received to date via snail mail and taken them to the local post office. I'm now working on the OQRS bureau requests."

ZP5YW QSL MANAGER UPDATE. Randy, W5UE, reports: "Effective immediately, I have agreed to serve as QSL manager for Mike, ZP5YW. Mike's former manager, WA3HUP has retired from this service. Mike uploads his logs regularly to LoTW and eQSL. Mike is providing me all of his logs. New QSLs are being ordered, so there may be a slight delay in replies. Direct requests should go to Randy Becnel, W5UE, P.O. Box 170, Kiln, MS, 39556-0170, USA. OQRS requests can be made for ZP5YW as well as other stations I manage from my web site: http://w5ue.net/qsl-w5ue.html Please help get the word out."

QSL RECEIVED VIA LoTW: 3C0E, 3C6A, 4A8MDR, 5W0W, 6W1/N2WQC, 7N2JZT/6, 8Q7NC, 9A1A, 9M2/R6AF/P, 9U4U, A45XR, A92IO, BA7NO, C6AKQ, D2QV, D3AA, EY8MM, F6CSR, H44KW, H44RK, HK0JJH, HK6F, J6/N7QT, NP2/N5RZ, OD5PY, RI1ANP, RU27ON, SP3SLA, T2T, UT3IB, V31YK, V44KAI, VK9CZ, WH7W, YI1RZ and ZF1DZ

QSLS RECEIVED VIA MAIL: 3D2C, 4L1MA, 9K2/SP4R, 9Q6CC, 9U4U, BY8AC, BY8DX, CP6UA, D3AA, D44BS, E40VB, H44KW, H44RK, HD2A, HK0/F6BFH, OD5NJ, OY1CT, PT0S, PY0F/PP1CZ, S21XV, T46RRC, T47RRC, T48RRC, TR8CA, TT8TT, TU2T, UA0ABK, UK8OM, VK6ANC, VU2PAI, XR0YG, XT8TT, ZL9HR and ZP9MCE

QSLS RECEIVED VIA THE BUREAU: 4K7Z, 5N6/YL2SW, 5B4AJC, 6V7D, 6W/RK4FG, 7O6T, 8Q7DV, A61AR, A65BP, CA3OEV, CT9/YL1ZF, D44TBE, EF8M, HB0WR, HK3W, J38XX, J5NAR, JY4NE, TK/DF6ZY, RI1ANC, RI0FM, VR2/UA3QNS, ZK3OU and ZM4T

SW5, DODECANESE. Rich, M5RIC, will be active as SW5CC (yet to be confirmed) from Rhodes Island (EU-001) starting October 23rd until the end of the month. Activity will be on 30-10 meters, especially 30/17/12 meters, using SSB and RTTY. He also plans to be in the CQWW SSB DX Contest (October 26-27th) as a Single-Op/Single-Band (??)/High-Power entry. For updates, visit his Webpage at: http://m5ric.co.uk/sw5cc-october-2013

T6, AFGHANISTAN. Doug, ND9Q, is now active as T6DA from Panjwayi, Kandahar, until sometime in August. He is currently operating with a FT-857D with a maximum of 20w through an end-fed dipole for 10/20/40m. He will be changing antennas soon to allow 100w operations on all bands, and he will also be adding PSK31 and other Digital modes when his equipment arrives in country. He states, "Due to an extensive (80+ hour) work week, I will be unable to schedule operating times in advance."

T6, AFGHANISTAN (Update/Correction). Tim, KB2RLB (ex-DA2TF and YI9RLB), is currently operating in Afghanistan as T6TM in Eastern Kabul on an American military compound (inside an Afghan compound). He informs OPDX, "The T6 call was received after submitting my application through the military channels here. I plan on being here for at least another year and will be working mainly Fridays between the hours of 0400 and 1300 UTC. My OP Conditions: FT-897D, Clover leaf G5RV (Working to put up some other wire), Z11Pro Tuner. I will be working PSK, SSB and might do some CW (if I get the nerve up since it has been a while for me)." QSL via KB2RLB. CORRECTION TO OPDX.1109. Your editor mixed up some info last week between T6JP and T6TM. It is Mike, T6JP (not Tim, T6TM), who is expected to leave on April 25th, but is expected to return within 2 months (see below). However, Tim did tell us this week that he will be going on vacation sometime in June.

T6, AFGHANISTAN (Update/Correction). Jesse, KB2OBQ, was once again active as T6JP from Panjwai in the Kandahar Province starting May 15th. However, he was planning to leave on April 25th, but is expecting to return within 2 months (not yet planned). He states he can be active as T6JP through August 2014. Activity will be on 160-10 meters (mostly 40/20/10m) using 100 watts, on CW and SSB. Logs will be uploaded daily (if possible) to LoTW, eQSL, QRZ.com. For more details and updates, watch QRZ.com (under T6JP).

TR, GABON. Thorbjorn, SM7RME, is once again active as TR0A/p from Port Gentil, Mandji Island (AF-089), until April 30th. QSL via SM7EHU.

V6, MICRONESIA. Just a reminder that operators Takio/JH3QFL and Keizo/JH3AZC will be active as V6H and V6S, respectively, from the South Park Hotel in Pohnpei between April 29th and May 5th. Activity will be on 80-6 meters using CW, SSB, RTTY and JT65. QSL via their home callsign.

VK9N, NORFOLK ISLAND. Just a reminder that twelve operators and members of the Oceania DX Group (ODXG) will be active as VK9NT from Norfolk Island (OC-005) between May 3-13th. The group plans to have 4 stations covering all bands 80-10 meters on CW, SSB and RTTY. Operators mentioned are Chris/VK3QB (Team Leader), Luke/VK3HJ, Lee/VK3GK, Benton/VK3CBV, Allan/VK2CA (QSL Manager/Webmaster), Catherine/VK4GH, John/VK4IO, Roy/VK3GB, Peter/VK3IJ, Graeme/VK3GL and San/K5YY. An "Online QSL Request Service" will be available for Bureau, and direct cards on ClubLog which is the PREFERRED method. If for some reason you cannot use the OQRS or LoTW, QSL can go direct to VK2CA. For more details and updates, visit the VK9NT Web page at: http://vk9nt.odxg.org

VP2M, MONTSERRT. By the time you read this, Nao, JN1RVS, will once again be active as VP2MRV from Montserrat (NA-103, WLOTA 1475) until May 3rd. Activity will be on 40-10 meters using CW and RTTY. QSL via JA1HGY, direct or by the Bureau, and LoTW. There is a log search on ClubLog.

VU7, LACCADIVES ISLANDS (Update to OPDX.1109 - Lakshadweep Islands). A couple of sources are reporting that Krish, W4VKU/VU2VKU, who is now active as 8Q7KP, has received his plane tickets to fly to an island in the VU7 chain, either Kavaratti or Agatti. He will be active as VU7KV between May 2-5th. Remember, his plan is for SSB and some RTTY on 80-10 meters using a TS-480Sat and TenTec Hercules 2 amp into a Butternut HF9V and a 2 element SteppIR yagi + 30/40m trombone. Basically the same equipment used at 8Q7KP. QSL via W4VKU, by the Bureau, LoTW or eQSL.

XP, GREENLAND. Henning, OU2I/OZ1BII, will once again be active as XP2I from Kanger-lussuaq between May 23-27th. Activity will be CW only. He will participate during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band/Low-Power entry. QSL via OZ1BII (see www.oz1bii.dk/qsl-info.htm).

XU, CAMBODIA (XZ Possible!). Alex, M6CFW, reports on QRZ.com that he recently received a license to operate as XU7WXA from Phnom Penh and will be using it when he visits the country for work. Alex states, "Future dates will be posted here (QRZ.com), and I will try to be on-air as much as work permits. These trips are NOT designed to be full blown DXpeditions. Having said that if you need an XU7 for an award, then I'd be happy to arrange a sked and try to make contact. I will be using all HF bands, SSB and PSK31/63. I'm limited to 100W, but given how flat Cambodia is, I should still be able to reach pretty much anywhere. QSLs will be uploaded pretty much immediately to LoTW and eQSL. If you need a paper card then I'm happy to provide them, but ONLY directly via my UK address M6CFW, and ONLY with $2, €2, £2 or 2 VALID IRCs. I will hopefully be operating soon from XY/XZ (Myanmar). Negotiations for licenses are well advanced, and once I have it then I will mount a one man DXpedition."

XZ, MYANMAR. Simon, HS0ZIB, announced on QRZ.com: "During the months of May and June 2013, I will again operate XZ1K from Tanintharyi State. I will only operate on PSK31, according to when I have free time. From 1st July, I will be working in Laos, but I will try to return each holiday to re-activate XZ1K. QSLs will only be available via online verification. There is, of course, no bureau in Myanmar and I will have no permanent address there. I will mail out a hard-copy QSL for each QSO verification. SWLs may also submit their reception reports."

YE90, INDONESIA (Special Event). Members of the ORARI Jawa Barat and YB Club DX, along with the Bandung Heritage Community will activate the special event station YE90PK between May 3-5th. Activity is to commemorate the 90th anniversary of Radio Malabar. Activity will be on all modes and HF band. The location of Radio Malabar is in Puntang, Mount Malabar, South of Bandung, West Java. For more details, see: http://www.qrz.com/db/YE90PK

Z8, SOUTH SUDAN. Olli, OH0XX, is now active as Z81X from Juba. The length of his stay is not known. Activity has been on 17/15 meters CW. QSL via OH0XX. Hopefully, more details will be forthcoming.

ZD8, ASCENSION ISLAND. Bob, G4DBW, will once again be active as ZD8RH from Ascension Island between April 29th and May 3rd. Since Bob is working on the island, his activity will be limited. Operations will be mainly on CW. Suggested frequencies are around 7007, 10105, 14007, 18073, 21007, 24897 and 28007 kHz. Equipment is a FT857 w/100 watts and a modified MP-1 portable whip antenna. QSL direct via G4DBW with 2 'green stamps' or IRC or via RSGB Bureau. Bureau replies can take up to 18 months.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 28st April 2013

81st IRTS AGM

Today Sunday April 28th the 81st AGM of the IRTS is taking place at the Shamrock Lodge Hotel, Athlone, hosted by the Shannon Basin Radio Club. The AGM meeting will take place at 2pm and the usual radio rally will also take place. Remember, the IRTS is the national society for Ireland and your participation is most welcome. We look forward to seeing you at the AGM meeting.

Amateur Station Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4 July at 2.00 p.m. in the ComReg offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee on line are available at www.irts.ie/exam .There is also an exam button on the home page. Places for the examination are limited and will be allocated on a first come first served basis. Some applications have already been received. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. The closing date for the receipt of completed applications is Friday 14th June.

IRTS Technical Panel

The IRTS Technical Panel is a group of volunteers who have expertise in, or experience of, different aspects of amateur radio. The e-mail address irtstech /at/ irts.ie is a single point of contact for communicating with the Panel. Our aim is to help radio amateurs with technical or operational problems.

Send your question to irtstech /at/ irts.ie. Provide as much information as possible, including details of attempts already made to deal with the issue in question.

The North Cork Radio Group

The North Cork Radio Group will also be operating a new callsign EI75GP for the upcoming event of the celebration of the 75th anniversary of the Cork Grand Prix which is to be held on 22nd - 23rd June 2013. We will also be active for another new initiative involving Fort Camden and the "Rescue Camden" effort, which aims to help in the restoration and development of Fort Camden, Crosshaven, with our members active through the months of June - September 2013, as well as taking part in the ILLW (Lighthouse & Lightship) weekend in August using the reference IE0010 from Roches Point. More details in relation to these activations will be available nearer the dates

---

The Latest Edition of Echo Ireland

In the latest edition of Echo Ireland, (March 2013), the Cork-based Edwin van Mierlo EI2HEB recounts the journey from his introduction as a young boy in the 1970s to the "magical" world of amateur radio by an uncle, to passing the exam and obtaining an amateur station licence in 2011. CW and QRP enthusiast Tom EI2AJ tells us how someone with a small garden and budget can get on the air with a low-cost commercial vertical antenna. Staying with verticals, Tony EI4DIB gives the results of SWR tests on a range of rubber duck antennas for 2 metres and 70 cms.

"HF Happenings" by Anthony EI2KC includes some suggestions for achieving DXCC on individual bands. Anthony also covers recent and forthcoming DXpeditions. In the "Excerpts from the HX files" Pat EI2HX talks about his efforts to fit a telescopic sight to a 10 Gigahertz dish, so that it can be used to line up two portable stations. Pat's experience while using an angle grinder on an aluminium block is worth noting!

Youngsters On The Air

During the summer of 2013, a youth radio camp "Youngsters On The Air" will be held near Tartu, Estonia from 5-12 August. There will be 10 teams participating from different European member associations of IARU R1. The camp is organised by the Estonian Radio Amateurs Union. During this week teams of young radio amateurs from 10 different European countries will be participating in different activities: presentations, Contests, visiting radio stations, observatory, etc. Young operators or SWL's aged between 14-25, are being sought to represent Ireland, and should contact Ger McNamara, IRTS Youth Co-ordinator on 087 2532512 or by email to ei4gxb /at/ gmail.com

As two previous events in Romania and Belgium/Netherlands have shown, it will be a great experience for the young hams which they will never forget.

Fingal Radio Club

Fingal Radio Club have a new Home. We had to give up our old meeting room in Erin's Isle GAA club over a year ago.

We meet most Tuesday evenings at 8.00pm in the KittyHawks Bistro in the Carlton Hotel on the old airport road just outside Dublin Airport.

We would like to hear from any amateurs who might be interested in 3 - 4 day trip to the UK to visit the enigma machine on display in Bletchley Park museum, and at the same time attend a UK rally over a long week-end around the end of August or early September. Please contact Christopher, EI7AAB,at yeatesds/ /at/ /eircom/dot/net or on 087-2463303.

DX News

Pierre HB9AMO is currently active as 5U9AMO in Niger. It is a holiday-style operation and he will be there until 30 May. Listen for his CW signal on all bands 80 - 10m. QSL manager is M0URX and logs will be uploaded to Logbook of the World.

A group of Australian amateurs will operate as VK9NT from Norfolk Island during the period 3 - 12 May. They hope to have 4 stations on the air and will operate CW, SSB and RTTY on all bands 80 - 10m.

ZL1AAO will be on Rarotonga Island in the South Cook Islands from 3 - 14 May. He will use the callsign E51AAO running 100 watts on SSB on 40 - 10m. QSLs go via the home call.

A team of Egyptian IOTA enthusiasts will operate from Nelson's Island in the Nile Delta and Sinai Region from 3 - 10 May. The callsign will be SU8N. This will be the first operation from this island, and the Islands on the Air reference number will be AF-109.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Can You Hear Me Now? Cellphone Satellites Phone Home:

Posted: 27 Apr 2013 05:04 PM PDT
http://www.eham.net/articles/30093

NASA Ames Research Center Smartphones can check e-mail, record videos and even stream NPR. Now NASA has discovered they make pretty decent satellites, too. Three smart phones launched into space this past Sunday are orbiting above us even now, transmitting data and images back to Earth. The PhoneSats, which cost just a few thousand dollars each, could usher in big changes for the satellite industry. The PhoneSats started as a project among young engineers working at the NASA Ames Research Center in California. Jim Cockrell, the project's manager, says it began as a hallway conversation. One noted that smartphone microprocessors are cheaper than those in satellites. So why not just use a smartphone as a satellite? "It was sort of a whimsical notion," Cockrell says. But it also made sense. Modern satellites are used for communication and navigation, and so are smartphones. And the phones have things that satellites have, too, like accelerometers, gyroscopes and cameras. The PhoneSats hitched a ride on the very first flight of a commercial rocket called Antares, which NASA hopes will soon be resupplying the International Space Station. "Within the first orbit after being released from the launch vehicle, we started receiving signals," Cockrell says. The signals from the satellites, which are named "Alexander," "Graham" and "Bell," are actually picked up by ham radio operators all over the world, who send them to the team at NASA Ames. The team is now in the process of using the small data packets to piece together photos taken by the different PhoneSats' cameras. The achievement could mark big changes in the satellite business. Peter Platzer, CEO of NanoSatisfi, a startup company that's about to launch a small satellite into space using money raised on the crowdfunding site Kickstarter, sees a world in which satellites aren't owned solely by powerful corporations and governments.

899. [RAC-Bulletin] RAC Bulletin 2013-016E - RAC completes Review of Amateur Radio ExamQuestions

Newsgroup: rec.radio.amateur.misc
Date: 2013-04-28 22:49:38 UTC
From: rac-bulletins@eton.ca
Message-ID: <517DA72F.8040700@rac.ca>

RAC Bulletin 2013-016E - RAC completes Review of Amateur Radio Exam Questions
2013-04-27

On April 17th 2013, RAC submitted the final documents called for in the contract it won to review the question banks used for exams for the Basic and Advanced certification of Canadian radio amateurs.

Industry Canada had issued a request for proposals to undertake the review in December 2012. RAC engaged RAQI to collaborate on the French language component of the work and submitted a response to the proposal. The $20,000 contract was awarded to RAC late in January.

The first phase of the contract, completed on March 13, consisted of a complete review of all the questions and answers used for amateur radio certification in Canada. At the end of this phase RAC delivered a comprehensive set of recommendations to improve and modernize the question banks. In most cases this involved detailed editing of existing questions but proposals were also made to delete or replace obsolete or inaccurate questions and add questions on aspects of amateur radio that had grown in importance since the last review.

The review concentrated on the accuracy and clarity of the questions and answers and recommended changes where required to eliminate possible confusion over the correct answer to each question. Some errors were easy to identify such as typing mistakes showing an obviously incorrect answer as correct. Others, particularly related to ensuring that all incorrect answers were truly incorrect, required more careful study. The review team took special care in comparing questions in both languages so that the English and French versions conveyed the same information.

Clear, accurate and understandable exam questions are an important element in making amateur radio accessible to all Canadians. RAC sees an up to date and well functioning exam system as an important element in bringing more people into amateur radio to ensure its continuation and growth, a priority objective of the national organization.

On April 4th, Industry Canada officials kicked off phase 2 of the project by providing a preliminary reaction to the RAC recommendations made in phase 1. Over the next 13 days the RAC-RAQI team reviewed the Industry Canada comments and where appropriate provided additional comments and recommendations.

The first phase had identified most areas of needed change and as a result the Phase Two report contained a significantly smaller set of recommendations. Industry Canada will make the final decision on changes to the questions after considering the RAC Phase 2 report. However the exchange of comments so far suggests that the RAC review will lead to a significant improvement and updating of the question banks .

RAC understands the importance of amateur radio courses and educational material developed and delivered by dedicated volunteers across the country. Changes in the question banks can lead to increased work by these volunteers and the Review Team worked to propose changes in ways that will minimize the updating. Many questions will remain as they were before the review. When proposing deleting obsolete questions the Team recommended replacement questions so that question numbering of the unchanged questions would not have to be changed.

RAC is already planning for the transition. Once Industry Canada makes public the updated questions banks, we will prepare information identifying where changes have been made to assist instructors in modifying their course materials and examiners in preparing for the change. As has been mentioned in previous bulletins, the curriculum has not been changed. The topics addressed in the exams and consequently in courses and educational material remain the same. The changed questions will assess the knowledge of these same topics but should be clearer, more accurate, more understandable and relevant to modern amateur radio.

RAQI has been an excellent partner in this project and all francophones should immediately see the vast improvement in the French language questions when the new questions banks are approved and made public.

A great deal of effort has gone into the review and we are happy that it is being received well. RAC will continue to work with Industry Canada through existing consultative arrangements to provide Canadian radio amateurs with the best possible circumstances to pursue their hobby. As well, based on the success of this project, RAC looks forward to competing for contracts on significant projects related to amateur radio if the opportunity presents itself in the future.

For more information contact Glenn MacDonell, Project Manager, Question Bank Update Project and Deputy Director Ontario North East, (ve3xra@rac.ca).

#
# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
22 - 28 April 2013

Solar activity was at low to moderate levels during the period. The
period began at very low levels, but quickly rose to moderate levels
as an impulsive M1 flare and associated Type IV radio sweep occurred
at 22/1029 UTC from Region 1726 (N13, L=331, class/area Fkc/1000 on
25 Apr). An associated coronal mass ejection (CME) was observed in
LASCO C2 imagery off the west limb at 21/1036 UTC, but was only
partially Earth-directed and did not result in noticeable impacts.
Activity returned to low levels following the M1 flare, but remained
fairly active throughout the period, producing over 60 C-class
flares. The most active region was Region 1726, which produced over
33 C-class flares on its own. As soon as Region 1726 rotated off the
visible disk on 25 Apr, Region 1731 (N09, L=187, class/area Dkc/420
on 28 Apr) emerged and quickly became the area of interest,
producing a total of 12 C-class flares. Region 1733 (S17, L=254,
class/area Cso/30 on 28 Apr) produced a C4/1n flare associated with
Type II (576 km/s) and Type IV radio emissions at the end of the
forecast period, and had an associated potentially Earth-directed
CME. Further analysis is pending.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was
normal to moderate levels from 22 Apr to 26 Apr. Flux values
increased to high levels on 27 Apr, reaching a max of 2920 pfu at
27/1625 UTC, and remained at moderate to high levels until late on
28 Apr as a result of effects from coronal hole high speed stream
(CH HSS) activity.

Geomagnetic field activity was at quiet to unsettled levels on 22-23
Apr. Activity increased to unsettled to active levels on 24 Apr due
to effects from a favorably positioned CH HSS. Solar wind speeds
increased to near 430 km/s, the total interplanetary magnetic field
(IMF) reached a maximum 23.4 nT, and the Bz component dropped to
```

-18.9 nT. Solar wind speed continued to increase on 25 Apr to the 500 km/s range, total fields decreased to approximately 5 nT, and the Bz component of the IMF was variable between +/- 3 nT. The ionosphere responded with a short-lived G1 (Minor) geomagnetic storm early on 26 Apr, but conditions quickly returned to unsettled levels for the remainder of the day. Quiet levels returned by 27 Apr and remained there through the end of the period as CH HSS effects diminished.

Forecast of Solar and Geomagnetic Activity
29 April - 25 May 2013

Solar activity is expected to be low with a chance for M-class flares through 07 May as Region 1731 remains on the visible disk. Activity is expected to decrease to very low to low levels through 08 May. Activity will likely increase to low with M-class flares likely when we see Region 1726 return on 09 May. Region 1731 returns on 20 May, keeping levels low with M-class flares likely through the end of the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at moderate to high levels through 02 May due to CH HSS effects. Values should decrease to normal to moderate levels from 03 May through 21 May. Another increase to moderate to high levels in response to recurrent CH HSS effects is expected from 22-25 May.

Geomagnetic field activity is expected to be mostly quiet through 20 May. Conditions should increase to unsettled to active with isolated periods of minor storming possible from 21-23 in response to recurrent CH HSS effects. Mostly quiet levels should return on 24 and 25 May.

http://forums.qrz.com/showthread.php?389442-K4RC-Jamestown-Island-Va-Special-Event-May-11&goto=newpost

The Williamsburg Area Amateur Radio Club will be holding its annual Landing Day special event from Jamestown Island, Va on May 11, 2013. We plan to be on the air as K4RC between 10AM-4PM on 40, 20, and possibly 15 and 10 meters. To QSL please send a card to the club QSL Manager, Steve KG4SMV. We also QSL via LoTW.

This is one of three annual events in the club's "Historic Triangle" special event series. If you work us at Jamestown, Colonial Williamsburg in July, and Yorktown in October, you are eligible for a special certificate. The contacts do not have to be made in the same calendar year. Check out our web page at www.k4rc.net for more information.

Noble Radio NR-6N4 Two Band VHF Transceiver

Posted: 28 Apr 2013 11:55 AM PDT
http://forums.qrz.com/showthread.php?389345-Noble-Radio-NR-6N4-Two-Band-VHF-Transceiver&goto=newpost

Noble Radio NR-6N4 Two Band VHF Transceiver

We are pleased to announce the birth of a new amateur radio
equipment manufacturer - Noble Radio. All of their products are designed
and manufactured in the USA.

Their first transceiver will be a DualBand Multimode VHF
transceiver for 6 and 4mtrs.

Preliminary Technical Specifications*

1. RECEIVER SPECIFICATIONS

Frequency Coverage:

4M: 69.9 MHz to 70.5 MHz

6M: 50.0 MHz to 52.0 MHz

Modes: SSB (USB & LSB) and CW

Circuit Type:

Downconverting Design

Dual Conversion: 1 st IF: 10.7 MHz 2 nd IF: 25 kHz

Sideband elimination using phasing techniques with digitally
generated Quadrature carriers and Image Reject Mixers preceeded by 15 kHz
crystal roofing filters

Ultimate receiver bandwidth set by adjustable SCAF filters
(two 8 th order filters used. One for High Cut and one for Low cut)

Sensitivity:

MDS = -130 dbm

Dynamic Range Figures:

Blocking: 110 db

IMD (3 rd Order) = 95 db

Selectivity:

500 Hz to 4 kHz adjustable with the SCAF filters

Ultimate attenuation of filters are 55db or better

2. TRANSMITTER SPECIFICATIONS

Frequency Coverage:

4M: 69.9 MHz to 70.5 MHz

6M: 50.0 MHz to 52.0 MHz

Modes: SSB (USB & LSB) and CW

OUTPUT POWER: 20 Watts CW or PEP SSB

SCAF Filters can be used to tailor SSB Transmit audio.

3. GENERAL SPECIFICATIONS

SYNTHESIZER: DDS/PLL synthesizer with 10 Hz minimum step size.
Tuning rate is variable depending on the Tuning Knob speed (Variable Speed Tuning - VST)

MEMORIES: 10 Memories per band

ANTENNA IMPEDANCE: 50 ohms unbalanced

SUPPLY VOLTAGE: 11.5 to 14 Volts Regulated DC (Negative Ground)
at approximately 3.6 Amps at full output power.

DIMENSIONS: 8 in (203 mm)W x 12 in (305 mm) D- including knob
and heatsink x 3.75 in (95 mm) H - including feet

WEIGHT: Approximately 4 lbs (1.8 kg)

4. SPECIAL FEATURES

The NR-6N4 has the capability of being controlled by a standard PC type keyboard that plugs into a rear connector. Once a keyboard is interfaced to the radio, it can be used to directly enter a frequency, skip directly to various functions by a single press of a function key without having to navigate the menus from the front panel buttons as well as being used to send CW via the keyboard. There is also a built in keyer function that operates with a standard keyer paddle for CW operation with or without a keyboard connection.

The low level 10.7 MHz IF signal is also brought out to a rear connector so that it may be used for panadapter or SDR applications.

* All specifications in this document may be subject to change without notice or obligation

The price is expected to be around $800

A website will be up-and-running shortly

CubeBug-1 reaches orbit

Posted: 28 Apr 2013 11:51 AM PDT
http://forums.qrz.com/showthread.php?389344-CubeBug-1-reaches-orbit&goto=newpost

CubeBug-1 reaches orbit

CubeBug-1 is the first technology demonstration mission for a new CubeSat platform design (mechanics, hardware and software) intended to be released as Open Source and Open Hardware for its use in Amateur projects, University projects and research labs.

The project is sponsored by the Argentinean Ministry of Science, Technology and Productive Innovation.

Payloads on this first mission include:

☐ an ARM based on-board computer

☐ a nano-reaction wheel with its driver circuit

☐ a low resolution camera

all based on COTS components

CubeBug-1 is a 2U CubeSat and uses a 1 watt output AstroDev Lithium Li-1 on 437.445 MHz using 1200 bps AX.25 AFSK FM packet radio, callsign LU1VZ-11.

Depending on the mode of the satellite the beacons will be transmitted every 10 to 30 seconds. Telemetry information is at http://1.cubebug.org/coms/telemetry

The team say ☐Please, if you hear the satellite, let us know by email to cubebug1@satellogic.com. If you decode a beacon or save its audio, please please please, share it with us!☐.

After the technology demonstration part of the mission is over, the satellite will enter a mode that will include services to the Amateur radio community, including an AX.25 Packet Radio Digipeater, science data downloads from the payload (including images if possible).

CubeBug-1 launched on a Long March CZ-2D rocket from the Jiuquan Space Center on April 26, 2013. After 816.5

seconds the CubeBug-1 deployed from the rocket. Orbital data
including TLE is at http://1.cubebug.org/orbit

Other satellites on the same launch include NEE-01 Pegasus
(910 MHz) and TURKSAT-3USAT (145/435 MHz linear transponder).

Ham Radio 50 MHz operation in New Zealand

Posted: 28 Apr 2013 11:45 AM PDT
http://forums.qrz.com/showthread.php?389343-Ham-Radio-50-MHz-operation-in-New-Zealand&goto
=newpost

Ham Radio 50 MHz operation in New Zealand

Analog TV transmissions in South Island, NZ have
now ceased enabling amateur radio use of the 50 MHz band

As of Sunday, April 28 radio amateurs there have been using
50 MHz.

George Boorer ZL3PN commented "Well, what a thrill to hear
that horrible noise of CH1 TV2 stop just 3mins after 2am this morning.
Straight into it put out CQ 6m CQ CQ 6m. Back came ZL3GE on 50.050 MHz."

George ZL3PN had been active on 50 MHz in 1950 before it was
used for TV. ZL3GE is also a veteran 50 MHz operator.

Channel 1 TV in New Zealand occupied 44.0 to 51.35 MHz and
amateurs were prevented from using 50.0-51.35 MHz if they were within 50
km of an area served by a channel 1 TV transmitter or an area where there
was a translator whose input was on channel 1.

Three 437 MHz ham radio balloons to launch from Poland

Posted: 28 Apr 2013 11:42 AM PDT
http://forums.qrz.com/showthread.php?389342-Three-437-MHz-ham-radio-balloons-to-launch-from-Poland&goto=newpost

Three 437 MHz ham radio balloons to launch from Poland

Tomasz Brol SP9UOB plans to launch three High Altitude
Balloons to near-space this week which will carry amateur radio payloads
on 437.600, 437.595 and 437.615 MHz.

At maximum altitude the 10 mW signal from these balloons
could have a potential range of up to 700 km.

Thomasz posts:

I☐m planning on launching 3 balloons from Gliwice Glider
Airport [Upper Silesia], with ultralight (36-40 grams) payloads.

First launch on Wednesday, May 1 at 9:00 UTC ☐ under 100g kaysam / Helium
☐ just for hardware check 437.600 MHz

Second on Saturday, May 4 at 9:00 UTC ☐ 1600 g Hwoyee / Hydrogen ☐
437.595 MHz

Third on Saturday, May 4 at 10:00 UTC ☐ 1600 g Hwoye / Hydrogen ☐ 437.615
MHz

RTTY, 470 Hz shift / 50 baud / 7n1

The IARU Region 1 site carries this report on the May 4 balloon launch:

On Saturday, May 4, 2013 at 9:00 UTC (11:00 am ☐ local time), the team
from the club SP9PDF ☐ directed by Tomasz, SP9UOB ☐ will launch an
unmanned stratospheric balloon. The current record of flight altitude is
44,376 feet above sea level.

The balloon named SEBA-1 will be launched from the Aero Club of Gliwice
within the project ☐From Gliwice to Space☐, started in June 2012.

A telemetry transmitter (its power ☐ 10 mW) will be placed in a
capsule, the balloon will operate on RTTY on the frequency 437.600 MHz USB
(+ / ☐ thermal drift of about 10 kHz), 50 baud, 470 Hz shift, 7N1. To
receive telemetric data, you should use the dl-fldigi program.

Detailed instructions for configuration of the software can be found at:
http://sp9uob.verox.pl/rtty_tracking.html

The capsule has a total weight of just 37 grams, including: the electronic circuits ☐ 8 grams, the power (R6) ☐ 14 grams, the antenna ☐ 3 grams, the thermal insulation ☐ 12 grams.

Such light weight load, combined with a giant balloon (2 kg of latex filled with hydrogen) should result, at least, in approaching the world record.

We invite everyone to track the flight of the balloon by listening on the indicated frequency, or at the following website: http://spacenear.us/

Source of information: SP9PDF Club Team

GB2RS NEWS

Sunday 14th April 2013

The news headlines:

* World Amateur Radio Day

* New RSGB website to go live

* GU100RSGB on the air later this week

On 18 April, World Amateur Radio Day celebrates the forming of the International Amateur Radio Union (IARU) on 18 April 1925. This year the theme is Entering Its Second Century of Disaster Communications. This commemorates the first known use of amateur radio in a disaster situation when, in March 1913, the Scioto River in Columbus, Ohio flooded its banks, killing more than 100 people. According to local newspapers, Herbert Akerberg, a 15-year-old from Hilltop, Ohio used his home radio transmitter to send SOS calls via Morse code for nearly 72 hours. His actions were highly commended by the city authorities and his achievement widely heralded over the country as a new contribution to the comparatively new science of radio.

After almost a year of planning and building a new site by a small team led by Alan, G0TLK, we are pleased to announce the new RSGB site will be going live at the end of this week at www.rsgb.org. It's not yet complete and development work will continue. We need authors, particularly for the technical section, and good quality pictures. If you want to help please contact the RSGB General Manager, Graham Coomber, G0NBI by e-mail at graham.coomber@rsgb.org.uk.

G100RSGB, the special event callsign celebrating the RSGB Centenary, stays in Region 11 again this week. Today, 14 April, Torbay ARS are running a 24 hour HF station in Newton Abbot using SSB, digital modes and FM. Monday sees Taunton & District ARS running CW and SSB on the 10 to 40m bands. Tuesday the callsign moves to Sidmouth where Norman Lockyer Observatory will be running HF, 6m and 70cm using SSB, PSK31 & ROS. Wednesday sees Exmouth ARC putting the callsign on the air. On Thursday 18 April, West Devon RC will be running CW and SSB on 70cm, 2, 6, 10, 20 and 40m from Plymouth. Friday 19 April and Riviera ARC will be on the air from Torquay using the 2, 10, 12, 15, 17, 20, 40 and 80m bands on CW, SSB, PSK and SSTV. Next weekend, 20 and 21 April, the callsgin moves to Guernsey and changes to GU100RSGB. The club will be on the HF bands as well as 6m to 70cm using SSB, RTTY, PSK, Satellite, WSJT and SSTV. Details of how to get your QSL card are on the website,

www.rsgb.org.uk.

On Thursday, the RSGB gave a presentation to staff at Ofcom entitled the RSGB's first 100 years. It celebrated the history of the Society, its relationship with the regulator and what amateur radio can achieve in today's world. After the talk, which was presented by Jim Lee, G4AEH, Ofcom's Head of Business Radio, Paul Jarvis, thanked the Society for the presentation and said it showed the amateur hobby in an excellent light.

On Tuesday 9 April, the count took place for the re-establishment of the RAIBC committee. The ballot was overseen and conducted by the RSGB. Brian Tuffill was elected Chairman and Terry Baldwin was appointed equipment manager with Mr Maunder and Mr Watts elected as Committee Members. The count was conducted by Carlos Eavis, G3VHF and Mark Allgar, M1MPA from the RSGB staff and an independent

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast scrutiniser Bill Pyle, G8IAY. The RAIBC were represented by Terry Baldwin who took no part in the count process.

The latest Region One IARU Monitoring System newsletter reports a Russian over the horizon radar has been transmitting between 3.555 to 3.590 and 3.750 to 3.785MHz. The signal is always 35kHz wide with its location believed to be in the area of Makhachkala in the Caspian Sea. A letter has been sent to the Russian Radio Society asking for assistance in ending the operation of this radar system. An Iran based over the horizon radar has been interfering with amateur radio operations on the 10m band. This radar is on the air daily on 28.000 to 29.700MHz transmitting bursts that are 60kHz wide. The splatter from the signal often covers spectrum 500kHz or more in bandwidth. The German Department of Post and Telecommunications has sent an official complaint to its counterpart in Iran. The Dutch Datawell buoys are still operating illegally on 10 meters. If you happen across signals in the amateur radio bands that you know do not belong there, please send a report to the Intruder Watch Coordinator for the nation that you live in, see www.iaru-r1.org for more information.

The Hurdy Gurdy Museum of Vintage Radio will be celebrating International Marconi Day and the tower will be open from 11am to 4pm. The callsign will be EI0MAR. The tower was the site for an experimental Marconi Station in 1905. All visitors are welcome, licensed amateurs, SWLs and anyone with an interest in radio. The museum is located in the Martello Towel, Howth Harbour, Fingal, County Dublin.

And now for the details of rallies and events for the coming week

A WW2 Air Forces Radar Reunion will be held at Blackpool from Friday, 12 April to Monday 15 April. Operators, mechanics, filter room and airbourne radar visitors welcome. Day visitors are also welcome. For further details please contact Jim Ward, G0DGG, 17Valley Walk, Croxley

Green, Rickmansworth, Hertfordshire WD3 3TA.

On 21 April, the West London Radio & Electronics Show will take place at Kempton Park Racecourse, Staines Road East, Sunbury on Thames TW16 5AQ. Doors open at 10am and there will be trade stands, a Bring & Buy and special interest groups Details from Paul, M0CJX on 08451 650 351.

On 21 April the RADARS Rally And Surplus Equipment Sale will be held in The Hugh Ripley Hall, Ripon, North Yorkshire HG4 2TP. Doors open at 10.30am and entry is £2. There will be trade stands and a Bring & Buy. Details from rally@ripon.org.uk.

Now for the news of special events

Gordano Amateur Radio Club will be operating GB5IMD, an International Marconi Day special event station, on all bands from 10 to 80m from Flat Holm Island in the Bristol Channel on 20 April. On the 19th and 21st the club will be operating as GW0GRG/P.

Telford and District Amateur Radio Society will be operating from the old Marconi receive only station at Tywyn, on the west coast of Wales, on 20 April. Using GB100TMD they will be on the air from 0001 until 2359UTC on all bands from Top Band to 28MHz using both SSB and CW. They will also be using CW only around 474kHz. Visitors are welcome and may operate too. For more details contact Simon Taylor, 2E0CHV on 01588 673053, evenings only.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast Cleddau ARS will be operating a special event station, GC0SYG/MM, from on-board the Stena Europe Irish Sea ferry in memory of the 101st Titanic remembrance weekend until 2359UTC on 14 April. The ferry will travel between Fishguard in Wales and Rosslare in Eire and the station will operate on 40m and 20m primarily using CW and SSB with and some PSK31. Spots will be made via clusters.

The Radio Society of Harrow will be running GX3EFX and displaying period radio equipment at the 1940's Family Experience Weekend on 14 April at the Lincolnsfield Centre, Bushey Hall Drive, WD23 2ES.

On Saturday 20 April, Halifax & District Amateur Radio Society will be running a special event station during the St George's Day Youth Festival in the Piece Hall, Halifax. The callsign GB4HPH will be active between 10am and 4pm on 40m. It is also hoped to activate the callsign on Friday 19th on 2m. QSL cards will be issued via the RSGB's QSL bureau only if requested.

On 20 April, Southport and District Amateur Radio Club will be operating an International Marconi Day special event station under the club callsign G2OA on various HF and VHF bands using CW, SSB and FM. The station will be located at the club house in Scarisbrick. Visitors are very welcome to attend and for directions see www.sadarc.org.uk.

And now the DX news compiled from 425 DX News and other sources

Rob, J6/N7QT and Frans, J69DS will be active from St Lucia, IOTA reference NA-108 until 16 April. They will operate CW, SSB and RTTY or PSK on the 10 to 80m bands with field portable activity and lightweight antennas from beaches or mountain tops. QSL J6/N7QT via his home callsign either direct or via the bureau, LoTW and eQSL and QSL J69DS direct only.

Brian, GW4DVB will be active as J8/G4DVB from Palm Island, which is IOTA reference NA-025 until 20 April. [

The ZK3N DXpedition to Tokelau has been brought forward and Hans, DL6JGN and Guenter, DL2AWG will now be active on 15 to 30 April. They will operate CW, SSB and digital modes on the 10 to 80m bands. QSL via DL2AWG.

Maurizio, IK2GZU will be back in Tanzania until 8 May. He will be working on electrical installations in the local hospital and orphanage. In his spare time he plans to reactivate his 5H3MB callsign. QSLs go via his home callsign.

Mario CT1FTR will be in Khartoum, Sudan until June. He is signing ST2FT.

Rick AI5P is off to the Caribbean and will first visit Dominica until 20 April. While there he will use the callsign J75PX. Then he travels to Martinique until 30 April where his call will be TO5PX. QSLs are via his home callsign.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast Now the contest news

On 16 April the 1.3GHz UK Activity Contest takes place from 1900 to 2130UTC. Using all modes the exchange is signal report, serial number and locator.

The data leg of the 80m Club Championships takes place on 18 April from 1900 to 2030UTC. The exchange is signal report and serial number.

The Spring EU Sprint Contests SSB leg takes place on Saturday 20th. Running from 1600 to 2000UTC on the 3.5 to 14MHz bands, the exchange is both callsigns, serial number and name. Note there is no signal report in this exchange.

On Sunday 21st the second of five UK Microwave Group Low Band contests takes place between 1000 and 1600UTC. The bands for this one are 23cm, 13cm and 9cm and the exchange is signal report, serial number and locator.

And now the solar factual data for the period from Friday the 5th to Thursday the 11th of April compiled by Neil Clarke, G0CAS on Friday the 12th of April.

During the period many sunspot groups were visible with up to ten groups on the 5th, some of these groups were large and looked rather threatening. Right at the start of the period, an impulsive M2 solar flare took place and then, at the end of the period, a much larger M6 solar flare occurred. An Earth directed coronal mass ejection was associated with this flare. Solar flux levels increased from 134 units on the 5th to 148 by the 10th. The average was 140 units. The 90 day solar flux average on the 11th was 113 units, that's one unit down on last week. X-ray flux levels increased from B3.6 units on the 5th to B7 by the 10th. The average was B5.1 units. Geomagnetic activity was quiet everyday with an average of Ap 4 units. Solar wind data from the ACE spacecraft saw solar wind speeds increase erratically from a slow 250 kilometres per second on the 5th to 500 by the 11th. Particle densities were low everyday except for the 10th, which increased to 20 particles per cubic centimetre. Bz never varied more than minus 7 and plus 8 nanoTeslas for the entire period.

And finally the solar forecast for the coming week. Later this week the quiet side of the Sun is expected to be rotating into view. Solar activity is expected to be low but activity could increase to moderate levels with the occasional M class solar flare taking place. Solar flux levels should decline and be around the 100 mark later in the week. Geomagnetic activity could be at 'storm levels' due to the coronal mass ejection that departed the Sun on the 11th. Activity should then decline for the rest of the period to quiet levels. MUFs during daylight hours at equal latitudes should be around 23MHz for the south and 20MHz for the north. Darkness hour lows are expected to be about 11MHz. Paths this week to the east coast of North America should have a maximum usable frequency with a 50 per cent success rate of around 22MHz. The optimum working frequency with a 90 per cent success rate will be about 17MHz. The best time to try this path will be between 1600 and 2100 hours UTC.

And that's all for another week from the propagation team.

Next, the Local News:

Please note that details of all RSGB-affiliated clubs and societies

can be found on the RSGB website, including email addresses

and website links where known.

[Note to Newsreaders: Please read the local news items appropriate to the service area of your transmission.]

NEWS FOR THE MIDLANDS Northampton Radio Club is arranging an intensive Foundation level training course weekend for anyone interested in becoming involved in amateur radio. Further information can be obtained from Bob, M0HAF, by e-mail to kenvee2@gmail.com.

On Sunday 14 April Wythall Radio Club is running a Special Event Station at Stoke Prior Steam Fair, then at 8pm there's a club net on 145.225MHz. On 16 April there is a Morse class at 7.45pm and then at 8.30pm Callum, M0MCX will talk on Knots for Beginners. On Thursday the club is taking part in the 80m Club Championships Contest. On Friday is a shack social at 7.30pm. Next Sunday, the 21st, the club is visiting the Kempton rally setting off at 8am. Details from Chris, G0EYO, on 07710 412 819.

On Monday 15 April Friskney and East Lincolnshire Communications Club has VHF SSB club net on 144.165MHz USB, using vertical polarisation, starting at 7.30pm. On Wednesday there's an M3+M6 club net on GB3FR repeater at 8pm and Friday a club net on the GB3FR repeater at 8pm. Non members are welcome on all nets. Contact the FELCC Information Line on 07554 362 020 for more information.

On Monday 15 April Lincoln Short-Wave Club is holding a committee meeting at 7.30pm followed by participation in the 1.3GHz UK Activity Contest on Tuesday from 8pm. On Wednesday the club has a formal meeting and on Thursday there's a club simplex net on 145.375MHz at 8pm. On Saturday 20 April it's the shack morning and mentoring from 9am. For more information contact Pam Rose, G4STO, on 01427 788 356.

On Monday 15 April Northampton Radio Club is holding its weekly club net on 145.4625MHz starting at 8:00pm, then on Thursday it's the club meeting. Anyone interested in taking up amateur radio is welcome to attend. More information from John, G4CZB by e-mail to g4czb@hotmail.com

On Monday 15 April South Birmingham Radio Society has an open meeting with the shack on the air. Tuesday sees the coffee morning talking place from 11am to 1 pm. On Thursday there are training classes with Dave Murphy, G8OWL and on Friday there's work to be done in the Shack and on the aerials. Details from Mick Cleary, G7RRP on 07595 696 359.

On Monday 15 April Welland Valley Amateur Radio Society is holding the Annual General Meeting. On Thursday the club is taking part in the 80m Club Championship from 1900 to 2030UTC. For more information contact Peter D Rivers, G4XEX on 01858 432 105.

On Monday 15 April Gloucester Amateur Radio & Electronics Society has an evening of VHF operating and construction. More information from Anne, 2E1GKY on 01242 699595 daytime.

On Monday Sutton Coldfield Amateur Radio Society has an open net on 145.250MHz from 7 30pm, all are welcome. More information from Robert Bird, by email to spirit.guide@hotmail.co.uk.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast On Tuesday 16 April Derby & District Amateur Radio Society has an illustrated talk on the work of the RAIBC. Contact Richard Buckby, by email to radio@dadars.org.uk for more information.

On Tuesday Dudley and District Amateur Radio Society has a 23cm contest night. Details from Miles Hall, G4GSB by e- mail at g4gsb@gmx.com.

On Tuesday Loughborough & District Amateur Radio Club is on the air from the club room. More information from Chris, G1ETZ on 01509 504 319.

On Wednesday 17 April Midland Amateur Radio Society has a general meeting when the shack will be open and training classes available. Details from Norman, G8BHE on 07808 078 003.

On Wednesday South Kesteven Amateur Radio Society is having an informal evening. Contact Nigel, M0CVO on 01476 402 550.

On Wednesday South Notts Amateur Radio Club is having an on the air and natter night. More information from Terry, M0RIA on 01159 372 942.

On Wednesday Telford & District Amateur Radio Society has a talk on what 472kHz & 5MHz is all about. Contact Mike, G3JKX, on 01952 299 677 for more information.

On Thursday 18 April Cheltenham Amateur Radio Association has a talk on the GJ6YB IOTA Expedition by G4FKA. Details from Derek Thom, G3NKS on 01242 241099.

On Thursday Salop Amateur Radio Society is having a natter night. Details on the club website at www.salop-ars.org.uk.

On Friday 19 April Coventry Amateur Radio Society is taking part in the 2nd Round of the 2m DF trophy. Contact John, G8SEQ, on 07958 777 363 for more details.

On Friday Hucknall Rolls Royce Amateur Radio Club starts a 3 day camping and caravan weekend with a fox hunt on Saturday starting at 10am. Details from Dave Wilde, G1YAI, by e-mail to treasurer@hrrarc.com.

On Saturday 20 April Rugby ATS has a talk on valves and classical electronics. More information from Steve, G8LYB on 01788 578940.

NEWS FOR THE NORTH OF ENGLAND

On Sunday 14 April North Cheshire RC is looking at loft antennas on 21 April they are taking part in Maritime Radio Day. More information from Jill Gourley, by e-mail to jillgourle@aol.com.

On Tuesday 16 April Halifax & District Amateur Radio Society is holding the first /P evening of the year at Blackshaw Head above Hebden Bridge. On Saturday 20 April GB4HPH will be on the air from the St George's Day Youth Festival in The Piece Hall, Halifax. Details from Martin, M0GQB, on 01422 341 317.

On Monday 15 April Angel of the North Amateur Radio Club is having a demonstration of D-star Equipment by John Cranston. Contact Nancy Bone, G7UUR, on 01914 770 036.

On Monday Sheffield Amateur Radio Club is holding an open forum on club activities and what do members want in the future? More information from Peter Day, G3PHO, by email to sarc@g3pho.org.uk.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast On Monday Workington and District Radio and IT Group Club will be on the air. For more information get in touch with Barry Easdon, G0RZI, on 01946 812 092.

On Tuesday 16 April Chester & District Radio Society will have a talk on Software Defined Radio by Chris Seward G0PJX. Contact Bruce Sutherland, M0CVP, on 01244 343 825 for more information.

On Tuesday Stockport Radio Society has a talk on Collecting Military Radio Gear with John Kay. Details from Nigel Roscoe on 07973 312 699.

On Wednesday 17 April Denby Dale Radio Club is having a talk on Mobile Antennas by Richard, G3UGF. Details from Richard, M0RBG, on 07976 220 126.

On Thursday 18 April South Manchester Radio and Computer Club will be hearing from Elaine, 2E1BVS on A Chance Encounter, A DXpedition to the Shetlands. Details from Ron, G3SVW, on 01619 693 999.

On Friday 19 April East Cleveland Amateur Radio Club is holding a components catalogues evening. For more information contact Alistair, G4OLK, on 01642 475 671.

On Friday 19 April Tynemouth Amateur Radio Club has a talk in the RF noise bridge. More details from Bob, M0KLO, by e-mail to mail@g0nwm.com.

NORTHERN IRELAND

On Sunday 14 April the normal Mid Ulster Amateur Radio Club meeting has been postponed until the 21st at Navan Fort Caf© to coincide with the Marconi Day event. On Tuesday there is a shack night and on Saturday MN0VFW will be on the air for two days for International Marconi Day. Contact Brian Burns, MI0TGO, by email to muarc.secretary@yahoo.co.uk.

NEWS FOR SCOTLAND

On Tuesday 16 April Livingston & District Amateur Radio Society is having a club evening. Details from Norman, GM1CNH, on 07740 946 192.

On Thursday 18 April Aberdeen Amateur Radio Society is holding a construction night. Contact Fred Gordon, MM0ODL, on 01975 651 365 for more information.

On Friday 19 April Cockenzie & Port Seton Amateur Radio Club is taking part in the Vulcan Weekend at the Museum of Flight running GB2VEF. More information from Bob, GM4UYZ, on 01875 811 723.

On Friday 19 April West of Scotland Amateur Radio Society has a talk from Derek Kozel AG6PO on Software Defined Radio. He will demonstrate

the use of a £10 USB receiver that covers 24MHz to 1766MHz and compare a variety of software packages capable of decoding a myriad of different voice and data modes. Details from Sam, GM4BGS on 07771 554 035.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast

NEWS FOR THE SOUTH EAST and EAST ANGLIA

On Monday 15 April Farnborough & District Radio Society is running 80m slow speed CW at 1pm on 3.57MHz and a Top Band net on 1.995MHz at 8pm. On Wednesday there is more slow speed CW on 1.995MHz. More information from Neville, G4SPD on 01252 404 816.

On Monday 15 April Felixstowe & District Amateur Radio Society has a talk on 473kHz by Alan, G3NYK. On Saturday the club is at the volunteering festival. More information from Paul, G4YQC, by email to pjw@btinternet.com.

On Tuesday 16 April Bromley & District Amateur Radio Society has a talk on ADS-B. On Saturday 20 it's the Intermediate course. Details from Andy, G4WGZ, on 01689 878 089.

On Wednesday 17 April Norfolk Amateur Radio Club has a talk that deals with questions on VOIP, limited antenna space and talking to amateurs using your computer when Mark, G0LGJ talks about Echolink and D-Star. On Saturday the club is taking part in International Marconi Day. Details from Chris Danby, G0DWV, on 01603 898 678.

On Thursday 18 April Shefford & District Amateur Radio Society visit Bedford School Planetarium and on Saturday it's the club dinner at Stratton House Hotel. Details from John Burnett, 2E0OAK on 07860 804 793.

On Sunday 14 April Basingstoke Amateur Radio Club is looking at Technology in Retail Stores with Bob, M0KER. Details from Tim, G3PJD on 07754 132859,

On Monday 15 April Braintree & District Amateur Radio Society has a visit from the RSGB Regional Manager. For more information contact John, M5AJB, on 01787 460 947.

On Monday Burnham Beeches Radio Club has a talk from Don, G3XTT on how to work DX. Contact Dave, G4XDU, on 01628 625 720 for more information.

On Monday 15 April Maidstone YMCA Amateur Radio Society has a normal club meeting. Details from Ian Hope, 2E0IJH, by e-mail to info@g3trf.org.

On Tuesday 16 April Brede Steam Amateur Radio Society is at the shack. For more information contact Steve, on 01424 720 815.

On Tuesday Stevenage & District Amateur Radio Society has a talk on the kilo as a standard by Martin, G8KDF. Contact Martin Juhe, M0XJP, on 07973 793 770 for more information.

On Tuesday Verulam Amateur Radio Club has a talk by Rod G0IAL and Roger M0RKB on nuts. screws, washers and bolts. Contact Ralph, G1BSZ, on 01923 265 572.

On Wednesday 17 April Chesham & District Amateur Radio Society has a members forum where members can bring along their radio equipment. More details from Terry, G0VFW, on 01442 831 491.

On Wednesday Dover Radio Club is looking at operating from difficult locations with Ian, G3ROO. More information from Pete, M0PKH by e-mail to peter.halloway@sky.com.

On Wednesday Worthing & District Amateur Radio Club has a talk by Mike, G3LHZ, on a small high power, wide band un-tuned loop monopole. Contact John, G8FMJ, on 01273 593 232 for more details.

On Thursday 18 April Bredhurst Receiving and Transmitting Society has a club night. Details from Charles G4VSZ on 07982 244 788.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast On Thursday Colchester Radio Amateurs has a talk on film archives by Vic, 2E0CHX. More information from Kevan, 2E0WMG, on 07766 543 784.

On Thursday Cray Valley Radio Society is holding its AGM. Details from Malcolm Bryan, G8MCA, on 07906 433 965.

On Thursday Horndean & District Amateur Radio Club is having a surplus equipment sale/auction evening. Contact Stuart, G0FYX, on 02392 472 846.

On Thursday Newbury & District Amateur Radio Society is taking part in the 80m Club Championships. Contact Rob, G4LMW, on 01635 862 737 for more information.

On Thursday Sutton & Cheam Radio Society has a talk on the Sun and HF propogation by Dr Colin Forsyth from the Mullard Space Science Laboratory. Details from John, G0BWV on 020 8644 9945.

On Friday 19 April Farnborough & District Radio Society has a 2m net on 144.675MhHz FM at8pm.

On Friday Mid-Sussex Amateur Radio Society has Morse revision with Mike, G3VAK. Details from Mike Mundy, G1TDL, on 01444 246 899.

On Saturday 20 April Chelmsford Amateur Radio Society will be operating GX0MWT from Sandford Mill for International Marconi Day. Contact Martyn, G1EFL, on 01245 469 008.

On Saturday Hastings Electronics and Radio Club has a Spring Auction Sale. Details from Gordon on 01424 431 909.

On Sunday 21 April East Kent Radio Society will be at the Kempton Park Radio Rally. Details from Karl Davies, M1DFM, on 01227 710 120.

On Sunday Radio Society of Harrow will be on the air with GX3EFX/P from Old Redding. More information from Linda, G7RJL on 02083 868 586.

NEWS FOR THE SOUTH WEST

On Monday 15 April Exeter Amateur Radio Society has a Monday HF net on 3.675MHz at 7.45pm. On Tuesday it's the turn of 2m on 145.575MHz at 7.45pm then on Thursday the 4m net is on 70.425MHz at 7pm. Contact Nick, 2E0NRJ, on 01363 775 756.

On Tuesday 16 April Riviera Amateur Radio Club will put MX0RIV on the air. On Wednesday there is a 2m net on 145.425MHz at 8pm. On Friday the club will put G100RSGB on the air. Contact Alan Wyatt, G2DXU, by email to rivieraarc@gmail.com.

On Monday 15 April Weston Super Mare Radio Society is holding a construction and natter night. The on Saturday they are taking part in International Marconi Day on Brean Down with GB0IMD. Details from Paul, G3SDH, on 01761 221 206.

On Thursday 18 April Cornish Radio Amateur Club has cancelled the usual workshop evening. On Friday it is set up for GB4IMD at Perranworthal Church Hall. The station will be on the air on Saturday and dismantled on Sunday. Details from Steve, G7VOH, on 01209 844 939.

On Wednesday 17 April Thornbury & South Gloucestershire Amateur Radio Club has a video night. On Friday there is a 2m net at 8pm. Contact Tony, G0WMB, on 01454 417 048.

Copyright © RSGB 2013. Not for public release before Monday 15 April 2013 except as a GB2RS broadcast On Sunday 14 April Poldhu Amateur Radio Club has a talk by Des Prouse on The future of Goonhilly. Further details from Keith Matthew, G0WYS by e-mail to g0wys@yahoo.co.uk

On Monday 15 April Appledore & District Amateur Radio Club has a talk on integrated data logging for RAYNET by Steve, G6SQX. Contact Brian Jewell, M0BRB, on 01237 473 251 for more information.

On Thursday 18 April Saltash & District Amateur Radio Club is planning to activate the local repeater on VHF and UHF from the club room. Contact Brian, M0BHG, on 01752 844 321.

On Thursday South Bristol Amateur Radio Club has a Cheese and Wine Evening. Details from Andrew Jenner, G7KNA, on 07838 695 471.

On Thursday 18 April Swindon & District Amateur Radio Club has an activity night. Contact Den, M0ACM, on 07810 317 750.

On Thursday 18 April Yeovil Amateur Radio Club is holding its AGM. Details from Rodney Edwards, M0RGE on 01935 825791.

On Friday 19 April Torbay Amateur Radio Society is having a natter night with an 80m net. For more information contact Dave, G6FSP, by email to g6fsp@tars.org.uk.

On Saturday 20 April Plymouth RC is taking part in International Marconi Day from 0001 to 2359UTC . More information from Robert Goodhall on 01752 777888.

On Sunday 21 April Flight Refuelling Amateur Radio Society has a talk on high altitude balloons by Jules G0NZO. Details from John, G4POF by e-mail to g4pof@hotmail.com

NEWS FOR WALES

On Monday 15 April Dragon Amateur Radio Club has a talk on First Aid with Neil Adam, MW6BKS from the Ogwen Valley Mountain Rescue Team. More information from Stewart Rolfe, GW0ETF, on 07833 620 733.

On Tuesday 16 April Carmarthen Amateur Radio Society has an open night. Details from Lloyd, 2W0LLT, on 01239 711 297.

On Tuesday 16 April Wrexham Amateur Radio Society has a talk on my shack. Details from Frank Bailey, M1EYH, by email to fcbailey20@btinternet.com.

//
Small In Size, Big On Power: New Microbatteries A Boost For Electronics:

Posted: 28 Apr 2013 05:01 PM PDT
http://www.eham.net/articles/30102

Though they be but little, they are fierce. The most powerful batteries on the planet are only a few millimeters in size, yet they pack such a punch that a driver could use a cellphone powered by these batteries to jump-start a dead car battery - and then recharge the phone in the blink of an eye. Developed by researchers at the University of Illinois at Urbana-Champaign, the new microbatteries out-power even the best supercapacitors and could drive new applications in radio communications and compact electronics. Led by William P. King, the Bliss Professor of mechanical science and engineering, the researchers published their results in the April 16 issue of Nature Communications.
"This is a whole new way to think about batteries," King said. "A battery can deliver far more power than anybody ever thought. In recent decades, electronics have gotten small. The thinking parts of computers have gotten small. And the battery has lagged far behind. This is a microtechnology that could change all of that. Now the power source is as high-performance as the rest of it." With currently available power sources, users have had to choose between power and energy. For applications that need a lot of power, like broadcasting a radio signal over a long distance, capacitors can release energy very quickly but can only store a small amount. For applications that need a lot of energy, like playing a radio for a long time, fuel cells and batteries can hold a lot of energy but release it or recharge slowly. "There's a sacrifice," said James Pikul, a graduate student and first author of the paper. "If you want high energy you can't get high power; if you want high power it's very difficult to get high energy. But for very interesting applications, especially modern applications, you really need both. That's what our batteries are starting to do. We're really pushing into an area in the energy storage design space that is not currently available with technologies today." The new microbatteries offer both power and energy, and by tweaking the structure a bit, the researchers can tune them over a wide range on the power-versus-energy scale.

4J, Azerbaijan:
4J20RO and 4K20RO are special event calls celebrating 20 years
of the Russian Centre of Science and Culture in Baku. Active till
the year's end, QSLs via 4J6RO. http://en.russia.edu.ru/links/1557/

4X, Israel:
Three FOC members will be active during May for their club's 75th
anniversary with the call 4X75FOC, on all bands on the following
schedule:
1st - 10th of May Daniel, 4X1FC
11th - 20th of May Ami, 4X4DK
21st - 31st of May Mark, 4Z4KX
QSL via 4Z4KX.

5T, Mauritania:
Jean, 5T0JL (ON8RA) joins the FOC jubilee in May as 5T1FOC.
QSL via h/c.

A3, Tonga:
With his recent S21XV expedition behind him, Vadym (UT6UD) will
be active as A35UD from Tongatapu Island (OC-049) between the 1st
and 7th of May. QRV 40-10m in CW, SSB, and RTTY, QSL via h/c.

Masa, JA0RQV is working for the Tongan government and will get
on the air between the 5th and 22nd of May with the call A35JP as
far as his work duties will permit. QRV on 80-10m in CW and SSB.
QSL via h/c.

C9, Mozambique:
Gert, ZS6AYU, will put Mozambique on the air holiday-style between
the 1st and 7th of May as C91GR (QTH Bilene, Gaza Province). QRV
40-10m with 400W and R7000 vertical antenna. QSL via h/c.

DL, Germany:
DA0KOL (special DOK 200KOL) is a special event station QRV during May on HF. QSL via DL4HCF, eQSL.

DR0PALAEON brings attention to the oldest human-made weapons ever discovered in an archaeological exploration near Schoeningen. The discovered spears date back ca. 300000 years. Activity begins 1st of May and will continue till the end of March 2014 (special DOK SPEERE only 16th of May 2013 - 15th of June 2013).
QSL via (B), eQSL.
http://www.palaeon.de/home.html

ES, Estonia:
Mek, SP7VC, and Kate, SQ7OYL, plan on activiating loc. squares KO17ax, KO18aa, and KO07xx, between the 1st and 5th of May as ES0/SP7VC and ES0/SQ7OYL. QRV 160-2m, 70cm, 23cm, 13cm, 6cm, 10GHz, and 24GHz. QSLs via h/c, LotW.
http://www.sp7vc.pl/

F, France:
The radio club of Provins (F6KOP) looks back on 35 years and celebrates its jubilee and the opening of their new facilities with the special event call TM35KOP. QRV between 3rd and 18th of May, 160m - 10GHz. QSL via F6KOP, direct via F5NQL.
http://www.f6kop.com/

The radio club of Pau (F6KDU) will get on the air as TM64PAU in the context of the 72nd Grand Prix Car and the 4th Grand Prix History between the 6th and 21st of May. QSL via F6KDU.
http://f6kdu.wordpress.com/activation-2/tm64pau/

FO, French Polynesia:
Al, KZ3AB, travels on the MV "Paul Gauguin" and will visit Tahiti, Bora Bora, Raiatea, Taha'a, and Moorea between the 3rd and 13th of May. QRV as FO/KZ3AB on 40, 20, 15, and 10m in SSB. QSL via WA3EOP.

FO, French Polynesia, FO/A, Austral Islands:
Yoshi, JJ8DEN/KH0PR, plans activity according to the following schedule on 40-10m with an IC-7000 and an inverted-V, in CW, RTTY, PSK31, and JT65A:
till May 7 Pukapuka Island (OC-062) FO
8th - 15th Raivavae Island (OC-114) FO/A
prefered QRGs:
CW: 7004, 10104, 14004, 18074, 21004, 24894, and 28004 kHz
RTTY: 7034, 10144, 14084, 18104, 21084, 24924, and 28084 kHz
Availability of mains electricity on Pukapuka is limited to 0630-2400 local time. Yoshi hopes for a supply of fuel and a car battery for the rest of the time. QSL via JJ8DEN.

G, England:
GB75FOC and M0RSE join the FOC jubilee (see qrz.com for a list of OPs). QSLs via G3SWH (online request available), LotW.

LY, Lithuania:
Till the 20th of May LY550W celebrates 550 years of city rights for Kaunas. QSL via LY5W.

LZ, Bulgaria:
24th of May commemorates the orthodox Saints Cyrill and Methodius, the developers of the cyrillic alphabet. LZ2013KM will be active the whole month of May. QSL via LZ1BJ, email request via lz1bj[@]yahoo.com, LotW.

OM, Slovakia:
OM60DAT is a special event station in the context of the 60 year anniversary of the Transport Academy in Trencin. QRV May till the end of the year on all bands in CW, SSB, BPSK, and RTTY. QSL via OM4CI (B), eQSL.

Slovakia's telecommunications agency was installed 20 years ago. OM20TUSR will be active in this context. The agency's spokesman, Roman Vavro (OM3TOW), will be QRV 1st of May - 31st of December. QSL via OM3RP.

PA, Netherlands:
Geetruidenberg was granted city rights 800 years ago. Because of that Cor, PA0GTB, Bert, PA1BM, Frank, PA1FM, Bert, PA2TT, and Louis, PA3ATN, will put PA800GTB on the air from now on till the 31st of October. QSL via bureau.

Bob, PA5V, will take part in the FOC activities as PA75FOC, 4th till 31st of May. QSL via h/c.

The "Englandspiel monument" - commemorating the death of 54 Dutch secret agents during a German counter-intelligence operation between 1940 and 1944 - will be the QTH of PA54ES on the 4th of May. QTH is Den Haag, QSL via bureau.
http://en.wikipedia.org/wiki/Englandspiel

On May 5, 1923 the first two-way radio contact took place between the Netherlands (Radio Kootwijk, call: PCG) and their East India territory (Radio Malabar, call: PKX). PI90PCG will operate in that context between the 4th and 28th of May. The Radio Malabar side will be QRV as YE90PK. QSL via bureau.
http://www.pi4vrz.nl/meer/

PY, Brazil:
ZW1CCOM54 celebrates the graduation of the Signal Corps' Academy 54th class. QSL via LotW, eQSL.

SU, Egypt:
A team of Egyptian Operators (Said, SU1SK, Ateff, SU1AO, Ayman, SU1AR and Yasser, SU3YM) is going to Nelson's Island (AF-109) between the 3rd and 10th of May. The particularly small island (350m x 150m) will be activated for the first time. QSL via SM5AQD, direct only.
http://www.qsl.net/eara/ERASDActivieties.html

http://www.facebook.com/events/441478712566533
https://www.facebook.com/erasdnet
http://www.qsl.net/egyptham/

UA, Russia:
The following stations will operate around Russia's Day of Victory in WWII:
RP68L St. Petersburg, Leningrad
RP68M Moscow
RP68MU Murmansk
RP68NR Noworossijsk
RP68S Smolensk
RP68ST Stalingrad
RP68T Tula

UT, Ukraine:
Similarly from the Ukraine:
EM68U Kiev
EN68JK Kertsch
EO68F Odessa
EO68J Sewastopol

V3, Belize:
Furthermore, regarding 75 years of FOC, Joe (V31JP) will join the pile-ups as V3FOC. QSL direct via h/c, LotW.

VE, Canada:
In a similar vein are also operating two special event stations in Canada, VX2X (QSL via VE2AEJ) and XM3X (QSL via VE3HX).

VP2M, Montserrat:
Nao, JN1RVS, will continue to operate till the 3rd of May from Old Towne, Montserrat (NA-103, WLOTA 1475) on 40-10m in CW and RTTY. QSL via JA1HGY, LotW, online log on ClubLog.

VQ9, Chagos:
Jim, ND9M, remains QRV as VQ9JC until July. He also plans to operate as VQ975FOC, and between the 22nd of June and 7th of July as VQ93JC. Since the dismantling of the club station on VQ9 Jim sets up a field-day style station, an FT-897 and a dipole 10m high, for each activity. QSL via ND9M.

XU, Cambodia:
Alex, M6CFW, has received his operating permit as XU7WXA and hopes to be on the air during his job-related visits to Cambodia. QRV on HF in SSB, PSK31, and PSK63 (100W). He also hopes to receive an operating license in Myanmar soon (see also qrz.com). QSL direct via M6CFW. LotW, eQSL.

XZ, Myanmar:
Simon, XZ1K/HS0ZIB, will be QRV again during his spare-time in May and June. From July onwards he will move on to Laos, but hopes for holiday returns to Myanmar. For QSLs see qrz.com.

YA, Afghanistan:
Tim, KB2RLB (ex DA2TF and YI9RLB) will be in Afghanistan for at least one year. He will be QRV as T6TM, mainly on fridays 0400-1300z with an FT-897D and a G5RV in PSK, SSB, and maybe some CW. QSL via KB2RLB.

Mike, T6JP, was due to leave the country on the 25th of April but will be back within two months till August 2014. QSL via KB2OBQ, LotW, eQSL.

YB, Indonesia:
YE90PK, run by the Organisasi Amatir Radio Inonesia (ORARI), YB Land DX Club, and the Bandung Society for Heritage Conservation, will commemorate 90 years of the Radio Malabar station in the south of Bandung. QRV between the 3rd and 5th of May (see also the entry on PI90PCG above). QSL via YB1LZ, OQRS on ClubLog.

YN, Nicaragua:
Luca, IK2PFL, stays in Grenada between the 2nd and 6th of May. He will work as YN/IK2PFL on HF and 6m in CW with 100W and a 3 element quad. Luca is also going to participate in the ARI International DX Contest. QSL via h/c.

Z8, South Sudan:
Olli, OH0XX and Martti, OH2BH, are undertaking a Goodwill mission in Juba to help the authorities with establishing an amateur radio administration. In their free-time they are QRV as Z81X since the 24th of April. The duration of their stay is unknown.
QSL via OH0XX.

FOC Anniversary:
The "First Class CW Operators' Club" (FOC) celebrates its 75th anniversary this year. Additionally to the stations listed above, the following special callsigns will be QRV during May:

Call Manager Call Manager
5B75FOC M0URX K7FOC

01.-07.05. Activity week of the DTC e.V.
04.-05.05. ARI International DX Contest
04.-05.05. DARC VHF-/UHF-Microwave Contest
06.-10.05. VFDB Activity Days

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

Island Activities

AF-003; ZD8; Ascension Island: Bob/G4DBW will stay on Ascension Island
until May 3rd and operate as ZD8RH mostly in CW. His favorite
frequencies are 10105, 14007, 18073, 21007, 24897 and 28007 kHz.
QSL via G4DBW (d/B). LoTW and eQSL after the end of his trip.

AS-073; 9M2; Kelantan/ Terengganu State group: Piju/9M2PJU,
Khairul/9M2KRZ and Rizal/9M2RDX (Members of the "Malaysian Special
Expedition Team") and Jacek/SP5APW plan to be QRV from May 1st to
3rd from Pulau Perhentian Besar (WLOTA 2848) as 9M2SE QRV. Jacek
will stay a few days longer until May 7th and use the callsign
9M2/SP5APW. With two 100W stations and vertical antennas they plan
activities on 40 - 10m in CW, SSB and Digi-Modes. QSL for both calls
via SP5APW (d/B). http://as-073.blogspot.com

EU-002; OH0; Aland Island: Members of the "Radio Club of Lyly Signals
Depot" (OI3V) are going to be QRV as OH0/OI3V from Eckero Island
(OHFF-037) from May 3rd to 5th. They'll be QRV on 80m - 10m in CW,
SSB and Digi-Modes. QSL via OI3V (d/B).

EU-013; GJ/MJ; Jersey: David/ON4DN will operate as MJ/ON4DN/P in holiday style from Jersey from May 6th to 9th. His activities will include lighthouse and GJFF activations. QSL via ON4DN (d/B).

EU-038; PA; Noord Holland/ Friesland/Groningen Province group: Roland/DL1EAL will spend his vacation (May 4th to 15th) On Texel Island. As PA/DL1EAL he'll operate in holiday style on 40 - 10m with 100W and vertical atennas. QSL via DL1EAL (d/B).

EU-042; DL; Schleswig-Holstein State North West group: From May 1st to 4th, Siggi/DL3HBZ, Lothar/DL8HAL, Helge/DF6LPC, Uli/DJ9IE, Benjamin/DB2LS, Steve/DJ7AO and Harry/DL5HAQ will be QRV from Hallig Hooge within "Schleswig-Holsteinisches Wattenmeer" (DLFF-013). They will use the callsigns DL0DFF and DK0RZ. QSL via Buero. Direkt-QSL fuer DL0DFF via DL3HBZ und fuer DK0RZ via DL5HAQ.

EU-064; F; Pays De La Loire Region group (=Dumet, La Calebasse, Le Pilier, Noirmoutier, Yeu): Gil, F4FET, will pay a short two hour visit to Yeu (DIFM AT021) on May 5th signing F4FET/P. QSL via Homecall. http://f4fet.webs.com/

EU-084; SM5/SM0; Uppsala/ Stockholm County group: Mel/SM0MPV will spend some time on Vassaro Island (WW Loc. JP90ig) from May 1st to June 16th. As SM0MPV/5 he'll show up on the HF bands in his free time while taking care of school classes ans youth groups during the camping season. QSL via SM0MPV (d/B).
http://www.ssf.scout.se/stockholm/vassaro/vassaro-in-english/

EU-105; F; Bretagne (Finistere North) Region group: TM3B will be the call sign Geert/ON7USB, Tim/ON5HC, Pat/ON7PQ, Jurgen/ON5MF and Francis/ON8AZ from May 4th to 11th on Ile de Batz (DIFM MA-018). This activity also counts for LH "L'Ile de Batz" (DPLF PB-094, ARLHS FRA-071, TWLHD WLH F-004, WLOTA 0680, WW Loc. IN78xr).
QSL via Buero oder ON8AZ (d).
http://www.eu105.be

EU-115; EI/GI/MI; Ireland: On May 5th / 6th members of the "Ballymena A.R.C." will be QRV from vom Shanes Castle Estate (CASHOTA GI-026, WCA GI-00032, WAB: J18, WW Loc. IO64ur) on the occasion of the "Shanes Castle May Day Steam Rally" signing GN4KPT. Activities are planned on HF in CW and SSB. QSL via MI0RYL (d/B).
http://gi3fff.synthasite.com/

NA-046; W1; Massachusetts State South (Bristol to Barnstable County) group: Members of the "Team HAMCOW" will activate Martha's Vineyard (USi MA005S, WLOTA 2804) for the 20th time between May 2nd and 5th, signing W1ACT/1. The crew consists of Roland/N1JOY, Dave/W2DAN, Bill/KB1G, Don/N1PMB, Paul/KE1LI, Mike/KB1TWA and Bob/KB1JBC.
A participation in the New England QSO Party is planned.
QSL via N1JOY. http://hamcow.net/

OC-005; VK9; Norfolk Island: Headed by Chris/VK3QB, a team of ten Australian hams plans to activate Norfolk Island (VKFF-392, WLOTA 1469) from May 3rd to 13th. Using the callsign VK9NT they will be

QRV from 80 - 10m in SSB, CW and RTTY. OQRS is available via
Clublog, LotW upload after the DXpedition. Paper cards can also
be requested via VK2CA (d/B). http://vk9nt.odxg.org

OC-013; E5; Rarotonga Island: Tony/ZL2AGY plans a three week activity
as E51AGY from Rarotonga starting May 7th. His CW activities in
holiday style will include a participation in the CQ WPX CW.
QSL via ZL2AGY (d/B).

Another activity from Roratonga will be E51AAO by Bruce/ZL1AAO.
He'll be QRV in SSB only from May 3rd to 14th on 40m - 10m.
QSL via LoTW and ZL1AAO (d/B).

OC-086; KH0; Northern Mariana Islands: Nick/JL1UTS (KH0TH) and
Chieko/7L3PFH (KH0TG) are QRV from Saipan Island (USi NI002S,
WLOTA 1333) from May 2nd to 5th on HF. QSL via Homecall (d/B).

WWFF Activities
==========
WWFF websites (part 6):
OKFF: http://www.okff.cz/
URFF: http://wff44.org.ua/?paged=2

General information:
ARI Mondovi provides a list of current WWFF areas which can be
downloaded at:
http://www.dcia.it/iffa/index.php/downloads/category/5-worldwide-flora-fauna

GFF-259 - Lincolnshire Wolds Area
On May 5th, Piotr/M0MNV will be M0MNV/m or /p from GFF-259. He
plans to start in the morning and depending on battery life
and weather conditions stay on the air thoughout the afternoon.
QSL via M0MNV (d/B)

URFF-Krim URFF-Expedition
Eugene/UV5EVZ and Eugene/UW5EFU will repeat heir traditional Krim
tour once again and activate the following areas:
01.05. URFF-093 Mountain Karst Crimea
02.05. URFF-108 Demerdzhi
03.05. URFF-104 Chatyr-Dag Yayla
04.05. URFF-085 Aiya-Baidarskyi NP
05.05. URFF-132 (NEW ONE)
06.05. URFF-129 (NEW ONE)
07.05. URFF-121 (NEW ONE)
08.05. URFF-128 (NEW ONE)
The list above reflects the current plan which may change
depending on the weather conditions. The focus will be on
20m and 40m in SSB. QSL via Homecall (d/B). http://uv5evz.at.ua/

URFF-070 - Naturpark Dnepr-Teterivska
From May 1st to 3rd the traditional ham radio spring festival
"GreenFest-2013" will take place in "Dnepr-Teterivska" (URFF-070).
Two stations, EM44U and EO5UFF, will be on the air during the

event. QSL for EM44U via UT7UT (d/B), EO5UFF direct via US5UFF.

URFF-112 - Tokovsky Geological Reserve
Roman/UT5ERP and Sergey/US5ERQ will activate URFF-112 QRV on
May 2nd/3rd. They'll be QRV from 80m - 10m in SSB and digital
modes. QSL via Homecall (d/B)

URFF-116 - Velikoanadolsky
Members of the club station UT4IYZ will activate Velikoanadolsky
(URFF-116) on May 3rd to 5th. They will sign UT4IYZ on HF and
VHF in SSB, CW and digital modes. QSL via UT5IH (d/B).

Timaru Herald
Sweet sound of ham radio
Timaru Herald
He switched on the ham transmitter, and "back came a fellow old timer reliving our young days". Mr Boorer has been a radio amateur for around 60 years, studying it at the former Timaru Technical College. His gear was "fairly ancient" but worked fine ...

Dayton Hamvention 2013 Free Services

Posted: 28 Apr 2013 04:25 PM PDT
http://forums.qrz.com/showthread.php?389374-Dayton-Hamvention-2013-Free-Services&goto=newpost

Unfortunately I will be unable to perform any service at the upcoming
Dayton Hamvention that involves testing

electronic gear of any kind.I have recently been advised by a fellow ham
who happens to be an attorney that since I am not licensed, bonded, or
insured that I would be putting myself at great risk of liability exposure.
He also mentioned that I could also be in violation of Ohio State law.

Having said that I will not be offering any services at FW3976 or FW3977
that involves testing electronic gear

in any way, shape, or form. I will still maintain a free advertising board
(forsale or looking to buy) and free

paging on 2 meters on 147.525 mhz.

This has dealt me a serious emotional blow as I was so looking forward to
doing all these things.

I do hope everyone understands my dilemma.

If you come to the Dayton Hamvention please stop by and say Hi.

I sincerely apologize to all that were counting on these services.

RAC completes review of Amateur Radio Exam questions

Posted: 29 Apr 2013 12:48 PM PDT
http://forums.qrz.com/showthread.php?389499-RAC-completes-review-of-Amateur-Radio-Exam-questions&goto=newpost

RAC completes review of Amateur Radio Exam questions

On April 17th 2013, Radio Amateurs of Canada (RAC) submitted
the final documents called for in the contract it won to review the
question banks used for exams for the Basic and Advanced certification of
Canadian radio amateurs.

Industry Canada had issued a request for proposals to undertake
the review in December 2012. RAC engaged RAQI to collaborate on the French
language component of the work and submitted a response to the proposal.
The $20,000 contract was awarded to RAC late in January.

The first phase of the contract, completed on March 13,
consisted of a complete review of all the questions and answers used for
amateur radio certification in Canada. At the end of this phase RAC
delivered a comprehensive set of recommendations to improve and modernize
the question banks. In most cases this involved detailed editing of
existing questions but proposals were also made to delete or replace
obsolete or inaccurate questions and add questions on aspects of amateur
radio that had grown in importance since the last review.

The review concentrated on the accuracy and clarity of the
questions and answers and recommended changes where required to eliminate
possible confusion over the correct answer to each question. Some errors
were easy to identify such as typing mistakes showing an obviously
incorrect answer as correct. Others, particularly related to ensuring that
all incorrect answers were truly incorrect, required more careful study.
The review team took special care in comparing questions in both languages
so that the English and French versions conveyed the same information.

Clear, accurate and understandable exam questions are an
important element in making amateur radio accessible to all Canadians. RAC
sees an up to date and well functioning exam system as an important
element in bringing more people into amateur radio to ensure its
continuation and growth, a priority objective of the national organization.

On April 4th, Industry Canada officials kicked off phase 2 of the project by providing a preliminary reaction to the RAC recommendations made in phase 1. Over the next 13 days the RAC-RAQI team reviewed the Industry Canada comments and where appropriate provided additional comments and recommendations.

The first phase had identified most areas of needed change and as a result the Phase Two report contained a significantly smaller set of recommendations. Industry Canada will make the final decision on changes to the questions after considering the RAC Phase 2 report. However the exchange of comments so far suggests that the RAC review will lead to a significant improvement and updating of the question banks.

RAC understands the importance of amateur radio courses and educational material developed and delivered by dedicated volunteers across the country. Changes in the question banks can lead to increased work by these volunteers and the Review Team worked to propose changes in ways that will minimize the updating. Many questions will remain as they were before the review. When proposing deleting obsolete questions the Team recommended replacement questions so that question numbering of the unchanged questions would not have to be changed.

RAC is already planning for the transition. Once Industry Canada makes public the updated questions banks, we will prepare information identifying where changes have been made to assist instructors in modifying their course materials and examiners in preparing for the change. As has been mentioned in previous bulletins, the curriculum has not been changed. The topics addressed in the exams and consequently in courses and educational material remain the same. The changed questions will assess the knowledge of these same topics but should be clearer, more accurate, more understandable and relevant to modern amateur radio.

RAQI has been an excellent partner in this project and all francophones should immediately see the vast improvement in the French language questions when the new questions banks are approved and made public.

A great deal of effort has gone into the review and we are happy that it is being received well. RAC will continue to work with Industry Canada through existing consultative arrangements to provide Canadian radio amateurs with the best possible circumstances to pursue their hobby. As well, based on the success of this project, RAC looks forward to competing for contracts on significant projects related to amateur radio if the opportunity presents itself in the future.

For more information contact Glenn MacDonell, Project Manager,

Question Bank Update Project and Deputy Director Ontario North East, (ve3xra@rac.ca).

USS Wisconsin Radio Club On the Air in December

Posted: 29 Apr 2013 04:08 PM PDT
http://forums.qrz.com/showthread.php?389519-USS-Wisconsin-Radio-Club-On-the-Air-in-December&goto=newpost

December 7th 1941, the attack on Pearl Harbor pulled the United States
right into the war! This year the USS Wisconsin wants to help you remember
this event by operating a Special Event station from the decks of the USS
Wisconsin in Norfolk, VA. We will operate December 7th (Saturday) from
10AM EST to 4:30PM EST and December 8th (Sunday) from Noon EST to 4:30PM
EST.

You should find us on 40m on or around 7.264 Mhz

You should also find us on 20m on or around 14.264 MHz

We offer a great card with a picture of the USS Wisconsin (BB 64) for your
efforts!

//

http://forums.qrz.com/showthread.php?389517-USS-Wisconsin-Participates-in-Museum-Ships-on-the-Air-2013&goto=newpost

Again this year the USS Wisconsin Radio Club will participate again with the USS New Jersey as part of the Museum Ships on the Air 2013 Special Event. The event will run, for us, from 10AM EST to 4:30PM EST on Saturday, June 1st followed on Sunday, June 2nd with operations from 10AM EST to 4:30PM EST. Our operating hours are determined by the Nauticus Museum operating hours.

As always, we will operate on 40m around 7.264 MHz and 20m on or about 14.264 MHz. These frequencies may vary due to interference and other conditions out of our control but you will find us close to these frequencies.

Come join us, we are expecting over 100 museum ships this year, inproving your chance to get the certificate. More information can be found on http://n4wis.org/n4wis/index.php?page=special-events or http://www.nj2bb.org/museum/

Sweet Sound of Ham Radio:

Posted: 29 Apr 2013 05:01 PM PDT
http://www.eham.net/articles/30107

Enthusiasts re-discover "the magic band" -- Timaru radio enthusiast George Boorer is thrilled with the national switchover to digital television. It means after 40 years he can head back out to his "radio shack" and tap into the six-metre international amateur band, otherwise known as "the magic band". "We were off that when they started up the TV2 channel there at Studholme, [so] all the New Zealand radio amateurs that used that frequency were closed down," he said yesterday. But with the whole of the South Island switching to digital television on April 28, Mr Boorer was ready and waiting to jump back on. He was prepared, making sure he got his special permit. Early on Sunday morning Mr Boorer had his gear on "full steam", and tuned in. At first it was the "horrendous noise from channel one" which had blocked the band. "At 2am the ruddy noise is still going, then three minutes past the hour the noise all stopped. Nothing but the sweet sound of silence," Mr Boorer said. He switched on the ham transmitter, and "back came a fellow old timer reliving our young days". Mr Boorer has been a radio amateur for around 60 years, studying it at the former Timaru Technical College. His gear was "fairly ancient" but worked fine. He was thrilled at the return of the six-metre band. "It means a lot to me. We've got it back again and it belongs to the amateurs again."

//
The Power of Ham Radio:

Posted: 29 Apr 2013 05:01 PM PDT
http://www.eham.net/articles/30106

LEWISTON -- Ham radio can be more than a fun hobby, Lewiston-Auburn eighth-graders were told April 23. It can be a way to make international friends, fight terrorism and even boost a job resume. .As students waited to make contact with the International Space Station through ham radio operators, they listened to Dave Taylor, technical adviser for the American Radio Relay League.
Tragedies such as the April 15 Boston Marathon bombing can be countered with more one-on-one international friendships through ham radio, he said. "You are the folks who can change the world," he said. How? "By making friends, talking with people in different lands, finding out about their culture. That puts us in a position we can better understand the

differences."

//
Hurricane Watch Net Seeks Control Ops:

Posted: 29 Apr 2013 04:51 PM PDT
http://www.eham.net/articles/30105

With the 2013 hurricane season rapidly approaching, the Hurricane Watch Net is preparing for what could be a very active storm season. Earlier this month, the Tropical Meteorology Project at Colorado State University headed by Dr. Gray and Philip Klotzbach, posted an article in which they are forecasting 18 named storms, 9 of which to become hurricanes with 4 of those to become major hurricanes (Cat 3 or higher) for the Tropical Atlantic Basin. They will issue an update in June and again in August.

Hamvention Live internet broadcast.

Posted: 30 Apr 2013 01:16 PM PDT
http://forums.qrz.com/showthread.php?389618-Hamvention-Live-internet-broadcast&goto=newpost

Its time again for the W5KUB.com world wide broadcast of Hamvention. This is our 11th year to broadcast.

After 34 years outside in the fleamarket, W5KUB.COM had moved inside the building for Hamvention. Space SA302.

Our live broadcast begins on Wed May 15th at 8:00 AM Central time as we broadcast the 550 Mile drive from Memphis to

Dayton live. The broadcast will be up Thurs as we show various vendors setting up. Then the show Friday- Sunday.

As in the past, we will be giving out thousands of dollars of ham prizes to our viewers. Join in on the fun at W5KUB.Com chat room

and talk directly to us or other hams around the world. Last year we have 47,300 viewers follow us during this trip.

See you soon when the fun starts. Tom W5KUB

Hurricane Watch Net Seeks Net Control Operators

Posted: 29 Apr 2013 04:24 PM PDT
http://forums.qrz.com/showthread.php?389520-Hurricane-Watch-Net-Seeks-Net-Control-Operators&goto=newpost

With the 2013 hurricane season rapidly approaching, the Hurricane Watch Net is preparing for what could be a very active storm season. Earlier this month, the Tropical Meteorology Project at Colorado State University headed by Dr. Gray and Philip Klotzbach, posted an article in which they are forecasting 18 named storms, 9 of which to become hurricanes with 4 of those to become major hurricanes (Cat 3 or higher) for the Tropical Atlantic Basin. They will issue an update in June and again in August.

HWN is always looking for well qualified, experienced net control operators who can effectively communicate with hurricane prone areas. We are especially looking for bilingual operators as we recognize that some Latin American operators hesitate to check-in and send reports to us if they aren't fluent in English.

The Hurricane Watch Net relies on volunteer operators ☐ our members ☐ who serve as our net control stations. These volunteers are hams who have above-average stations and are willing to commit their time to operating in support of the HWN☐s mission during Net activations. These Net sessions can be long, and, at times, very stressful.

With the current solar activity, we are interested in finding more members who can help with Net Control Station duties on the low end of the 40 meter phone band as we continue to broaden our focus from only operating on 14.325 MHz

If you are interested in becoming an HWN net control operator, click on the following link to apply: http://hwn.org/about-us/membership-info.html. Please be sure to carefully read all the requirements before proceeding with your application.

As a reminder, the Hurricane Watch Net is generally activated when an Atlantic basin hurricane is within 300 miles of landfall or at the request of the National Hurricane Center. Although the ☐Official☐ Hurricane season for the Atlantic and Caribbean runs from June 1☐November 30, usually peaking from late August through September; the Pacific Ocean season runs from May 15☐November 30, hurricanes may occur at any time of the year.

It is interesting to note that seven and a half years have passed since Hurricane Wilma came ashore with 125 mph winds (Cat. 3) near Naples, FL. ☐ the longest period the nation has gone without a hit from a major hurricane since the government began keeping records in 1851.

The last category 5 hurricane to hit the U.S. was Andrew which made landfall on Elliott Key, FL and later in Homestead on August 24, 1992.The last category 5 hurricane to make landfall in the Atlantic basin was Felix which made landfall on September 4, 2007 just south of the border between Nicaragua and Honduras, in the Mosquito Coast region, with 160 mph winds.

Let☐s pray for a quiet season.

Kind Regards,

Bobby Graves ☐ KB5HAV

HWN Net Manager

Hamvention special Live internet Broadcast

Posted: 30 Apr 2013 01:18 PM PDT
http://forums.qrz.com/showthread.php?389620-Hamvention-special-Live-internet-Broadcast&goto=newpost

Its time again for the W5KUB.com world wide broadcast of Hamvention. This
is our 11th year to broadcast.

After 34 years outside in the fleamarket, W5KUB.COM had moved inside the
building for Hamvention. Space SA302.

Our live broadcast begins on Wed May 15th at 8:00 AM Central time as we broadcast the 550 Mile drive from Memphis to

Dayton live. The broadcast will be up Thurs as we show various vendors setting up. Then the show Friday- Sunday.

As in the past, we will be giving out thousands of dollars of ham prizes to our viewers. Join in on the fun at W5KUB.Com chat room

and talk directly to us or other hams around the world. Last year we have 47,300 viewers follow us during this trip.

See you soon when the fun starts. Tom W5KUB

WWII Veteran Hits the Airwaves to Keep in Touch with Friends:

Posted: 30 Apr 2013 05:11 PM PDT
http://www.eham.net/articles/30111

GYMPIE Second World War veteran Allan Booth has a box full of friends right at his fingertips. The war veteran, 90, is an avid member of the Gympie Amateur Radio Group and has the complete set-up in his room at Gympie's St Patrick's Villa Nursing Home. Mr Booth, who is blind, may be vision impaired but his fingertips tiptoe around his radio equipment with complete ease. The amateur radio hobbyist specialises in morse code in addition to using the hand-held microphone during his transmissions. Morse code has a special place in Mr Booth's heart as he used the groundbreaking method of communication during the Second World War as a member of the Royal Australian Air Force. "I used morse code in the air force during the war and it's great to keep it alive," he said. "I like using the radio because it's about making friends and you never know who you are going to talk to."

//
Edna 'Eddy' Thorson, Role Model and Ham Radio Operator, N0YL (SK):

Posted: 30 Apr 2013 05:11 PM PDT
http://www.eham.net/articles/30110

Edna "Eddy" Thorson pioneered the use of amateur radios by people with disabilities -- just one of her many accomplishments despite having muscular dystrophy. Thorson, who died April 13 at age 75, was known as a role model, including as the first "Handiham" at the Courage Center in Minneapolis. Handiham is now a worldwide program that enables those with disabilities to learn amateur radio and technology skills.

NZART Headquarters Infoline Issue 272

3 May 2013

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Notes

· 70cm Band Plan Review update

· Jock White Field Day Report enclosed and attached

· Special Event EA3DBE

· 80m Phone Trans-Tasman Contest 11th May

Debby says…Getting ever so close to conference now, and sadly I have had only one response from branches re awards and recognising members of branches for their service to amateur radio, in the community and nationwide. I fear we are at risk of losing any sponsorship that we have carefully negotiated for just such events.

This is the last opportunity you have this year of nominating any person for the awards I have previously advised, in HQ Info-line and your branch circular.

I will be away on the 16/17 May as I have been generously offered by Tait Mobile Communications to attend the RFUANZ conference to be held here at Te Papa. I am not exactly sure how this may benefit you as members of the Association, but having seen the conference agenda, there are people who will be there that I have dealt or continue to deal with in my role here.

Perhaps understanding what they do in the commercial industry may help you also, I dare-say time will tell.

This said, the next issue of HQ Info-line is due out on the 17th May, so please send any articles you wish to have included early, so I can prepare this and send out to you.

Talk soon…ZL2DL

FMTAG NOTES FOR HQ INFOLINE 272

PROPOSALS

ZL2WHO has applied for a beacon at Waipuna, located at TOPO50 BJ33 890.46 298.11. The transmit frequency will be 432.271 MHz. This beacon will be co-located with existing beacons on 50.024 MHz and 144.271 MHz.

FINAL RECOMMENDATIONS TO NZART COUNCIL

None this time.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

70 cm Band Plan Review

Submissions on the 70 cm band plan have closed.

I want to thank those 27 hams who placed a submission or supported other hams. In addition I would like to thank the 3 Branches that also took the time to prepare a submission.

Once analysed, and as soon as practical, we will be putting out a proposed band plan for you to offer any final comments on.

Phil King ZL1PK

Chairman 70 cm Band Plan Review Group

80M PHONE TRANS-TASMAN CONTEST: 11 MAY, 8PM-2AM

The popular 80m phone Trans-Tasman contest is coming around again, and will be held on Saturday 11th of May 2013, from 8pm to 2am NZST. As usual your best 5 hours of the 6 count toward the final result.

Contact as many ZL's and VK's as you can each hour on 80m SSB. Bonus points for QRP, and for each group of 5 different call areas. Full rules and last years results are on the WIA contest pages:

http://www.wia.org.au/members/contests/transtasman/ [8]

The contest logging software VKCL has been updated to cover the latest revision of the rules. VKCL can be downloaded here:

http://www.mnds.com.au/vkcl/ [9]

This is always a great night of contesting, not too long or too serious, but there's enough activity and challenge for an enjoyable evening. For extra fun many stations go portable with simple wire antennas.

160M PHONE & 80/160M CW & DIGITAL TRANS-TASMAN CONTEST: 20 JULY, 8PM-2AM

The 160m phone contest in July is always popular with 160m enthusiasts, and is a great chance to have a go on the band, or to go portable with simple antennas.

The Trans-Tasman CW and Digital contests are held on the same night. They can be entered separately or combined with 160m phone to compete in the multi-mode category. This is a great opportunity for clubs and other multi-op stations to work both bands and all modes with 2 transmitters. CW scores double points this year!

Rules and results on the WIA page above.

Rob, ZL3AKM
Contest Manager

2013 Jock White Field Day Report

The weather was excellent over the entire country this year which made for an more enjoyable weekend.

Thanks as usual to all of you that participated, with the same number of field stations there was more activity (4 more branch points than last year for the same number of stations: 35) on 40m than last year which is great to see.

For some reason there were no CW only or overseas entrants, the latter would be explained by the reduced VK activity this year.

The Northern and Central regions first and second place getters swapped positions this year. Napier and South Taranaki were very close in contacts but somehow South Taranaki missed two branch points on 80 which sealed their fate.

Propagation on 80 was better than has been for a while, 40 performed well but with deep QSB on Sunday and the usual dead loss for the first hour or two on the Sunday morning.

With even the ‘big gun’ stations making five contacts or
less each for the first hour on 40m on Sunday morning one wonders if we should start 40 at 0700? This has been the situation for a number of years with poor propagation first thing written off by over the horizon radar.

Interest seems to be fading in the single station 80/40 section I will watch this over the next year or so and see how things go.

>From my own listening I think there were less poor quality signals around, I only noted one station that was probably running low on ‘volts’. Your average solid state HF transceiver likes
to be well fed: keep DC lead resistance low, batteries in good shape and you could consider a DC-DC booster, MFJ have one available.

There are always a few Elecraft kitset transceivers out there, but this year we heard a more basic QRP SSB kit (MKARS 80) on the air from

Stewart near Nelson.

A few branches made their first appearance for many years: Far North Districts, Tararua (ZL2AJ as a single operator) and Reefton-Buller (ZL3DAC as a single operator).

Claiming branch points (multipliers)

I understand that when you are scoring your entry and filling in summary sheets many of you are hesitant to claim a callsign for branch number that you fear may not be valid. Each year there are a few stations that appear for a short period, make a few contacts giving out a branch number and then vanish, not achieving the minimum 20 CW or 50 phone contacts on a particular mode/band. Some of these will be obvious to you, others not.

My suggestion is that you go ahead and claim them anyway, I check every summary sheet and have to make corrections every year, it’s not an issue for me.

Contacts needed to become a valid branch point (repeated from last year)

Note that 20 contacts are needed to achieve this on CW for field stations and 50 on phone. These numbers are required as too few contacts mean many teams miss out on the chance to gain that branch point.

It is getting tiresome seeing the same branches year after year coming on and ‘giving out a few contacts’ then going QRT.

Those contacts are of no use, I remove them from the raw data when I calculate the final scores.

Field Stations not submitting logs

There were three stations this year that failed to do so, one achieved the minimum number of contacts the others did not. To find this out requires me to troll through submitted logs to work this out and is a complete waste of my time. It also prolongs the time my family loses partial or complete use of the dining table!

If you operated as a field station you make my day by submitting a log, and vice-versa!

Home stations not valid as branch points

Please note that you cannot claim branch zero

Correct use of Summary Sheets

Another annual problem. Download the sheets and use them to do your scoring. It makes my job much easier, please note this includes sheets two and three for listing callsigns claimed for each branch.

If there is any confusion feel free to email me.

Team Comments

Great contest, 40’ pole broke in half, ‘someone’
forgot to tighten the bolts! Great family weekend and BBQ, nothing burnt
this year

Operators well behaved

A very successful club event in glorious weather

My CW is still @$#%, who is at branch ** (deleted but in Taranaki!) that
insists on sending at 25 plus WPM!?

80 metres performed more consistently well throughout the contest than
in previous years

Less VKs than in previous years

Late starting on Sunday morning “they said the generator would
not start!!!”

Thank you for a good experience

As we lost one of our team members to the ZL@%$ team, we should get a
percentage of their points!

Full marks to those that dusted off neglected Morse keys and had a go

Deep fading on 40m on Sunday

Supported by a local tractor driver/dairy farmer

Aussie DX poor this year?

Lack of operators this year

Band conditions good, stations just weren’t there

Statistics

35 Field stations (same as 2012) with 169 operators

Log format (field stations): 26 paper based, 9 electronic

6 Home station entries

Valid Multipliers

Total of 94, maximum available to a field station is 90 (you
can’t claim your own branch point) although a home station could
claim this many if

80m phone (total 34)

02 03 05 06 08 10 12 18 20 22 24 25 26 27 28 29 30 34 37 40 50 53 56 58
61 62 63 64 68 69 77 86 87 88

80m CW (total 17)

02 02 05 12 22 24 25 27 28 30 53 56 69 77 86 87 88

40m phone (total 28)

02 03 05 06 08 10 12 18 20 22 25 28 29 30 37 40 56 58 61 62 63 64 68 77
78 86 87 88

40m CW (total 15)

02 03 05 12 22 25 27 28 30 37 56 77 78 87 88

Invalid Multipliers (insufficient contacts made)

80m phone: 13 41

80m CW: 18 29 37 40 41

40m phone: 27 41

40m CW: 29 40 41 86

Check Logs

Special Event EA3DBE

Members of a local section of URE in Tarragona together with the RADIO
CLUB DEL TARRAGONES will activate this special callsign EA3DBE from 13
to 26 of May.

>From the above dates, a large number of exhibitions, workshops and
conferences how to visitors of Tarraco, one of the most magnificent
cities at the time of the Roman Empire. These events take place at Roman
monument sites such as the old city walls, the circus, amphitheatre and
aqueduct.

In these spectacular settings, different groups give demonstrations of
how competitions of gladiators and equine sports took place, or what
different aspects of daily life were like in a Roman city.

For more info in http://www.tarracoviva.com

EA3BDE Secretary of URE SL Tarragona

==> + FCC NEWS: PRESIDENT OBAMA NOMINATES FINANCIER AND FORMER TELECOM
EXECUTIVE TOM WHEELER AS FCC CHAIRMAN

On Wednesday, May 1, President Barack Obama announced that he
nominated Tom Wheeler to be the new Chairman of the Federal
Communications Commission. If the Senate confirms the nomination,
Wheeler will replace Julius Genachowski who announced his resignation
from the FCC in March. Pending Wheeler's confirmation, FCC Commissioner
```

Mignon Clyburn -- the agency's soon-to-be senior Democrat -- will serve as the Commission's acting chairman.

Wheeler, 67, has served as an informal adviser to Obama in recent years and has been a major fundraiser for his political campaigns. He has a background as a venture capitalist and as a lobbyist for the communications industry. He is the former President of the National Cable Television Association (now known as National Cable & Telecommunications Association) and former Chief Executive Officer of the Cellular Telecommunications & Internet Association. Currently, he is a Managing Director at Core Capital Partners, a venture capital firm in Washington, DC. Read more <http://www.arrl.org/news/president-obama-nominates-financier-and-former-telecom-executive-tom-wheeler-as-fcc-chairman>.

==> + DAYTON HAMVENTION�: DX ACTIVITIES FEATURED AT ARRL EXPO AT THE 2013 DAYTON HAMVENTION

The ARRL will present a variety of DX activities as part of the ARRL EXPO -- the ARRL's "show within a show" at the 2013 Dayton Hamvention, to be held May 17-19 at Hara Arena, near Dayton, Ohio. Activities will include DXCC card checking and the opportunity to drop off QSL cards for the ARRL Outgoing QSL Bureau, as well as to apply for awards, such as the IARU Worked All Continents Award, the IARU Region 3 Operating Award and several awards administered by the Japan Amateur Radio League. In addition, representatives from the International Amateur Radio Union and several IARU Member Societies will be on hand within the EXPO area. Read more <http://www.arrl.org/news/dx-activities-featured-at-arrl-expo-at-the-2013-dayton-hamvention>.

==> + ON THE AIR: ANNUAL ARMED FORCES DAY CROSSBAND TEST SCHEDULED FOR MAY 11

In celebration of the 63rd anniversary of Armed Forces Day (AFD), the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test. Although Armed Forces Day is traditionally celebrated on the third Saturday in May -- May 18 in 2013 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 11 to prevent conflict with the Dayton Hamvention�, scheduled for May 17-19. The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to stations making contact with the military stations. Read more <http://www.arrl.org/news/annual-armed-forces-day-crossband-test-scheduled-for-may-11>.

==> + HURRICANE WATCH NET SEEKS NEW MEMBERS FOR NET CONTROL STATIONS

With the 2013 hurricane season approaching, the National Hurricane Center (NHC) in Miami and the Hurricane Watch Net (HWN) are gearing up for what could be a very active storm season. In preparation for the upcoming season, the HWN is currently seeking new members who can serve as net control stations. The HWN provides on-the-ground, real-time weather data from Amateur Radio operators who volunteer their time to monitor their calibrated home weather stations. The stations report that data to the HWN, who in turn reports it to WX4NHC, the Amateur Radio station at the NHC. "The Hurricane Watch Net relies on volunteer operators -- our members -- who serve as our net control stations," HWN Net Manager Bobby Graves, KB5HAV, told the ARRL. "HWN members are hams who have above-average stations, are capable of effectively conducting HF net operations and are willing to commit their time to operating in support of the HWN's mission during net activations." Read more <http://www.arrl.org/news/hurricane-watch-net-seeks-new-members-for-net-control-stations>.

==> LOGBOOK OF THE WORLD TO UNDERGO SCHEDULED MAINTENANCE

Logbook of The World (LoTW <http://www.arrl.org/logbook-of-the-world>), the ARRL's online QSO confirmation system, will undergo scheduled maintenance on Thursday, May 2 at 5 PM (2100 UTC); this should last approximately three hours. LoTW will be offline and unavailable during this time. Thank you for your patience.

==> ARRL IN ACTION: WHAT HAVE WE BEEN UP TO LATELY?

This feature is a concise monthly update of some of the things that the ARRL is doing on behalf of its members. This installment -- which covers the month of April -- takes a look at the FCC's denial of an ARRL Petition concerning BPL, the ARRL's meeting with FEMA Administrator Craig Fugate, KK4INZ, World Radio Day, upcoming conferences, updates from the ARRL Development Office, reports from the Official Observer Desk and more. Read more <http://www.arrl.org/news/arrl-in-action-what-have-we-been-up-to-lately-57>.

==> CELEBRATE 75 YEARS OF W1AW WITH COMMEMORATIVE GEAR

W1AW, the Hiram Percy Maxim Memorial Station, is celebrating its 75th anniversary this year, and what better way to show your support of Amateur Radio's flagship station than by sporting W1AW commemorative gear! The ARRL is pleased to present a limited edition T-shirt, pin and challenge coin to mark this milestone. Your purchase helps support W1AW -- $5 from every shirt purchased and 100 percent of the key chain and pin proceeds go directly to the W1AW Endowment Fund. Read more <http://www.arrl.org/news/celebrate-75-years-of-w1aw-with-commemorative-gear>.

==> SUPPORT ARRL: ATTENTION FEDERAL EMPLOYEES -- ARRL APPROVED FOR 2013 COMBINED FEDERAL CAMPAIGN!

Since 2001, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC), the annual giving campaign for federal employees. In that time, this campaign for

civilian employees of the federal government, US Postal Service workers and members of the military has generated almost $220,000 for ARRL programs. The CFC provides federal employees with an easy way to support the ARRL's effort to represent its members and all radio amateurs.

The CFC encourages individuals employed in all branches of the federal government to pledge by payroll deduction to the non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support the ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching the ARRL's ability to serve its members and all of Amateur Radio. Read more <http://www.arrl.org/news/attention-federal-employees-arrl-approved-for-2013-combined-federal-campaign>.

==> SEATTLE WILL HOST THE 32ND DIGITAL COMMUNICATIONS CONFERENCE

Digital communications enthusiasts will be heading to the Pacific Northwest this autumn for the 32nd annual ARRL/TAPR Digital Communications Conference (DCC), September 20-22, at Cedarbrook Lodge near Seattle, Washington. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications. The DCC is for all levels of technical experience -- not just the expert. Introductory sessions are scheduled throughout the conference to introduce new technical topics for both beginners and experts. Read more <http://www.arrl.org/news/seattle-will-host-the-32nd-digital-communications-conference>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Solar activity made a healthy jump over the past week, with the average daily sunspot numbers up over 30 points to 120.9, while the average daily solar flux increased more than 27 points to 136.5. The most active day for geomagnetic indices was May 1, when the planetary A index reached 21 and the high-latitude College A index (measured near Fairbanks, Alaska) was a whopping 57. That number has been higher, but only twice in the past six months, when it was 64 on March 1 and 79 on March 17. The latest forecast has the solar flux at 165 and 170 on May 2-3, 165 on May 4-5, 160 on May 6-7, 165 on May 8-9, 125 on May 10-11, 120 on May 12, 125 on May 13-15, 120 on May 16-17, and 125, 120, and 130 on May 18-20, and rising to 135 on May 21-22. The predicted planetary A index is 12 and 8 on May 2-3, 5 on May 4-20, then 15, 10 and 15 on May 21-23, and then down to 5 for at least the following three weeks. On May 1, NASA released a new solar cycle prediction, but it wasn't really new. These arrive at the start of

every month, and have remained the same since March 1 when NASA's prediction for the smoothed International Sunspot Number at the cycle peak shifted from 69 to 66 for fall 2013. Look for more information on the ARRL website on Friday, May 3. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL RECOGNIZES: GEORGE WALLNER, AA7JV, WINS APRIL QST COVER PLAQUE AWARD

The winner of the April QST Cover Plaque Award is Gerorge Wallner, AA7JV, for his article "The Garden Beam <http://www.nxtbook.com/nxtbooks/arrl/qst_201304/index.php#/36>." Congratulations George! The QST Cover Plaque Award -- given to the author or authors of the most popular article in each issue -- is determined by a vote of ARRL members on the QST Cover Plaque Poll web page <http://www.arrl.org/cover-plaque-poll>. Cast a ballot for your favorite article in the May issue today.

==> + SILENT KEY: HAM RADIO EDITOR AND NOTED DXER JOE SCHROEDER, W9JUV (SK)

Joseph J. Schroeder Jr, W9JUV, of Glenview, Illinois, passed away Tuesday, April 30. He was 83. An ARRL Life Member, Schroeder was on the editorial staff for Ham Radio magazine from August 1974-July 1990, penning almost 400 articles that ran the gamut from FCC actions to Field Day to licensing issues. Schroeder was also the founding editor of HR Report, a newsletter published by Ham Radio.

Schroeder was one of only three radio amateurs who had 394 confirmed DXCC entities, placing the trio at the top of the DXCC standings. Schroeder had missed only seven entities, all of which are now deleted: Tibet (AC4), Damao and Diu (CR8), French Indo-China (FI8), French India (FN), Java (PK1-3), Netherlands Borneo (PK5) and Celebe and Molucca (PK6). Schroeder made Top of Honor Roll in 1993. Along with his 394 Mixed DXCC entities, Schroeder also held DXCC on Phone (238 entities), CW (165 entities) and 6 meters (108 entities), as well as VUCC on 50 MHz. Read more <http://www.arrl.org/news/noted-dxer-joe-schroeder-w9juv-sk>.

==> THIS WEEK IN RADIOSPORT

This week:

- May 3 -- NCCC Sprint Ladder
- May 4 -- Microwave Spring Sprint (local time)
- May 4-5 -- New England QSO Party; Indiana QSO Party; 7th Call Area QSO Party; 10-10 International Spring Contest (CW); Araucaria VHF Contest; ARI International DX Contest
- May 7 -- ARS Spartan Sprint
- May 8 -- NAQCC-EU Monthly Sprint
- May 8-9 -- CWops Mini-CWT Test
- May 9 -- NAQCC Straight Key/Bug Sprint

Next week:

- May 10 -- NCCC Sprint Ladder
- May 11 -- FISTS Spring Sprint
- May 11-12 -- Nevada Mustang Roundup; VOLTA WW RTTY Contest; CQ-M International DX Contest; Portuguese Navy Day Contest; SKCC Weekend Sprintathon; EUCW Fraternizing CW QSO Party; Worldwide EME Contest

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

==> UPCOMING ARRL SECTION, STATE AND DIVISION CONVENTIONS AND EVENTS

- May 4 -- ARRL South Carolina Section Convention <http://www.arrl.org/hamfests/south-carolina-section-convention-upstate-hamfest-1>, Spartanburg, South Carolina
- May 17-19 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-4>, Trotwood, Ohio
- June 1 -- ARRL Georgia State Convention <http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest-1>, Marietta, Georgia
- May 31-June 2 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>, Seaside, Oregon
- June 7-8 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-35th-anniversary-ham-com>, Plano, Texas
- June 8 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-2>, Rogers, Arkansas; ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-knoxville-hamfest-electronics-convention>, Knoxville, Tennessee
- June 28-30 -- ARRL Rocky Mountain Division Convention <http://www.arrl.org/hamfests/rocky-mountain-division-convention-hamcon-colorado-2013>, Estes Park, Colorado
- July 6 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-electronics-expo>, Harrisburg, Pennsylvania
- July 25-27 -- Central States VHF Society Conference <http://www.arrl.org/hamfests/central-states-vhf-society-2013-conference>, Elk Grove Village, Illinois

http://forums.qrz.com/showthread.php?389882-The-Great-Hagerstown-Hamfest-May-4-2013&goto=newpost

It's that time again. The Antietam Radio Association in Hagerstown, MD will be holding its annual hamfest. We have covered tailgating, forums, a VE test session, refreshments for sale and our claim to fame of FREE CAKE! For more details visit: http://www.w3cwc.org/HamFests.html

//
Next "Quartzfest" Campout - January 19 - 26, 2014-start making your plans now!

Posted: 02 May 2013 12:00 PM PDT
http://forums.qrz.com/showthread.php?389863-Next-quot-Quartzfest-quot-Campout-January-19-26-2014-start-making-your-plans-now!&goto=newpost

If you haven't heard of Quartzfest, that means you've never been there. Quartzfest www.quartzfest.org is an 8 day long campout for hams in the desert just south of Quartzsite AZ the last full week of January each year. At Quartzfest, there are no facilities such as water, sewer or electricity. We bring our facilities with us and provide our own power which mostly comes from the sun (but some do use generators). Talk about a perfect opportunity for you to find out just how well prepared you are for the next emergency or disaster that comes along!

Quartzfest is a week packed full of Seminars on HAM Related Topics including an ARRL Forum, RV and camping topics, Crafts for those interested in non-technical stuff, Cookouts and Pot Lucks, Geocaching, Prospecting, Hidden Transmitter Hunting, 4x4 Off Road Trip, Evening Movies, Ham Radio Tailgate "Yard Sale", Social Gatherings and so much more. If you don't know anyone when you arrive at Quartzfest, you'll have lifelong friends by the time the week is over.

This coming January we'll be holding two "multiple session" workshops. One will be kit building by Joe K0NEB who is CQ Magazine's "Kit Editor" the other is Emergency Communications by Ron N1AHH for the individual operating in a disaster but not affiliated with disaster organizations. If you're not a licensed HAM yet or you want to upgrade your current license, we hold VE Exams each year. If you want to get on the air, drop by our W7Q Special Event Station and pick up the mic on either the ICOM IC-9100 or IC-7200. If

you've never been on the air and want to but you'd like help, who better than Gordon "Gordo" West WB6NOA gordonwestradioschool.com to sit with you and walk you thru making your very first HF contacts?

Our attendance this past January was a whopping 460 and we hope to see even more of you next January from the 19th - 26th. It's typically T-Shirt weather at Quartzfest during the day so bring your sunglasses, lawn chair and sun block...and join us for the week at the most unique and educational gathering of HAM's in the world.

Camping is absolutely FREEAttendance at Quartzfest is absolutely FREERaffle Prizes donated by Amateur Radio Manufacturer and Amateur Radio Accessory Manufacturers are absolutely FREE for you to win.

For more information about Quartzfest and to view our April/May Newsletter that was just published yesterday, drop by our Quartzfest website www.quartzfest.org

While on our Quartzfest website, remember to bookmark and save it to your favorites so you can check back for new additions to our 2014 schedule of events (it's still a work in progress). Also while there, check out and download our FREE Quartzfest 2013 Cookbook.

We hope to see you at Quartzfest 2014.

73,

Kris - KR1SS and Angel - KG7ASN

RADIO RULES: IARU REGION 1 MEETS IN VIENNA

IARU Region 1 held its Interim Meeting in Vienna Austria the weekend of April 20th through the 21st. Jeremy Boot, G4NJH, of the RSGB news reports:

--

H-F topics included preparations for the WRC15, which includes the possibility of a worldwide amateur allocation at 5MHz. Other proposals included trying to align some of the High Frequency band plans between Regions and the DXpedition Code of Conduct.

A number of other papers covered contest matters, support for newcomers via scouting's Jamboree on the Air, operation of unmanned stations, and discussions on a possible band plan for the new 472 to 479 kHz amateur allocation.

For VHF and microwaves, there were a total of 34 papers covered technical, operating, band planning and contest matters. Areas of focus were improvements to IARU contests and accommodating digital voice, beacon and TV developments.

Band plans at 4m, 2m and 70cm came under particular scrutiny. Pressure on spectrum, notably at 2.3GHz, was also discussed. Several topics are expected to be further developed in time for the next Region 1 Conference in the autumn of 2014.

For the Amateur Radio Newsline, I'm Jeremy Boot. G4NJH, reporting from Nottingham in the United Kingdom.

--

The minutes and recommendations of the Interim Meeting will be published shortly, once approved by the Region 1 Executive Committee. (IARU - R1, GB2RS)

**

BREAKING DX NEWS: DX GROUP ATTEMPTING TO ARRANGE OPERATION FROM NORTH KOREA

A well known group of DX'ers say that they are working on getting permission to operate from North Korea which is the most wanted DXCC entity in the world. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Intrepid-DX Group, in partnership with the World-Wide DX Group says that for the past four years that they have been working with professionals in the business and tourism industries who are actively doing business in North Korea.

In a widely circulated press statement the organizations note that they have prepared a comprehensive, multi-faceted proposal, which has been delivered it to the North Korean officials via their emissary located in Chinese. Also that several members of the combined groups leadership and advisory team have made multiple visits to the region and are advising the overall groups accordingly.

The DXers say that they are using the same techniques that were successful in opening up Kurdistan, the South Sudan and Yemen to DXpedition activity. They add that they are leveraging their ideas and contacts towards the goal of a major DXpedition over a four week period from within the North Korea border. As we go to air, no date for such an operation to take place has even been speculated.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

We will have more DX related news later on in this weeks Amateur Radio Newsline report. (Intrepid-DX Group release)

**

RADIO LAW: HAWAII DISTRACTED DRIVER LAW WITH HAM RADIO EXEMPTION SENT TO GOVERNOR FOR SIGNATURE

House Bill 980, dealing with mobile cellular telephone law for the State of Hawaii that contains an exemption for mobile ham radio operation has been transmitted to the Governor and is awaiting his

signature.

Like many other states, the new law in Hawaii states that no person shall operate a motor vehicle while using a mobile electronic device, however the use of a mobile electronic device for the sole purpose of making a "911" emergency communication is permitted. The Hawaii law provides that no person under eighteen years of age can operate a motor vehicle while utilizing even a hands-free mobile electronic device, except, once again for the sole purpose of making a "911" emergency call.

According to Ron Hashiro, AH6RH, in addition to radio amateurs, also exempted from the law will be emergency responders using a mobile electronic device while in the performance of their official duties and those operating under FCC Part 90 Land Mobile Radio rules.

Not exempted are those using Family Radio Service, users of the General Mobile Radio Service, Citizens Band radio operators, marine radio, the aviation band, text messaging and of coarse those making non emergency calls using hand held cellular telephone.

Penalties include a fine of not less than $100 and not more than $200 for a first violation. A second violation within that occurs within one year brings with it a fine of not less than $200 and not more than $300. For a violation that occurs within two years of two prior violations and for the fourth and each subsequent violation regardless of when they were committed, a fine of not less than $300 and not more than $500 can be assessed.

If signed by the Governor, the new Hawaii distracted driving law will take effect on July 1st. The full text is on the web at tinyurl.com/hawaii-cell-final. (AH6RH via Facebook and other published news reports)

**

RESCUE RADIO: TEXT ALERTS ISSUED AFTER BOSTON MARATHON BOMBINGS

Boston officials did use cellphone text messages, known as Wireless Emergency Alerts in the aftermath of the marathon bombings. That's according to Rick Wimberly of alerting consultancy Galain Solutions.

The former broadcaster and current consultant to FEMA told Radio World that the Massachusetts Emergency Management Agency or MEMA has the ability and authority to issue imminent threat Wireless Emergency Alerts messages and did do on April 19th. Specifically, MEMA issued a shelter-in-place order, by tweeting out a message to that effect.

According to Wimberly, Wireless Emergency Alerts complement EAS system because the text messages remind users to tune in to their local broadcast stations for more detailed information. Whether or not the EAS system itself was placed into formal use in the marathon bombing aftermath is still open to debate. (RW)

**

COMMUNICATIONS LAW: COMMISSIONER WANTS FCC TO LOOSEN OWNERSHIP RULES

FCC commissioner Ajit Pai says that if the FCC proceeds to count some Joint Sales Agreements toward local TV station ownership caps, it would be an error. This is because Pai believes that the Commission must treat broadband as a complement, not replacement, for broadcast use of spectrum.

His remarks came in a recent speech to the Media Institute. In it, Pai wants the FCC to loosen the local ownership rules, and found it amazing that the proposal currently on the table would tighten them by adding the Joint Sales Agreements and possibly shared service agreements.

Pai pointed to a Joint Sales Agreement between two stations in his home state of Kansas. There, a Univision affiliate and an Entravision station were able to create the only Spanish-language newscast in the state. Another he cited was in Missouri between the broadcasters Nexstar and Mission that allowed for expanded news coverage.

A Joint Sales Agreement sometimes known as a Limited Sales Agreement is an agreement in which one company agrees to operate a radio or television station owned by another license holder. In essence, it is a sort of lease or time-buy arrangement. (Multichannel News, Wikipedia)

WORLDBEAT: WEB RADIO EXECS MEET IN BRUSSELS FOR RAIN SUMMIT

An Internet radio summit is coming to Europe next month. Amateur Radio Newsline's Jeff Clark, K8JAC, has the details:

--

Internet radio executives from across Europe will meet in Brussels on Thursday, May 23rd for the second annual RAIN Summit Europe. This is according to Kirk Hansen who is the publisher of the RAIN Radio and Internet newsletter.

RAIN Summit Europe will take place at the Hotel Bloom. The conference will be a daylong event featuring panels and presentations along with speakers and other opportunities for European networking executives to consider the future of radio in the digital world.

RAIN conferences are educational and networking events for the Internet radio and on-line audio industries. For the past decade these conferences have been presented several times each year in North America and feature top speakers and panelists from around the world.

I'm Jeff Clark, K8JAC.

--

For those who may be wondering these conferences are not in any way connected with Hap Holly, KC9RP's weekly RAIN Report based in Chicago. (RW)

ENFORCEMENT: COMMISSION UPHOLDS $17,000 FINE AGAINST BROADCASTER

Turning to regulatory enforcement, word that the full commission has upheld a decision by the Enforcement Bureau and has ruled that Mt. Rushmore Broadcasting owes $17,000 for violations of the agency's EAS and public file rules.

Earlier, the bureau denied the company's 2011 petition to reconsider the fine levied for failing to ensure the operational readiness of the station's EAS gear, failing to maintain a complete public inspection file for stations and failing to operate the Studio to Transmitter Link from its licensed location.

Now in its final judgment in this matter the full Commission says that Mt. Rushmore Broadcasting did not dispute the facts or that the violations took place. Rather that the broadcaster had only substantially reiterated all of the arguments previously considered and rejected. The FCC also noted that Mt. Rushmore Broadcasting did not demonstrate that the Enforcement Bureau made an error in its findings. Nor did it provide financial documentation to support its repeated request that the fine be reduced or eliminated.

The full commission upheld the Enforcement Bureau's original order and said payment is due within 15 days. In the meantime, the government filed a complaint in federal district court against Mt. Rushmore Broadcasting to recover the money. That case will be dismissed if the licensee makes the payment, according to the agency.

Mt. Rushmore Broadcasting is the licensee of KRAL-AM, KIQZ-FM, and Studio to Transmitter link WHB734, in Rawlins, Wyoming. (FCC, RW)

**

INDUSTRY NEWS: SPX DIELECTRIC TO CEASE MAKING ANTENNAS

One of the nation's best known manufacturers of broadcast and two-way antenna systems, transmission lines and associated products is closing its doors. Amateur Radio Newsline's Skeeter Nash, N5ASH, reports:

--

SPX Communications Technologies, formerly Dielectric Communications, will cease its broadcast television, radio and wireless antenna manufacturing operations effective June 29th. Dielectric as it is still better known had already begun letting customers know that it plans to get out of the antenna business.

The company was started in 1942 as Dielectric Products Corp., which specialized in developing transmission lines for wartime radar system use. The company has been located in Raymond ME since 1954. It installed its first Digital TV broadcast antenna in 1994 and provided more than 1200 broadcasters with Digital Television transmission solutions.

SPX acquired Dielectric in 2001. According to the CGC Communicator, over the years Dielectric produced some of the finest broadcast antennas made in the United States, and its closure represents a significant blow to U.S. manufacturing capabilities.

For the Amateur Radio Newsline, I'm Skeeter Nash, N5ASH.

--

More on the shuttering of this historic company is on the web at tinyurl.com/dialectric-closes. (RW, CGC)

**

RESCUE RADIO: ETON ZONE GUARD RECEIVER

Eton Corporation has a new product that may well be of interest to hams involved in emergency response operations or those who live in regions where getting accurate emergency alerts are a necessity.

Called the ZoneGuard, it is a portable battery-powered AM/FM radio that receives NOAA weather and Specific Area Message Encoding or S.A.M.E. local emergency messages. The ZoneGuard radio will also flash an internal 3 level High-visibility color alert light bar and emit warning sounds when local warning messages are activated. On top of that, it is also programmable so multiple geographic areas can be programmed into it for emergency message reception. Best of all is the price for this little gem at under $40 street and available where most consumer electronics are sold.

And less we forget, the radio also carries a Red Cross identification brand on it and a portion of sales profits goes to that organization. (RW)

HAM HAPPENINGS: 4 DAYS IN MAY CONCURRENT WITH HAMVENTION 2013

The 18th annual Four Days in May the QRP and Homebrew mini-convention held concurrently with the Dayton Hamvention beginning on Thursday May 16th. The venue is once again the Holiday Inn located in Fairborn, Ohio which is just about twenty minutes to the east of the Hara Arena.

Guest speakers this year feature Roy Lewallen W7EL, Rick Campbell KK7B and George Dobbs G3RJV, and others. Thursday evening will include a presentation from Ten-Tec at which there will be a new product announcement. Events on Thursday and Friday evenings are free of charge. More information along with tickets for the seminars, the Buildathon and Grand Banquet can be bought online at www.qrparci.org/fdim. (W4DU, G4GXL)

**

HAMVENTION 2013: ARRL AWARD CHECKING AT HAMVENTION

Bill Moore, NC1L, says that the ARRL Awards Staff will be present at the 2013 Dayton Hamvention to check applications for all ARRL awards. These include DXCC, WAS, VUCC, WAC and the Extra Class Certificate.

A detailed PDF file is available to help guide you through the card checking process so that everything proceeds smoothly at tinyurl.com/arrl-awards-dayton-2013. If, after reviewing the PDF file and you have questions, send an e-mail to Bill Moore, NC1L, at bmoore(at)arrl(dot)org. (NC1L)

**

HAMVENTION NEWS: TECHNICIAN LICENSE CLASS AT HAMVENTION 2013

A Technician level Ham Radio Class will be held at the Dayton Hamvention on Saturday, May 18th.

The session runs from 9AM until 4PM and will be held at the Hara Arena Hamvention venue. Immediately following the conclusion of the class a team of Volunteer Examiners will be on-hand to administer the Technician class exam.

You must pre-register for the class and yes, there is homework. Info on what's in the class and how to enroll can be found at http://www.hamclass.net/hamvclass.htm

Interested students should not delay as there is limited room and once the class fills, enrollment will be closed.

The class will be again sponsored by Mitch Stern, W1SJ. If you have any questions please contact him at w1sj@arrl.net

Stern tells Amateur Radio Newsline that this will be his 4th year of providing these classes at the Dayton Hamvention but that he has actually been teaching 1 and 2 days classes for 21 years. (W1SJ)

**

HAMVENTION 2013: W9FIZ ANNOUNCES HE CANNOT PROVIDE ELECTRONIC EQUIPMENT TEST STATION

Barry Gose, W9FIZ, who had previously announced a number of free services at Hamvention 2013 has been forced to cancel a few of them. This after he was advised by a fellow ham who is an attorney that since he is not licensed, bonded, or insured to test electronic equipment that he would be exposing himself self to considerable liability. Gose says that based on this that he will not be unable to offer any service that involves testing electronic devices of any kind in any way shape or form. However, W9FIZ still plans to attend and both his free advertisement board and 2 meter paging service will still be available. (W9FIZ)

CHANGING OF THE GUARD: W9JUV - S.K.

The changing of the guard in our world of amateur radio continues with the sad news of the passing of our longtime friend and colleague Joseph J. "Joe" Schroeder, Jr. W9JUV on Tuesday, April 30th. Bill Pasternak, WA6ITF, is here with more on the life of this truly dedicated ham radio operator:

--

When he passed away at age 83, Joe Schroeder, W9JUV, was perhaps best known as the founding editor of the weekly H-R Report newsletter published in the 1970's by Ham Radio Magazine. This was the first independent amateur radio news source other than the ARRL's W1AW broadcasts and its Directors Letters. In addition to HR Report, Joe was also a member of the Ham Radio Magazine editorial staff from its inception and continued with it for many years. He also served as a reporter for this news service during its formative days as the Westlink Radio News.

Joe was licensed as W9JUV since 1946. An accomplished DXer, he was active on all bands from 160 meters through 432 MHz. His ham radio

achievements included being on the DXCC Honor Roll since early 1970's; achieving 6 Meter DXCC, Worked All Continents and Worked All States.

W9JUV was a life Member ARRL, AMSAT and the QCWA. Over the years he had held various positions with ARRL, AMSAT and the Old Old Timers Club. He was also a member of the PJ2T Contesting Group, the Northern Illinois DX Association, and the Radio Club of America.

Professionally W9JUV was a former Motorola engineer and Managing Editor of Electronic Instrument Digest magazine. He was the founder of the Chicago area-based firm Consultek Consulting as well as being an authority on firearms history and gun collecting. In the latter he was the owner of Handgun Press Publishing Co. and wrote or edited many books and articles in that field. A private pilot since 1956 he was also active with Civil Air Patrol.

And less I forget to mention, Joe was a close friend of this reporter for the better part of 40 years and will never be forgotten. There are some special people who touch ones life, and for me, Joe Schroeder, W9JUV, ranks at the very top.

I'm Bill Pasternak, WA6ITF, in Los Angeles.

--

Joe Schroeder, W9JUV is survived by his wife of 55 years Janet, N9LGI; his son Brad, daughter Elizabeth Anderluh and two grandchildren. Speaking for the family, Joe's daughter Elizabeth says that a memorial service will be held for him at some point in the near future. In lieu of flowers, memorials may be made to the Leukemia and Lymphoma Society, 651 W. Washington Blvd., Suite 400, Chicago, Illinois 60661 or Cal's Angels, 721 Aston Lane South, Elgin, Illinois 60177. (ARNewsline(tm))

ON THE AIR: FIRST CLASS CW OPS CLUB CELEBRATES 75 YEARS

Members of the First Class CW Operators Club will take to the air in May with many using special calls. This to celebrate the 75th anniversary of that organization.

Nearly 50 special FOC suffix calls, and 6 calls with unique prefixes will be on the bands throughout the month. The special call GB75FOC will be activated by a group of English members each day in May and special versions of the club call G4FOC will be used in non-English U.K. countries. In addition, the call M0RSE will be on the air as well.

An FOC 75 award will be available at the three levels of bronze, silver and gold. For full information about the award as well as QSL routing to stations involved in this celebration, simply take your web browser to www.g4foc.org and then follow the link to FOC 75th Anniversary. (KR3E)

**

ON THE AIR: CELEBRATING ST CYRIL AND METHODIUS DAY

Now here' a rather interesting one. A special event station signing LZ2013KM will be activated by members of Bulgarian Federation of Radio Amateurs between May 1st and the 31st.

This operation is to celebrate a national holiday known as St. Cyril and Methodius day. Operation will be on all the High Frequency bands with QSL's going only via the LZ bureau.

And who were St. Cyril and Methodius you ask? Well they were the creators of the Cyrillic alphabet, and we thought you might like to know. (Z1BJ)

**

DX

In DX, JA9LSZ is reported as being currently active from Nepal as 9N7SZ. His operation is on the High Frequency bands only. If you work him please QSL to JA9LSZ.

According to SQ8X posting on the FT5XM Web page the group hopes to set sail for Amsterdam Island on January 15, 2014 and arrive on the 24th. Landing operations will begin as soon as the sea conditions and weather allow. Once the team is ashore, they will have 18 days to set up, conduct the DXpedition, and tear down for departure. You can follow developments at www.amsterdamdx.org

JJ8DEN was to be active from Puka Puka Atoll in French Polynesia From April 30th through May 7th. This will be followed by an operation from Raivavae Island in the Austral Island group as KH0PR stroke FO from May 8th to the 15th. He will be active on High Frequency bands using CW , RTTY and PSK. QSL via JJ8DEN.

Members of the Dutch Society of Radio Amateurs will be active as 9H25 from Qawra, Malta between May 20th and June 4th. This in celebration of the groups 25th Holiday DXpedition to that nation. Operations will be on 80 through 6 meters using CW and SSB. QSL via PI4KGL

Lastly, a DXpedition made up of members of the Oceania DX Group will activate Norfolk Island as VK9NT between May 3rd and the 13th. They plan to have 4 stations covering 80 through 10 meters operating CW, SSB and RTTY. An "Online QSL Request Service" will be available for bureau, and direct cards on ClubLog which is the preferred method. If for some reason you cannot use the ClubLog or Logbook of the World, paper QSL can go direct to VK2CA.

(Above from various DX news sources)

RADIO IN SPACE: NASA MISSION TO STUDY EQUATORIAL ELECTRICAL STORM PROPAGATION

And finally this wee, a NASA funded sounding rocket mission will launch from an atoll in the Pacific in the next few weeks to help scientists better understand and predict the electrical storms in Earth's upper atmosphere. These severe weather outbursts can interfere with satellite communication, the global positioning system and other space-based communications including some used by radio amateurs.

The mission is called EVEX which stands for the Equatorial Vortex Experiment. It will consist of the launch two rockets from the Kwajalein Atoll in the Marshall Islands for a twelve minute information gathering journey through the equatorial ionosphere above the South Pacific. The twin spacecraft will measure events in two separate regions of the ionosphere to see how they work together to drive the ionosphere from placid and smooth to violently disturbed. Such information could ultimately lead to the ability to more accurately forecast this important aspect of space related weather.

The launch window for EVEX runs through May 10th. More on this propagation study mission is on-line at tinyurl.com/nasa-storm-rocket (Space Daily)

GB617SQN Special Event Call

Posted: 02 May 2013 04:58 PM PDT
http://forums.qrz.com/showthread.php?389898-GB617SQN-Special-Event-Call&goto=newpost

GB617SQN,

will be active on most bands and modes throughout the month of May, to
commemorate the 70th anniversary of the famous 617 Squadron's Dambuster
Raid "Operation Chastise" to break German dams and put the war machine out
of action.

Go to:http://www.qsl.net/gb617sqn for further details.

A limited edition QSL card has been produced for the event, which will run
from the former RAF Woodhall Spa in Lincolnshire England. From Friday 3rd
May until Thursday 30th May 2013.

The event is dedicated to the crews of the Lancaster Bombers that took part in the mission, led by Wing Commander Guy Penrose Gibson and the inventor scientist who created the bouncing bomb (Upkeep) Dr Sir Barnes Wallis.

THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE OF AUSTRALIA FOR WEEK COMMENCING MAY 05 2013.

New 24 GHz EME World Record

Rex VK 7 MO has completed a 16383 km QSO with OK 1 KIR in the Czech Republic to claim the World record on 24 GHz.

Rex used just a 1.14 metre dish and 10 watts which he has designed for portable operation, while OK 1 KIR used a 4.5 metre dish and 22 watts.

This has been a 12 month project for Rex, which has involved working with Joe, K 1 JT to produce improved decoders that can cope with the very wide spreading of signals on 24 GHz EME. Rex and Joe will be publishing this work in the next edition of DUBUS magazine which is devoted to VHF and Microwave Amateur radio.

(vk7news)

The ACMA is conducting the Contemporary community safeguards inquiry into the core principles that should guide the content of contemporary broadcasting codes of practice. To help inform this inquiry, they're hosting a series of Citizen conversations and welcome your perspective on some or all of these topics.

All events will be held at ACMA's Sydney office in Pyrmont.

More details will be available shortly acma.gov.au

HAMS ACROSS AUSTRALIA.

web service:- http://www.amateurradio.com.au/news/

Some breaking news from The Sherbrooke Community Radio Club Inc.,
"VK3KID" "8.9db gain on 80 metres"

Club members will be on very active on air from the 5th till the 12th May,
working from Kurth Kiln, Gembrook.

Each year the club builds an 80 metre-antenna system for the VK/Trans-Tasman Contest. Details of this year's new high performance array, that their members will be running in the next Trans Tasman contest on 11 may, will be submitted to the WIA AR Magazine after the contest, in anticipation of hopefully sharing their developing knowledge with other fellow amateurs, in a future publication.

The complete construction cost to members, of this Top Fed, Linear Loaded, three quarter wave length, dual polarity, high gain array, with unheard off 8.9db gain on 80 metres, and only cost less than $60:00 to make.

You are most welcome to drop in any time before the contest to have a look and chat about the antenna system; they hope to hear you on 80 metres.

If you need directions have a look on the club web site www.vk3kid.org

MDRC Hamfest 2013

The Moorabbin and District Amateur Radio club are pleased to announce the 2013 Hamfest will be on Saturday 11th May, with doors opening at 10am. at Southern Community Centre, Rupert Drive, Mulgrave.

Raising the Public Profile of Amateur Radio.

The Midland Amateur Radio Club, in their ongoing efforts to raise the public profile of amateur radio, will be staging an event with a difference May 25.

Kevin Crockett, VK3CKC, will take to the Axedale end of the O'Keefe Rail Trail which forms part of the old Heathcote Junction to Bendigo rail line.

A radio-equipped, recumbent tadpole trike has been purpose-built for the event.

The Club, callsign VK 3 CMZ, will also have an operating amateur station set up at the Axedale Market next to the hall where the public can listen in on 40m HF contacts around 7.090MHz being made. They will be able to directly communicate with the trike itself on 2m via the local VK3RCV repeater as the trike makes its way towards the town accompanied by children from the Axedale Primary School.

Automatic Packet Reporting System, or APRS, will be used to display progress on a laptop computer at a display stand at the Market. Those who can't attend

should be able to follow the trike via www.aprs.fi/. An offer for Internet streaming communications audio via www.vk3cmz.com has also been received.

The City of Greater Bendigo is currently extending the Rail Trail to Heathcote and this event is something of a shakedown for a larger event later in the year that will cover from Bendigo to Axedale or even beyond if any of the extension is ready by then. It may even be repeated for the WIA National Field Day next year.

The event has attracted proud support from the City of Greater Bendigo Eppalock Ward Councillors, Friends of the Bendigo-Kilmore Rail Trail, Axedale Primary School, Axedale Our Town Our Future Committee and Axedale Public Hall Committee.

Clairview Gathering this weekend

As the news goes to air the Clairview Gathering has been happening at a spot on the coast between Rockhampton and Mackay.

Apart from being one of the main revenue raisers for the Rockhampton and District Amateur Radio Club Inc. and Mackay Amateur Radio Club, it has also been a great time to catch up with fellow radio amateurs, swap a few yarns and see what a few people have been up to with the latest advances in the hobby.

The Saturday evening events went of very well with many a QUALITY item snaffled by distinguishing hams and onlookers during the Famous Mega Auction.

The Raffles were very popular, including the wheelbarrow sized Massive First Prize donated by Liz/VK4FLIZ and Tony/VK4HOG.

VK4's Gympie Times has a story this week of 2nd World War veteran Allan Booth who has a box full of friends right at his fingertips.

VK4EAB, 90, is an avid member of the Gympie Amateur Radio Group and has the complete set-up in his room at Gympie's St Patrick's Villa Nursing Home.

Mr Booth, who is blind, may be vision impaired, but his fingertips tiptoe around his radio equipment with complete ease.

The amateur radio hobbyist specialises in morse code in addition to using the hand-held microphone during his transmissions.

Morse code has a special place in VK4EAB's heart as he used this method of communication during WW2 as a member of the Royal Australian Air Force.

Technology Behind the NBN Presentation

REAST have had confirmed that an engineer (and amateur ZL1VBI) from
the NBN rollout team will be going along to their June meeting and giving a
presentation on the technology being used in the National Broadband Network.

June 5th, 2013 at 7:30pm.

http://reast.asn.au/events.php#NBN <http://reast.asn.au/events.php#NBN>

VK9

Look out for VK9NT on Norfolk Island, until 13th of May.

A team of eleven, including one operator from America, will be active on
all HF bands, using CW, SSB and RTTY.

VK9NT will also be active in the Trans-Tasman 80 m contest on Saturday
evening, 11th of May.

Goals are:

To work as many stations as possible
Build skills and experience in radio operation and dxpeditioning
Have some fun and enjoy a bit of a break on a beautiful Pacific Island!

For more information, see the Oceania DX Group's website www.odxg.org

(Luke VK3HJ)

DISCUSSION POINT

What use is an f-call?

In the last few minutes I've spoken with an Amateur in Kansas, a couple in
Port Pirie and a few in Perth, all within the same conversation. That sums up
Amateur Radio for me in a nutshell.

Where else can you speak, real-time, with people across the planet, hear
their voice, listen to their story and react as it occurs to you?

Amateur Radio is many things for different people. It is that way because
there is no barrier to entry. If you can pass your test, you can become an
Amateur. It means that people come at this hobby with different experiences,
different expectations, different skills and different languages.

If you've had your license for a little while, you might have gotten to a
stage where you wonder, "What Next?" - is this hobby really for me, or is it

just another one that I started all excitedly and then got bored with?

I cannot stop your boredom, but I can encourage you to have a look around in the vast expanse that represents Amateur Radio. From making contacts across the planet, to building radios and inventing stuff, from going camping, to socialising over a cup of coffee, from having lunch to participating in a contest, there is such a range of things to do that it boggles the mind.

If you're stuck in a rut, I recommend that you try something else associated with Amateur Radio. If you've never done a contest, "because it's just not you", then I'd like to encourage you to try it anyway. If you know a couple of Amateurs, have lunch, or dinner, or coffee, or drinks, whatever. Talk about Amateur Radio.

Find the spark that represents what Amateur Radio means for you. I can guarantee that there is something here for everyone.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

Live broadcast of Hamvention

It's time again for the W5KUB.com world wide broadcast of Hamvention.

The live broadcast begins on Wed May 15th broadcasting the 550 Mile drive by the TV crew from Memphis to Dayton.

The broadcast Thursday shows various vendors setting up.

Friday to Sunday w5kub.com will be giving out thousands of dollars of ham prizes to viewers.

Last year some 47,300 viewers follow this trip.

Cave radio

Communicating between a cave and the surface is a formidable challenge, yet it's a common requirement for underground explorers and it plays a vital role in coordinating cave rescues.

With the growth of interest in low frequency radio in recent years, radio amateurs and electronics enthusiasts are well placed to make a contribution in this area. If you'd like to get involved in this unusual yet fascinating realm of radio, and perhaps make a contribution to the state of the art, the Journal of the Cave Radio and Electronics Group , published by the British Cave Research Association is essential reading.

FCC ADOPTS RULES TO PROVIDE EMERGENCY INFO TO THE BLIND

The FCC has adopted rules requiring that emergency information provided in video programming be made accessible to individuals who are blind or visually impaired. It's also mandating that that certain apparatus be capable of delivering video description and emergency information these citizens.

Specifically, the rules clarify that the new emergency information requirements apply to video programming provided by entities that are already covered in Commission rules along with any other distributor of video programming for residential reception that delivers such programming directly to the home and is subject to the jurisdiction of the Commission.

Last week John VK2JJW brought us that tongue in cheek look at the DXpedition where the SP found the "Genie in the lamp."

This week a story is emerging of an SP who really has his sights set high.

Tomasz Brol SP 9 UOB plans to launch three High Altitude Balloons to near-space which will carry amateur radio payloads on 437.600, 437.595 and 437.615 MHz.

At maximum altitude the 10 mW signal from these balloons could have a potential range of up to 700 km.

A bit far for we VK's to pick up but our many European listeners will have their eyes and ears glued!

The IARU Region 1 site carries a full report on this May balloon launch:

==========

NEWS FROM ARNEWSLINE USA

GOOGLE EXEC PREDICTS EVERYONE IN THE WORLD ON-LINE BY 2020

And finally this week, do you believe what Google Executive Chairman Eric Schmidt says that everyone in the world will be on-line by the end of the decade? Amateur Radio Newsline's Cheryl Lasek, K9BIK, has the rest of this rather interesting prediction.

--

On Saturday April 13th Google Executive Chairman Eric Schmidt stated on his Google Plus blog that for every person online, there are two who are not. He went on to add that by the end of the decade, he predicted that everyone on Earth will be connected by 2020. A day later, Schmidt added - and we quote: "Think about how great the internet is now with 2 billion users. Now think about how amazing it will be when 5 billion come online in a decade."

But can Schmid's prediction come true? As pointed out in one news article, Google itself supports a project called Geeks Without Frontiers. This is described as a non-profit

group that donates computers and related wireless access technology to poor areas around the world. The organization's current focus is to bring such wireless access to parts of Mexico, Central America and Africa. These are regions without any traditional form of wired Internet access.

Also, back in 2011 Geeks Without Frontiers announced that it had developed its own low cost open source Wi-Fi software. At that time it said that by driving down the cost of metropolitan and village scale Wi-Fi networks, millions more people will be able to reap the economic and social benefits of significantly lower cost Internet access

The rise of the mobile access expected to play a role. In parts of Africa it's reported that more people have access to a mobile phones than have electricity. Google itself notes that in South Africa 25% of its searches during the week are made via mobile devices and that rises to 65% on the weekends.

So will every man, woman and child be on-line by 2020? There's no way to be certain but Google leaders rarely make predictions that they know won't come true. So the bottom line is, don't rule this one out. And if it does happen it will likely be thanks to Wi-Fi which is in itself nothing more than a form of digital two-way radio.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

According to the International Telecommunication Union, at this time approximately 38% of the world's population is currently using the Internet in some way. That's up from about 35% who were on-line in 2012. But with poor and developing nations around the world isolated by non-existent Internet infrastructures, and others hindered by government censorship, some wonder if Eric Schmidt's vision might be a bit overly optimistic. Then again as time has proven, Google is rarely wrong.

OPERATIONAL NEWS - DATELINE 2013

We'll start with news of the John Moyle.

Yes results of the 2103 John Moyle National Field Day have been published and are now on the contest page of the WIA website, wia.org.au

This year's entries came from all Australian mainland call areas, as well as from Tasmania and New Zealand. The total number of logs submitted was 111.

Well done to all who took part.

It was good to see some ZL stations take part again this year, and 3 stations submitted their log.

Based upon submitted logs, there were some 18,047 contacts, accumulating some 61,213 points claimed. This was good contesting for an Australian field day contest. More than 1,000 Australian individual call signs were logged during the contest.

Unfortunately, the numbers of stations who went to the considerable trouble of going out and setting up as a portable station and then not bothering to submit a log as an entry, is a great disappointment. Some multiple operator stations got very big scores this and perhaps that simply reflects the great and varied planning and implementation efforts required to assemble and operate a multi operator station.

VK Trans Tasman Contest May 11

The Day of the YL's will be held 18 and 19 May.

VK SHIRES June long weekend 0600 UTC Sat June 8, ends 0600 UTC June 9.

WW International Museums Weekends June 15/16 and 22/23

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Special event station VI 3 BEZ 75 will be active during May, to celebrate the formation as the Eastern Zone of WIA Victoria in 1938.

DUTCH NATIONAL WINDMILL AND WATER PUMP STATION WEEKEND

The special event call PD 13 MILL will be on the air May 10th to the 12th in honour of the Dutch Windmill and Water pump weekend. Operators will be PD 5 JFK PD 0 ME and PD 7 BZ and they will have three Stations active at the same time on 40, 20 and 10 meters using SSB and the digital modes.

A 2 meter station for local contacts will be operational as well.

QSL via PD 7 BZ, direct, via the bureau or electronically on Logbook of the World or eQSL. Information about Mills on the Air is on the web at www.pd6mill.com

(Southgate)

To promote Amateur Radio and the WIA Onno and the WIA AGM tea, have licensed VI 103 WIA.

If you'd like to operate the VI 103 WIA call sign which is active during the 2013 WIA AGM and conference you can do so from your QTH or your club station. We welcome operators from around VK, any time of the day or night. You do not need to have a full-call to operate the call sign, though you are required to

operate within your own license.

The call sign is intended to promote Amateur Radio and the WIA. Each QSO must be logged electronically and submitted so a QSL card can be sent to the remote station. You're not required to be a member of the WIA to operate the call sign, but we welcome your membership application.

Robert VK3DN is designing the QSL card as we speak, so warm up your radios and have a go.

If you'd like to claim a spot, visit the VK6 conference site, conference.vk6.net and register now.

The call sign is licensed for use on 23 - 27 May 2013.

Finally, if you're an F-call, you too can operate this call sign, so don't be shy, register today.

That web address again: conference.vk6.net.

28.000 to 29.700

WELL WELL

In the US a resident has been issued an Official Citation for operating an incidental radiator and causing harmful interference.

The radiator was of all things a well pump that was putting out a signal at 1800 Kilohertz and interfering with ham radio operations.

In response to complaints of interference to Amateur Radio Service reception of medium and high frequency radio signals, the Enforcement Bureau instructed him to resolve any interference, and suggesting he install new AC line filters for his well pump.

Now, in its April Citation the FCC has instructed Lopez to take immediate steps to come into compliance by repairing or replacing his incidental radiator and eliminating all harmful interference. If he fails to do so, the

FCC says that he could be subject to substantial monetary penalties, seizure of the offending equipment, and criminal sanctions.

(The entire text of the Citation is on-line as a PDF file at tinyurl.com/pump-qrm)

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

NASA mission to study what disrupts radio waves

A NASA-funded sounding rocket mission will launch from an atoll in the Pacific in the next few weeks to help scientists better understand and predict the electrical storms in Earth's upper atmosphere.

These storms can interfere with satellite communication and global positioning signals.

The mission, called EVEX, for the Equatorial Vortex Experiment, will launch two rockets for a twelve-minute journey through the equatorial ionosphere above the South Pacific.

The launch window for the mission from the Kwajalein Atoll in the Marshall Islands is until May 10, 2013.

WW SPECIAL INTEREST GROUPS --- RADIO AMATEUR OLD-TIMERS
http://www.raotc.org.au

Hallo everyone, this is Clive VK6CSW.

Tomorrow is the first Monday of May and that means it's time once again for the Radio Amateurs Old Timers Club of Australia's monthly bulletin of news, information, stories and anecdotes.

This month's feature is entitled Wireless Telegraphy Distress Signals and is by Herman Willemsen VK2IXV. Herman is a retired merchant navy radio operator so the story comes straight from the horse's mouth, so to speak!

The bulletin is transmitted on a number of different VHF and HF frequencies throughout the day, but the principal HF transmissions are on 20 metres on 14.150 MHz, firstly at 0100 UTC beamed north from Melbourne for Eastern states listeners and then again at 0200 UTC beamed westward for WA listeners.

To find a time and frequency for the more local VHF and HF transmissions in your area, please visit the RAOTC website at www.raotc.org.au

Barry VK6WF will be transmitting the bulletin from his QTH about 150 km east of Perth at 0200 UTC on 40 metres on 7060 kHz LSB. This transmission is aimed mainly at WA country listeners but could well be heard in South Australia, too.

Everyone, RAOTC members and non-members alike, is cordially invited to listen to this bulletin and to call back afterwards.

So once again, the May RAOTC bulletin can be heard tomorrow, Monday May 6th.

73 from Clive VK6CSW.

Submitting news items

If you would like to submit news items for inclusion in the
VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on
wia.org.au

Remember the sooner you submit material the more the likelihood of it being
broadcast in the very next edition of WIA National News. Each item will only
be broadcast once, if you want a couple of mentions, please submit different
slants to keep your event 'fresh 'and always if the news room is to read your
item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to
the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may
lodge a quick reply to let us know you read it, who knows, you might
even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize
their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs. Opinions expressed in
"WIANews" are those of the writers who submit material and do not necessarily
reflect those of the rebroadcasters, nor the National WIA, but are broadcast
in the spirit in which they were submitted."

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Seattle, WA May 3, 2013
To all radio amateurs

SB PROP ARL ARLP018
ARLP018 Propagation de K7RA

Solar activity made a healthy jump over the past week, with average daily sunspot numbers up over 30 points to 120.9, and average daily solar flux increasing over 27 points to 136.5.

The most active day for geomagnetic indices was May 1, when the planetary A index reached 21 and the high-latitude college A index (measured near Fairbanks, Alaska) was a whopping 57. That number has been higher, but only twice in the past six months, when it was 64 on March 1 and 79 on March 17.

The latest forecast has solar flux at 155 on May 3-4, 150 on May 5-6, 145 on May 7-9, then 140, 125 and 120 on May 10-12, 125 on May 13-15, 120 on May 16-17, then 125, 120, and 130 on May 18-20, 135 on May 21-22 and 130 on May 23-24.

Predicted planetary A index is 8 on May 3-4, 12 on May 5, 8 on May 6, 5 on May 7-20, then 15, 10 and 15 on May 21-23, and then 5 forever after that. This is from a 45 day forecast, so we won't really see quiet conditions forever, but the forecast ends on June 16 with planetary A index of 5 until then.

F.K. Janda, OK1HH has another short forecast for geomagnetic conditions, like last week. He sees the geomagnetic field quiet to unsettled May 3-10, quiet to active May 11-12, and quiet to unsettled May 13-19. That's it!

NASA released a new solar cycle prediction on May 1, but it wasn't really new. These arrive at the start of every month, and remain the same since March 1. On March 1, 2013 the prediction for the smoothed International Sunspot Number at the cycle peak shifted from 69 to 66 for Fall 2013. The 2013 Autumnal Equinox begins in about four months and three weeks. This week the May 2013 issue of CQ Magazine arrived, and across the top of the cover was this headline: "Another

Double-Peak Sunspot Cycle?" We certainly hope so.

Time to review our 3-month moving average of sunspot numbers, which has increased. The average daily sunspot number for February, March and April was 85.2. The average daily sunspot number for the three month periods centered on September 2012 through March 2013 were 81.2, 82.3, 74.4, 82.8, 73.6, 80.7 and 85.2. This is a moving average, so 81.2 was the average for August through October 2012, 82.3 was September through November 2012 and so on. But this involves a bit of cherry picking of the data, as the three previous period's averages were 96.5, 91.9 and 89.9.

The average sunspot number for the month of April was 112.8, for March it was 81.1 and February was 60.1.

Eric Ferguson, VE3CR of Burlington, Ontario sent his father-in-law Bruce Jones an article about solar flares, and they both wondered why there are no solar flares at the Sun's poles.

I passed this question on to Robert Steenburgh, KA8JBY who is a Senior Space Weather Forecaster at the NOAA Space Weather Prediction Center.

Robert wrote, "Flares are thought to originate from the deformation of magnetic field lines which break and reconnect. There is a latitudinal band in which this magnetic flux emergence (and hence sunspot formation) and deformation occurs.

"Sunspots typically form at mid-latitudes (equatorward of around 40 degrees) at the beginning of the solar cycle, and the breeding grounds drift towards the equator over the course of the cycle. This behavior is attributed to the solar dynamo. See http://solarscience.msfc.nasa.gov/dynamo.shtml.

"A cartoon depiction of the dynamo process is here:

http://www.nasa.gov/images/content/144061main_CycleDiagramLG.jpg

"You can find a paper on flare distribution for Solar Cycle 23 here:

http://www.ias.ac.in/jaa/junsep2006/JAA10.pdf

"There were 4 flares identified poleward of 50 degrees latitude in that paper, out of a total of 20,186.

"The poles are usually dominated by coronal holes and 'open' magnetic field lines that extend out into the heliosphere. So the mechanisms for flare formation are generally absent."

David Moore sent a link to a NASA video showing ten coronal mass ejections over five days in April:

http://www.nasa.gov/multimedia/videogallery/index.html?media_id=162261751

Mike Snyder, KN8J who lives a few miles south of Harrisville, West Virginia in EM99lf wrote this morning, May 3: "My wife and I are early risers. I mean real early. We're up about 3AM. Generally speaking, 3 to 5AM produces some fair DX for me.

"Lately it's been getting a bit better on the 20 and 30 meter bands. The South Pacific is usually open at these hours. I've managed a couple QRP contacts with Hawaii. I've noticed parts of Europe open as well. I had a solid QSO with OK1HB from the Czech Republic on 14.062MHz. I was running 100 watts barefoot for this one.

"This morning I finally worked a new one: A35JP in Tonga on 14.003 MHz running up two at 0736 UTC.

"Well, gotta go...someone just spotted FO/KH0PR!"

Mike runs a Cushcraft A4 antenna on a 40 foot tower with the two rear elements askew due to high winds last month. On 160 and 30 meters he uses a fan inverted vee dipole at 35 feet.

He sent this final note: "Just worked A35UD on 10.108 MHz at 1010 UTC. Too bad I gotta go to work now!"

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for April 25 through May 1 were 93, 104, 100, 97, 136, 165, and 151, with a mean of 120.9. 10.7 cm flux was 119.2, 121.9, 127, 131.7, 142.4, 154.4, and 159.2, with a mean of 136.5. Estimated planetary A indices were 8, 17, 6, 5, 5, 7, and 21, with a mean of 9.9. Estimated mid-latitude A indices were 14, 18, 6, 4, 5, 6, and 16, with a mean of 9.9.

//
Mile High Radio Club Connects the Hill: Bill Baker Longtime Instructor:

Posted: 03 May 2013 05:41 AM PDT
http://www.eham.net/articles/30130

Since 1989 the nonprofit Mile High Radio Club has connected the Hill. First formed as a social club for individuals interested in amateur radio, Mile High Radio Club very soon recognized the role it could play in communication during disasters, especially given the isolation of Idyllwild and the San Jacinto mountain communities. The club also provides radio communication for nonemergency events such as this weekend's Idyllwild Spring Challenge and the annual Jazz in the Pines festival.
Former president, longtime Mile High Radio Club member and radio instructor Bill Baker, played a pivotal role in expanding the number of club members and advancing their radio operator skills and license levels through training and classes he offered. An advocate for disaster preparation, Baker has also been instrumental in expanding the reach of the club's communication. He pushed for installation of a repeater that gives the club and its sponsored governmentally administered affiliate Mountain District RACES (Radio Amateur Civil Emergency Service) communication to and from points as far away as Santa Barbara and San Diego.

//
Longtime Volunteer Al Fox has Helped Tri-State 20-Plus Years:

Posted: 03 May 2013 05:39 AM PDT
http://www.eham.net/articles/30129

ENID, Okla. -- Tri-State Music Festival officials are good about noting the support of the Enid community in maintaining the festival, which began in 1932. Al Fox is one of the longtime volunteers. As part of Enid Amateur Radio Club, Fox has worked more than 20 Tri-State Million Dollar Parades, helping to keep things moving along. Fox moved to Enid 32 years ago and raised his family here. His three children went through Enid schools and performed in Tri-State, and two grandchildren, so far, have done the same. One performed this year. Fox said when he started working with the parade there were about 80 bands involved. The number has declined since then, as the festival has changed throughout the years. "Part of ham radio is public service. We help with the parades and events, and Tri-State is a natural fit," Fox said.

//
Boston Marathon Volunteer, Harold Kramer WJ1B, Speaks May 6:

Posted: 03 May 2013 05:37 AM PDT
http://www.eham.net/articles/30128

Boston Marathon volunteer communications worker, chief operating officer of ARRL and QST publisher Harold Kramer will speak on Monday, May 6, at the senior center, 120 Cedar St. (CT Route 175) Newington at an open-to-the public meeting of NARL, the Amateur Radio Club of the Capitol Region. Kramer is an FCC licensed Amateur Radio Operator WJ1B and his communications assignment was with the Medical Group at the Finish Line. Admission is free. Says Mr. Kramer, "Specifically, I was assigned to shadow Boston Marathon Medical Director Chris Troyanos and relay messages back and forth to him from the Course Communications team." He brings us an eye-witness account from an radioman's perspective.

SARL NEWS SUNDAY 05 May 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

SILENT KEYS

It is with regret that it must be announced that the keys of two radio amateurs have become silent. They are:

Des Classen, ZS5CJ,on 28th January following poor health for a considerable time. He leaves his wife Corinne, Son and Daughter Gavin and Sandy and 5 grandchildren.

Des Woods, ZR4DRW, on Sunday 28 April.

Our sincerest condolences to the relatives and friends of the deceased.

(PAUSE)

IN THE NEWS TODAY:

JOIN THE SARL AND GET MAY AND JUNE ON THE HOUSE

SARL COUNCIL

YOUTH WEEK 2014

SA AMSAT SPACE SYMPOSIUM

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

JOIN THE SARL AND GET MAY AND JUNE ON THE HOUSE

Join the SARL this week, pay the 2013/2014 rate and get May and June on the house. The rate for full membership is R430 and for seniors R240. A senior member is a person over 65 years of age. To join the SARL, visit

www.sarl.org.za or call the office on Monday on 011 675 2393. Full and senior membership includes access to all SARL services such as Radio ZS, the QSL bureau, Members only web access and access to two frequencies in the 5 MHz band and to 472 kHz which are dedicated channels for SARL members who wish to take part in propagation studies.

SARL COUNCIL

In last week's SARLNEWS some councillors were not listed. The full council for 2013/2014 is: President: Rassie Erasmus, ZS1YT, Vice President: Geoff Levey, ZS6GRL, Secretary: Fritz Sutherland, ZS6SF, Treasurer: Riaan Greeff, ZS4PR, Councillors: Hans van de Groenendaal, ZS6AKV, Dennis Green, ZS4BS, Laurie Devereux, ZS5DL, Fred Scheepers, ZS1FCS, Frik Wolff, ZS6FZ, Johann Marais, ZS1JM, Gideon Jannasch, ZS4GJA, Gerhard Coetzee, ZS3TG, and Jaco Le Roux, ZS6PX. Details of the various portfolios and appointees will be available on the web and will be published in the next SARL letter due during this week.

YOUTH WEEK 2014

The SARL is planning to hold a Youth Week in mid February 2014 to coincide with the ARRL School Club Round-up from 11 - 15 February 2014. SARL's newly appointed youth councillor, Gerhard Coetzee, ZS3TG, is looking for input and suggestions on the type of activity young Amateurs in South Africa would like to see included. Send your suggestions to youth@sarl.org.za before the end of May. Your suggestion could win you a lucky dip amateur radio book prize.

60 METRES ALREADY GOING STRONG

The registration for access to 5 MHz and 472 kHz opened on 1 May. A large number of SARL members have already registered to have access to the 5 MHz band. The activity frequency is 5 260 kHz USB and QSO's are taking place across the country. Full details on how to join the activity can be found on www.amateurradio.org.za/propresearch.htm. Reception reports of QSOs heard are also invited. Send your reports to propresearch@sarl.org.za.

All stations operating on 5 260 kHz are requested to include their locator code so that these details can appear in the logs. If you are submitting a SWL report, please include the callsigns, locator code and signal report of both stations.

SA AMSAT SPACE SYMPOSIUM

The early bird registration period for the SA AMSAT Space Symposium to be held at the Innovation Hub in Pretoria on Saturday 18 May is running out this week. Register now and enjoy the lower rate. Full details can be found on www.amsatsa.org.za.

Did you know that OSCAR 7 is the oldest amateur satellite still operating? It was launched in 1979. Eddie Leighton, ZS6BNE, will take delegates on a historical journey in his presentation "living the

dreams of our space pioneers." Deon Coetzee, ZR1DE, will share his experiences developing a 14 MHz receiver to receive signals from the soon to be launched ZACube satellite. The programme is packed with interesting papers to cater for all levels of interest and experiences. All attendees will receive a CD with all the presentations and other interesting material. Want to control antennas, Frik Wolff, ZS6FZ, will tell you all about it. Register now at www.amasatsa.org.za.

SEATTLE WILL HOST THE 32ND DIGITAL COMMUNICATIONS CONFERENCE

Digital communications enthusiasts will be heading to the Pacific Northwest of the USA in September for the 32nd annual ARRL/TAPR Digital Communications Conference (DCC), September 20-22, at Cedarbrook Lodge near Seattle, Washington. The ARRL/TAPR DCC is an international forum for radio amateurs to meet, publish their work and present new ideas and techniques. Presenters and attendees will have the opportunity to exchange ideas and learn about recent hardware and software advances, theories, experimental results, and practical applications.

The DCC is for all levels of technical experience - not just the expert. Introductory sessions are scheduled throughout the conference to introduce new technical topics for both beginners and experts. Get more details from www.arrl.org.za. If you are planning a trip to the USA, this is the time to do it!

2013/2014 MEMBERSHIP FEES

At the 2013 AGM the members approved the proposed increase of membership fees. New members are invited to register now and receive May and June membership free. The Treasurer, Riaan Greeff, ZS4PR, has also announced that members may, by prior arrangement, be allowed to make down payments should they find it difficult to pay the full amount. Breaking the payment into 2 to 4 monthly installments eases the financial burden on our members. Installments must be arranged and confirmed by sending an e-mail to admin@sarl.org.za. Members who use this option, are requested to be fully paid up by the end of November, else they may not have voting rights at next year's AGM. The Treasurer challenges the members to convince other non-members to also join the SARL. Should he find that membership has still grown, he will commit to no increase, or even a reduction of membership fees proposal at the 2014 AGM. The financial condition of the SARL is stable and by just having more members, the in

come will still carry the activities and expected expenses.

APPLICATION OFr. MEMBERSHIP

The SARL has received an application for membership from Ken Gurr, ZS6KN.

CONTEST NEWS

ZS3 Sprint. The ZS3 Sprint is on the air this afternoon from 14:00 to 15:00 UTC or 16:00 to 17:00 CAT. It is a phone and CW contest on the 40 metre band. The exchange is RS or RST report and provincial or country abbreviation.

ZS3 stations score 1 point for contacts with stations in ZS3 and 2 points for contacts with stations in other ZS call areas or Southern African countries. All other stations score 2 points for a contact with a station in ZS3 and 1 point with a station in their own or other ZS call areas (excluding ZS3) or Southern African countries. Contacts with the Northern Cape ARC, ZS3NC, Namaqualand Aero Sport Association, ZS3FLY, the Sutherland ARC, ZS3OBS, and the Kalahari Karoo ARC, ZS3ARK, are worth 5 points each. Only one contact per station is allowed.

Log sheets must be submitted by 13 May and sent by email to zs3nc@qsl.net. A certificate will be awarded to the 1st, 2nd and 3rd place in the competition.

Antique Wireless Association AM/SSB Valve QSO Party: This is a phone contest held over 2 sessions on Saturday 11 and Sunday 12 May 2013.

On Saturday afternoon 11 May, 15:00 to 19:00 SAST the AM section will be held with Contacts on both the 40 m and 80 m bands.

On Sunday 12 May from 15:00 to 19:00 SAST the SSB section will be held with contacts on both the 40 m and 80 m bands.

Frequencies - 40 metres: 7,053 to 7,100 MHz and 80 metres: 3,603 to 3650 MHz

Exchange - Call sign, RS and consecutive serial numbers starting at 001, plus type of radio used, eg HT37 Tx.

Points scoring: All valve radio - 3 points per contact; Hybrid (valve & solid state) - 2 points per contact; Solid State Radio - 1 point per contact. Multiplier - All valve radio - 3 points per contact; Hybrid (valve & solid state) - 2 points per contact; Solid State Radio - 1 point per contact.

Certificates will be awarded to the first three places in each category.(AM/SSB) A 10 year anniversary QSL card will also be issued to all who send a QSL with a SASE to the AWA.

All logs to be submitted to: Southern African Antique Wireless Association, PO Box 12320, Benoryn,1504. E-mail: andy[dot]cairns[at]xsinet[dot]co[dot]za. Closing date for log submissions: 31 May 2013. Please refer to the SARL Contest Manual for any queries.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is increasing nicely. The sun is peppered with several large sunspots and AR1731 has an unstable, delta-class magnetic field that harbours enough energy for M-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 102.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be some good 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 5 May - This afternoon, ZS3 Sprint 14:00 to 15:00 UTC. Today onwards - Book for the SA AMSAT annual space symposium in Pretoria at the Innovation Hub on Saturday 18 May 2012, visit www.amsatsa.org.za. 11/12 May - 13 May - Log sheets for ZS 3 sprint to be in to zs3nc@qsl.net. 18 May - SA AMSAT SPACE SYMPOSIUM at the Innovation Hub in Pretoria. 31 May - Last day to submit suggestions on the type of activity young Amateurs in South Africa would like to see included in 2014 Youth Week programme. Send your suggestions to youth@sarl.org.za. 31 May - Last day to submit logs for the Antique Wireless Association AM/SSB Valve QSO Party to andy.carns@xsinet.co.za. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 025, and 17 570 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za.

Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Students Help Celebrate Defiant Radio:

Posted: 03 May 2013 05:11 PM PDT
http://www.eham.net/articles/30136

Students helped The Rochdale Pioneers Museum and the Rochdale and District Amateur Radio Society (RADARS) celebrate the Defiant Radio in a special fun day held at the museum last month. The event, which saw over 100 visitors attend, was designed to raise awareness of the history of the first modern media outlet and the co-operative movement's involvement in radio production. During the 1930s, dealers of radio sets were reluctant to work with the Co-operative Wholesale Society (CWS) because they saw the dividend Co-operative customers received when they shopped in the store (like a modern day version of a store card where members got money back for purchases) as a discount that undermined their fixed price monopolies. As a result the CWS began production of their own radios and deliberately chose the name 'Defiant' for them. Visitors to the event had the opportunity to record their own radio broadcast with the help of Hopwood Hall students, Matthew Hey and James Matthew. Both are currently studying for the Extended Diploma in Creative Media Production. Helping at the event was not only enjoyable but provided them with great work experience. James said: "I feel I have achieved a great deal from the work experience opportunity. Being able to interact with the public is different to being in college. I had a great day helping visitors and it was good to learn about the history of radio too."

//
Hollis Eugene Griffin, WA4JDL (SK):

Posted: 03 May 2013 05:10 PM PDT
http://www.eham.net/articles/30135

Hollis Griffin was a great communicator all his life, even if he was sometimes a silent party in the connection. Born in the South Georgia town of Holt in 1925, Hollis Griffin was a quiet kid who grew up with a passion for math and softball. He excelled in school, but never bragged about his accomplishments. "It wasn't important to him to get recognition," said his brother, Shirley Griffin of Macon. "In softball, he wanted to win, but he didn't promote himself and would generally promote someone else," he said. "He never wanted to be the top student, but he wanted to know as much as that student." Hollis Griffin wanted to be a pilot in the service, according to his brother, but a broken ear drum prevented that. Griffin

became a radio operator with the Army Air Corps, forerunner to the U.S. Air Force, during WWII, where he was stationed in Newfoundland and the Azores Islands. His interest in electronics and putting things together was infused into his home life as well. Griffin, an avid ham radio operator, built his own radio room off the garage of his home, which included a 40-foot tower on the roof. A quiet man in a family of talkers, he also used that space as a solitary retreat. "Mom did a lot of the talking, but dad was the communicator and brought people together," said Reg Griffin. Hollis Eugene Griffin of Canton, formerly of Conyers, died at his home on April 26 from complications of Alzheimer's. He was 87. The body was cremated. A memorial service will be held at 3 p.m. Sunday, May 5 at Scot Ward Funeral Services' Green Meadow Chapel, also in charge of arrangements.

//
California City Incorporates Hams In Response Program:

Posted: 03 May 2013 05:10 PM PDT
http://www.eham.net/articles/30134

When a disaster strikes, amateur radio operators in the affected area are quick to mobilize. The result is invaluable communications services at a time when they are most needed. In some parts of the world, where the first-responder infrastructure isn't as robust as it is in the U.S., the hams step into that role, as seen in the aftermath of the Indian Ocean tsunami in 2004. Within the U.S., the role of hams usually is to provide supportive services, as they did in the aftermath of Superstorm Sandy last October, when hams helped the American Red Cross set up communications in numerous ad-hoc shelters established across the region, where commercial communications were rendered inoperable in many places.

NASA Smartphone Satellites Beam Clear Images of Earth:

Posted: 03 May 2013 05:10 PM PDT
http://www.eham.net/articles/30133

NASA's PhoneSats were an experiment to develop super-cheap satellites: The trio of Android smartphones NASA blasted into orbit recently have ended their journey by burning up in the atmosphere, but not before snapping shots of Earth -- and the pictures don't look too bad. The "PhoneSats" were a NASA experiment to develop super-cheap satellites and to determine whether a consumer-grade smartphone can be used as the main flight avionics of a capable satellite, NASA said. NASA says the three miniature satellites used their smartphone cameras to take pictures of Earth and transmitted these "image-data packets" to multiple ground stations. As part of their preparation for space, the smartphones were outfitted with a low-powered transmitter operating in the amateur radio band. Every packet held a small piece of the big picture. As the data became available, the PhoneSat Team and multiple amateur radio operators around the world collaborated to piece together photographs from the tiny data packets. Piecing together the photo was a very successful collaboration between NASA's PhoneSat team and volunteer amateur ham radio operators around the world. NASA researchers

and hams working together was an excellent example of Citizen Science, or crowd-sourced science, which is scientific research conducted, in whole or in part, by amateur or nonprofessional scientists. On the second day of the mission, the Ames team had received more than 200 packets from amateur radio operators. "Three days into the mission we already had received more than 300 data packets," said Alberto Guillen Salas, an engineer at Ames and a member of the PhoneSat team. "About 200 of the data packets were contributed by the global community and the remaining packets were received from members of our team with the help of the Ames Amateur Radio Club station, NA6MF."

Ham_Radio_Now_600.png

HAMRADIONOW.tv

Episode 76:

HamRadioNow Visits the KH6HME Hawaiian Beacon

Since the early 80's, Paul Leib KH6HME has been operating a VHF/UHF beacon system from the 8200-foot level of the 14000-foot Mauna Loa volcano on the Big Island of Hawaii. Every summer, band openings occur across 2500 miles of Pacific Ocean to the west coast of North America, and the beacons - at just the right altitude to enter the natural duct - tip off hams to this remarkable phenomenon. Then Paul would rush... make that crawl... up a rutted mountain road to make two-way contacts on bands from two meters through 10 GHz (well, they're still trying on 10 GHz).

Paul passed away last summer, but the beacon lives on, supported by a new club, the California Pacific Amateur Radio Club. One of the club founders, Fred Honnold KH7Y, gave us an extensive tour of the beacon, and we talked about Ham Radio in Hawaii in general.

N4B CALL TO ACTION CAMP OUT

SPECIAL EVENT STATION

Bert Adams Scout Reservation

218 Boy Scout Road

Covington, GA 30016

THE ATLANTA AREA COUNCIL, BOY SCOUTS OF AMERICA, will be holding their Call
to Action Camp Out from Friday, May 17 through Sunday, May 19, 2013 at Bert
Adams Scout Reservation, Covington, GA, east of Atlanta.

This camp out will have a Special Event Station to introduce the expected
5000 boys to Amateur Radio.

The station will be primarily active on Saturday, May 18, from sunup until
sundown.

To get a certificate, please send a qsl card (if available) with a SASE to
Elden Morris, N1MN. Information for N4B is on QRZ.com. I will be putting a
QSL book together for permanent display at the Atlanta Area Council
Headquarters.

For more information on the Call to Action Camp Out, please check this web
site: http://www.atlantabsa.org/campout-call-to-action/45393

73's,

ELDEN, N1MN

//
Dayton Hamvention MegALinK

Posted: 05 May 2013 05:26 AM PDT
http://forums.qrz.com/showthread.php?390202-Dayton-Hamvention-MegALinK&goto=newpost

Once again this year, K9NZF Systems☐ and the Chief Anderson Amateur Radio Club are proud to announce the Dayton Hamvention® MegALinK☐ special event wide area voice network for the 2013 Hamvention®. MegALinK☐ was conceived as a way to provide FM mobile voice coverage from central Indiana all the way to Dayton, Ohio, and now, in to and on the grounds of the Dayton Hamvention® itself!

After a successful trial run with a mobile simplex node in 2011, the on-site RF system has been upgraded to a stationary UHF VoIP-enabled repeater base station, providing coverage to Hara Arena and the surrounding area, with wide-area connectivity via EchoLink®, IRLP, and RF to the other three MegALinK☐ core RF sites in Indiana, as well as any other stations that may wish to connect.

Core Sites participating in the K9NZF Systems☐ MegALinK☐ are the following:

WA9EOC Repeater

444.675/449.675 Carrier Squelch/

IRLP Node 4465 - Primary IRLP Node - Open to All Stations

Anderson, Indiana

I-70 Coverage from East Indianapolis to approximately IN-3 (I-70 Exit 123 in Indiana)

K9NZF Repeater

443.325/448.325 PL 103.5 Hz

EchoLink® K9NZF-R (Node 443325) - Primary EchoLink® Node - Open to All Stations

Modoc, Indiana

I-70 Coverage from IN-3 (I-70 Exit 123 in Indiana) to approximately I-70 Exit 21 in Ohio

KB9RRN Link

443.325/448.325 DPL 325

EchoLink® KB9RRN-L (Node 541081) - Secondary EchoLink® Node - Open to All Stations

Greenwood, Indiana

Southwest Indianapolis Metropolitan Area Coverage

K9NZF Dayton Hamvention® MegALinK☐ On-Site Repeater

444.675/449.675 PL 131.8 Hz

Dayton, Ohio

HARA Arena & Immediate Coverage Only

The Dayton Hamvention® MegALinK☐ On-Site Repeater is intended for coverage at the Dayton Hamvention® and surrounding areas. All amateurs in route to or who are at the Hamvention® are welcome and encouraged to use the system to communicate with any other amateur on the system.

EchoLink® connectivity is also available to all interested stations, both single-user mode (PCs, tablets, and smart phones) and RF simplex links and repeaters through two EchoLink® nodes and one IRLP node. The primary EchoLink® node for stations wishing to connect is K9NZF-R, EchoLink® node number 443325. The secondary EchoLink® node for stations wishing to connect is KB9RRN-L, EchoLink® node number 541081. IRLP connectivity is available through the WA9EOC Chief Anderson Amateur Radio Club repeater by connecting to IRLP Node 4465.

It is recommended that stations wishing to connect over EchoLink® primarily connect to K9NZF-R (node 443325) as it features higher bandwidth capacity and serves as the hub of the Dayton Hamvention® MegALinK☐ system. K9NZF-L will be online as the Dayton Hamvention® MegALinK☐ On-Site Repeater, however it will not accept incoming connections in order to preserve all available bandwidth for the VoIP backhaul to the K9NZF Repeater master site. If all connection slots on K9NZF-R (node 443325) are full, please use the backup node, KB9RRN-L (node 541081).

Please make sure your EchoLink® or IRLP node is operating properly before connecting to the system. Stations connecting to the system whose nodes are operating improperly and/or causing unreasonable noise or interference (i.e. carrier-squelch operated repeaters or simplex nodes receiving co-channel or malicious interference) will be disconnected by the system control operators, and if necessary, permanently banned from the system.

Please direct any correspondence about the Dayton Hamvention® MegALinK☐ system to megalink@k9nzf.com, or visit our web site at http://www.k9nzf.com. Thank you for your interest, and we hope to hear you on the system!

See you at Dayton Hamvention® 2013!

//
RP68TG - Memorial station activity from May 3 to 9, 2013.

Posted: 02 May 2013 10:18 PM PDT
http://forums.qrz.com/showthread.php?389918-RP68TG-Memorial-station-activity-from-May-3-to-9-2013&goto=newpost

Within the National Memorial stations activity from May 3 to 9, 2013, RP68TG will represent the city of Nizhny Tagil. The TG suffix stand for "Tankograd", in English - "The city of Tanks". Almost every third armoured tank, took part in the World War the II, was built in our city. For more information please follow http://uralvagonzavod.com/corporation/history/ .

QSL manager is RK9DC, cards will be sent 100% according to the log.

Warmest Greetings, 73's!

Alex/r9cb

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for 231 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9X, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FW, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J5, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ5, PY, PZ, R1FJ, S5, S9, SM, SP, ST, SU, SV, SV5, SV9, T7, TA, TF, TG, TI, TJ, TK, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9N, VP2E, VP2M, VP2V, VP5, VP8, VP8/h, VP9, VQ9, VR, VU, VU7, XE, XU, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZD8, ZF, ZK3, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

2013 AFD. In celebration of the 63rd anniversary of Armed Forces Day (AFD), the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test. Although

Armed Forces Day is traditionally celebrated on the third Saturday in May -- May 18th -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 11th to prevent conflict with the Dayton Hamvention, scheduled for May 17-19th. The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to stations making contact with the military stations. Military-to-amateur crossband operations will take place on the dates and time in UTC on the frequencies listed for the Army, Air Force and Navy/Marine Corps and Coast Guard MARS stations. Voice

contacts will include operations in single sideband voice (SSB); some stations will use CW to provide the opportunity to check in by Morse code. Depending on propagation and staffing, some stations may not operate the entire period. Participating military stations will transmit on selected military MARS frequencies and listen for Amateur Radio stations in the amateur bands. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The annual Secretary of Defense message will be transmitted via digital modes, including RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 from certain stations. Check the MARS Armed Forces Crossband Test website for schedules and frequencies of participating military stations, including a list of stations that will be transmitting the annual Secretary of Defense message at:
http://www.usarmymars.org/home/announcements
Instructions on how to copy and submit the message are also included.

3D2, FIJI. Laci, HA0NAR, will be active as 3D2AR from Viti Levu Island (OC-016, WLOTA 0055), in the Fiji Island group, sometime in October. Activity will probably be on all HF bands, 160-10 meters using CW, SSB and RTTY. QSL via his home callsign. For updates, watch:
http://www.ha0nar.hu

4J, AZERBAIJAN (Special Event). Look for special event callsigns 4J20RO and 4K20RO to be active until the end of the year. Operations seems to be mainly CW so far on 30-10 meters. Activity is to celebrate the 20th anniversary of the "Russian Centre of Science and Culture" in Baku.
QSL via 4J6RO.

4J/4K, AZERBAIJAN (WFF Op). Members of the "Safari DX-Activators Club" are planning to conduct a DXpedition to the Pirgulu Natural Reserve (WFF reference 4JFF-012, coordinates - 40 47'14"N / 48 34'43"E) between May 9-10th. This will be a first time activation (i.e. "new one").
Activity will be on 40-20 meters; possibly other bands - depending on local and propagation conditions. Two callsigns will be used for this operation: 4J0SFR - CW mostly (QSL via 4J5T)
4K6AE - PSK31 and RTTY mostly
Updated QSL info will be posted on QRZ.com.

9H25, MALTA (Update to OPDX.1110 - Callsign Change). Members of the Dutch Society of Radio Amateurs (VRZA Afd. Kagerland)club station (PI4KGL) will be active as 9H25Y (not 9H25 as first announced) from Qawra between May 20th and June 4th. The VRZA DXpedition Group had been issued the special callsign 9H25 by the MCA Malta Communications Authority's originally, but they changed their minds and gave them 9H25Y instead! They were not happy at all by this! The group also had to change their Web site! Please note the change: http://members.ziggo.nl/9h25y

A3, TONGA. Just a reminder that Masato "Masa", JA0RQV, will be active as A35JP from Tongatapu Island (OC-049) between May 5-22nd. Activity will be limited as Masa is there working for the Tongan government, so look for him possibly every night (local time) after his work. Operations will be on 80-10 meters using CW and SSB. QSL via his home callsign, by the Bureau or direct. For more info, visit Masa new Web page at: http://www.sato3.com/a35jp/index.html

CQ DX MARATHON (Announcing Version 13.1 - ADIF to DX Marathon Conversion Program). John, K9EL, DX Marathon Manager, reports on April 28th: "Today we are announcing a completely new version of the ADIF to CQ Marathon Conversion Program written by Jim, AD1C. Version 13.1, which is now available for download, is a significant enhancement of the previous ADIF conversion program. Version 13.1 creates a completed DX Marathon score sheet from your ADIF file no more copy/paste required.
Version 13.1 will only work with the Excel version of the DX Marathon Score Sheet version 2013.5 or later, so please delete any copies of earlier score sheets you may have. The latest scoresheet can be downloaded here: http://www.dxmarathon.com/Submission/2013/Submission2013.htm
Although this new program has been thoroughly tested, there may still be bugs and we would appreciate hearing about any issues. As always, this program is a tool to assist you in submitting your DX Marathon score you must review the final output and the author assumes no responsibility for any errors or omissions in your submission.
Version 13.1 of the program can be downloaded here:
http://software.ad1c.us/marathon
I wish to recognize the superb efforts by Jim, AD1C, in creating this excellent DX Marathon tool..... 73, John K9EL DX Marathon Manager"
Join the DXMarathon Group on Yahoo Groups!

CR5, PORTUGAL (Castle Op). Members of the "Clube Radioamadores do Entroncamento" (CRE) will use the special callsign CR5AT on May 18th from Amieira do Tejo Castel (WCA reference CT-0086, DCFP reference C-086, DMHP reference PG-010 and DMP reference 1212 for the Portuguese Castles Award). Operation will be on the HF bands using CW, SSB and Digital modes. Amieira do Tejo Castel is located in the Province of Portalegre. QSL via CS5CRE.
CRE Web Page: https://sites.google.com/site/radioamadoresentroncamento
CRE FACEBOOK Page: https://www.facebook.com/groups/cs5cre

DAYTON HAMVENTION NEWS (DX Activities Featured at ARRL EXPO). The ARRL Letter reports this week: "The ARRL will present a variety of DX activities as part of the ARRL EXPO -- the ARRL's 'show within a show' at the 2013 Dayton Hamvention, to be held May 17-19th at Hara Arena, near Dayton,

Ohio. Activities will include DXCC card checking and the opportunity to drop off QSL cards for the ARRL Outgoing QSL Bureau, as well as to apply for awards, such as the IARU Worked All Continents Award, the IARU Region 3 Operating Award and several awards administered by the Japan Amateur Radio League. In addition, representatives from the International Amateur Radio Union and several IARU Member Societies will be on hand within the EXPO area." For complete details, see:
http://www.arrl.org/news/dx-activities-featured-at-arrl-expo-at-the-2013-day
ton-hamvention

E5, SOUTH COOK ISLANDS (Update/75th FOC Op). Tony, ZL2AGY, who will once again be active as E51AGY from Rarotonga Island (OC-013) starting May 7th for about 24 days, announced on May 5th [edited]: "I may be active with this callsign [E51FOC] during the period May 9-29th, from Matavera, Rarotonga. This will be a holiday style operation, CW only, running my K3 barefoot. Note, I am a member of the 'First Class CW Operator's Club', which is currently celebrating its 75th anniversary during May. A QSO with an 'FOC' suffixed call will give you extra points for the award commemorating this event. See <www.g4foc.org> for details. My 'normal' Cook Islands call is E51AGY, which I may also be using. Hoping to see you on the bands....73, Tony"

FO, FRENCH POLYNESIA. By the time you read this, Al, KZ3AB, aboard the "MS Paul Gauguin", is expected to activate some of the Polynesian Islands as a portable set up on 40/20/15/10 meters SSB until May 13th. The islands mentioned are Moorea (OC-046, DIFO FO-010, WLOTA 0465), Tahiti (OC-046, DIFO FO-002, WLOTA 0885), Bora Bora (OC-067, DIFO FO-003, WLOTA 0430), Raiatea (OC-067, DIFO FO-012, WLOTA 1977) and Taha'a (OC-067, DIFO FO-013, WLOTA 3909). QSL via WA3EOP.

FT5Z, AMSTERDAM ISLAND (Press Release). The following press release was sent out by Ralph Fedor, K0IR, team leader of the January 2014 Amsterdam Island (FT5ZM) DXpedition, on May 3rd [edited]: "Since our last Press release early last month, we have a great deal of news to report.
We have received the callsign FT5ZM. It is a good callsign and we thank the TAAF for their cooperation. Two new team members have joined the team of fourteen. They are Neil, VA7DX and Andy, UA3AB. Both men are veterans of many DXpedtions and add expertise to the list of operators.
Several more sponsors have joined in with their support, Spiderbeam, Cycle 24 Antennas, and Array Solutions. Array Solutions will be providing the new OM Power amplifiers for our low band operations.
The team will assemble in Perth, Australia, on January 10/11, 2014.
The DXpedition vessel Braveheart will arrive on January 12th, and loading of equipment and personal items will begin. The North Coast Radio Group of Western Australia, along with Alek, VK6APK, will be offering logistical support to the FT5ZM Amsterdam Island DXpedition Team. The VK6's will assist in obtaining masts, ground rods, electrical hardware, and some medical supplies. This will result in a substantial decrease in the bulk and weight of material that the team has to ship from the U.S. We plan to depart for the 9 day trip to Amsterdam Island on January 15th.
We are grateful to the growing list of DX Foundations, DX Clubs and

individual DXers who have contributed toward the DXpeditions expenses. NCDXF, INDEXA, ARRL/Colvin and several European based DX Foundations have made unusually large commitments. They are aware of the extreme cost of the venture at over 400,000 USDs. (see our budget on the website.) However, thus far, we have only raised just over 53% of the money that we need to complete this DXpedition. As payments on the vessel begin next month, we must ask the world-wide DX community for their support. Visit our website at: <www.amsterdamdx.org> and contribute whatever you can. We need your help.
Thanks... we will update you monthly until departure."

GH3, JERSEY. Members of the Jersey Contest Group from GJ2A contest station will activate the special callsign GH3IT between May 11-12th. The GH3IT callsign will be used for pile-up training purposes prior to major contests. Activity will be on all HF bands, with a focus on the the lower bands and 30/17/12 meter bands using CW and SSB. Operators mentioned are Paul/MJ0PMA, Mathieu/MJ0ASP, Phil/GJ4CBQ and Steve/MJ0ULE. The log will be uploaded promptly to LoTW and Clublog after each operation. Use the OQRS for direct and Bureau cards (Your QSL is not needed) at: https://secure.clublog.org/logsearch/GH3IT

HC8, GALAPAGOS ISLANDS. By the time you read this, Daniel, DL5YWM, who was active as HC3/DL5YWM from Isla Jambeli (SA-034) this past week, should be active as HC2IWM/8 from Santa Cruz Island (SA-004) in the Galapagos Island group until May 11th. Activity will be holiday style on 40-6 meters using CW and SSB. QSL via his home callsign.

HD8, GALAPAGOS ISLAND (A Rare Prefix To Be Activated!). Operators Alex/HD2A and Alberto/HC2AQ will be active as HD8A from Santa Cruz Islands (SA-004, WLOTA 1667, WWFF HCFF-004), Galapagos Islands, for 4 days starting May 15th. Activity will be on the HF bands using a TS-590 with an amp into a TH6 beam and wire antennas. QSL via HD2A, direct only (QRZ.com).

HONDURAN IOTA EXPEDITION. Dan, HM2DMR, plans to activate the following Honduran IOTA Islands between late May to July (dates depend on Navy permission: NA-223 • Vivorillos (callsign HQ8D), NA-035 • Santanilla (callsign HQ8S) and NA-160 • Cochinos (callsign HQ3W). He states, "It's likely that Cochinos NA-160 will be activated first, around the period May 28-31st. Callsigns have been requested and currently tentative. Activity will be on 160-10 meters. For more details and updates, watch: http://hriotas.com

IOTA NEWS.....
AS-073. A Web page, with pictures, video and wrap-up of the recent Malaysian Special Expedition Team's activity as 9M2SE from Perhentian Besar Island between May 1-3rd, is now available at:
http://9m2pju.blogspot.com/2013/05/9m2se-perhentian-island-iota-as-073.html

AF-109. (New IOTA) The DX-World.net reported on Sunday, May 5th: "FLASH NEWS @ 0830z • The SU8N [Nelson's Island] team are currently QRT due to a broken generator. They plan to return

to the island but no firm time-frame has been set. Update to
follow.."

EU-009. Operators Pierre/ON7PC and Fred/ON6QR will be active as MM/ON6QR
from Orkney Islands, West Mainland, during the RSGB IOTA Contest
(July 27-28th) as a Multi-Op/All-Band/All-Modes/Low-Power entry.
QSL via the home callsign.

EU-010. Paul, M3KBU, will be active as MM3KBU/p from South Uist Island
(IOSA OH03, SCOTIA HI06, WLOTA 2972), Outer Hebrides, between
July 26th and August 2nd. Activivty will include the RSGB IOTA
Contest (July 27-28th). QSL via M3KBU, direct only (QRZ.com).

EU-023. Bruno, F4CZU, will be active as 9H3ZU from Gozo Island, Malta,
between May 11-18th. Activity will be on the HF bands, probably
40-10 meters. QSL via his home callsign.

EU-038. Roland, DL1EAL, will be active as PA/DL1EAL from Texel Island
(WLOTA 0043) until May 15th. Activity will be holiday style
on 40-10 meters using 100 watts into vertical antennas. QSL
via his home callsign, by the Bureau or direct.

EU-043. Joakim, SA7BGN, will be active as homecall/p from Krokholmen
Island, an uninhabited island in the Skagerak Sea, between
May 5-8th. Activity will be on 40/20/17 meters on SSB using
a simple wire antenna and 100 watts. QSL via SM5DJZ.

EU-048. Members of the Club Radio Amateurs of Lanester [CRAL] (F6KPQ)
will be active as TM2BI from Belle Ile en Mer Island between
July 24-31st Activity will be on 160-10 meters using CW, SSB
and the Digital modes. They will also participate in the RSGB
IOTA Contest. Operators mentioned are Michel/F1SRC, Jean-Yves/
F4EHM, Gwena/F4FHZ, Mickael/F4FFZ, David/F4FDA, Jean-Fran&#xFFFD;ois/
F6DZD, Philippe/F6AUP, Chris/F5CBQ and Philippe/F5PHW. QSL
via F6KPQ, direct, by the Bureau and via LoTW. Visit their
Web page at: http://iota.f6kpq.org

EU-107. Members of the Babaow Island Gang will be active as TM0BIG
from Petite Island (DIFM MA055) between 0700z, June 4th and
1300z, June 5th. Operators mentioned are Gil/F4FET, Diego/
F4HAU and SWL Ludo. Activity will be on 40/20/17/15/10 meters.
QSL via F4FET.

EU-172. Noel, OO4O, will be active again as OZ/OO4O from Langeland
Island (WLOTA 0590) between May 19-25th. Activity will be
mainly SSB/CW on the HF bands. QSL via LoTW and the Belgian
QSL Bureau.

SA-060. (Update) Operators Renato/PY8WW, Ewerton/PY8AA, Fernando/PU8WZT,

Ronaldo/PS8RV, Pedro/PR8ZX and Gabriel/PU8RGV will be active
as PX8Z from Cotijuba Island (DIB PA-14, ARLHS-278, DFB PA-13,
WLOTA 2855) between July 26-28th. Activity coincides with the

RSGB IOTA Contest weekend. Operations will be on all bands
using CW and SSB. QSL via PY8WW.

KH9, WAKE ISLAND (Press Release). Joe, W8GEX, sent out the following
press release on May 5th [edited]: "Press Release #3 - Wake Atoll
Commemorative DXpedition -- The Wake Atoll commemorative team's operation
at the beginning of October, 2013 is progressing nicely.
The initial phase of the operation, planning, is essentially complete
and the Team has moved into equipment procurement and staging operations.
The equipment will be pre-staged in California and Hawaii prior to trans-
port to Wake. Staging, pre-testing, packing, and shipping under the
direction of Tom, ND2T, and Kimo, KH6U, are major undertakings for DX-
peditions and are essential to assure equipment arriving on-time and
safely on Wake.
Our support Team has been expanded to include these additional Pilot
Stations: Hiroo, JA1WSX (Japan/Asia); Stan, KH6CG (Oceania) and Rich,
KY6R (USA). Additionally, Val, NV9L, has agreed to be the chief pilot
for the operation. As mentioned in the previous release, this support
Team is an essential part of the DXpedition's operation. The information
they gather from the DX communities' feedback during the event, allows
the 'on island team' to adjust their activities to meet changing band
conditions and optimize QSOs worldwide.
Stu, K6TU, will be developing in-depth propagation summaries which will
be posted on our website and Don, N1DG, has been guiding the team on
Logistical issues.
The Team wants to thank the DX Community, including generous worldwide
Foundations and Clubs, equipment manufacturers and outlets for their
outstanding support of the Wake Commemorative efforts. These DXpeditions
are extremely expensive and could not be accomplished without the support
of the entire DX Community. Please visit the <wake2013.org> website to
view our Sponsors and make your personal donation.
Please check our website often for updates. http://www.wake2013.org/
73, K9W Wake Atoll Management Team"

OA, PERU. DXer and World Traveller Vlad, UA4WHX, is currently active as OA4/UA4WHX from Peru. His length of stay is unknown at this time. Activity has been on 30/17/12m RTTY. QSL via details on QRZ.com.

OW75, FAROE ISLANDS (75th FOC Event). Carsten, OY1CT, will be active as OW75FOC from Faroe Islands during the month of May, to celebrate the 75th anniversary of the "First Class CW Operators' Club". Activity will be on the HF bands. QSL via OY1CT.

QSLS RECEIVED VIA MAIL: 9M4SLL, EA9/DL2RNS, HD2A, PJ7AA, PT0S, T2TT, TB4/DJ7RJ, VK3TZ/3, XR0YG, XV1X, XW4XR, ZK3T and ZL9HR

QSLS RECEIVED VIA THE BUREAU: 4L5O, 5X4DEL, 6W/AA1AC, 8P1A, AL9A, CR3E, CX1AA, E4/OM2DX, EY8/K4ZW, FM5WD, HI3/W1JNZ, HT2N, HZ1DX, IS0/OM3PC, J79UN, JY4NE, KH2L, KL1V, KL2RD, KL5E, KL7GLL, KL7IWC, NP2L, OX3PG, P40A, P40M, P41USA, PJ2T, PJ2/K2NV, PJ2/W8QID, PJ2/W9VA, PJ4W, PJ4/W9NJY, PY0FF, SV9/OM4KK, TF/OM5CD, UK8FF, V85TX, VP5/NE7D, VP5/K9PPY, VQ90JC, VQ99JC, YB0AZ, YI9AJ, ZF2DF, ZK2V, ZK2X and ZS6TQ

V3, BELIZE. Just a reminder that Bob, K4UUK, will be active as V31RD from Belize until May 18th. Activity will be on 80-6 meters SSB. QSL via his home callsign, direct (preferred) or by the Bureau.

V4, ST. KITTS (New Contest Callsign). John, W5JON/V47JA, informs OPDX that he has a new contest callsign for his vacation home in Calypso Bay, St. Kitts (NA-104, WW Loc. FK87SG). Look for him to sign V49J during the contests between July 9th and August 10th. His contest callsign is good until the end of the year, but he plans to renew it for two more years when he renews his V47JA and Cathy's, V47HAM for another two years this November. ALL QSLs go to W5JON direct or via LoTW. NO Bureau QSLs.

XR0, JUAN FERNANDEZ (Update/Press Release) [edited]. "After many months of careful planning, the XR0ZR team is pleased and proud to announce preparations for a multi-national Dxpedition to Robinson Crusoe Island in the Juan Fernandez Archipelago (CE0Z), using the callsign XR0ZR. It is our privilege to activate this entity during the period November 8–20th, 2013.
The Juan Fern&#65533;ndez Islands (Spanish: Archipi&#65533;lago Juan Fern&#65533;ndez) are
a sparsely inhabited island group reliant on tourism and fishing in the South Pacific Ocean, situated about 600 kilometers off the coast of Chile, and is composed of three main volcanic islands; Robinson Crusoe Island, Alejandro Selkirk Island and Santa Clara Island.
On the Club-Log's most wanted DXCC list, Juan Fernandez, CE0Z ranks as #35 on the most wanted list for all amateur radio operators, #23 on the most wanted list for Asia, #27 on the most needed list for CW operations, and #18 on the most needed list for Digital Operations.
The Team is meeting in Santiago, Chile, and will depart by a chartered aircraft on November 7th. The Team expects become active on November 8th.

The main goals of this DXpedition are to work every amateur radio operator
who needs Juan Fernandez, (CE0Z) for a new DXCC country. In addition, we
will be active on all bands and modes from 1.8 MHz to 50 MHz with special
attention to be made to accommodate distant stations during periods when
propagation permits. We are planning to have 4 stations running simulta-
neously and hope to make thousand contacts worldwide.
We are kindly seeking Club and Individual Sponsors to help us defray
the costs of carrying out this important Dxpedition.
Our team will consist of the following Operators: Fabri-IW3SQY (Team
Leader), Franco-IZ8GCE, Paolo-IV3DSH, Josep-EA3AKY, Les-SP3DOI, Dino-CE3PG,
and Art-WA7NB.
We wish everyone good propagation and we hope that you enjoy working
the XR0ZR Team.
Thank you for your assistance in helping make this a world class
DXpedition. You can follow us on:
Website : http://www.juanfernandez2013.com
Facebook : https://www.facebook.com/groups/xr0zr/
Twitter : @xr0zr
73 de XR0ZR Team"

YE30, INDONESIA (Special Event). Members of the Organisasi Amateur Radio
Indonesia (ORARI) will be active as YE30P from Merauke between 0000z,
May 15th and 2400z, May 17th. Activity is to celebrate the 30th Anniver-
sary and Provincial Congress of "ORARI Daerah Papua". Operations will be
on all modes (CW/SSB/RTTY) by 2 stations on at the same time. QSL Manager
is YB9WR. All qsl card should be addressed ONLY to: PO BOX 1096, Jakarta
10010 Indonesia (see details on QRZ.com). For more details, see their
Web page at: http://ye30p.wordpress.com

YB8/YE8, INDONESIA (IOTA Op). Operators John/YB5NOF, Anton/YB5QZ Anton
and possibly two others will activate two IOTA islands in Indonesia.
The tentative days, callsigns and IOTAs are as follows:
May 16-19th - Callsign YE8P; Banggai Island (OC-208), located at the
far eastern end of Central Sulawesi, Indonesia.
May 22-26th - Callsign YB8P; Togian Island (OC-213), in the Gulf of
Tomini, off the coast of Central Sulawesi, Indonesia.
Watch the IOTA frequencies. QSL Manager will be announced soon.

Z8, SOUTH SUDAN (Mission Goodwill To Juba). Operators Olli/OH0XX and
Martti/OH2BH posted a press release/update on May 3rd, about their
operations in Juba on QRZ.com at: http://www.qrz.com/db/Z81X

Amateur Station Licence Examination

The next Amateur Station Licence Examination will be held on Thursday 4 July at 2.00 p.m. in the ComReg offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee on line are available at www.irts.ie/exam .There is also an exam button on the home page. Places for the examination are limited and will be allocated on a first come first served basis. Some applications have already been received. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. The closing date for the receipt of completed applications is Friday 14th June.

EI News

The first edition of the Society's new members-only electronic newsletter, announced at the AGM, has been sent to members who have registered their Email address with the Society. It is intended to publish on the first of each month. Final date for copy is five days before that. Short contributions are welcome particularly with photographs and web references about happenings in EI and abroad. The newsletter has a members' ads section. Copy should be sent to newsteam /at/ irts.ie. This new pdf publication will complement the Society's Journal, Echo Ireland. Any member who did not receive the newsletter should request a copy by providing their name, call sign and email address to memrecords /at/ irts.ie

---

IRTS AGM Awards

The names of the winners of trophies presented at the 2013 AGM are available at www.irts.ie/awards. Two new trophies were presented this year. The Oriel Trophy is awarded to the leading station in the 70 MHz restricted section of the IRTS VHF/UHF Field Day. The trophy, which was fabricated in the Louth Men's Shed in Seatown, Dundalk, was presented

to the Society by Peter Grant EI4HX and was awarded to Tom McDermott EI9CJ. The SDR Trophy is awarded to the leading station in the 50 MHz restricted section of the IRTS VHF/UHF Field Day. The trophy was presented to the Society by South Dublin Radio Club and was awarded to Oleg Solovyov EI7KD.

Shannon Basin Radio Club

The Shannon Basin Radio Club would like to thank all who attended Sundays rally including the traders, those who sponsored raffle prizes and of course all the individuals who took the time to visit the rally.. The club would also like to thank the management and staff of the Shamrock Lodge Hotel, Athlone for all their help and assistance over the weekend.

South Eastern Amateur Radio Group

South Eastern Amateur Radio Group will for the 6th consecutive year take part in the Geoparks Communications weekend which takes place over the weekend of 25th and 26th of May to coincide with European Geoparks week. The event is co-ordinated by Martin G3VOF of the Riviera Amateur Radio Club and awards are available for working Geopark stations including the main station GB6GEO. Although most activity is in Europe, a number of stations will be QRV from geoparks around the world.

SEARG will be QRV as EI2GEO from the Copper Coast Geopark in Co. Waterford. As the Geopark event is not a contest, operation tends to be relaxed with ample time and an ideal location to experiment with antennas. There is also a strong social aspect to the event with barbecue and drinks on the Saturday night. Activity will be mainly on HF (SSB and CW).

The Copper Coast European Geopark is located on the South East coast of Ireland.

SEARG would like to thank Paula McCarthy from the Copper Coast Geopark management for making this excellent site available to us over the past number of years. At the April meeting of the club Michael EI7GH gave a talk and a demonstration on how to construct homebrew traps and baluns. He had a great display of items in various stages of construction. This demonstration proved very popular and informative with those present and SEARG would like to thank Michael for the time and effort he undertook to do the demonstration. For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

Dundalk Amateur Radio Society EI7DAR

Dundalk Amateur Radio Society enjoyed their annual awards night during their monthly meeting on Wednesday May 1st, both members and visitors availed of the photo opportunities with the wide array of trophies collected at the IRTS AGM in Athlone.

Dundalk Amateur Radio Society will be operating EI7DAR/p all bands, all modes including data / rtty during Dundalk Agricultural Show on Sunday 16th June. SWL's and visitors will be made very welcome on the stand.

DX News

Daniel DL5YWM was QRV last week from Isla Jambeli off the coast of Ecuador signing HC3/DL5YWM. This activity counted as SA-034 for the Islands on the Air Award. He has now travelled on to a new location and is active from the Galapagos Islands. Here he is signing HC8/DL5YWM and counts as a separate DXCC entity and a reference of SA-004 for IOTA.

Martti OH2BH and Olli OH0XX are at present in South Sudan and on the air as Z81X. The first activity from here was as ST0R following independence from Sudan in 2011. Since then there has been sporadic activity from stations such as Z81A, Z81D and Z81Z. The current activity by Z81X is resulting in big pile-ups. Length of stay by Martti and Olli is unknown.

Rich KE1B and Anna W6NN will be holidaying on the island of Anguilla from 9 - 16 May. While there they will use the callsigns VP2EAQ and VP2EAR. They hope to be QRV on all bands 40 - 10m. Later in the summer they will visit the Canary Islands as EA8/W6NN and Malta as 9H3NN.

An unusual expedition will take place on the island of Reunion on 11 - 12 May. A group of local amateurs will be active as TO1PF from the peak of the local volcano. The location is a UNESCO world heritage site. QSL Manager is FR1GZ.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Ham Radio Operators Can Play Crucial Role During Weather:

Posted: 04 May 2013 06:10 PM PDT
http://www.eham.net/articles/30140

DANVILLE -- Last year, three major storms hit our area, causing widespread and long-lasting power outages. These weather events also hampered communication efforts and delivery of up-to-the-minute information difficult, especially in rural areas of the county. "We had a major storm in March, June and in late October of last year," said Kevin Dalton, a Boone County 911 operator and the District Emergency person for Boone County's amateur radio operators. "These storms had a devastating effect on emergency communications in Boone County, as all of the county repeaters where not working." Dalton said the county was having to dispatch by cell, landline phone and by hand held radios. "With all of the power outages, not all of the local fire departments had back-up generators, so this was a big problem not only for the fire departments, but for the people who lived in the affected areas," he said. "There were parts of the county that were totally cut off from the outside world for several weeks."

//
Cell Phone Outages in Boston Highlight Ham Radio Use:

Posted: 04 May 2013 06:08 PM PDT
http://www.eham.net/articles/30139

Tragedy brings cell phone outages during Boston Marathon incident, but ham radio just keeps on working. Runners weren't the only thing stopped at the 2013 Boston Marathon following the bombing -- cell phone operation screeched to a halt as well. The untold story of the marathon is how nearly 240 volunteer amateur radio operators handled communications for the event. A ham radio network or "net" was established to pass traffic (on-air information or data) between operators stationed at checkpoints throughout the course and the net control operator. Radio operators keep the event going by communicating injuries, equipment breakdowns, needed supplies, even race updates on leaders and slowpokes. But when two bombs were detonated at the Boston event, the race was halted. Soon the cell phone networks became overloaded and quit working. "Many runners don't carry cell phones, and they were desperately trying to use anyone's phone, including mine, to call their loved ones at the finish line," wrote ham radio operator Tim Carter, W3ATB. "Everyone was getting a busy signal. That could have happened because the cell networks were overloaded, or because

officials turned off the cell towers. "The bottom line is there were several hundred people who were able to continue to communicate during the disaster. Police, fire and others like me who had radios were still talking," Carter said.

//
Sun Unleashes Spectacular Solar Eruption Unleashes (Photos):

Posted: 04 May 2013 06:06 PM PDT
http://www.eham.net/articles/30138

An intense solar storm erupted from the sun on Friday (May 3) in a dazzling space weather display captured by a NASA spacecraft. The solar flare erupted from the edge the sun, with NASA's powerful Solar Dynamics Observatory snapping photos of the sun storm. The flare peaked at 1:32 p.m. EDT (1732 GMT), registering as a relatively medium-strength M5.7-class event. Friday's solar storm was the second major space weather event in three days, but was not aimed at Earth. According to astronomer Phil Plait, who chronicled the flare on his Bad Astronomy blog, the solar storm launched super-hot solar plasma about 120,000 miles (200,000 kilometers) above the surface of the sun before it faded from view.

RAC Bulletin 2013-017E - Radio Amateur of the Year for 2012
2013-05-04

The RAC Board of Directors takes great pleasure in announcing the selection of Scott Wood, VE1QD of Halifax, Nova Scotia, as the Canadian Radio Amateur of the Year for 2012.

Scott celebrated sixty years in Amateur Radio in 2012. Over these years he has contributed enormously, and in many and varied ways both to our hobby and to radio in general. In his youth as a net controller in the Oregon State Fire Service, later as a radio operator in the US Naval Reserve, as a member of the Board of Directors for Radio for Peace International, in contesting and DXing, and in Elmering aspiring new hams, both young and old. However, it is the leadership in Amateur Radio that Scott has demonstrated locally, regionally, and internationally that is being recognized with this award. Scott has demonstrated vision, enthusiasm, dogged determination, and commitment to excellence in the area of Amateur Radio DXing through the establishment and management of the Maritime DX Forum for eight consecutive years. Scott envisioned the forum to be a venue where DXers in the region could come together annually to hear world-class, as well as local DX experts speak about important and current DX topics, and to provide a forum in which to share ideas with some of the best operators and leaders within the Amateur Radio community.

A presentation will be made to Scott by the RAC President at the RAC booth at the Dayton Ham Fest this month. A more detailed article will appear in an upcoming TCA/RAC Report

Brit Fader Scholarship Trust Announces Call for Applications
2013-05-05

The Brit Fader Scholarship was established in 1993 by the Halifax Amateur Radio Club and endowed through the generosity of Club members and Radio Amateurs throughout the Maritime Provinces of Canada. This scholarship is intended exclusively for post-secondary educational use, to provide assistance with the cost of tuition, room, board, books and/or other fees essential to the advanced education of the recipient. The amount of the 2013 award will be $1000.00.

Applicant must be a Canadian Citizen, but without regard to gender, race, national origin, handicap status or any other factor and must be performing at a high academic level.

Applicant must, hold an active Basic Class or higher grade of Canadian Amateur Radio license.

This Scholarship will be provided for attendance at an accredited Canadian post-secondary technical school, college or university, with preference given to applicants who have been accepted into a program in the field of electronics or electrical engineering, or related area.

Application submissions must be postmarked no later than July 12 th , 2013.

A zipped application package (Criteria; Application Form; Reference Form) is available for down-loading from the HARC website at www.Halifax-arc.org. Follow the link to the Brit Fader Scholarship from the Home Page under Education .

Hamfest Chattanooga October 26th 2013!wAYNE

Posted: 04 May 2013 04:39 PM PDT
http://forums.qrz.com/showthread.php?390155-Hamfest-Chattanooga-October-26th-2013!wAYNE&goto=newpost

Hamfest Chattanooga is in its 34th year! We moved to a new venue this year, Alhambra Building.

Come to Chattanooga in the fall! Beautiful scenery and gateway to the mountains.

Remember Rocky City, Ruby Falls and the Incline? Bring your family to make some new memories.

Friday setup 3 pm until 8 pm, early Saturday setup 6 am, doors open at 8 am. Show is over at 3 pm when the final prize is drawn.

Good food and good friends.

Admission is $5 per person which includes one prize ticket, parking and admission arm band.

For dealers we suggest preregistration for this show!

Inside tables are $15 and most will be 8 ft long. Outside flea market spaces are $5.

# Weekly Highlights and Forecasts
#
Highlights of Solar and Geomagnetic Activity
29 April - 05 May 2013

Solar activity reached high levels this week when Region 1739 (N13,
L=75, class/area=Dac/150 on 03 May) appeared on the east limb and
unleashed an M5/Sf flare on 03 May at 1732Z. The flare was
accompaned by Type II (1297 km/s) and Type IV radio emissions. A
coronal mass ejection (CME) was subsequently observed in LASCO/C2
coronagraph imagery at 03/1748Z and also in STEREO-A and B COR2
imagery. Region 1739 was also responsible for an M1/Sf flare at
05/1756Z. The most prolific active region of the week was, by far,
Region 1731 (N09, L=187, class/area=Dkc/420 on 28 Apr) with 17
C-class and two M-class flares to its credit. By 30 Apr, Region 1731
had developed beta-gamma-delta magnetic characteristics which it
mainteined through 03 May. During this period it produced an M1/1n
flare at 02/0510Z and a long duration M1/2n flare at 03/1655Z. The
02 May event was associated with a tenflare (159 sfu), a Type II
emission (703 km/s), and a CME first seen in LASCO/C2 imagery at
02/0524Z. The majority of the ejecta was directed north of the
ecliptic, but output from the WSA-Enlil model suggested a possible
scrape from the CME on 06 May. The 03 May event was not associated
with a CME.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at
high levels on 29-30 Apr and 03-04 May.

Geomagnetic field activity reached ensettled to active levels
beginning late on 30 Apr and lasting through 02 May. This activity
was in response to the presence of a recurrent negative polarity
coronal hole high speed stream. On 01 May, activity reached major
storm levels at high latitudes. Activity returned to quiet levels
early on 02 May. Conditions were quiet, with the exception of one
unsettled period during the latter half of 05 May with the arrival
of a corotating interaction region in advance of a positive polarity
```

recurrent coronal hole high speed stream.

Forecast of Solar and Geomagnetic Activity
06 May - 01 June 2013

Solar activity is expected to be at low levels with a chance for an isolated moderate or greater event for the extent of the outlook period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be high on 8-10 May and again on 24-31 May in response to recurrent coronal hole high speed streams.

Geomagnetic field activity is expected to be quiet to unsettled for the majority of the outlook period. Active levels are possible on 21-23 May in response to a recurrent coronal hole high speed stream.

NZART Headquarters Infoline Special Issue 39s

7 May 2013

NZART Website: www.nzart.org.nz

Dear Members,

Over the last year there has been an on-going difference of opinion between the majority of members of NZART Council and Fred Johnson ZL2AMJ over the copyright of the NZART examination question bank and Study Guide.

Your Council has been trying for some time to update the existing examination material on the NZART web site and has made some changes to examination questions (16 out of the 600), reflecting feedback from Branch examiners.

Fred Johnson ZL2AMJ initially agreed to work towards updating the whole examination package but subsequently decided not to do so, instead insisting that his “new” package should be adopted as the NZART examination system. Council had some reservations about adopting this package as ZL2AMJ insisted on having total control and also that it would not be hosted on the NZART web site.

I have received a letter from NZART Councillor Fred Johnson ZL2AMJ, along with a legal opinion that he has sought. The letter from Fred Johnson, and the legal opinion that he has sought are both attached. (Appendix 3 and 4 respectively). Members should note that we have only received part of the legal opinion and do not know what ZL2AMJ originally wrote, nor do we have the full text of the reply from Baldwins Law. A request for this information has been ignored by ZL2AMJ.

Fred is demanding that the NZART examination question bank have his copyright acknowledged. He is also demanding that we cease using what he asserts is his copyrighted title “The New Zealand Amateur Radio Study Guide” and the shorter “Amateur Radio Study Guide”.

In the letter from Baldwins Law Limited you will see a reference to an email from me dated 9 August 2012. In this email I said that I had received advice on the question of copyright and the essence of that advice was that we (NZART) did not hold copyright, that it resided with the owners of the intellectual property rights.

Subsequent to this email, other information has come to hand in the form of notes prepared by Fred Johnson in 2006 in which he clearly states that the question bank is the intellectual property of NZART, and details its complex origins and lists many of the contributors. I have also attached an e-mail from Fred to the then MED where the same position is taken. (appendix 1 and 2 respectively)

On the introduction page of the amateur radio study guide there is the following paragraph:

Please note: Every effort has been taken to make this STUDY GUIDE as accurate and as complete as possible. We're still working on it! The information is provided on a free as is basis. The compilers have prepared this information in good faith and accept no responsibility to any person or entity for any outcomes. Your feedback will help us to improve it.

There is no mention of copyright being attributed to any person or organisation and you can see from the wording above that input from multiple people is acknowledged.

NZART relies on the voluntary work of officers to prepare a variety of material that is used in its day to day operations. I am sure you share the same concerns that I have over the correspondence that NZART has received from Fred Johnson.

It is the intention of NZART council not to follow the demands of Fred Johnson. This infoline release has the majority support of your Council.

Vaughan Henderson ZL1TGC

NZART President

Appendix 1:

The Amateur Radio Examination and NZART’s part in it

Background to the amateur radio examination:

a. The present 600-question question-bank lineage can be traced back to questions brought forward from the NZPO in 1990 and revised and updated many times since. It has been developed by volunteers with professional experienced in examination work and in multiple-choice questioning in technical institutes and universities. Countless voluntary man-hours have been invested by many individuals. The present questions bear little resemblance to the handed-on 1990 questions.

b. The examination question-selection and examination paper preparation software has been written and developed by a volunteer with very specialist skills. Many precautions have been built-in to the examination software to ensure the security and integrity of the question-bank.

c. A 60-question examination paper is produced by a controlled random-selection from brackets of question-bank questions covering the approved examination syllabus. Each examination paper is unique, no two examination papers are the same. Each examination paper is given a printed-on examination number to identify the paper, the candidate's answer sheet and the correct-answer sheet.

d. The syllabus, question-bank and the examination preparation procedure have been submitted to and have received the approval of the Ministry.

e. The NZART examination paper preparation and testing system is used nation-wide, examinations being arranged as-and-when-required.

f. Each actual examination is supervised by two Examination Supervisors arranged with the candidate(s) at a suitable and mutually convenient agreed time and place.

g. Examination Supervisors are experienced radio amateurs generally nominated by NZART Branches on a local basis and the names submitted to the NZART Examination Coordinator who can make further enquiries and can accept or reject a nominee, deciding on persons with integrity.

h. As arranged in 1990, a representative from the Ministry is welcome to sit in and observe any examination.

i. The requirements when selecting a room for an examination and the examination room procedures to be followed are well documented and details can be provided.

j. Examination and contact information is provided on the NZART web site inviting potential candidates to arrange an examination when they consider themselves to be ready.

k. The software used for generating and printing each examination paper also prints a correct-answer sheet which is held confidential by the Supervisors and used after the candidate has completed the examination for "marking" a candidate's answer sheet. The printed examination paper numbers identify the documents.

l. Immediately following an examination, both Supervisors in private check the candidate's completed answer sheet against the confidential correct answer sheet and work out the candidate's result.

m. The examination result and the pass/fail decision are notified to the candidate on a specially-prepared notification form. If the result is a pass, the result form is used by the candidate to support an application for a callsign. Various precautions have been used to ensure the security and integrity of the result form.

n. The question-bank and the examination-paper preparation software are in the public domain, freely available for downloading from the NZART web site. Candidates are welcome to use the examination-paper

generating process for generating “real” examination papers for self-testing as a part of their preparatory studies.

o. The standard of the examination has been firmly established and continues from its NZPO origin as the sole New Zealand qualifying examination to become a radio amateur.

p. NZART has continued the running of this nation-wide standardised examination system with a successful 16-year service record. Any difficulties experienced have been rare and minor and promptly and satisfactorily fixed.

q. On accepting the national examination task, NZART recognises that the approval of the syllabus and the question-bank have remained with the Ministry.

r. The Ministry is regarded as “the examiner”, NZART being an agency running the examination on the Ministry’s behalf.

s. The examination-room “Supervisors” are administrators/invigilators of prepared examination material and by using a “correct answer sheet” for each candidate’s unique examination they are not “examiners” and do not themselves make pass/fail judgements on the correctness of the technical content of candidates’ answers.

t. NZART has appointed an “Examinations Coordinator” with facilities to handle the examination process.

Policy considerations:

1. Anyone or any organisation aspiring to set up a rival and parallel examination system is welcome to do so.

2. The parallel system is expected to be in the public domain and freely available to all.

3. The expectation is that the Ministry will approve and monitor the standard of the intended syllabus, the questions and the examination procedures.

4. NZART by its long involvement with the NZART examination question-bank and the examining process asserts intellectual property claims on the NZART website examination material.

5. An “MED-approved examining body” and “MED-approved examiners” outside the NZART system are welcome to negotiate an arrangement leading to using the examining material that can be downloaded from the NZART website and on payment to NZART of a licence fee to do so. A fee of $150 per attempting candidate to be paid in advance of the examination is the expectation. This fee includes a component for maintaining the website material.

6. If the NZART Examinations Coordinator is to process the examination results of successful candidates originating from outside the NZART examination system, further charges will be necessary based on the time and work involved.

(Prepared by ZL2AMJ, cleared by ZL2WP and others, 27 July 2006)

Appendix 2: e-mail from Fred Johnson ZL2AMJ to NZART council

>Subject: FW: Examiner Approval for Amateur Operator Certificates
>Date: Wed, 06 Dec 2006 10:42:30 +1300
>From: Fred
To: Council

Greetings All!

>From time-to-time someone, somewhere, with no NZART affiliation, seems to want to run exams for the Amateur Ticket using the NZART material from the web-site. The last time is documented below and in the document attached. Again, as is usual, nothing further has been heard!

This matter is being raised because, in checking a copy of the “New Rules Explained” booklet, the MED RSM has suggested that an entry could be included:

“Can I suggest a comment here along the lines that "The question bank is the intellectual property of NZART and can only be used within NZART systems and procedures to ensure the integrity of the examination process is maintained".

This will avoid non NZART examiners claiming rights to use the NZART question bank as per earlier emails.”

A good idea, and I have now included those words into the Introduction part of the booklet, on page 2. However, it should also be included into the Question-Bank book. Please see the latest attached – with the words included.

For your information and for any consideration needed.

73,
Fred ZL2AMJ

Appendix 3: Letter from Fred Johnson ZL2AMJ

18 March 2013

The President and Council,

The New Zealand Association of Radio Transmitters Inc.,

P.O. Box 40 525

UPPER HUTT 5140

Dear President and Council,

Copyright of Question Bank and training material

I have received legal advice on this matter from Messrs. Baldwin Son & Carey, Solicitors specializing in Intellectual Property. The relevant section of their advice is attached.

In view of this I assert my rights as Author of the Original Question Bank and Study Guide (2006), and the title “The New Zealand Amateur Radio Study Guide”. Further, I request that you identify and attribute me as the Author in any publication of this copyright material, whether electronic or paper based.

The major proportion of the question bank published by you remains in original form, with only a minor proportion amended by you.

I request that a notice along the following lines be stated:

All original work Copyright J F C Johnson, 2006.

Derivative work Copyright New Zealand Association of Radio Transmitters Inc.

I do not give my permission for you to use my copyrighted title “The New Zealand Amateur Radio Study Guide” or the shorter “Amateur Radio Study Guide” for your derivative work.

Yours Sincerely,

Fred Johnson, MNZM, FIPENZ, CEng, MIET, ZL2AMJ

J.F.C. Johnson, 15 Field Street, Upper Hutt 5019, NEW ZEALAND

[Attachment: Baldwins statement.] 2

Appendix 4: Legal Opinion sought by Fred Johnson

[Attachment to the letter of 18 March 2013 from ZL2AMJ to the NZART President and Council.]

15 February 2013

Copyright – authorship

By way of introduction, copyright is a property right that arises or "subsists" automatically in an original piece of literary or artistic work. Unlike some other intellectual property rights there is no need in New Zealand for copyright to be registered. In our opinion, the compilation of the original Question Bank qualifies as a literary work; although in general compilations are not considered to have a high level of originality.

The Copyright Act 1994 defines a person who creates a literary work as the "author" of that work and accords that author with certain rights.

You have never been an employee of NZART or been commissioned by NZART to produce the original Question Bank. You have explained that the

compilation and editing of the original Question Bank was conducted by you as a voluntary contributor of NZART. You therefore fall within the definition of an "author" of this work. Also supporting this position is an email from Vaughn Henderson, the President of NZART, to you dated 9 August 2012.

The Copyright Act incorporates a number of distinct "moral" rights directed at the author of a piece of copyright work – for example, where a literary work is placed into an online repository. It follows that as the author of the work, the author can require that his or her details are acknowledged. You are empowered by section 94 of the Copyright Act to assert this moral right, to be identified as the author of the copyright work.

You are in a position to require NZART to identify and attribute your authorship in all formats of the Original Question Bank, whether electronic or paper based.

Baldwins Law Limited

You have received this message because you are subscribed on an NZART infoline list.

Cy-Fair Students Savor Radio Visit with Space Station:

Posted: 05 May 2013 05:37 PM PDT
http://www.eham.net/articles/30141

Local students enjoy a virtual trip away from Earth during radio visit with astronauts on space station: For a few minutes Thornton Middle School was transformed into mission control. After a year's worth of preparations - that included the addition of an antenna powerful enough to reach the International Space Station - seventh grader Christopher Babbichio found the right frequency to communicate with astronauts with classmates on standby. The International Space Station only had about 10 minutes of time -- when it would be positioned in just the right spot for ham radio correspondence with the eager students. Commander Chris Hadfield, the first Canadian astronaut to walk in space, answered their call. He offered insight into life in space, responding to a steady stream of questions.

Amateur Radio Buffs Gather in Deerfield:

Posted: 06 May 2013 05:00 PM PDT
http://www.eham.net/articles/30147

DEERFIELD -- Amateur radio operators from along the East Coast met at the Deerfield Fairgrounds over the weekend to talk technology, sell and swap parts and share their stories at the 13th New England Amateur Radio Festival, or NEAR-Fest. About 700,000 amateur radio operators, or hams as they call themselves, are spread throughout the country, with approximately 5,000 transmitting from their homes in New Hampshire. The latest meeting of NEAR-Fest drew the usual crowd of tech-savvy tinkerers, curious global communicators and public service volunteers who step in whenever they can help with emergency services. "The hobby is diverse, there's so much in it for everyone," said Manchester ham Rick Tenney. "The technology has changed dramatically, but as far as communicating and connecting go, it's still the same. Some people just enjoy talking, and you never know who you'll run into." Amateur radio is often described as the original vehicle for social networking. But unlike some of today's online global networks, experienced hams have reached out and chatted with distant voices when chatting was exotic and exciting.

**********************************************
The ARRL Contest Update

Published by the American Radio Relay League
**********************************************

May 8, 2013

Editor: Ward Silver, N0AX <rate-sheet@arrl.org>

==> IN THIS ISSUE

- That's Amore! - International EME Contest
- Uniform Signal Strength - Armed Forces Comm Test
- CQ WW CW Scores for 2012 Hit the Mailboxes
- A Truly Boring Website
- Ready for Some Improvement?
- ARRL 160, Phone Sweeps, and Rookie Roundup Online
- RF Simulators - How They Do It
- A Lofty Look at Batteries
- Calling Any QP

NEW HF OPERATORS - THINGS TO DO

Just outside the ham bands this weekend, listen for the military
stations calling CQ and listening somewhere inside the ham bands. This
might be a real good time to learn how to operate split since QRMing a
station with a call sign like WAR - outside the ham bands, to boot -
doesn't sound like a really great idea. However, all of those stations
will QSL automatically - don't worry, of course they know where you
live!

BULLETINS

There are no bulletins in this issue.

BUSTED QSOS

The photo of W6KH in the previous issue should be credited to Bob N6TV
and the drone video link was contributed by Tim K3HX.

CONTEST SUMMARY

Complete information for all contests follows the Conversation section

May 11-12
```

- CWops Monthly Mini-CWT Test (May 8)
- NAQCC Monthly QRP Sprint--CW (May 9)
- Worldwide EME Contest.
- EUCW Fraternizing CW QSO Party
- Alessandro Volta RTTY DX Contest
- Armed Forces Communications Test
- CQ-M International DX Contest
- Portuguese Navy Day
- Nevada Mustang Roundup
- FISTS Spring Sprint--CW
- 50 MHz Spring Sprint
- Straight Key Weekend Sprintathon

May 18-19

- Worldwide EME Contest
- Portuguese Navy Day--Digital
- EU PSK DX Contest
- His Majesty King of Spain Contest--CW
- Feld-Hell Hamvention Sprint
- Baltic Contest.
- Run For the Bacon--CW (May 20)

==> NEWS, PRESS RELEASES, AND GENERAL INTEREST

The May issue of CQ magazine is hitting mailboxes with the results from CQ WW CW 2012. This is considerably earlier than in past years - thanks, CQ! Updated WRTC-2014 Event Scores <http://www.wrtc2014.org/qualifying/qualification-standings> are now posted and in addition, a handful of other corrections/updates were posted for 4Z4DX, 9A3A and the ops at KH7X. Official results for 48 of the 55 qualifying events are now included, awaiting only the official results from Oceania DX, January's NAQP January, the February NA Sprint (Feb), and both modes of ARRL DX. (Thanks, WRTC-2014 Team Selection Director, Dan K1TO)

Online registration for the 2013 Central States VHF Society Conference <http://www.csvhfs.org/> is now open. The 2013 Conference will be held near Chicago at the Elk Grove Village, IL, Holiday Inn from Thursday July 25th until Sunday July 28. There will be Antenna Range (144 MHz-24 GHz) measurements, Rover Row, Dish Display, and a Noise Figure Measurement Contest. This year will see the return of the free-admission "VHF-101" introductory session on Saturday morning. The banquet speaker will be ARRL CEO, Dave Sumner K1ZZ. (Thanks, Kermit W9XA)

The Dallas-Fort Worth (DFW) Contest Group announces the 2013 DFW Contest Forum to be held on Friday, June 7 in conjunction with Ham Com at the Plano Center in Plano, Texas. Tickets to the kickoff luncheon, featuring speaker Doug Grant K1DG, may be purchased in advance either via Ham Com <http://www.hamcom.org/>, or the DFW Contest Group <http://www.dfwcontest.com/index.html>. The W5DXCC Dinner will follow in the evening and tickets for that are also available via Ham Com.

(Thanks, Jim W0UO)

Do you need the up-to-date information on Dayton contest events? Try the K3LR web page (www.k3lr.com <http://www.k3lr.com>) for information on Contest University, Topband Dinner, Contest Dinner, and the four-night Contest SuperSuite. Links are at the bottom of the page. A free webinar <http://wwrof.org/webinar-archive/contest-university-and-dayton-contester-activities-by-tim-duffy-k3lr/> on Dayton contest activities is available, too!

A new NASA project is getting ready to learn a lot more about the ionosphere and its effects on communications and satellite services like GPS. The ICON (Ionospheric Connection) <http://icon.ssl.berkeley.edu/icon-selected-to-be-nasas-next-explorer-mission/> satellite will be launched in 2017 as part of the ongoing Heliophysics Explorer program. You can read more about one Minnesota professor <http://www.twincities.com/minnesota/ci_23062424/st-cloud-state-professor-is-part-nasa-project> who will be participating. If ICON can do for the ionosphere what SODO and STEREO have done for the solar side of propagation predictions, it will eventually have a huge impact. (Thanks, Lance W7GJ)

The National Voice Of America Museum of Broadcasting and Bethany Relay Station - a.k.a. the VOA museum <http://www.voamuseum.org/□> - is holding their second annual Voice of America BBQ Bash on May 17 and 18. The event is sponsored by the West Chester Rotary Club and a portion of festival proceeds will benefit the VOA museum. The VOA museum is located in the historic Bethany Relay Station building at 8070 Tylersville Road in West Chester, Ohio, not far south of Dayton. The museum consists of collections and exhibits from the VOA-Bethany station; Media Heritage's Greater Cincinnati Museum of Broadcast History; the Gray History of Wireless Museum; and the control for the West Chester Amateur Radio Associatio <http://www.wc8voa.org/□>n, best known as WC8VOA on the air. (Thanks, Eric W3DQ)

Bob WA1Z announces the release of a new version of the Super Check Partial <http://www.supercheckpartial.com/> database files this coming evening on (May 8) While it's too late to get your logs into this release, Bob is always collecting logs. Please attach your Cabrillo-formatted log to an email addressed to logs@supercheckpartial.com. Logs from any contest during the last 24 months are always appreciated.

Version 5.0 of Jim AD1C's ADIF County Conversion <http://software.ad1c.us/ADIF_County/> tool is now available. This program takes an ADIF file from a contest logger like WriteLog or N1MM, and converts the contest-specific county abbreviations into real ADIF field values which can be imported into a general-purpose logging program.

After four years of running the gang, the founders of the Arizona Outlaws Contest Club are turning the reins over to new leaders, effective June 1:

- President - Mike Fulcher, KC7V
- North Region VP - Bud Semon, N7CW
- Central Region VP - Andy Warycka, NY7N
- South Region VP - Bill Straw, KO7AA
- Secretary/Treasurer - Larry Reader, KE2VB

The outgoing bunch of banditos - K8IA, W7ZR, AB7E, and N7RQ - did a great job during the first four years of the club! (Thanks, Bob K8IA)

Contest Update readers might want to browse to Chris, W2PA's history blog's most recent series <http://w2pa.net/HRH/crossingsi-aquitania> - a three-part posting on the Transatlantic Tests in 1921, originally billed as a "contest," and probably the first DX contest - maybe the first on-air contest of any kind.

The W9DXCC convention <http://www.w9dxcc.com/> committee has announced it will offer a six session class on Friday, September 20th, 2013, to help inform all hams interested in DX'ing" about general topics of interest to the DX community. The class will be held the day before the W9DXCC convention and has been designed for both new and experienced DX'ers. Each session will cover a different aspect of DX'ing and features speakers NN1N, K9LA, K9AJ, K9EL, K9NU and W9MU. Please contact W9MU <jack@w9mu.net> for additional details and information.

Yes, this clock certainly makes everything in the room seem ever so much more official. Why? It's a Morse Code clock <http://gizmodo.com/a-morse-code-clock-makes-everything-seem-more-official-492110395>! (Thanks, Chris KL9A)

Is it worth the trouble? This XKCD cartoon <http://www.xkcd.com/1205/> will answer the question!

Web Site of the Week - From the "Well Now You Know Department" - you have surely wondered where you would emerge having dug completely through the Earth below your feet. Now there is no question - find out using the Tunnel to the Other Side of the Earth <http://www.freemaptools.com/> web tool! (Thanks, Sean KX9X)

WORD TO THE WISE

Practice the way you play <http://37signals.com/svn/posts/3504-you-play-like-you-practice> - (Thanks, George K5TR)

==> SIGHTS AND SOUNDS

CQ World Wide Contest Director, Randy K5ZD gave this presentation on "How Can You Improve As a Single Operator? <http://www.youtube.com/watch?v=0VFYjRfBVwo>" at the recent Norsk Hammeeting. (Thanks, Bob K8IA)

Members of the band OK Go and a team of collaborators joined forces to capture the Sound of the Northern Lights <http://www.wired.com/design/2013/04/okgo-aurora-borealis/> in the northern village of Jukkasjärvi, Sweden. Not only did they listen, but they played along, including using a Swedish instrument called a nykelharpa. Good, good, good...good vibrations! (Thanks, Tim K3HX)

==> RESULTS AND RECORDS

Results like crazy - the extended results <http://www.arrl.org/contest-results-articles> for both the ARRL 160 Meter Contest (by K9AY) and the November Phone Sweepstakes (by N2IC) are now online. Also take a look at the brand-new format for quick turnaround results of the April (Phone) Rookie Roundup <http://www.b4h.net/arrlrr/rr_scores201304.php> created by Bruce WA7BNM. Not only that, ARRL Contest Branch Manager, Sean KX9X reports that certificates for the 2012 ARRL DX Phone Single-Operator entries are hitting the mailboxes. From all reports, the new format and layout are worth the delay!

Preliminary results for the February 2013 running of the North American QSO Party on RTTY are now on the National Contest Journal <http://www.ncjweb.com/naqprttyprelim.php> website. If you see any problems, please contact contest manager, Mark K6UFO <k6ufo@arrl.net>. Final results will be published in the July/August 2012 issue of the NCJ. NAQP SSB manager, Bill AC0W <ssbnaqpmgr@ncjweb.com>, reports that revised preliminary results for the 2013 January NAQP SSB contest have been posted on the NCJ web site, too. Please let Bill know if you see any errors.

If you worked all seven of the record-setting Florida QSO Party's <http://www.floridaqsoparty.org/> special 1x1 call signs, and it is reported that at least 494 stations did so, there is no need for you to request a certificate. It will be automatically emailed to you in the coming weeks as a PDF file if your Cabrillo-formatted log contained your email address. If you did not include your email address, resubmit your log or contact the organizers at logs@floridaqsoparty.org. (Thanks, Chris WF3C and Dan K1TO)

The 2013 Minnesota QSO Party results <http://www.w0aa.org/docs/mnqp/MNQP_2013_RESULTS.pdf> are now posted for all to enjoy along with brand-new and colorful MNQP certificates. Contest committee member, Mark WA0MHJ, extends appreciation and thanks to both the faithful and the newcomer participants who helped set another participation record.

OPERATING TIP

You may have read the DX Code of Conduct that is directed at DXers, presenting guidelines for operating in a way that could bring order and make pileups more civil. Less widely known is that "The DX Code of Conduct" Web pages also contain a set of guidelines for DXpeditioners or DXpeditioner's Code. To clarify this situation, DX University

<http://www.dxuniversity.com/> offers clearly delineated guidelines for both DXpeditioners and DXers. They are referred to separately as "Best Practices for DXpedition Operating" and "Best Practices for Courteous and Efficient DXing" on the DX University web site. This might be a real good time to read both!

==> TECHNICAL TOPICS AND INFORMATION

For the interested reader with some technical background, the online paper "Introduction to RF Simulation and its Application <icslwebs.ee.ucla.edu/dejan/researchwiki/images/3/30/Rf-sim.pdf>" by Ken Kundert provides an introduction to RF simulation methods and how they account for the characteristics of RF circuits and components when performing simulations at RF.

What's the difference between RS-232 and RS-485? The former is quite common in the radio shack as a serial interface. Sometimes characterized as "Party-line RS-232", the latter is occasionally found in "daisy-chained" serial interfaces. The two standards are cousins but do you know the difference? Louis Frenzel W5LEF explains in this Electronic Design article <http://electronicdesign.com/what-s-difference-between/what-s-difference-between-rs-232-and-rs-485-serial-interfaces>.

The ARRL Handbook and numerous other references that used graphics from Amphenol have an error in the step-by-step procedure to install Type N connectors. The procedure omits the washer between the nut and gasket at the back of the shell. The instructions <http://www.amphenolrf.com/products/AssemblyInstructions/typen.pdf> have been corrected in the online version. (Thanks, Bruce WA3SWJ)

>From the weekly Make: Newsletter <newsletter.makezine.com> comes a handy tip for gluers: "After using Shoe Goo or contact cement in those toothpaste-type tubes, first wipe the threaded neck after use, then apply a thin coat of petroleum jelly on the threads only. You'll be able to twist the cap off with ease every time. --Matthew Gryczan"

How high is that thing, anyway? Trees, towers, antennas, buildings - they all yield their secrets to the proper use of a clinometer. You can learn how to make and use one in this Instructables article <http://www.instructables.com/id/Using-a-clinometer-to-measure-height/>.

Here's another handy project - a mobile-phone charger <http://electronicdesign.com/power/adapters-charge-cell-phones-using-standard-aa-batteries> that uses standard AA batteries! A little soldering and a few parts create this power converter that plugs into the USB port of your phone. This could be terrifically useful gadget when your usual power source...doesn't.

Hams are inventive and like to "repurpose" stuff. My personal vice is acquiring jars and plastic bins for putting parts in...but let's not talk about that. Check out the 99 Life Hacks

<http://siriuslymeg.tumblr.com/post/33738057928/99-life-hacks-to-make-your-life-easier>
website for good ideas in general and many will immediately be seen to
have applications around the shack and workbench! (Thanks, Joanna W6YL)

Technical Web Site of the Week - So why did that 787 Dreamliner battery
catch on fire, anyway? And what changes were made to recertify the
battery? Here's an Electronic Design article
<http://electronicdesign.com/blog/dreamliner-battery-fire-solutions-and-concerns?NL=ED-03&
Issue=ED-03_20130424_ED-03_457&YM_RID=rich@rpmsys.com&YM_MID=1389241&sfvc4enews=42>
about the whole affair. You might also find the Electropaedia
<http://www.mpoweruk.com/index.htm> website on batteries and energy
references useful, too! (Thanks, Rich KZ9K)

==> CONVERSATION

Calling Any QP

While rambling around the wilds of south-central Missouri in the 2013
MO QSO Party, I made QSOs with stations in the QRP ARCI Spring QSO
Party as well as the SP DX Contest. After some minor confusion, we
managed to exchange all of the necessary information. Everybody went
away happy and with their logs a little longer.

A couple of weekends later the North Dakota, South Dakota, and Nebraska
QSO Parties lined up to create the High Plains QSO Parties (still
separate contests). Just this last weekend, the annual collision grande
found the airwaves full of regional adventures: Seventh District QSO
Party or 7QP (seven states), New England QSO Party (six more states),
and just to be different, the single-state Indiana QSO Party. That's 28
percent of the way to Worked All States right there!

So just how do you go about calling CQ on that kind of weekend,
anyway? Sean KX9X was out doing a mobile run for the NEQP and decided
he would call CQ for "Any QSO Party". What the heck - all comers
welcome - what do you need? I've got it! It's like an on-the-air
baseball card convention - everybody has something for everybody else.

Well. Why not make this official and create the AnyQP, a contest made
up of contests? I can hear the logging software authors groaning and
reaching for the Bayer bottle now. Here are my proposed rules:

- Enter all of the State or Province QSO parties during a single
weekend.
- All QSOs must be made in accordance with the rules of each QSO party,
including time limits.
- Complete information must be exchanged during the QSO for all QSO
Parties in which each station is participating.
- Logs *MUST* be submitted for all QSO parties for which you exchange
information - yes, even the little ones must get your log.
- Your final score starts with the sum of all multipliers times the sum
of all QSO points, then add bonus points awarded by any QSO party
multiplied by the number of QSO parties you enter.
- The prize? A QP doll, of course!

Checking the contest calendar, the last weekend of August looks promising with the Hawaii, Ohio, and Kansas QSO Parties all in play. And why limit ourselves to just state QSO parties? Every weekend has several contests going full bore from somewhere! What would you do if on the Worked All Europe weekend, some station asked for QTC? Add 'em up, multiply 'em out, and have fun! CQ AnyQP!

73, Ward N0AX

==> CONTESTS

8 May through 21 May

An expanded, downloadable version of QST's Contest Corral in PDF format <http://www.arrl.org/contest-calendar> is available. Check the sponsor's Web site for information on operating time restrictions and other instructions.

HF CONTESTS

CWops Monthly Mini-CWT Test--CW, from May 8, 1300Z - See website. Multiple time periods. Bands (MHz): 1.8-28. Twice monthly on 2nd and 4th Wed, 18 to 28 kHz above band edge. Exchange: Name, member number or S/P/C. Logs due: 2 days. Rules <http://www.cwops.org/onair.html>

NAQCC Monthly QRP Sprint--CW, from May 9, 0030Z to May 9, 0230Z. Bands (MHz): 3.5-14. Monthly on 2nd Tuesday or 3rd Wednesday local time (alternating). Exchange: RST, S/P/C, and NAQCC mbr nr or power. Logs due: 4 days. Rules <http://naqcc.info/sprint201305.html>

EUCW Fraternizing CW QSO Party--CW, from May 11, 1000Z - See website. Multiple time periods. Bands (MHz): 3.5-28. Exchange: RST, name, club, member number. Logs due: Jun 30. Rules <http://www.eucw.org/>

Alessandro Volta RTTY DX Contest--Digital, from May 11, 1200Z to May 12, 1200Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: Jun 30. Rules <http://www.contestvolta.com/>

Armed Forces Comm'ns Test--Phone,Digital, from May 11, 1200Z to May 12, 2400Z. Bands (MHz): 1.8-28. See website for specific station schedules. Exchange: RS(T). Logs due: no logs. Rules <http://www.netcom.army.mil/mars>

CQ-M International DX Contest--Phone,CW, from May 11, 1200Z to May 12, 1200Z. Bands (MHz): 1.8-28. Exchange: RS(T) and serial. Logs due: 30 days. Rules <http://www.cq-m.andys.ru/>

Portuguese Navy Day--Phone,CW, from May 11, 1500Z to May 12, 1500Z. Bands (MHz): 3.5-28. Exchange: RS(T), serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

Nevada Mustang Roundup--Phone,CW,Digital, from May 11, 1700Z to May 12, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

FISTS Spring Sprint--CW, from May 11, 1700Z to May 11, 2100Z. Bands (MHz): 3.5-28. Exchange: RS(T), S/P/C, name, FISTS nr or power. Logs due: 30 days. Rules <http://www.fists.org/operating.html#sprints>

Straight Key Weekend Sprintathon--CW, from May 12, 1200Z to May 12, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

Portuguese Navy Day--Digital, from May 18, 0800Z to May 18, 1500Z. Bands (MHz): 3.5-28. Exchange: RST, serial, CQ zone. Logs due: 20 days. Rules <http://www.nra.pt/>

EU PSK DX Contest--Digital, from May 18, 1200Z to May 19, 1200Z. Bands (MHz): 3.5-28. Exchange: RST and EU area code or serial. Logs due: 30 days. Rules <http://www.eu.srars.org/>

His Majesty King of Spain Contest--CW, from May 18, 1200Z to May 19, 1200Z. Bands (MHz): 1.8-28. Exchange: RST and serial or EA province. Logs due: Jun 10. Rules <http://www.ure.es/>

Feld-Hell Hamvention Sprint--Digital, from May 18, 1500Z - See website. Multiple time periods. Bands (MHz): 1.8-28. Monthly on 3rd Saturday. Exchange: RST, S/P/C, Feld-Hell member nr. Logs due: 7 days. Rules <http://www.feldhellclub.org/>

Baltic Contest--Phone,CW, from May 18, 2100Z to May 19, 0200Z. Bands (MHz): 3.5. Exchange: RS(T) and serial. Logs due: Jul 1. Rules <http://www.lrsf.lt/bcontest/english/rules_html.htm>

Run For the Bacon--CW, from May 20, 0200Z to May 20, 0400Z. Bands (MHz): 1.8-28. Monthly on 3rd Sunday night (local). Exchange: RST, S/P/C, Flying Pig nr or power. Rules <http://www.fpqrp.org/>

VHF+ CONTESTS

Worldwide EME Contest--Phone,CW, from May 11, 0000Z to May 12, 2400Z. Bands (MHz): 1.2G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

50 MHz Spring Sprint--Phone,CW,Digital, from May 11, 2300Z to May 12, 0300Z. Bands (MHz): 50. Exchange: Grid square (6-character preferred). Logs due: 14 days. Rules <http://sites.google.com/site/springvhfupsprints>

Worldwide EME Contest--Phone,CW, from May 18, 0000Z to May 19, 2400Z. Bands (MHz): 5.7G. Exchange: TMO/RS(T) and "R". Logs due: Jun 25. Rules <http://www.dubus.org/>

Nevada Mustang Roundup--Phone,CW,Digital, from May 11, 1700Z to May 12, 1700Z. Bands (MHz): 1.8-28, 50. Exchange: RS(T) and S/P/C or NV county. Logs due: Jun 15. Rules <http://www.nvqsoparty.info/>

Straight Key Weekend Sprintathon--CW, from May 12, 1200Z to May 12, 2359Z. Bands (MHz): 1.8-28, 50. Exchange: RST, QTH, name, member nr if member. Logs due: 5 days. Rules <http://www.skccgroup.com/>

RAC Bulletin 2013-018E - Grow, Thrive and Influence: The future of RAC and Amateur Radio
2013-05-07

In October of 2010 Radio Amateurs of Canada (RAC) Directors and Executives met in Ottawa to establish RAC's strategic goals for 2010 to 2012. This established Planning Cycle 1 and was the "Financial Recovery" period. By midway in 2012 we met the objectives of that planning cycle: RAC is now solvent and membership numbers were stabilized and increasing.

In February of this year, RAC Directors and Executives met in Ottawa to establish our 2013 to 2018 goals. We are now in Planning Cycle 2 which can be labeled "Grow, Thrive, and Influence". This phrase applies to both the future of RAC and the future of Amateur Radio in Canada. On May 1st, RAC held the first in a series of webinars with club presidents and Field Organization volunteers to discuss the activities of RAC from January 2010 to date and RACs goals and 2013/14 plans. Over the next couple of months we will have webinars with each Region. Our first was in the Atlantic Region.

Presentations were made by the President and Chair, Geoff Bawden, VE4BAW, Atlantic Director Everett Price, VO1DK, and Chief Field Services Officer Doug Mercer VO1DTM/VO1DM. Other RAC officals present were Northern and Eastern Ontario Director Bill Unger, VE3XT, Atlantic Deputy Director Len Morgan, VE9MY, Vice President and Regulatory Affairs Officer Ian MacFarquhar, VE9IM and Chief Information and Technology Officer, Paul Burggraaf, VO1PRB.

Our five year vision and goals were outlined:

- Continue growth of amateur radio and RAC
- Increase public support for amateur radio
- Increase political support for amateur radio
- Increase RAC influence on regulatory agencies (local, provincial, national and international)

Actions for 2013/14 include:

- Develop publication and communication supports to clubs, amateurs, public, to grow new Amateurs, increase RAC membership and influence public and political opinion
- End "hidden subsidies" for RAC to stand as an organization,
- Increase RAC resource base (grow resources)

• Be prepared to pay for mission critical functions (to ensure increased accountability and outcomes)

Two major issues were raised by the participants, New Brunswick's ban on amateur mobile operation (the only Canadian province with such a ban) and foul language on the airways and the perceived lack of language enforcement by Industry Canada.

RAC and Amateurs in New Brunswick fought the legislation banning Amateur Radio mobile operation when it was introduced and for RAC represents the only (temporary) defeat on this issue. All other provinces responded to RAC and Amateur lobbying and now permit amateur mobile radio operation. Provinces changed their draft legislation due to our collective action. The New Brunswick file is still open and we will continue to work with our members to have the legislation changed to enhance safety in that province. Eventually the politicians will see the light.

Good practice requires that operators use language that is inoffensive. I can recall that I would tell employees that if you couldn't tell your mother a certain joke or show her a certain cartoon and if you wouldn't proudly tape it to the outside of your office door then you shouldn't have the joke or cartoon in the workplace. The same guideline should apply to the use of Amateur frequencies. RAC is not a regulatory agency but we will reinforce good practice and raise issues raised by our members to Industry Canada. Foul language is not good practice.

I am looking forward to our next webinar for Northern and Eastern Ontario with Director Bill Unger, VE3XT. Invitations will be going out shortly.

Geoff Bawden, VE4BAW
President and Chair RAC

FDIM 2013 - 'Four Days In May' at Dayton, OH

Posted: 07 May 2013 04:52 AM PDT
http://forums.qrz.com/showthread.php?390439-FDIM-2013-Four-Days-In-May-at-Dayton-OH&goto=newpost

The QRP ARCI club will be hosting the 18th 'Four Days In May' conference at Dayton (known as FDIM 2013)

The venue is the Holiday Inn, Fairborn (just a few miles east of Dayton city centre)

HolidayInn_264.jpg

It starts on Thursday 16th May (that's the day before the Dayton Hamvention opens) with a day of seminars from World class speakers.

Everyone booking a ticket online enters a draw for a Ten-Tec Argonaut VI.

Argonaut_120.jpg

The seminars are followed by our Buildathon where elmers are on hand to guide less experienced constructors in the completion of a homebrew project.

Thursday evening we have a presentation from Ten-Tec - a new Ten-Tec product will be announced during this talk.

The events on Thursday finish with a 2 hour Vendor Evening. A great place to buy components, antennas, paddles etc.

On Friday evening we have our Club Night, Homebrew Contest and Show & Tell.

The FDIM event closes on Saturday evening with our Grand Banquet and award ceremony.

Door prizes for attendees are values in $1000s and our raffle is for an Elecraft KX3.

kx3_120.jpg

Full details can be found on the FDIM webpage

The VHF-DX-Portal MMMonVHF - Newsletter Credits & Info
****

Our Newsletter is compiled from the input of the USERS of the
VHF-DX-Portal MMMonVHF and as well by a lot of free usable
HF-V-U-SHF-Info-Sources (named as SOURCE at the NEWS) and chats
like ON4KST-, RU-VHF-DX-Net, EA-V-U-SHF-Chat, N0UK-Chat and others.

** Many thanks to all our USERS who did send us info and news **

Wherever we found the info we always indicate the source of the
info. If you get knowledge of an expedition, which is NOT listed
at our VHF-DX-Portal MMMonVHF or if you have additional info for
an expedition, PLEASE be so kind and send us this info at:

** www.mmmonvhf.de/newsuser.php or www.mmmonvhf.de/contact.php **

The MMMonVHF-Team is always trying to spread any expedition info
as much up-to-date and reliable as possible and as long as the
info does not violate with our MMMonVHF-Policy ...

Have a lot of fun and enjoy the VHF-DX-Portal MMMonVHF!

One Year of the Sun's Activity Captured in One Image:

Posted: 07 May 2013 05:01 PM PDT
http://www.eham.net/articles/30152

Released on Earth Day, this photo of the sun is actually many photos layered over one another. It reveals where the sun has been most active during the last year. NASA states, "In the three years since it first provided images of the sun in the spring of 2010, NASA's Solar Dynamics Observatory has had virtually unbroken coverage of the sun's rise toward solar maximum, the peak of solar activity in its regular 11-year cycle. This image is a composite of 25 separate images spanning the period of April 16, 2012, to April 15, 2013. It uses the SDO AIA wavelength of 171 angstroms and reveals the zones on the sun where active regions are most common during this part of the solar cycle."

Special Event Stations Celebrate 100 Ham Nation Broadcasts

Posted: 09 May 2013 08:36 AM PDT
http://forums.qrz.com/showthread.php?390693-Special-Event-Stations-Celebrate-100-Ham-Nation-Broadcasts&goto=newpost

Petaluma, CA, May 7, 2013 - To celebrate the 100th broadcast of the Ham Nation program on TWIT.TV Wednesday, May 29th, several of its post show net control stations have been issued 1x1 calls. Hams around the nation and world can join the celebration and earn a colorful certificate at the same time.

To earn a certificate amateur radio operators need to work each of the four stations: W1H, N5H, W6H and N0H. Contacts may be made on any band. The logs from all four stations will be merged and verified and hams may print their own certificate at www.hamnation40.net/c.aspx. The certificates will be available on the site a few days after the 100th broadcast.

Additionally, amateur radio operators may exchange QSL cards and receive a commemorative 100th Ham Nation broadcast QSL from each Special Event station. To get the individual QSL cards hams may send their QSL with a SASE to each special event station. Mailing addresses for all four stations may be found at www.qrz.com.

Ham Nation premiered on the TWIT.TV network on May 25, 2011. It's been broadcast on the Internet weekly ever since. Hosted by Bob Heil (K9EID), Gordon West (WB6NOA), George Thomas (W5JDX), along with TWIT.TV president and owner Leo Laporte (W6TWT), its goal is to excite existing hams to become active again and help prospective hams obtain their license.

Ham Nation may be viewed live at http://TWIT.TV/hn every Wednesday evening at 0100 UTC. Hams who are unable to watch the show live may watch the Podcasts at TWIT.TV or on iTunes. The archives at TWIT.TV contain an audio and video podcast of every Ham Nation broadcast ever aired.

Each week the show covers subjects ranging from simple antenna design to the answers of Frequently Asked Questions (FAQ's) about

any topic of interest to hams. Hamfests, conventions and other current events are spotlighted each week. "Smoke and Solder," with George Thomas features kit building and construction tips for the Do It Yourself (DIY) crowd. Also, Don Wilbanks, AE5DW, presents the latest news from Amateur Radio Newsline every week.

The Special Event stations will be operating on or near their regular net operating frequencies: 14.268.00 MHz; 7.272.00 MHz; 3.847.00 MHz. If band conditions permit, the four stations will also operate on or near 28.450.00 MHz for the benefit of Technician Class operators. All four stations plan to operate at various times during the day and at night pending operator availability and band conditions.

From May 15th to May 29th, keep an eye on your favorite DX Cluster for W1H, N5H, W6H and N0H!

==> + DAYTON HAMVENTION¿½: MEET THE AUTHORS AT ARRL EXPO IN DAYTON

The ARRL will present a "Meet the Authors" area in the ARRL EXPO at
the 2013 Dayton Hamvention, giving visitors an opportunity to speak
with authors who are inspiring today's radio experimenters, operators
and innovators. Leigh Klotz Jr, WA5ZNU, lead editor of Ham Radio for
Arduino and PICAXE, along with Eric P. Nichols, KL7AJ, author of Radio
Science for the Radio Amateur and Don Keith, N4KC, author of Riding the
Shortwaves: Exploring the Magic of Amateur Radio will be available to
discuss -- and sign -- their books during Hamvention.

In addition to the "Meet the Authors" area, the ARRL EXPO will include
a wide variety of exhibits and activities from the ARRL, including an
exhibit commemorating the 75th anniversary of W1AW featuring
photographs of the station from over the years; QSL card checking; the
```

opportunity to have your handheld transceiver checked for spurious emissions; youth activities, and more. Read more <http://www.arrl.org/news/meet-the-authors-at-arrl-expo-in-dayton>.

==> + ARRL CENTENNIAL CELEBRATION: ARRL PUBLIC RELATIONS COMMITTEE SPONSORING "I AM THE ARRL" VIDEO CONTEST

As part of the ARRL's Centennial Celebration in 2014, the ARRL's Public Relations Committee is sponsoring an "I am the ARRL" video contest. The Committee is looking for pairs of short video clips featuring ARRL members. One clip should show the radio amateur on the radio, while the other should show the amateur in his or her work setting saying "I am (name). I like (radio activity) and I am the ARRL."

ARRL Public Relations Manager Allen Pitts, W1AGP, explained further: "For example, a car mechanic in coveralls working over an engine looks at the camera and says 'I am Henry Smith, N0XCC. I like to talk to people in exotic countries and I am the ARRL.' This clip would then be paired with a shot of him at home talking on the radio. You may be a lab technician in a white coat, a doctor with a stethoscope, a teacher in a classroom, a cook in a kitchen -- whatever represents your profession. We're looking for videos that communicate that you are that 'guy or gal down the street' and you are the ARRL. With Field Day coming up next month, you have a great opportunity for filming clips." Read more <http://www.arrl.org/news/arrl-public-relations-committee-sponsoring-i-am-the-arrl-video-contest>.

==> + FCC NEWS: FCC AND GAO RELEASE RECOMMENDATIONS ON RECEIVER PERFORMANCE; COMMENTS INVITED

In early 2012, FCC Chairman Julius Genachowski tasked the FCC's Technological Advisory Council (TAC) to study the role of receivers "in ensuring the efficient use of spectrum and to provide recommendations on avoiding obstacles posed by receiver performance to making spectrum available for new services." On April 22, 2013, the FCC released a Public Notice (Docket No. ET 13-101), detailing the recommendations of the TAC's working group on Receivers and Spectrum in a white paper called Interference Limits Policy -- The use of harm claim thresholds to improve the interference tolerance of wireless systems. Last week, President Obama nominated TAC Chairman Tom Wheeler as FCC Chairman.

In addition to the work of the TAC, the Government Accountability Office (GAO) was tasked by Congress in the Middle Class Tax Relief and Job Creation Act of 2012 to study spectrum efficiency and receiver performance. The GAO report -- titled Further Consideration of Options to Improve Receiver Performance Needed -- was recently published and references the TAC white paper. The GAO report recommends that the FCC "consider small-scale pilot tests and other methods to collect information on the practical effects of various options for improving receiver performance." Comments on the both the TAC's white paper and

the GAO's report are now being accepted.

The white paper also noted that "interference being experienced is widely distributed both geographically and temporally. This would be the case when, for example, widely deployed consumer devices like television sets or handheld wireless devices receiving signals 'over the air' are interfered with by, say, geographically dispersed private land mobile radio, amateur radio transmitters or other wireless devices operating in an adjacent band. Thus the base case would exclude resolution of interference that arises when multiple radio systems (i.e., transmitters and receivers) are co-located at a single antenna site, or on a single tower, or even share a single antenna on a tower." The ARRL is studying all the documents in this proceeding and expects to file comments. Read more <http://www.arrl.org/news/fcc-and-gao-release-recommendations-on-receiver-performance-comments-invited>.

==> + PUBLIC SERVICE: GAREC 2013 TO PRECEDE HAM RADIO GATHERING IN FRIEDRICHSHAFEN NEXT MONTH

The 2013 Global Amateur Radio Emergency Communications Conference (GAREC) will take place June 25-27 in Zurich, Switzerland, immediately preceding HAM RADIO -- Europe's largest Amateur Radio gathering -- in Friedrichshafen, Germany, June 28-30. GAREC 2013 will be combined with Switzerland's Convention of Amateur Radio Emergency Communication, on June 27. GAREC -- held annually since 2005 -- provides an opportunity for emergency communicators to discuss recent events, technical solutions to problems and how to find cooperation with professional partners. Attendees have an interest in providing emergency communication via Amateur Radio during training exercises or in response to disasters.

While GAREC 2013 will primarily focus on Amateur Radio emergency communication in Europe, all radio amateurs who are interested in providing public service via Amateur Radio are invited to attend. This year's topics include the relevance of Amateur Radio Emergency Communication in the First World and the HAMNET high speed data network, as well as presentations from the three IARU regions and presentations from groups with recent disaster relief communications operations. The ARRL will be represented by ARRL Vice President for International Affairs Jay Bellows, K0QB, who will also attend HAM RADIO. Read more <http://www.arrl.org/news/garec-2013-to-precede-ham-radio-gathering-in-friedrichshafen-next-month>.

==> + HURRICANE WATCH NET SEEKS NEW MEMBERS FOR NET CONTROL STATIONS

With the 2013 hurricane season approaching, the National Hurricane Center (NHC) in Miami and the Hurricane Watch Net (HWN) are gearing up for what could be a very active storm season. In preparation for the upcoming season, the HWN is currently seeking new members who can serve as net control stations. The HWN provides on-the-ground, real-time

weather data from Amateur Radio operators who volunteer their time to monitor their calibrated home weather stations. The stations report that data to the HWN, who in turn reports it to WX4NHC, the Amateur Radio station at the NHC. "The Hurricane Watch Net relies on volunteer operators -- our members -- who serve as our net control stations," HWN Net Manager Bobby Graves, KB5HAV, told the ARRL. "HWN members are hams who have above-average stations, are capable of effectively conducting HF net operations and are willing to commit their time to operating in support of the HWN's mission during net activations." Read more <http://www.arrl.org/news/hurricane-watch-net-seeks-new-members-for-net-control-stations>.

==> SUPPORT ARRL: ATTENTION FEDERAL EMPLOYEES -- ARRL APPROVED FOR 2013 COMBINED FEDERAL CAMPAIGN!

Since 2001, the US Office of Personnel Management has designated the ARRL to participate in the Combined Federal Campaign (CFC), the annual giving campaign for federal employees. In that time, this campaign for civilian employees of the federal government, US Postal Service workers and members of the military has generated almost $220,000 for ARRL programs. The CFC provides federal employees with an easy way to support the ARRL's effort to represent its members and all radio amateurs.

The CFC encourages individuals employed in all branches of the federal government to pledge by payroll deduction to the non-profit organizations of their choice. The ARRL encourages eligible radio amateurs to consider the League when designating campaign recipients. Payroll deduction through the CFC is an easy way for participants to support the ARRL over and above their annual membership. Such contributions support programs that are not funded by member dues, enriching the ARRL's ability to serve its members and all of Amateur Radio. Read more <http://www.arrl.org/news/attention-federal-employees-arrl-approved-for-2013-combined-federal-campaign>.

==> ON THE AIR: ANNUAL ARMED FORCES DAY CROSSBAND TEST SCHEDULED FOR MAY 11

In celebration of the 63rd anniversary of Armed Forces Day (AFD), the Army, Air Force, Navy, Marine Corps and Coast Guard are co-sponsoring the annual Military/Amateur Radio Crossband Communications Test. Although Armed Forces Day is traditionally celebrated on the third Saturday in May -- May 18 in 2013 -- the AFD Military/Amateur Crossband Communications Test will be conducted on May 11 to prevent conflict with the Dayton Hamvention¿½, scheduled for May 17-19. The annual celebration features traditional military-to-amateur crossband communications SSB voice and Morse code tests. These tests give Amateur Radio operators and short wave listeners an opportunity to demonstrate their individual technical skills and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to stations making contact

with the military stations. Read more

r-may-11>.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: This week, the average daily sunspot
numbers remained about the same, with the number nudging up from 120.9
to 121.7, while the average daily solar flux numbers went from 136.5 to
137.5. For the past two weeks, the average planetary A index has been
the same as the mid-latitude A index. Last week they were both 9.9;
this week, both values were 8. The predicted solar flux for the near
future is 125 on May 9-10, 120 on May 11-13, 115 on May 14-15, 120 on
May 16-17, 125 on May 18, and rising to 130 on May 19-20. The predicted
planetary A index is 5 on May 9-20, then 15, 10 and 15 on May 21-23, 5
on May 24-27, and rising to 15 and 10 for May 28-29. Look for more
information on the ARRL website on Friday, May 10. For more information
concerning radio propagation, visit the ARRL Technical Information
Service Propagation page
<http://www.arrl.org/propagation-of-rf-signals>.

==> + NEW QUICKSTATS POLL NOW AVAILABLE ON ARRL WEBSITE

Four new poll questions have just been published on the QuickStats page
<http://www.arrl.org/quickstats> on the ARRL website. Let your voice be
heard!

Questions in this month's QuickStats poll:

- Do you own a solid-state or tube-type linear amplifier?
- Where will you be operating during Field Day 2013?
- Do you own a software defined receiver or transceiver?
- Have you participated in any VHF/UHF contests during the last five
years?

Visit the QuickStats page <http://www.arrl.org/quickstats> and be sure
to bookmark it in your browser. Results from this QuickStats poll will
be published in the July 2013 issue of QST on the QuickStats page,
located in the rear advertising section of the magazine. Along with
monthly poll results, QST QuickStats offers colorful charts and graphs
that highlight interesting Amateur Radio statistics.

This Week in Radiosport

This week:

- May 10 -- NCCC Sprint Ladder
- May 11 -- FISTS Spring Sprint
- May 11-12 -- Nevada Mustang Roundup; VOLTA WW RTTY Contest; CQ-M
International DX Contest; Portuguese Navy Day Contest; SKCC Weekend
Sprintathon; EUCW Fraternizing CW QSO Party; Worldwide EME Contest

Next week:

- May 18 -- Portuguese Navy Day Contest (Digital); Feld Hell Sprint
- May 18-19 -- His Majesty King of Spain Contest (CW); Baltic Contest; EU PSK DX Contest; Worldwide EME Contest
- May 20 -- Run for the Bacon QRP Contest
- May 22 -- SKCC Sprint
- May 22-23 -- CWops Mini-CWT Test

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

Upcoming ARRL Section, State and Division Conventions and Events

- May 17-19 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-4>, Trotwood, Ohio
- June 1 -- ARRL Georgia State Convention <http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest-1>, Marietta, Georgia
- May 31-June 2 -- ARRL Northwestern Division Convention <http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>, Seaside, Oregon
- June 7-8 -- ARRL West Gulf Division Convention <http://www.arrl.org/hamfests/west-gulf-division-convention-35th-anniversary-ham-com>, Plano, Texas
- June 8 -- ARRL Delta Division Convention <http://www.arrl.org/hamfests/delta-division-convention-2>, Rogers, Arkansas; ARRL Tennessee State Convention <http://www.arrl.org/hamfests/tennessee-state-convention-knoxville-hamfest-electronics-convention>, Knoxville, Tennessee
- June 28-30 -- ARRL Rocky Mountain Division Convention <http://www.arrl.org/hamfests/rocky-mountain-division-convention-hamcon-colorado-2013>, Estes Park, Colorado
- July 6 -- ARRL Eastern Pennsylvania Section Convention <http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecracker-hamfest-electronics-expo>, Harrisburg, Pennsylvania
- July 25-27 -- Central States VHF Society Conference <http://www.arrl.org/hamfests/central-states-vhf-society-2013-conference>, Elk Grove Village, Illinois
- July 26-27 -- ARRL Oklahoma State Convention <http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-1>, Oklahoma City, Oklahoma
- August 2-3 -- ARRL Texas State Convention <http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2013>, Austin, Texas

- August 2-4 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-2>,
Spokane Valley, Washington
- August 17 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-3>,
Weston, West Virginia
- August 17-18 -- ARRL Alabama State Convention
<http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest-1>,
Huntsville, Alabama
- August 18 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-3>, Salina,
Kansas
- August 25 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-3>,
New Kensington, Pennsylvania

Dayton Hamvention D-STAR

D-Extra 38C, D-Plus 38C, Simplex & Group Pictures

Lorain County Ohio ☐The Northern Ohio Digital Interconnect Group, in conjunction with the Dayton Hamvention, will be providing D-STAR users globally the use of D-Extra X-Reflector 038C and D-Plus Reflector 038C for Hamvention activities.

All systems, repeaters & users normally connected to NODIG assets are encouraged to begin migration to the C modules on Thursday morning, 5/16/2013. All systems normally connected via the 905 hub are asked to connect directly to XRF038C.

Any repeater, DVAP, hotspot, dongle or individual user wishing to link to the reflectors may do so as the systems are open for all to use. The systems, D-Extra & D-Plus, will run in parallel and not be linked.

A D-STAR simplex gathering point has also been planned for this year. 446.1000 With a Digital Code, CSQL, of 13. NODIG, OWDN and some DARA members will monitor this frequency.

A group D-STAR picture will be taken once on Friday and again on Saturday for all D-STAR users at Hara Arena. We invite everyone involved at any level of D-STAR to join in. Time and location to be announced.

As in previous years the Ohio Wide D-STAR Net will run the Sunday of Hamvention at its normal time of 8:01 PM EST on XRF038C. Not its normal A port. After the net all NODIG assets will return to their normal allocations.

Please throw your call out during the course of Hamvention. Everyone whether in Dayton or around the world can join in. Many will be listening and it will provide a great opportunity to showcase the abilities of the system and D-STAR to those not familiar with the mode or amateur radio in general.

HAMVENTION 2013 PREVIEW: DOORS OPEN FRIDAY MAY 17

It won't be long before the gates at the Hara Arena in Dayton, Ohio swing open for the 2013 Dayton Hamvention. This year's gathering runs May 17th to the 19th and for the first time ever, its theme is the DX Hamvention. And in a recent interview with Hap Holly, KC9RP, of the RAIN Report, Hamvention spokesman Michael Kalter, W-8-C-I, explained the reasoning for this choice:

--

Kalter: Our theme this year, the DX Hamvention, seemed to resonaste with us because in order to have good DX and to make contact, toy reach out to the world. That's literally what Hamvention is tryiong to do; we reach out to the world and bring amateur radio operators in throughout the whole world.

--

And says Kalter, this appears to be a record year for those showing and selling their wares at Hamvention:

--

Kalter: "We have more vendors inside this year than we have ever had. Last year was a big year so we nearly sold out inside. It appears as if its going to be another great year inside. Its hard to keep up with all of the folks that are coming but you know that's part of the surprise of Dayton is that a new vendor comes in and you go: `.oh my gosh, I didn't know about these people and you find some new and

interesting radio gear.'"

--

And will there be anything really special taking place? Kalter says most definitely:

--

Kalter: "One of the big things this year is that Homeland Security is going to be involved with us. They approached us last year and they are going to have a special emergency (class) this year. I think you can get your different certificates from the 100B through the 800B certificate. That's a new thing for this year."

--

As usual, Amateur Radio Newsline has its team of reporters at Hamvention 2013. We also will be hosting the annual Ham Radio Town Meeting on Saturday, May 18th where the central topic will be "What DX Means to Me." In keeping with the theme of this years Hamvention, this will be a non-technical look at working and being DX from a very personal point of view. Among our presenters will be world-class DX operator Chip Margelli, K7JA, of Innov Antennas; Hollywood film maker and DX'er Dave Bell, W6AQ and the United States Coordinator of the International Morse Code Preservation group FISTS, Nancy Kott, WZ8C, to mention only three. So if you will be at Hamvention 2013, please stop by Meeting Room 2 on Saturday, May 18th from 11:45 a.m. to 2 p.m. in Meeting Room 2 for this year's Ham Radio Town Meeting. We are looking forward to seeing you there. (ARNewsline(tm) with audio supplied by The RAINReport)

HAMVENTION 2013: LIVE NETCAST COURTESY OF W5KUB

And speaking about Hamvention, if you cannot be there in person, then you can travel to Dayton vicariously again this year thanks to Tom Medlin, W5KUB and his live television streaming at W5KUB.com.

Tom's live broadcast begins on Wednesday May 15th at 8:00 AM Central time as he starts the 550 Mile drive from Memphis to Dayton. On Thursday you can get a peak of the various vendors setting up and then enjoy the next three days of the Hamvention itself. And if you make it to Hamvention, Tom says that he and his crew will be set up at space SA302 and to drop by and say hello.

Once again, that's the 2013 Hamvention live on your computer or tablet courtesy of Tom Medlin at W5KUB.com. (W5KUB)

**

HAMVENTION 2013: ICOM TO STREAM LIVE FROM HAMVENTION

And this just in. In addition to exhibiting some new products, Icom says that it will transmit a live video stream across the Internet from its Dayton Hamvention booths on Saturday, May 18th. At airtime, guest speakers include Emmy-nominated television producer John Amodeo, NN6JA of the hit ABC sitcom "Last Man Standing;" noted ham radio educator Gordon West, WB6NOA and AmateurLogic.TV host George Thomas, W5JDX. Thomas is also the recipient of this years Dayton Hamvention Special Achievement Award. A complete webcast schedule and other Dayton-related information can be found at www.icomamerica.com/dayton2013. (Icom)

**

RADIO IN SPACE: M CLASS SOLAR EVENT CAPTURED ON MAY 3RD

In other news, an intense solar storm erupted from the Sun on Friday, May 3rd in what astronomers have described as a dazzling solar display. The solar flare discharged from the left limb of the Sun peaked at 17:32 GMT, registering as a medium-strength M 5.7-class event that launched hot solar plasma about 200,000 kilometers above the surface of the Solar Disc. Photos of the event were captured by NASA's Solar Dynamics Observatory and sent back to Earth by radio.

The May 3rd solar storm was the second major space weather event in three days, but was not aimed at Earth. The Solar Disc fired off an eruption on Wednesday, May 1st from the same region, which at the time was at the very leftmost limb of the Sun as seen by the Solar Dynamics Observatory. Astronomers predict that this active region will be rotating to face Earth fairly soon.

So far the strongest solar flare of the year occurred on April 11 and registered as an M 6.5 class storm. M-class solar flares are medium-strength events and are the weakest type of storm that can still have an impact on Earth. When aimed directly at our planet they can cause aurora displays and some short term radio communications outages. The stronger X class flares are the ones that can interfere with communications satellites and cause major radio blackouts on Earth.

The Solar Dynamics Observatory is a NASA mission in launched in February of 2010 to study the Sun for over five years. It is one of several spacecraft constantly monitoring the our star to track these solar weather events as we approach what's believed to be near the peak of Solar Cycle 24. (Space.com, Spacenews, Wikipedia)

WORLDBEAT: DARC AND UBA SUPPORT AMATEUR RADIO IN TUNISIA

Amateur radio could soon have a new life in Tunisia as we hear from Amateur Radio Newsline's Norm Seeley, KI7UP:

--

The Deutscher Amateur Radio Club, which is Germany's national amateur radio society, reports that after the political changes in Tunisia amateur radio in that North African country has a new opportunity to expand. This as members of the Association of Tunisian Radio Amateurs used World Amateur Radio Day on April 18th to inform the that nations public and in particular its Minister for Technology, Information and Communication about amateur radio in its various forms.

Representatives of European amateur radio organizations were there to support the event. This included the International Office of the Deutscher Amateur Radio Club in the person of Mustapha Landoulsi, DL1BDF. Landoulsi gave a presentation on the important role of amateur radio in emergency and disaster situations.

Stefan Dombrowski, ON6TI, from the Belgian federation the U-B-A was also on hand. He explained the history of the development of amateur radio satellites, and in particular, the construction of CubeSat spacecraft and the AMSAT-UK FUNcube satellite.

According to reports, the Tunisian Minister was quite impressed by the potential of amateur radio. As a result he has promised to ensure that the necessary statutory basis for granting individual licenses would be created as soon as possible.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

This information appears to open up the prospect for the successful development of amateur radio in Tunisia. (ARAT)

**

RADIO RECORDS: NEW 24 GHZ EME WORLD RECORD OF 16383 KM

Rex Moncur, VK7MO, has completed a Earth-Moon-Earth QSO with the OK1KIR EME Team in the Czech Republic with some 10,180 miles between. This, to claim the new world EME record on 24 GHz.

To accomplish this feat VK7MO used just a 1.14 meter dish and 10 watts which he has designed for portable operation. On the other end of the path OK1KIR used a 4.5 meter dish and 22 watts.

According to the VK7 News, this has been a 12 month project for VK7MO during which he collaborated with famed Digital low noise mode developer Joe Taylor, K1JT. The two worked to produce improved decoders that could cope with the very wide spreading of signals on the 24 GHz E-M-E path.

Word is that VK7MO and K1JT will be publishing this work in the next edition of DUBUS magazine. This is a publication which is devoted to VHF and Microwave amateur radio communications. More information is at www.dubus.org. (vk7news)

**

HAM RADIO IN SPACE: NASA AND HAM RADIO ASSEMBLE THE PHONESAT PICTURE

Engineers at NASA's Ames Research Center in California and amateur radio operators around the world recently collaborated to reconstruct an image of Earth sent to them from three smartphones launched into a low Earth orbit. Amateur Radio Newsline's Heather Embee KB3TZD, reports:

--

The joint effort was part of NASA's nanosatellite mission called PhoneSat. The first phase was launched on Sunday, April 21st aboard the Antares booster from NASA's Wallops Island Flight Facility in Virginia.

Although the ultimate goal of the PhoneSat mission was to determine whether a consumer-grade smartphone can be used as the primary flight avionics for a satellite in space, the three miniature satellites also used their smartphone cameras to take pictures of Earth. These images were then transmitted to multiple ground stations as data packets with each packet holding a small piece of the big picture.

As the data became available, the PhoneSat Team working with multiple ham radio operators pieced together a high-resolution photograph from data sent back by the tiny birds. Amateur radio operators from every continent except Antarctica contributed in capturing the data packets needed to piece together the final image.

This first PhoneSat mission successfully ended Saturday, April 27th after atmospheric drag caused the tiny satellites to re-enter Earth's atmosphere and burn up as predicted by the mission planners.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

The PhoneSat project is a technology demonstration mission funded by NASA's Space Technology Mission Directorate and the Engineering Directorate at NASA Ames Research Center. The project started in summer 2009 as a student led project between the Ames Research Center and the International Space University at Strasbourg. For more information about the PhoneSat mission and the part played by amateur radio please visit www.phonesat.org on the World-Wide-Web. (NASA Release, Southgate)

RESCUE RADIO: PREMIERE NETWORKS JOIN FEMA IN EAS

FEMA, the Federal Emergency Management Agency, says it will add Premiere Networks as a Primary Entry Point station for the nations Emergency Alert System or EAS. FEMA has already been installing satellite receivers at Primary Entry Point stations, intending to use satellite delivery of emergency alerts as an alternative distribution method.

According to reports Premiere Networks will use its satellite program receivers at its affiliates as another tool for delivering national EAS messages. The radio affiliates would in turn broadcast the emergency messages to the public.

Primary Entry Point stations are private or commercial radio broadcast stations that cooperatively participate with FEMA to provide emergency alert and warning information to the public before, during, and after incidents and disasters. Since the national EAS test in 2011, both FEMA and the FCC have been studying the results and executing fixes. (RW)

RADIO POLITICS: PRESIDENT OBAMA TO NOMINATE TOM WHEELER AS NEXT FCC CHAIRMAN

President Obama says that he will nominate wireless telecommunications and cable executive Tom Wheeler as the next FCC chairman. He will also designate Commissioner Mignon Clyburn to act as "acting Chairwoman" once current Chairman Julius Genachowski leaves the agency.

In a press statement, Genachowski said he's known Wheeler for 20 years and he's made strong contributions to the FCC's work. This includes unleashing spectrum for mobile, removing barriers to private investment, and strengthening our cyber security. Genachowski called Clyburn a strong, experienced and thoughtful leader who's distinguished herself as a champion for closing America's digital divide. (Published news reports)

RADIO POLITICS: W7EQI SAYS TV SPECTRUM AUCTION SHOULD BE UNENCUMBERED

Representative Greg Walden, W7EQI, of Oregon is worried that the FCC could mess up its planned auctions of TV broadcast frequencies by imposing too many restrictions on the process. Amateur Radio Newsline's Jim Davis, W2JKD, has more:

--

In a recent statement Walden, who the chairman of the House Communications and Technology subcommittee, endorsed the recommendations of the Expanding Opportunities for Broadcasters Coalition, a group of TV stations interested in participating in the auctions.

In his statement Walden asked the rhetorical question of what if the FCC held a broadcast incentive auction and no one came? He went on to note that could be a distinct possibility if the Commission does not heed the advice that the coalition of television stations filed recently with the agency.

Walden also agreed with the broadcasting group that the FCC should not exclude any wireless carriers, such as AT&T and Verizon, from the auctions. They argue that restricting bidders would likely suppress the final bid amount, leaving crucial revenue on the table.

Consumer advocacy groups have urged the FCC to prevent Verizon and AT&T from buying up the entire TV spectrum at auction. They argue that it would further consolidate market power in the top two carriers and stifle competition in the industry.

I'm Jim Davis, W2JKD.

--

Last year, Congress authorized the FCC to encourage TV stations to voluntarily give up their rights to some of their spectrum for auction to cellular and broadband carriers. These broadband suppliers claim that they are struggling to keep pace with the booming demand for mobile data spectrum. (The Hill)

HAM HAPPENINGS: ARMED FORCES DAY CROSSBAND MILITARY/AMATEUR RADIO COMMUNICATIONS TEST HELD EARLY

The Army, Air Force, Navy, Marine Corps, and Coast Guard co-sponsored the annual military to amateur radio communications tests in celebration of the 63rd Anniversary of Armed Forces Day a bit early this year. That's just after this newscast goes to air.

Although the actual Armed Forces Day is celebrated on May 18th, the Crossband Communications Test was conducted May 11th to prevent conflict with the Dayton Hamvention, which is the same weekend.

The annual celebration featured traditional military to amateur cross band communications using both SSB voice and Morse code. These tests give Amateur Radio operators and Short Wave Listeners an opportunity to demonstrate their individual technical skills, and to receive recognition from the appropriate military radio station for their proven expertise.

QSL cards will be provided to those stations that made contact with the military stations. Full details can be found at tinyurl.com/crossband-2013. (US MARS, ICPO, Southgate)

NAMES IN THE NEWS: RAC NAMES SCOTT WOOD VE1QD AS CANADIAN RADIO AMATEUR OF 2012

The Radio Amateurs of Canada Board of Directors has announced the selection of Scott Wood, VE1QD of Halifax, Nova Scotia, as the Canadian Radio Amateur of the Year for 2012.

Wood celebrated sixty years in Amateur Radio in 2012. Over these years he has contributed enormously, and in many and varied ways both to our hobby and to radio in general. In his youth as a net controller in the Oregon State Fire Service, later as a radio operator in the US Naval Reserve, as a member of the Board of Directors for Radio for Peace International, in contesting and DXing, and in elmering aspiring new hams, both young and old. However, it is the leadership in Amateur Radio that Scott has demonstrated locally, regionally, and internationally that is being recognized with this award.

According to Radio Amateurs of Canada, Wood has demonstrated vision, enthusiasm, and a commitment to excellence in the area of Amateur Radio DXing. This through the establishment and management of the Maritime DX Forum for eight consecutive years.

Radio Amateurs of Canada says that VE1QD envisioned the forum to be a venue where DX'ers in the region could come together annually to hear world-class, as well as local DX experts speak about important and current DX topics. The gathering would also provide a forum in which to share ideas with some of the best operators and leaders within the amateur radio community.

Presentation Canadian Radio Amateur of the Year for 2012 will be made to Scott Wood, VE1QD at the Radio Amateurs of Canada booth at the 2013 Dayton Hamvention. (RAC)

HAM RADIO IN SPACE: VO-52 SATELLITE COMPLETES EIGHT YEARS ON ORBIT

VU2WMY reports that AMSAT-India's VO-52 hamsat completed 8 years on-orbit on Sunday, May 5th. He notes that the overall health of the satellites parameters are excellent and that AMSAT-India hopes that transponders on-board VO-52 will continue to render services for many more years to come. He also notes that during the time it has been in space that VO-52 has proven to be a valuable communications resource for the amateur radio community. (VU2WMY, Southgate)

**

HAM RADIO IN SPACE: DEAD SATELLITE COMES ALIVE

The Times of India reports that a three-kilogram student satellite named Jugnu that was thought to be dead has come back to life.

Jugnu was launched on October 12, 2011 with a one year mission life. After it stopped transmitting controllers stopped tracking it.

Now comes word from the Nitte Amateur Satellite Tracking Centre in Bengaluru that it has been heard once again. Also that while its signals were strong, some of its internal functions had apparently weakened.

You can read the entire story on the re-birth of this bird at tinyurl.com/india-satellite-lives. (Tmies of India)

WORLDBEAT: SULTAN ORDERS CONSTRUCTION OF HEADQUARTERS FOR ROARS

His Majesty Sultan Qaboos Bin Said has ordered the construction of a permanent headquarters for the Royal Omani Amateur Radio Society also known as ROARS. This on a piece of land allocated for the ham radio society.

The plan was recently unveiled by the Secretary General of the Royal Omani Amateur Radio Society. In a speech during opening the regular session of the General Assembly, the Secretary General extended the thanks and appreciation of ROARS members to His Majesty the Sultan for the support given to the group since its establishment in the 1970's. He also noted that is what he termed as the wise vision of the Sultan that has played a major role in moving forward with all of the activities that may advance the nation's youth while giving them the opportunity of added scientific and technical progress. (ROARS)

**

WORLDBEAT: LONDON GB3LV IRLP/ECHOLINK NODE UP-AND-RUNNING AGAIN

Some good news for hams in North London, England. After some software hardware problems along with extensive radio room refurbishments, the GB3LV I-R-L-P and Echolink node is back in service. The node holds the IRLP designation of 5600 and Echolink assignment of 155403. It was off the air for several weeks during the upgrade. (G4CJC)

**

WORLDBEAT: SARL PLANNING YOUTH WEEK IN FEBRUARY 2014

The South African Radio League is planning to hold a Youth Week in mid February of 2014. This to coincide with the ARRL School Club Round-up from February 11th to the 15th of 2014 in the United States.

The South African Radio League's newly appointed Youth Councilor is Gerhard Coetzee, ZS3TG. He says that he is looking for input and suggestions on the type of activity young radio amateurs in South

Africa would like to see included. If you have any ideas, please e-mail then to youth (at) sarl (dot) org (dot) za before the end of May. (SARL)

**

ON THE AIR: BATTLE OF THE ATLANTIC SPECIAL EVENT

G0ELZ and G3UFO have announced that special event call signs GB70BOA and GB70WA will be on the air between May 20th to the 27th. This to commemorate the 70th anniversary of the Battle of the Atlantic.

Operations using all modes will take place on 80 through 10 meters as well as on 144 and 432 MHz. Station operators are hoping to make over 2800 contacts during this period. A special commemorative QSL card will be available. More details can be found on line at tinyurl.com/cmvdvq8 (G0LEZ)

**

DX

In DX, word that HD2A and HC2AQ will be active from Galapagos Islands May 15th to the 20th as HD8A. Operations will be on all of the High Frequency bands. QSL via HD2A.

OY1CT will be active from the Faroe Islands during May with special call OW75FOC. He will be operating on the High Frequency bands only. If you work him please QSL via Carsten Thomsen, OW75FOC, Kvivik, the Faroe Islands or as directed on the air.

UA4WHX is currently operational portable CP1 from Bolivia. You will find him on the various HF bands. QSL via UA4WHX.

ZL2AGY will be active from Rarotonga Island from May 9 to the 29th as E51FOC and E51AGY. QSL either via his home call.

Members of F6KUF Club station will be operating from Noirmoutier Island from May 18th to the 20th as F6KUF stroke P. They will be active on 80 through 2 meters using CW, SSB and RTTY. QSL via F6KUF

F4CZU will be on the air from Gozo Island through May 18th as 9H3ZU. He will be active on most HF Bands. QSL via F4CZU

Lastly, HA0NAR will be operational from Viti Levu Island, Fiji Islands in October 2013 as 3D2AR. Listen out for him an all of the High Frequency bands. QSL via his home call

(Above from various DX news sources)

**

THAT FINAL ITEM: GLOW IN THE DARK SHEEP

And finaly this week, word that scientists in Uruguay have announced the world's first genetically-modified phosphorescent sheep. No, we

are not kidding as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW, who has this glowing report:

--

According to news reports, nine glow-in-the-dark sheep were born in October of 2012 at Uruguay's Institute of Animal Reproduction in a genetics experiment in conjunction with the Institut Pasteur. The scientists say that they used the fluorescent protein from a species of jelly fish to give sheep a distinct glowing green color when exposed to ultraviolet light.

One of the team's lead researchers is Alejo Menchaca. In a recent press conference he noted that the genetic modification was done in the desire to fine tune the technique. Other researchers believe that these genetically modified, glow in the dark animals can help mankind to better understand diseases and how they develop in both the animal kingdom and in human beings.

The scientists say the nine sheep developed normally. They claim there are no differences between them and their non-genetically modified siblings other than that they can be made to glow from head to toe.

And before you ask, we have no idea if they can been trained to blink on and off in Morse code nor if they did if they would be considered for bonus points on Field Day.

For the Amateur Radio Newsline, I'm Bruce Tennant, K6PZW, not all that far from the glow of Hollywood.

--

More can be found on line at various on-line news sites including tinyurl.com/sheep-glow. (Various news sources)

QRZ Summer Tour 2013

Posted: 09 May 2013 11:18 AM PDT
http://forums.qrz.com/showthread.php?390708-QRZ-Summer-Tour-2013&goto=newpost

IMG_3380.JPG QRZ Summer Tour
2013 IMG_3380.JPG

Each summer, the founder of QRZ, Fred Lloyd (AA7BQ) and his lovely wife Robin hop into "The Zed," a 45 foot long tour bus, to zig-zag across the US visiting Hamfests and special events. This summer we're enlisting your help to decide where The Zed will turn up next! If you are a member of a club or are planning a Hamfest or special event, we'd love to hear from you.

The first leg of the Summer 2013 tour will begin in the Pacific Northwest. Fred and Robin will start by attending SEAPAC in Seaside, Oregon during the first week of June. They plan to be in the Seattle area from June 3-9 followed by Northern Washington between June 10 and 16. Fred will also celebrate Field Day at Ft. Flagler. If your club meets in or near any of these areas during the dates specified and you'd like to hear about the history of QRZ, we'd love to hear from you!

On the second leg of the tour, The Zed will be adventuring from Washington all the way south to Arizona and could plan a stop to speak to your club anywhere along the way. Potential routes include stops in Oregon, Idaho, Nevada, California, and Utah.

If your club is interested in booking Fred for a speaking engagement or you have an idea about a Hamfest or Special Event that Fred and Robin shouldn't miss, let us know! Send a detailed e-mail noting the location, dates, and type of event to QRZ's General Manager, Jaime Jeffries at KF7WIS@QRZ.com.

If your state or region isn't mentioned in this posting, Never Fear! Fred, Robin, and The Zed are also considering a 2nd Summer Tour. If your club is interested in hearing more about QRZ, send us an e-mail. Who knows where you'll find us next!

Focus South America during WWSA Contest

Posted: 09 May 2013 12:54 PM PDT
http://forums.qrz.com/showthread.php?390722-Focus-South-America-during-WWSA-Contest&goto=newpost

Focus South America during WWSA Contest

Using a very familiar exchange and format, contesters have a prime option from South America during the

second weekend of June, with the WWSA CW Contest, sponsored by the Grupo Argentino de Radiotelegrafia (GACW).

The focus is on South America, as the 24 hour contest runs from 1500 GMT on Saturday 8 June to 1500 on Sunday 9 June.

We has been trying hard in recent years to get more US and Canadian stations to join in the WWSA CW Contest,

and those that tune in during the 24 hour contest period should recognize a very familiar rhythm.

The contest exchange is the same as CQ WW, using a signal report and your CQ zone. Example: 59905, 59911, etc.

Multipliers are also counted the same way, making it a familiar format. Country + CQ zone

Just like CQ WW, contacts between stations in your home country are okay for zone or country multipliers, but

have zero point value.

Same continent = 1 pt - Different continet = 3 pts.

There is one difference in how your score is totaled, as South American stations are worth extra points - 5 points

for stations outside of South America.

It is a kind of a contest in which all the South Americans will play the role of difficult DX since we grant special points.

For this edition, as we did the previous year, we will grant electronic Diplomas to the winners of the most important

categories and when the score justifies it.

In our web site you can find multilingual rules, results, pictures and videos, software, etc.

There is a new address for your WWSA 2013 logs = logs@wwsatest.org

WWSA web site http://www.wwsatest.org

GACW web site http://gacw.no-ip.org

We will be very happy to contact you in the CW HF bands...!!!

SB PROP @ ARL $ARLP019
ARLP019 Propagation de K7RA

ZCZC AP19
QST de W1AW
Propagation Forecast Bulletin 19 ARLP019
>From Tad Cook, K7RA
Seattle, WA May 10, 2013
To all radio amateurs

SB PROP ARL ARLP019
ARLP019 Propagation de K7RA

Average daily sunspot numbers remained about the same this week,
with the number nudging up from 120.9 to 121.7. The average of the
daily solar flux numbers went from 136.5 to 137.5.

An odd thing happened too. For two weeks in a row the average
planetary A index was the same as the mid-latitude A index. Last
week they were both 9.9, and this week both values were 8.

Predicted solar flux for the near future is 125 on May 10, 115 on
May 11-13, 110 on May 14, 105 on May 15-16, 110 on May 17, 120 on
May 18, 130 on May 19-20, 135 on May 21-22, then rising to 160 on
May 28.

Predicted planetary A index is 5 on May 10-11, 8 on May 12-13, 5 on
May 14-20, then 15, 10 and 15 on May 21-23, 5 on May 24-27 and 15
and 10 on May 28-29.

F.K. Janda, OK1HH predicts the geomagnetic field will be quiet to
unsettled on May 10, quiet to active May 11-12, and quiet to
unsettled May 13-19.

The forecasts from OK1HH have been getting shorter. At first the
text was shorter because there was less variation over the forecast
period. So instead of shifting between five different levels of
activity over the course of nearly four weeks, we've seen two
levels, as in this week's forecast.

When I checked every bulletin since the first of the year, I found
that the number of days the forecast covers varied. The first two
bulletins of 2013 each covered 23 days, the next was 25 days, then
the fourth bulletin was 23 days, followed by 24 days on each of the
next three. The eighth (Propagation Forecast Bulletin ARLP008)
covered just 17 days, and the next six weeks varied from 21-24 days.

For bulletins ARLP014 through ARLP019 (this bulletin) the coverage was 23, 19, 25, 24, 17 and 10 days. So the predictions for this bulletin and the previous two all end on the same date, May 19. I will see if I can find out what his methods are, and if perhaps variation in conditions leading up the date of the forecast in some way limits the number of days that are predicted.

At 0119 UTC today (May 10) I received an alert from http://SpaceWeatherLive.com (not to be confused with http://spaceweather.com). The message is in Dutch, and it looks like it says there was a "Class M3.95" solar flare. But the message does not say whether the flare was geo-effective (Earth directed) or how long it lasted.

I note that http://spaceweather.com says the flare was just over the Sun's eastern horizon, so it was not aimed at Earth, but it will move toward Earth "in the days ahead." An event at the eastern horizon should take about a week to move into a position where it is aimed toward Earth, although another variable is the latitude of the region.

The English version of their web site is http://www.spaceweatherlive.com/en. In the group of six graphs at the top, five of them cover the previous two hours, and the Kp Index covers the previous 24 hours.

At the bottom of the page is a flattened version of the STEREO image at http://stereo.gsfc.nasa.gov/. Instead of watching the rotating globe, you see all sides of the sun at once.

David Moore sent a link to Phil Plait's "Bad Astronomy" blog (see http://www.slate.com/blogs/bad_astronomy/2013/05/08/solar_eruption_different_spacecraft_see_a_solar_eruption_from_different.html) with an article and an impressive NASA video showing a May 1 solar event, as seen from SOHO, SDO and STEREO. You can see Phil's website at http://www.badastronomy.com/index.html. Bad Astronomy refers to Phil's attempts to correct popular misconceptions about science.

Lance Collister, W7GJ of Frenchtown, Montana wrote about recent 6-meter adventures: "Well, I think the SFI being over 145 on Saturday May 4 probably moved the TEP further north than usual - and with the early onset of Es, which just happened to connect me to Texas just at the right time of late afternoon - I got my first ionospheric link to South America on TEP this cycle. Saturday I completed CW contacts with CX3AN, LW3EX, LU2DPW, LU5FZ, CX9AU, LU5FF, and PY3FF. CX1FK, LU2DEK, LU9DO, CX5CR, LU6DC, PY3OR and LU9EHF were worked on SSB. On Sunday, May 5, the SFI was still over 135 and I worked CE2AWW weakly on CW, although I didn't seem to have a good strong Es link like on Saturday. Still searching for HC, CP and PZ."

TEP refers to Trans-Equatorial Propagation. Check the W7GJ website at http://www.bigskyspaces.com/w7gj/. Lance invites us to use EME (moonbounce) and check some of the references on his website.

Paul Harden, NA5N of Socorro, New Mexico wrote about a fascinating project at the Very Large Array, the world's largest radiotelescope, where he works:

"I am an electronics engineer at the Very Large Array (VLA) radio telescope. My current project is our low-band system (60-500 MHz) and the Long Wavelength Array (LWA) for 10-88 MHz. Though a few years away, one of the science goals of LWA is to make real time 3D maps of the ionosphere. The prototype system clearly paints the locations of the E/F layers and it's depths as it migrates around. Really cool, and when completed, should be made publicly available on the web and a great tool for hams."

He sent this link to the project: http://www.aoc.nrao.edu/~pharden/LBR/lbr.htm.

Jay Miller, N4NUI of Sandy, Utah wrote about what happened on 6-meters on May 2:

"During the afternoon of May 2 there was a great opening on 6-meters. It was obvious there were many paths open north and south from the QSOs I could hear. I was mobile up in Antioch, Illinois (EN52wk) and heard stations to the SE down to South Florida and SW to West Texas. It was pouring rain and I couldn't get out of the vehicle to tune the manual screwdriver without getting soaked to the bone.

"I fixed that problem this afternoon (May 3) by driving up to Milwaukee and buying a Little Tarheel II. I got it on the vehicle in time to make a contact in the early evening with K5WLT and WP4O with good signals as the opening started to close. Let's hope this is a harbinger of things to come this summer.

"I travel for my job and I am sure glad I haul around a HF rig and a Gorilla magnetic mount for the rental cars. A traveling ham using rental cars has to ask for the same rental models each time once one finds out how to get through specific firewalls to the battery."

Floyd Chowning, K5LA of El Paso, Texas wrote on May 4: "I had a nice contact on 2-meter SSB this morning on 144.2 MHz at 1516 UTC with WA7KYM in Cheyenne, Wyoming. Cheyenne is 639 miles from El Paso, TX according to QRZ using grid squares. I am in DM61 and WA7KYM is in DN71. This was my first contact with a Wyoming station."

Jon Jones, N0JK of Kansas wrote on May 4: "Interesting opening today from the Midwest to South America.

"I was mobile (XYL driving) on K-10 just east of the K-7 intersection in Olathe and heard K3PA, K0HA and N0XA CQing or calling some of the DX.

"No DX heard until 2150 UTC when PY3RO showed up on 50.115 MHz SSB. He worked a local in Kansas City and I called after their Q. Had a quick QSO with Raoul, he peaked to 5x7. During our QSO another KC local came up on freq. and said my transmit audio was bad! (It was due to voltage drop using a cigarette lighter plug to run the radio in the car. I normally use jumper cables directly off the car battery to run the radio). The next couple of times I went back to PY3RO and listened, the local kept telling me 'OM your audio is bad.' Guess he didn't hear the PY. First Brazil 6 meter QSO since 2001. I did not hear any other DX stations. My mobile set up is a 2 meter 5/8 wave whip and the FT-897."

Jeff Hartley, N8II of West Virginia wrote on May 7 about great conditions back on April 7-11. He worked both Europe and Asia on 12 meters, and on April 9 on 10 meter CW running 5 watts he worked 9A4WY in Croatia who gave Jeff a signal repot of S9 plus 10 dB.

Jeff continued, "Throughout the last month, except during disturbed conditions, 15 has been open to EU many hours, sometimes as late as 2200-2400 UTC and open about 90% of the days to Indonesia with good signals from around 1300-1600Z. 20 meters is consistent every morning with good VK signals from about 1115-1430 UTC or so and long path southern Africans. On April 28, 15 meters was in good shape to Russia in the UA1DZ contest logging Many stations in northern Europe as well as UP0, UC0, and RN9. Many St. Petersburg area Russians were active and it was fun working them as well as hearing them working each other.

"On the April 29-30 with only 200 watts between 0200-0315 UTC, I had a huge number of Russian stations call on 20 CW, some of the most fun and biggest number of Russian callers in 40 years on the air. 43 stations were logged in an hour. Conditions were extremely good from central Asia all the way east to DL on April 29, logging all Russian call areas except for 0 as well as EX8AD and many Ukrainians. On April 30, Asia was not quite as good, but many UA3 and UA6 area stations called with the third QSO of the run being UA0YM in zone 23. Earlier around 2340-0030 UTC there was a large increase in EU and Middle East activity on 17 meter CW logging UT3, A65BR, YO5, SV1NN/3, and MU0FAL. On 20 CW I logged Z33Z. there was a real air of excitement on both sides of the Atlantic over the great conditions."

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for May 2 through 8 were 102, 139, 156, 103, 122, 118, and 112, with a mean of 121.7. 10.7 cm flux was 149.4, 147.9, 141.6, 137.1, 130.7, 128.7, and 126.9, with a mean of 137.5. Estimated planetary A indices were 13, 6, 5, 7, 8, 10, and 7, with a mean of 8. Estimated mid-latitude A indices were 11, 5, 5, 7, 9, 11, and 8, with a mean of 8.

SILENT KEY VK4PJ

Peter Handley Brown, Balmoral and recently Sylvan Woods.

Peter peacefully passed Wednesday May Eighth 2013 at age 100 years..

A long time Radio Ham, who will be honoured in perpetuity by the
"WIA Contest Champion - VK4PJ Peter Brown Trophy."

Peter also was a long-time supporter and member of RAEME.

He was an EX-POW in Japan and an engineer in civilian life..

His Daughter, Beth Hobson advised through the RAEME Newsletter that his funeral will be Monday 13 May at 1pm at Mt Gravatt Crematorium Chapel, Mains Road, Macgregor.

As an aside the Nominal Roll has Peter as a Captain and National Archives has a Japanese Registration card placing him in command of the AAOC Wksp with HQ Rabaul

He was captured in Rabaul and transported with other Officers & Nurses to Japan for the duration.

In the April 7 edition of WIA National News, Laurie Murray VK4LO, wrote a glowing tribute to Peter as he was celebrating his 100th Birthday April 13.

(Arte et Marte John Parfitt Welfare Officer RAEME Association Queensland, vk4bb, vk4lo)

A hearing between Adobe Systems (and others), and Bill Caralis' Super Radio Network, will be heard in the Federal Court of New South Wales Tuesday 28 May.

All affidavit evidence is required to be submitted by 15 May for preliminary discovery, outline of submissions from prospective applicants are required by 20 May, and by respondents by 23 May.

The five applicants who have brought the case are Adobe Systems Inc., Adobe Systems Pty ltd, Microsoft Corporation, Microsoft Pty ltd, and Microsoft Regional Sales.

The case relates to the Super Radio Network stations allegedly using products without licenses, and allegedly communicating internally how to apply a 'crack' to obtain unlicensed access.

Less than a year after the decision to site the revolutionary Square Kilometre Array in South Africa and part here in Australia, the SKA Organisation announced that it has opened its new international headquarters building which was constructed in just 6 months.

The opening ceremony for the building which will be home to the team managing the construction, design and scientific output of this ground-breaking telescope was observed by an invited audience of global dignitaries, scientists and engineers.

The Square Kilometre Array is a radio telescope that is planned to be built over 8 years commencing in 2016 in the remote and radio quiet deserts of Australia and Southern Africa.

The SKA will comprise thousands of radio telescopes, which will be located in these two desert locations, and will also have dishes and antennas spread over thousands of kilometres to create a single giant telescope.

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

During the WIA AGM and Conference we'll be using the Fremantle VK6RFM repeater for conference traffic.

Maintained by the WA Repeater Group, you can set your radio up using 146.950 as the output frequency and 146.350 as the input.

Thanks to Don VK6DN the repeater also hosts EchoLink and IRLP so you can make contact with home base from your hotel room or throughout Fremantle and beyond. The EchoLink node number is: 170709 and IRLP node number is 6200.

Those numbers can also be found online at vk6.net where you'll find a full list of repeaters and beacons in VK6.

Check the frequencies online, and if you're consulting this month's AR magazine, the gremlins got in and some of the frequencies there show the input frequency rather than the output frequency for some repeaters, so check online at vk6.net for details.

(vk6flab)

HAMS ACROSS AUSTRALIA.

VK9

VK9 now SOTA classified

The VK9 (Australian external territories) call area now has summits classified under SOTA as follows -

1 summit on Christmas Island.
2 summits on Norfolk Island.
4 summits on Lord Howe Island.

and can be used from May 1st.

(sourced to SouthGate)

DISCUSSION POINT

What use is an f-call?

When you get introduced to Amateur Radio, your likely first step is to get a Foundation License. That's not always been the case. The Foundation License has only been in existence since October 2005. I say only, because Amateur Radio has been around for over a hundred years. For example, the Wireless Institute of Australia, the WIA celebrated its centenary in 2010.

There are currently more than 2300 Foundation Licenses active, said in another way over 14% of Amateur Licences are Foundation Licenses.

My question is this.

If there are more Foundation Licenses as there are Standard Licenses, why don't we hear more of them on-air?

Recently I participated in a contest as a QRP station. That means I halved my allowable power from 10 Watts down to 5 Watts to participate to see what the impact might be - given that I'm aiming to contact 100 countries using my F-call and 5 Watts. During the 16 hours I participated in the contest I made contacts with 45 different stations. 80% of those were Advanced Calls, only 9% of those call signs heard were Foundation Calls.

Sure, you might argue that because an Foundation Licensee is only allowed 10 Watts, they cannot be heard, but I made 185 actual contacts across 4 states - hardly the mark of someone who could not be heard. Perhaps my set-up was better than those of other Foundation Licensees, but I don't think that this is what makes the difference. I think they're just not on air.

Perhaps you're an F-call and you're not on-air. What's stopping you from using your call and making your contribution to the airwaves? Perhaps you hold another license - perhaps you might ask F-calls you meet if they're on-air or not.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

The S.A.R.L. is planning to hold a Youth Week in mid February 2014 to coincide with the ARRL School Club Round-up from 11 - 15 February.

SARL's newly appointed youth councillor, Gerhard Coetzee, ZS 3 TG, is looking for input and suggestions on the type of activity young Amateurs in South Africa would like to see included.

The RAC Board of Directors have announced the selection of Scott Wood, VE 1 QD of Halifax, Nova Scotia, as the Canadian Radio Amateur of the Year for 2012.

VE1QD celebrated sixty years in Amateur Radio in 2012.

Over these years he has contributed enormously, and in many and varied ways both to our hobby and to radio in general. In his youth as a net controller in the Oregon State Fire Service, later as a radio operator in the US Naval Reserve, as a member of the Board of Directors for Radio for Peace International, in contesting and DXing, and in Elmering aspiring new hams, both young and old.

However, it is the leadership in Amateur Radio that Scott has demonstrated locally, regionally, and internationally that is being recognized with this award.

Scott has demonstrated vision, enthusiasm, dogged determination & commitment to excellence in the area of Amateur Radio DXing through the establishment and management of the Maritime DX Forum for eight consecutive years. Scott envisioned the forum to be a venue where DXers in the region could come together annually to hear world-class, as well as local DX experts speak about important and current DX topics, and to provide a forum in which to share ideas with some of the best operators and leaders within the Amateur Radio community.

A presentation will be made to Scott by the RAC President at the RAC booth at the Dayton Ham Fest this month.

SPRING 2013 5MHZ NEWSLETTER NOW AVAILABLE

The Spring 2013 edition of The 5MHz Newsletter is now available for free download. This edition features news about 5 MHz amateur band allocations, the latest update of the Worldwide Amateur 5 MHz Allocations Chart, plus stories on 5 MHz Web Software Defined Radios and much more.

IRTS NEWS DESK

SEARG gear-up for Geoparks weekend

Ireland's South Eastern Amateur Radio Group will, for the 6th consecutive year, take part in the Geoparks Communications weekend which takes place over the weekend of 25 and 26 of May to coincide with European Geoparks week.

The event is co-ordinated by Martin G3VOF of the Riviera Amateur Radio Club and awards are available for working Geoparks stations including the main

station GB6GEO. Although most activity is in Europe, a number of stations will be QRV from Geoparks around the world.

SEARG will be QRV as EI2GEO from the Copper Coast Geopark in Co. Waterford. As the Geopark event is not a contest, operation tends to be relaxed with ample time and an ideal location to experiment with antennas. There is also a strong social aspect to the event with barbecue and drinks on the Saturday night. Activity will be mainly on HF (SSB and CW).

The Copper Coast European Geopark is located on the South East coast of Ireland. SEARG would like to thank Paula McCarthy from the Copper Coast Geopark management for making this excellent site available over the past number of years.

For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter.

NEWS FROM ARNEWSLINE USA

RADIO READING: RIDING THE SHORTWAVES: EXPLORING THE MAGIC OF AMATEUR RADIO

Now the story of a new book for new and potential hams.

Amateur Radio Newsline's Cheryl Lasek, K9BIK, tells us all about it:

Riding the Shortwaves: Exploring the Magic of Amateur Radio is a new book by author Don Keith, N4KC, that contains material of special interest to newcomers to ham radio and those thinking of joining its ranks. This includes easy-to-understand chapters on antennas, choosing a first station, and a tour of the amateur radio high-frequency bands. There are also short fictional and satirical pieces that use humour or drama to show the various facets of the hobby. According to Keith, that's why he too the approach that he did:

N4KC: "I felt there was a need for a book for people who were just on the verge of either committing to ham radio or walking away from it. So I had to think about what's keeping people from entering the hobby and what would it take to push them over the cliff."

--

Keith also notes that it's just a matter of being in the right place at the right time and in the right situation for ham radio to become a part of someone's life:

--

N4KC: "That was my case. My dad was not a ham. He was a television repair and he had a shortwave receiver. We used to sit around and listen to hams; to Sputnik and all sorts of things like that and the bug bit."

--

Keith's book also counters the notion that Facebook, the web, Twitter, smart phones and other new technology have made amateur radio obsolete. On the

contrary, the author maintains, in its 100th year, the hobby is more vibrant and exciting than ever.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Riding the Shortwaves: Exploring the Magic of Amateur Radio is available in both paper and electronic release from booksellers everywhere including Amazon.com

DX GROUP ATTEMPTING TO ARRANGE OPERATION FROM NORTH KOREA

A group of DXers say that they are working on getting permission to operate from North Korea which is the most wanted DXCC entity in the world. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

The Intrepid-DX Group, in partnership with the World-Wide DX Group says that for the past four years that they have been working with professionals in the business and tourism industries who are actively doing business in North Korea.

In a widely circulated press statement the organizations note that they have prepared a comprehensive, multi-faceted proposal, which has been delivered it to the North Korean officials via their emissary located in Chinese. Also that several members of the combined groups leadership and advisory team have made multiple visits to the region and are advising the overall groups accordingly.

The DXers say that they are using the same techniques that were successful in opening up Kurdistan, the South Sudan and Yemen to DXpedition activity. They add that they are leveraging their ideas and contacts towards the goal of a major DXpedition over a four week period from within the North Korea border. As we go to air, no date for such an operation to take place has even been speculated.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

OPERATIONAL NEWS - DATELINE 2013

VK Trans Tasman Contest May 11

The Day of the YL's will be held 18 and 19 May.

VK SHIRES June long weekend 0600 UTC Sat June 8, ends 0600 UTC June 9.

WW International Museums Weekends June 15/16 and 22/23

160M PHONE & 80/160M CW & DIGITAL TRANS-TASMAN CONTEST: 20 JULY, 8PM-2AM

80M PHONE TRANS-TASMAN CONTEST: 11 MAY, 8PM-2AM

The popular 80m phone Trans-Tasman contest is coming around again, and will be held on Saturday 11th of May 2013, from 8pm to 2am NZST. As usual your best 5 hours of the 6 count toward the final result.

BUT the only news your WIA News has of this actually comes from ZL!

Contact as many ZL's and VK's as you can each hour on 80m SSB. Bonus points for QRP, and for each group of 5 different call areas. Full rules and last years results are over on the WIA contest pages:

http://www.wia.org.au/members/contests/transtasman/ [8]

The contest logging software VKCL has been updated to cover the latest revision of the rules. VKCL can be downloaded here:

http://www.mnds.com.au/vkcl/ [9]

This is always a great night of contesting, not too long or too serious, but there's enough activity and challenge for an enjoyable evening. For extra fun many stations go portable with simple wire antennas.

160M PHONE & 80/160M CW & DIGITAL TRANS-TASMAN CONTEST: 20 JULY, 8PM-2AM

The 160m phone contest in July is always popular with 160m enthusiasts, and is a great chance to have a go on the band, or to go portable with simple antennas.

The Trans-Tasman CW and Digital contests are held on the same night. They can be entered separately or combined with 160m phone to compete in the multi-mode category. This is a great opportunity for clubs and other multi-op stations to work both bands and all modes with 2 transmitters. CW scores double points this year!

Rules and results again on the WIA page above.

(sourced to Rob, ZL3AKM Contest Manager via NZART info line.)

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

To promote Amateur Radio and the WIA AGM listen out for VI 103 WIA during that AGM weekend.

CELEBRATING ST CYRIL AND METHODIUS DAY

Now here' a rather interesting one. A special event station signing LZ 2013 KM will be activated by members of Bulgarian Federation of Radio Amateurs until May 31st.

This operation is to celebrate a national holiday known as St. Cyril and Methodius day.

Operation will be on all the High Frequency bands with QSLs going only via the LZ bureau.

And who were St. Cyril and Methodius you ask? Well they were the creators of the Cyrillic alphabet, and we thought you might like to know.

(Z1BJ via ARNewsLine)

JA9LSZ is reported as being currently active from Nepal as 9 N 7 SZ.
His operation is on the High Frequency bands only.
If you work 9n7sz him please QSL to JA 9 LSZ.

In the USA in particular Armed Forces Day Cross band Military/Amateur Radio Communications Test is where the Army, Air Force, Navy, Marine Corps, and Coast Guard co-sponsor the annual military/amateur radio communications tests in celebration of the 63rd Anniversary of Armed Forces Day (AFD).

Although the actual Armed Forces Day is celebrated on Saturday, May 18, 2013, the AFD Military/Amateur Crossband Communications Test will be conducted this weekend 11 May to prevent conflict with the Dayton Hamvention, which is the same weekend as the actual Armed Forces Day.

The annual celebration features traditional military to amateur cross band communications SSB voice and Morse Code tests. These tests give Amateur Radio operators and Short Wave Listeners an opportunity to demonstrate their individual technical skills, and to receive recognition from the appropriate military radio station for their proven expertise.

QSL cards will be provided to those stations making contact with the military stations.

usamars.us/crossband_2013.htm

(SouthGate)

THE QNEWS WORK BENCH - the nuts and volts report - Measure Twice cut Once.

WIA Front Page News says "Though they be but little, they are fierce."

The most powerful batteries on the planet are only a few millimetres in size, yet they pack such a punch that a WIA member could use a mobile phone powered by these batteries to jump-start a dead car battery - and then recharge the phone in the blink of an eye.

Developed by researchers at the University of Illinois, the new micro batteries out-power even the best super capacitors and could drive new applications in radio communications and compact electronics, even our ham radios.

The new micro batteries offer both power and energy, and by tweaking the structure a bit, the researchers can tune them over a wide range on the power-versus-energy scale.

The batteries owe their high performance to their internal three-dimensional microstructure. Batteries have two key components: the anode (minus side) and cathode (plus side).

The National Science Foundation and the Air Force Office of Scientific Research supported this work in the USA.

WW SPECIAL INTEREST GROUPS --- DIGITAL

Comparison of ham radio digital modes

Tony K2MO has released a video comparing PSK-31 and MT63-500 on long path between New Zealand and New York.

He says, and I quote:

"I've been testing several modes with Fergus, ZL2FV, on 20 meters.
The long distance path from New Zealand to New York tends to be quite unstable and that makes for difficult copy with modes that are susceptible to the effects of multi-path and other types of ionospheric distortion.

We tested a mode with lots of error correction (MT63-500) and another (PSK-31) with no error correction. I plan on testing a few more modes under more adverse conditions and will post a follow up video ASAP."

SARL NEWS SUNDAY 12 May 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

ICASA ANSWERS QUESTIONS AROUND PAYMENTS AND LICENCES

NOMINATIONS FOR MTN RADIO AMATEUR OF THE YEAR AWARDS INVITED

NEW SAATI AWARD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

ICASA ANSWERS QUESTIONS AROUND PAYMENTS AND LICENCES

Following requests from members the SARL asked ICASA to clarify license payments and the issuing of licence documents. In its reply ICASA said that multiple year licences are not issued automatically after payment of the prescribed fees. A renewal application form for such a licence must first be submitted and the Authority has started to implement this process from the 2013/14 licence year. Any licensee who has paid the fee for a multiple year licence during the previous licence year must still submit the application form before the licence period can be amended. Licensees who do not submit the application form will be credited with the amount paid which will be off-set against the annual licence fees and a new invoice will be rendered once the fee is used after the fourth year.

"A licensee may request that a licence be issued for a period of one to five years. The application forms that were distributed and used by the Authority for this licence year did not provide for an indication of the period requested. It was therefore the responsibility of the licensee to indicate separately the amount of years that the licence

must be issued for. The majority of radio amateurs have merely completed the application form which shows only the intent to renew the licence. The Authority has therefore issued annual licences to those licensees that did not indicate the amount of years to be licensed. They can still indicate their intent to amend the licence period after which a new updated licence will be issued."

"The Authority had some challenges this licence year in acquiring the licence stationary which lead to a delay in issuing the paid-up licences. All these licences have now been issued and posted and licensees should receive their licences in due course.

If you have not completed form B, please do so. It is available on the SARL home page.

LAST CHANCE TO BOOK FOR THE SA AMSAT SPACE SYMPOSIUM

Don't miss the 2013 SA AMSAT Space Symposium. It will take place on Saturday 18 May 2013 at the Innovation Centre in Pretoria. Booking can be accepted till Thursday this week. Get details on www.amsatsa.org.za. You may also book online and pay at the door on arrival.

The programme has something for every interest. Make this year's event a success. Durban had 80 delegates attending, for this year we are still very far short of that number. Book now!

ANTENNA DEFENCE FUND NOW AT R61 750

The Antenna Defense fund now stands at R61 750 thanks to a donation from the members of the Hibiscus Coast Amateur Radio Club - ZS5HAC. At the SARL Annual General Meeting, SARL Legal Adviser, Johann Marais, ZS1JM, presented an update on the work done to date. Full details about the funds, who have contributed, how to support the initiative and the AGM presentation are available on the web at www.amateurradio.org.za/ADF.htm.

NOMINATIONS FOR MTN RADIO AMATEUR OF THE YEAR AWARDS INVITED

The South African Amateur Radio Development Trust invites nominations for the 2013 MTN Radio Amateur of the Year Awards. There are three award categories: Garth Milne Technical Innovation Award, MTN Radio Amateur of the Year Award and the MTN Amateur Radio Community Service Award.

The Garth Milne technical innovation award is made for the support, development and application of Technological Innovation in Amateur in South Africa. The recipient will be a person who has promoted the use of technology in amateur radio at club level, nationally, at schools or tertiary education institutions.

The MTN radio amateur of the year award is made for the support and development of the Amateur Radio Service in South Africa, not for individual achievements such as DXCC and other operational awards or contests. The recipient will be a person who has given of his or her

expertise and time to the promotion of Amateur Radio in South Africa.

The MTN amateur radio community service award recognises a radio amateur or a group of radio amateurs for service to the community. Community service can be assistance to a handicapped radio amateur, communications support during a sporting event or a disaster situation like a road accident or a natural disaster like a flood, veld fires, or an earthquake. Nominations are invited for an individual or a group of people like a radio club, or an association.

Each award carries a R2 000 cash award and a 2013 ARRL Handbook. Nomination forms and full details are available on www.amateurradio.org.za. The closing date for nomination is 10 June with the award presentation on 26 June 2013 at a lunch at the Mid Rand Protea Hotel.

NEW SAATI AWARD

One of the functions of a national body for amateur radio is to recognise outstanding ability and achievements on a national level. The South African Radio League (SARL) has done this for many years, providing a variety of awards for both service and operating achievements.

The South African Amateur Telecommunication Institute (SAATI) has tasked the SARL to present an annual award on its behalf. Thanks to some recent substantial donations by SAATI, the SARL is in a position to honour outstanding development work by radio amateurs in the digital field. This will be done by means of the SAATI award, an award of R4 000 for development work in the digital field, on either hardware or software.

SARL members and affiliated clubs may nominate a radio amateur at any time. The award nominations close on 31 January and will be presented at the following SARL AGM. Nominations should include a detailed motivation setting out what the nominee has achieved and what the impact of his development is making on amateur radio.

Address nominations to the secretary@sarl.org.za or contact the Secretary or the Awards Manager for assistance.

The SARL takes this oppurtunity to thank SAATI for their donation on behalf of all South African amateurs.

COMPETITIONS

80 METRE QSO PARTY MARCH 2013 RESULTS

52 stations operated during the contest and 11 logs were received. The results are as follows:

1. ZS3R, Christopher van Rensburg 485. 2. ZS6LH, Lukas Holtshausen 430 3. ZS1ZS, Abe Zwiegelaar 425. 4. ZS5ME, Dawn Snyders 345. 5. ZR6DNS, Denis Wheeler 290 6. ZS6KN, Ken Gurr 250 7. ZS1VK, Russell Mycroft 205

8. ZR6MS, Marius Snyman 160 9. ZS4BS, Dennis Green 160 10. ZS6BNE, Eddie Leighton 130. 11. ZS5KL, Kurt Linsin 30.

Divisional Results as follows:

Div 6 20.

1 12.

5 7.

4 7.

2 5. Other 3.

THE DAY OF YLs 2013

The SA YL Group would appreciate your involvement in this event.

For the 3rd time in the world, "THE DAY OF YLs" takes place from 06:00 UTC on 18 May till 18:00 UTC 19 May 2013.

The aim of the days is to promote YL's activity around the world but of course all OMs are invited to participate. Bands to use are: 3,5 - 7 - 14 - 21 - 28 MHz. To help competitors to find each other it is proposed to use frequencies +/- 10 kHz from the following activity center frequencies: CW: 3,533, 7,033, 14,033, 21,033 and 28,033 MHz RTTY: 3,588, 7,044, 14,088, 21,088 and 28,088 MHz SSB: 3,733, 7,133, 14,213, 14,240, 14,300, 21,233, 21.400 and 28,433 MHz Exchanges: RS(T) + YL/OM (e.g. 59(9)+ YL/OM) The same station may be worked once on each band and mode.

Points accumulate as follows: For OM/YL 2 points For YL/YL 3 points For YL/OM 1 point.

Mail logs to f5isy@orange.fr not later than 26 May.

CLUB NEWS

KARTS FLEA MARKET AND AWA OPEN DAY

The Kempton Park Amateur Radio Technical Society (KARTS) and the Antique Wireless Associations (AWA) have joined forces to present a combined flea market and AWA open day event on Saturday 1 June from 08:00 onwards.

It will be held at the Impala Voortrekkers Centre, Rooibos Avenue, Allen Grove, Kempton Park. Visit the KARTS website at www.zs6kts.co.za/ if necessary.

There will be the usual display of antique radios and associated equipment.

This event promises to be a most interesting, enjoyable and memorable day.

For table bookings or any queries, contact Selwyn, ZS6SEL, at 082 804 2782 or email to zs6sel@gmail.com or Nico, ZS6QL, at 083 269 9939 or email to nicolaasv@mweb.co.za.

KARTS and AWA are looking forward to seeing you there!

DURBAN ARC COMMITTEE

At the Durban ARC AGM on the 4 May 2013, the members decided unanimously to re-elect the full previous committee for the 2013/4 season. The committee is as follows: Chairman: Louis de Bruin, ZS5LP Vice chairman: Neil Slogrove, ZR5NAS Secretary: Kurt Linsin, ZS5KL Treasurer: Louis de Bruin, ZS5LP. Members: Aubrey Worthington ZS5L John Norman ZS5JX Alan Bartlett ZS5ADP (technical) Glen Meyer ZS5GM (IT) Sean Beukes (co-op general).

The Durban ARC has 40 members, including 4 new members who joined since 1 March 2013.

Their monthly open day/swopshop will, as in the past, be held the first Saturday of every month at the Dutch Club, Tara Road, Bluff, where they gather from 10:00 until 14:00 where The Dutch Club's facilities are available to visitors.

PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low levels. The sun is peppered with several large sunspots but only AR1 736 has a beta-gamma class magnetic field that harbours enough energy for M-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 69.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be some good 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 12 May - This afternoon 15:00 to 19:00 CAT Antique Wireless Association SSB Valve QSO Party. 13 May - Log sheets for ZS 3 sprint to be in to zs3nc@qsl.net. 16 May - Last day to book for the SA AMSAT annual space symposium in Pretoria at the Innovation Hub on Saturday 18 May 2012, visit www.amsatsa.org.za. 18 May - SA AMSAT SPACE SYMPOSIUM at the Innovation Hub in Pretoria. 26 May - Logs for The Day of the YLs to be in to f5isy@orange.fr. 31 May - Last day to submit suggestions on the type of activity young Amateurs in South Africa would like to see included in 2014 Youth Week programme. Send your suggestions to youth@sarl.org.za. 31 May - Last day to submit logs for the Antique Wireless Association AM/SSB Valve QSO Party to andy.cairns@xsinet.co.za. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 025, and 17 660 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. The website also lists various other retransmissions. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za. Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by George Honiball, ZS6NE.

Thank you for listening, 73.

/EX

Annual Armed Forces Day Cross-band Military / Amateur Radio Communications Test

Posted: 10 May 2013 04:07 PM PDT
http://forums.qrz.com/showthread.php?390863-Annual-Armed-Forces-Day-Cross-band-Military-Amateur-Radio-Communications-Test&goto=newpost

Tomorrow is the day! The weather isn't scheduled to be great for WAR (Pentagon) but we are still planning on operating. As side note from last year; as far as I know Fort Huachuca is the responsible entity for sending out QSL cards for WAR and hasn't yet sent out last year's. Either way, it is a great opportunity to contact US military stations.

Information from USARMY MARS about the event:
http://www.usarmymars.org/home/announcements

The Army, Air Force, Navy, Marine Corps, and Coast Guard are co-sponsoring theannual military/amateur radio communications tests in celebration of the 63rd Anniversary of Armed Forces Day (AFD). Although the actual Armed Forces Day is celebrated on Saturday, May 18, 2013, the AFD Military/Amateur Cross-band Communications Test will be conducted 11 May 2013 toprevent conflict with the Dayton Hamvention (17-19 May 2013), which is the same weekend as the actual Armed Forces Day.

The annual celebration features traditional military to amateur cross band communications SSB voice and Morse Code tests. These tests give Amateur Radio operators and Short Wave Listeners (SWL) an opportunity to demonstrate their individual technical skills, and to receive recognition from the appropriate military radio station for their proven expertise. QSL cards will be provided to those stations making contact with the military stations.

PART I. MILITARY-TO-AMATEUR CROSS BAND SSB & CW TEST CONTACTS.

Military-to-Amateur cross band operations will take place on the dates/times in ZULU (UTC), and frequencies listed below for each station. Voice contacts will include operations in single sideband voice (SSB). Some stations may not operate the entire period, depending on propagation and manning. Participating military stations will transmit on selected Military MARS frequencies and listen for amateur radio stations in the Amateur bands indicated below. The military station operator will announce the specific amateur band frequency being monitored. Duration of each voice contact should be limited to 1-2 minutes. The following stations will be transmitting on MARS frequencies listed below which are provided as "Window/Dial Frequency" in kHz. Some stations will use CW to provide the opportunity to check in by Morse Code.

SUBMISSION OF SECRETARY OF DEFENSE TEST MESSAGE ENTRIES.

Transcripts of the RTTY, PACTOR, AMTOR, PSK-31, MFSK and MT63 receiving test should be submitted "as received". No attempt should be made to correct possible transmission errors. Provide time, frequency and call sign of the military station copied, including name, call sign, and address (including zip code) of individual submitting the entry. Ensure this information is placed on the paper containing the test message. Each year a large number of acceptable entries are received with insufficient information, or necessary information was not attached to the transcriptions and was separated, thereby precluding issuance of a certificate. Entries must be sent to the appropriate military address as follows:

A. STATIONS COPYING SECRETARY OF DEFENSE MESSAGE TRANSMITTED FROM AAZ/WAR/AAC SEND ENTRIES TO:

ARMED FORCES DAY CELEBRATION

COMMANDER NETCOM/9TH ASC

Removal of Radio Equipment from Tower Worries Emergency Service Personnel:

Posted: 10 May 2013 05:11 PM PDT
http://www.eham.net/articles/30159

A decision to remove antennae and repeaters used by amateur radio operators from a tower on Buck Mountain worries many of the people working in local emergency services. Tony Davis, president of White Mountain Search and Rescue, said he learned late Wednesday that the tower on Buck Mountain holding the amateur radio repeater that is owned and maintained by Rick Sohl of Southwestern Wireless, also a member of Sierra Blanca Amateur Radio Club, was sold to American Tower Corporation. "Despite attempts by Rick to negotiate an arrangement, American Tower has decided to terminate HAM use of the tower, effective (Friday)," Davis said. "There are other towers there, but they are largely occupied." The lack of backup communications could have serious implications for public safety in Lincoln County, Davis said. During the Little Bear Fire in June 2012, amateur radio operators providing backup communication were invaluable, as they were in the flood of July 2008 along the Rio Ruidoso, Davis said. But as of Friday, that helpful backup no longer will exist in incidents where conventional means of communicating are lost.

Dayton Hamvention Lodging Available May 17 & 18, 2013

Posted: 10 May 2013 03:23 AM PDT
http://forums.qrz.com/showthread.php?390772-Dayton-Hamvention-Lodging-Available-May-17-amp-18-2013&goto=newpost

I have a room available at the Holiday Inn, Brookville, OH - about 10-15 minutes from Hara Arena.

My friend purchased his plane ticket and room in advance with no ability to cancel. Now that he is unable to attend, I am asking the nominal rate of $50 per night to help offset his loss. The room is now in my name and would change it over to yours. Personally, I will be arriving on Saturday evening. The room has one king bed.

If interested, please contact me at cns2007bus@yahoo.com.

Thanks folks!

N8CNS

EU PSK DX Contest - 18-19 May 2013

Posted: 11 May 2013 10:49 PM PDT
http://forums.qrz.com/showthread.php?391004-EU-PSK-DX-Contest-18-19-May-2013&goto=newpost

The European PSK Club has the honour to invite radio amateurs from all over the world to participate in the 10th EU PSK DX Contest 2013. The objective of the EU PSK DX Contest is to establish as many contacts as possible between radio amateurs around the world by using only the BPSK63 mode (all HF bands except WARC bands). Everybody can work everybody for QSO and multiplier credit. The next EU PSK DX Contest will be held from 12:00 UTC on 18.05.2013 to 12:00 UTC until 19.05.2013. Every station can be contacted once per band. The operator may change the bands without any restrictions. Only one transmitted signal is permitted at any time.

Categories: SO2R, SOAB, SOAB-QRP, SOAB-P, SOAB-YM-12, SOAB-YL-12, SOAB-OM-12, SO160, SO80, SO40, SO20, SO15, SO10, SOLF, SOHF, MOST-OM, MOST-YM, MOMT-OM, MOMT-YM.

Number Exchange: All EU stations should send signal report plus EU Area Code: http://www.eupsk.com/documents/euareas.xls (example for the County of Sisak and Moslavina, Croatia: 599 EUHRSM). Please note that "dots" should not be sent! 599 EU.HR.SM or 599 EU HR SM - are not correct reports. There should be no "dots", no "spaces" between the letters, all 6 letters should be sent together. Those who don't follow this rule will be disqualified immediately! DX stations should send signal report plus QSO number, starting 001. MOMT DX stations should use a separate serial number sequence for each band.

All logs must be sent no later than 5 days after the contest. You should send your log upload via the Web interface:
http://ua9qcq.com/contests/submit_log_eng.php

For more info please visit:

SB DX @ WW < KB8NW $OPDX.1112
Ohio/Penn DX Bulletin No. 1112

The Ohio/Penn DX PacketCluster
DX Bulletin No. 1112
BID: $OPDX.1112
May 13, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, K1XN & GoList, NJ1Q & W1AW, NG3K & ADXO, W3UR & The Daily DX, K4UEE, N4AA & QRZ DX, N4JF, N4RR, W4VQ, KH6BZF, W6SZN, KL7JR, AC8G, K8GI, K8YSE, W8GEX & 60m News, K9EL, W9ILY, ARVM, AT International, DK8JB & The DX News Letter, DL1SBF, DL5YWM, DxCoffee.com, DX-World.Net, ES1CW, F5NQL, F6AJA & Les Nouvelles DX, G3SWH, I1JQJ/IK1ADH & 425 DX News, I2MQP & DX Italia News, IK7JWX, JI3DST, OZ6OM & 50 MHz DX News, Pete's DX-Newsdesk, RSGB IOTA Web Site, Sixitalia Weekly, SV1HER, VA3RJ & ICPO, and the VHF-DX-Portal (MMMonVHF) for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): There will not be an OPDX Bulletin next week and "possibly the week after". I will be attending the Dayton HamVention (HOPEFULLY!!!!!). It is totally up in the air right now. Over the last several weeks, I have been experiencing shortness of breath. On Tuesday, May 7th, I had a "THALLIUM STRESS TEST" which showed some abnormalities. On May 10th, the Cardiac Doctor told me, or should I say she read me the riot-act, "no traveling or stressful work" until I have a heart catheterization. So some time this Monday before the HamVention, I will be at the Cleveland Clinic to have this procedure. If all goes well, I will be at Dayton. Some may remember that I had a double bypass in 2002. Let's hope I do not go there again.....
"IF" I receive a major announcements, (and if I am able to) I will probably send out a special bulletin. However, PLEASE continue to send your DX information. You never know what I might do.... 73 de Tedd KB8NW

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 5th-May, through Sunday, 12th-May there were 228 countries active. Countries available: 3A, 3B8, 3D2, 3V, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5H, 5N, 5R, 5T, 5U, 5W, 5X, 5Z, 6W, 6Y, 7P, 7Q, 7X, 8P, 8Q, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9N, 9Q, 9V, 9Y, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CE9, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FK, FM, FO, FP, FR, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB,

HB0, HC, HC8, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J3, J6, J7, J8, JA, JD/o, JT, JW, JY, K, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, SM, SP, ST, SU, SV, SV/a, SV5, SV9, T2, T7, TA, TF, TG, TI, TJ, TK, TL, TR, TT, TY, TZ, UA, UA2, UA9, UK, UN, UR, V2, V3, V4, V5, V6, V7, V8, VE, VK, VK9C, VK9L, VK9N, VP2E, VP2M, VP8, VP8/h, VP9, VQ9, VR, VU, XE, XU, XX9, XZ, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZD7, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

5K3, COLOMBIA. Look for special event station 5K3YL to be active Sunday, May 18th, operated by a group of YLs during the "Ladies on the Air Contest". Activity is to honor women participating in amateur radio contests, as well as nationally and internationally. Operators mentioned are Sandra/HK3JJB, Mery/HJ3MCT, Paty/HK3KFM, Janeth/HK3PUE, Dora/HK3IAI, Maria/HJ8MFF, Yolanda/HK7YMF, Laura/HJ7LDV, Yuli/HJ3KMV, Cristina/HK3QYV, Dalia/HK3JI and Patricia/HK3IWL. Operations will be on 40 and 20 meters SSB. QSL via EA3DUF. A certificate is available (see QRZ.com).

6V, SENEGAL (Reminder). Vladimir "Vlad", RK4FF, will once again be active as 6V7S from Le Calao in Ngaparou between May 13-30th. Activity will probably be on 80/40/20/ 15/10 meters using CW, SSB and RTTY. He is scheduled to be here two more times this year: July 1-16th and October 22nd-November 27th. QSL via RK4FF.

8Q, MALDIVES. Just a reminder that Jim, G3VDB, will be once again active as 8Q7EJ, but this time from Komandoo Island (AS-013) between May 13-26th. Activity will be holiday style mainly on 20 meters using CW and SSB. If conditions are poor, then it will be CW only. Suggested frequencies are: CW - 14020-14025 kHz and SSB 14212 kHz. QSL via his home callsign. The 2009/2010/2011/2012 8Q7EJ logs are available on the Clublog Web page at: http://www.clublog.org/logsearch/8Q7EJ

ARCTIC/ANTARCTIC INFO NEEDED! John, KL7JR, is once again requesting that if you or any of your radio friends, SWL or Ham operators, have worked or heard any Arctic or Antarctic stations, he would love to hear from you for his monthly Arctic and Antarctic DX column which goes to CIDX (Canadian Int'l. DX Club) for publication in the monthly "Messenger". Scanned copies of QSLs or reception reports from anywhere north of 60 degrees or the Antarctica are also welcomed. You can receive a sample of his column by E-mailing him at: KL7JR@yahoo.com

CS25, PORTUGAL (Special Event). A special event station signing CS25ARVM will be active between May 20-26th. Activity is to celebrate the 25th aniversary of ARVM - Associa��o de Radioamadores da Vila de Moscavide - Radioamadores do Concelho de Loures. Operations will be on 10, 15, 20, 40 and 80 meters, using CW and SSB, and also V/UHF at 145.350 MHz and 434.350 MHz. Qsl via CT1RVM.

DAYTON HAMVENTION CTU NEWS. Tim Duffy, K3LR, reports the following:
"About 250 contesters will attend Contest University (CTU) USA this coming Thursday (May 16) in Dayton, Ohio.
Starting at 8:00 AM EDT there will be a live webcast available from the CTU website <http://contestuniversity.com>. Go to the CTU website on Thursday and you will see a button to click on that will allow you to see and hear some of the topics being presented live. With four classrooms going most of the time, it is not possible to live stream everything, but you will definitely enjoy watching some of CTU from wherever you are. Last year hundreds of guys from all over the world got to experience CTU live via the web. Some of the Dayton CTU students even sat in one classroom session and watched the live CTU stream for another session on their smart phone or laptop - at the same time - is this SO2CC? Single Operator Two CTU Classes!
Thanks to the support of the Northern California DX Foundation, if you know of any amateur radio operator under the age of 26 that will be in Dayton and would like to attend CTU tuition free, please tell them to go to the CTU home page and click on Scholarships. Or just click here:
<http://www.contestuniversity.com/main/page_scholarships.html>
Then use the contact us button to be considered for a scholarship. Or you can click here:
http://www.contestuniversity.com/main/page_contact_us.html
Pat, N9RV's, 'Contesting Terminology Glossary' on the CTU website has recently been updated. It is in the files section. If you or someone you know is just getting started in contesting, this is an excellent resource that explains lots of the contesting language. Here is the direct link:
http://www.contestuniversity.com/main/page_files.html
We are hoping to also live stream the 21st Annual Contest dinner live next Saturday night. Watch the Contest Dinner website for times and live stream connection information. <http://contestdinner.com>"

DAYTON HAMVENTION DX HOSPITALITY SUITE. The Northern Ohio DX Association (along with Janeen Hire, W8ZET) will once again sponsor a Hospitality Suite (17th year) at this year's Dayton Hamvention. It will be in Suite 1011 on the 10th floor of the Crowne Plaza Hotel on Thursday, Friday and Saturday evenings (Look for signs!). All DXers/Contesters are welcome. Munchies and refreshments will be available. Come and meet the members and friends of NODXA.

FS, ST. MARTIN. John, K9EL, will once again activate FS/K9EL in June. Operating dates this year are June 11-28th. Activity will be on 80-6 meters. Daily uploads to ClubLog and LoTW are planned. John has a new QTH this year and should have a better signal to the USA on 6 meters. QSL via his home callsign.

HH, HAITI (Update). Tom, KC0W, will be active as HH5/KC0W from the extreme northern tip of Haiti between July 6-25th. Activity will be 160-6 meters using CW only. He will use a vertical antenna placed directly over salt water. Tom states, "My operating location in Haiti has unobstructed HF takeoffs to North America, Europe & Africa. Haiti has been underrepresented on CW so hopefully HH5/KC0W will go into many CW enthusiast's logbooks." QSL only direct to his home callsign. No LoTW or Bureau QSLs.

HONDURAN IOTA EXPEDITION (Update/Tentative Dates). Dan, HM2DMR, plans to activate the following Honduran IOTA Islands between late May to July (dates depend on Navy permission:
NA-160 • Cochinos (callsign HQ3W); May 27-30th
NA-035 • Swan (callsign HQ8S); June 16-20th
NA-223 • Vivorillos (callsign HQ8D); July 16-20th
Activity will be on 160-10 meters. For more details and updates, watch: http://hriotas.com

IOTA NEWS.....
AF-083. A short video is available on the Web on the recent TS8TI DXpedition to Djerba Island by ARAT and Italian Team. The link is: http://www.youtube.com/watch?v•qXTuF9CgM
The photos and videos are all available on ARAT Facebook Page at: https://www.facebook.com/arat.tunisia
http://www.laselki.net/vb/showthread.php?pR261#post52261

AS-036. This one was late getting in, but if you worked JF3ELH/6 this past weekend, you work Masa, JF3ELH, on Iki Island (Iki-jima Gounuura-cho Iki-gun Nagasaki-ken). Activity was suppose to be on 80/40/30/20/17/15/12/10/6 meters CW/SSB. It was mentioned that in case of heavy rain or other condition, the operation condition may vary. QSL JF3ELH/6 via JF3ELH. Please check QRZ.com for details.

AS-060. Kang, DS4DRE, is now active as DS4DRE/5 from Hajo Island (WLOTA LH-1006) until December 31st. Activity will be on 80-10 meters using CW and SSB. QSL via his home callsign, direct (he is a stamp collector) or by the Bureau.

EU-008. Operators Andy/M1LOL and Ray/M1REK will be active as MM1REK from the Isle of Coll (IOSA NH05, SCOTIA DI12, WLOTA 2123) in the Inner Hebrides group between August 5-10th. Activity will be on 80-10 meters SSB and the Digital modes. QSL via M1REK, by the Bureau or direct. See the Web site at: http://www.m1rek.co.uk/isle-of-coll

EU-008. Just a reminder that the members of the Camb-Hams are once again active from the Isle of Mull (IOSA NH15, SCOTIA CN10, WLOTA 2485), Inner Hebrides, as GS3PYE/p until May 16th. Activity will be on all HF bands (600-10m) using five stations with amps. Operations will also be on 6m, 4m and 2m. They will focus more effort on 2m EME and will also be on many of the VHF/UHF satellite passes. QSL via M0VFC (OQRS via QRZ.com). More details and updates can be found at: http://dx.camb-hams.com

EU-030. Just a reminder that Tom, DL7UZO, will be active as 5P9Z from Bornholm Island (DIA BO-001, WLOTA 2203) between May 25th and June 1st. Activity will be focused on 160 meters and the Digital modes, as well as all bands on CW. QSL via DL7UZO, direct or by the DARC Bureau. A Web page is available at: http://www.5p9z.com

EU-051. Operators Stefano/IK6JRI, Fred/IK7JWX and Vincenzo/IZ8LFI will be active possibly as IE9DX from Ustica Island (IIA PA-001) between July 23-30th. Activity will include the RSGB IOTA Contest (July 27-28th). Before the contest they will be active on 30/17/12/6 meters using CW, SSB and the Digital modes. Days after the contest they will be on any modes and bands. QSL via IK7JWX. ADDED NOTE: Anyone who wants to join the team for the contest (only 2 days) is welcome. For details, contact: ik6jri@hotmail.it (Team leader)

EU-110. Operators Stefano/IV3LZQ, Paolo/IV3PUT, Francesco/IV3EDU and Andy/9A3JH will be active from Sveti Nikola Island (ACIA IC-016, IOCA CI-118, MIA MC-414, WLOTA 3152) between July 25-29th. Activity will be on 80-6 meters using CW and SSB. They will also be an entry in the RSGB IOTA Contest (July 27-28th) using the callsign 9A/IV3LZQ. QSL direct only via IV3LZQ (see QRZ.com). For details and updates, see: http://www.arimanzano.it

EU-120. A group of operators from the North Northumberland area will be active as GB1VR from the Holy Island of Lindisfarne between 1500, June 7th and 1600, June 9th (local times). Activity is on the anniversary of the First Viking Raid 793AD and will be on all HF bands. Operators mentioned are Dave/M0DSS, Alan/ 2E0ZED, Tom/2E0VAI, Erick/M6ECK, Richard/M0VKX and Brendan/ M6HOS. QSL via eQSL only. For more details, see QRZ.com.

EU-127. Thomas, DJ6OI, is now active as DJ6OI/p from Helgoland Island until May 15th. QSL via info on QRZ.com.

EU-172. Ric, DL2VFR, will be active as OU1RAEM from Samso Island between May 18-24th. This is just one of many activities throughout the year to be used with this special callsign to celebrate the 110th anniversary/birthday of Ernst T. Krenkel. See QRZ.com for details. Ric will operate mainly CW. All QSOs will be confirmed automatically via the Bureau. For direct cards, QSL via DF5LW.

NA-128. Members of the "NA-128 Contest Group" will once again activate Ile Verte (C.IS.A QC-015, Grid FN58, ARLHS CAN-244, WLOTA 1404) using the special callsign CF2I between July 24-28th. Their activity will include the RSGB IOTA Contest (July 27-28th) as a Multi-Single entry. The group will operate many stations from the lighthouse keeper's quarters on many bands (SSB, CW and RTTY, PSK63) before and after the contest. The group will operate ONLY on SSB and CW on 10, 15, 20, 40 and 80m DURING the contest. The complete log will be uploaded to LoTW few days after the contest. Paper QSL is via VE2CQ. For more info, visit their Web page at: http://www.qsl.net/na128cg

NA-204. The Cuban T46A group will activate the special callsign T46C from Santa Maria Island between June 13-17th. The operators mentioned are Ore/CO6LC, Jose/CO6EC, Yordany/CO6YAC, Amaurys/

CO6WYR, CL6RLD and Luis/CO6LP. They will try to maintain three
stations on the air transmitting on 160-10 meters, including
30/17/12 meters, using CW, SSB and RTTY, into yagis, beverages
and verticals. QSL via EA5GL.

OC-237. A group of Indonesian operators will be active as YE3I from
Gili Ketapang between June 7-9th. Operators mentioned are
Edi/YB3EDD, Eddy/YB3VPP, Samsul/YB3GZS and Andy/YB3BOA. Activity
will be on 160-10 meters. QSL via YB3EDD. For more details,
see: http://www.iotadx-giliketapang.blogspot.com/
http://www.facebook.com/yethree.india#

J3, GRENADA (Team Members Needed). Harry, AC8G, is working with Gill,
J39AL, to arrange a team for the CQWW DX SSB Contest (October 26-27th)
with time for individual DXing. Available to the team are antennas,
towers, etc. for a large MULTI-MULTI contest station. About all that is
needed are ops, transceivers (with accessories) and computers. Depending
on team size, Gill's QTH and the local EOC would be used. Harry states,
"I will send an info E-mail with more details to those interested. You
can contact me several ways, <htflasher@gmail.com>, 937-434-9616 or
Skype using flasher-ac8g. Between the two locations (within distance
rules), there are four beams already up and room for others. This is a
GREAT chance to be DX and be in a major contest. The major cost is airfare.
Costs on the island are fairly reasonable. This will be covered in my
info E-mail. For those with Goggle Earth, Gill's QTH is at 12 degree
2.971 N. & 61 degree 44.386 W. Feel free to call - I am retired and
home most of time."

PJ4, BONAIRE. Members of the PJ4G club station will be active from the
"Radio House" <http://www.pj4g.com> on Bonaire (SA-006, WLOTA LH-1279)
during the CQWW WPX CW Contest (May 25-26th). Look for John, K4BAI,
to be active as PJ4A during the contest as a Single-Op/Single-Band (40m)
entry. Roger, N4RR, will be Single-Op/Single-Band (15m) entry as PJ4R.
David, NA2AA, will be Single-Op/Single-Band (10 or 20m - depending on
band conditions) entry as PJ4G. The team members will be active several

days before the contest on all bands using PJ4/homecall as their callsign. QSL via the QRZ.com addresses.

PJ6, SABA. "After the successful DXpedition of October 2010 (10-10-10), and a third place finish in the 2011 ARRL CW DX Contest as a Multi-Single, it is time for a return to Saba," states Bob, K4UEE. Operators Bob/K4UEE, Steve/VE7CT, Gregg/W6IZT and Roger/G3SXW will enter the CQWW WPX CW Contest (May 25-26th) as Multi-Op entry. Logs will be uploaded to LoTW quickly after their return, paper QSLs go via N4NX. Activity is planned before and one day after the contest.

KX6BB NOW ON LoTW AND CLUBLOG. Bob, W4VQ, informs: "I have uploaded nearly 9700 QSOs made by me at KX6BB on Kwajalein in 1972-1975 to LoTW and Club Log. The ClubLog link at this time is:
https://secure.clublog.org/logsearch/KX6BB
While this is of interest only to old timers and many of today's calls do not appear there, I wanted to provide the data in an electronic medium for future reference. It should be noted that I have NO paper cards and inquiries to that end will be in vain." He does mention: "Interestingly, I did get 129 LoTW matches for QSOs 40 years old."

OW75FOC INCORRECT QSL INFORMATION. Phil, G3SWH, reports: "Please note that incorrect QSL routing information is in circulation. The correct route is via G3SWH, and *NOT* via OY1CT." Please see the following Web page at: http://www.g3swh.org.uk/ow75foc.html

QSL RECEIVED VIA LoTW: EF7HQ, FK9DD, JA7MSQ, JH1BED, OM3LK, ON8NT and PY3KN

SV5, DODECANESE. Members of the "DX Plus Hellenic Amateur M. I. Team" and "Radio Amateur Association of Greece" are now active as SX5KL from Kalolimnos Islet (EU-001, GIOTA DKS-048, WLOTA 0662) until May 20th. Activity will be on 160-6 meters using CW, SSB and RTTY. Suggested frequencies are as follows:
CW - 1815, 3525, 10120, 14025, 18070, 21025, 24895 and 28025 kHz
SSB - 1845, 3770, 7110, 14225, 18130, 21275, 24950 and 28400 kHz
RTTY - 3590, 7038, 10140, 14090, 18098, 21090, 24920 and 28090 kHz
6m - 50103/CW and 50150/SSB

Operators mentioned are John/SV1GE, Cliff/SV1JG, Manos/SV1ME, Spiros/SV1RC, George/SV1RP, Vangelis/SV2BFN, Takis/SV2FWV, Mike/SV8GKE and Theodoros/SV1GRM. QSL Manager is SV2FWV (sv2fwv[at]gmail.com). QSL via direct, by the Bureau or OQRS (via ClubLog) and LOTW. For more details see the DXpediton's Web site at: http://SX5KL.no-ip.org

VP8, FALKLAND ISLANDS. Andy, M0HLT, is expected to be active as VP8DOH possibly for 2 years. He is now based on the Falklands as an electrician. Activity will be limited between his work commitments. Operations will be SSB only and mainly on the higher HF bands, preferring 10 meters when conditions allow but will try 20 meters and above. QSL via eQSL only or LoTW.

W9DXCC DX CONVENTION (Press Release). John, K9EL, sent the following dated May 6th [edited]: "W9DXCC DX CONVENTION COMMITTEE ANNOUNCES -- 'DX&#xFFFD;ing from the Black Hole 2'
A six session presentation sponsored by NIDXA and DX-u,
in conjunction with the 61st W9DXCC DX Convention

(Schaumburg, Illinois) The W9DXCC convention committee has announced it will offer a six session class on Friday, September 20th, 2013, to help inform all hams interested in DX'ing about general topics of interest to the DX community. The class will be held the day before the W9DXCC convention and has been designed for both new and experienced DX'ers. Each session will cover a different aspect of DX'ing including operating practices, digital DX'ing, chasing awards, QSL'ing, antennas and propaga-tion.

All presenters are accomplished DXers and include NN1N, K9LA, K9AJ, K9EL, K9NU and W9MU. Between them they have over 100 years of experience that includes participation in DXpedition operations to rare locations around the world and numerous awards.
Registration for the class may be done online at the W9DXCC web site <www.w9dxcc.com> when Convention registration is active. Discounts will be available for persons signing up for both the class and the convention. Please contact W9MU (jack@w9mu.net) for additional details and information."

XZ, MYANMAR. Simon, HS0ZIB, announced on QRZ.com over the past week that he is now in Kawthaung. He mentioned on May 1st that he will be there during the months of May and June, and will operate as XZ1K from Tanintharyi State. He adds, "I will only operate on PSK-31, according to when I have free time. From 1st July, I will be working in Laos, but I will try to return each holiday to re-activate XZ1K." According to his QRZ.com page, he has made 20 meter PSK QSOs with JA, VU, VK..etc., using Digipan. He suggests for you to transmit up to 1 kHz high of his frequency, and he can do a 'split' QSO. You can check QSOs and request QSLs from his online log at: http://www.myradioclub.org/xz1k
He states on May 11th, "LoTW is not yet available. I submitted documents to the ARRL for DXCC approval and LoTW account on 30/4/13, (by courier service from Yangon), but although the package is shown as delivered to the ARRL, I have had no feedback. If/when I am allocated an LoTW account, I will upload to LoTW for requested QSLs."

YASME FOUNDATION NEWS (Press Release). Kip Edwards, W6SZN, Director and Secretary of the Yasme Foundation, sent out the following press release on May 9th [edited]: "YASME BOARD OF DIRECTORS ELECTS NEW PRESIDENT AND HONORS OUTGOING PRESIDENT WAYNE MILLS, N7NG -- At its annual meeting held at the International DX Convention in Visalia, California, the Board of Directors elected Ward Silver, N0AX, as its new President. The remaining officers were re-elected. The necessity of an election for a new President was occasioned by the resignation of Wayne Mills, N7NG. Wayne has founded DX University (www.dxuniversity.com) and takes over as the new DX Editor for CQ Magazine.
The Board also decided to acknowledge Mr. Mills' many years of service to the Yasme Foundation by making a contribution to DX University in support of the goals shared by the two organizations.
The Yasme Foundation is a not-for-profit corporation organized to conduct scientific and educational projects related to Amateur Radio, including DXing (long distance communication) and the introduction and promotion of Amateur Radio in developing countries. For additional information about The Yasme Foundation, visit our website at <www.yasme.org>.

Ward Silver, N0AX, President Of The Yasme Foundation

Board of Directors:
Fred Laun, K3ZO, Director and Vice-President
Rusty Epps, W6OAT, Director and Treasurer
Kip Edwards, W6SZN, Director and Secretary

Martti Laine, OH2BH, Director
Mac McHenry, W6BSY, Director
Robert Vallio, W6RGG, Director"

ZL, NEW ZEALAND. Holger, ZL3IO, is expected to be active during the CQWW WPX CW Contest (May 25-26th) as a Single-Op/All-Band entry. QSL via ZL3IO, direct or by the Bureau.

Amateur Station Licence Examination

Many of the places for the upcoming Amateur Station Licence Examination have already been applied for, so anyone wishing to sit the examination should apply as soon as possible. The examination will be held on Thursday 4 July at 2.00 p.m. in the ComReg offices in Dublin. The examination may be held on that day at other centres where warranted by the number of candidates. Full details, including entry procedure, examination fee and how to pay the fee on line are available at www.irts.ie/exam . There is also an exam button on the home page. Places for the examination are limited and are being allocated on a first come first served basis. Please note that it is necessary to download the application form from the web page and forward the completed form and the appropriate fee in order to secure a place for the examination. If you pay the fee on line you must still complete and forward the application form. The closing date for the receipt of completed applications is Friday 14th June.

5Mhz Newsletter

The Spring 2013 - edition of The 5MHz Newsletter is now available to download free. This edition (No.6) features (of course) the latest news about 5 MHz Amateur Allocations, the latest update of the Worldwide Amateur 5 MHz Allocations Chart, plus stories on 5 MHz Web SDRs, an IARU 5 MHz Paper, A Correlation Graph from G3ZUN and an Idea on how to navigate the new UK 5 MHz allocation using your transceiver's memory channels. You can download your copy at tinyurl.com/dxlpgyj

---

New 24 GHz EME World Record

Rex VK 7 MO has completed a 16383 km QSO with OK 1 KIR in the Czech Republic to claim the World record on 24 GHz.

Rex used just a 1.14 metre dish and 10 watts which he has designed for portable operation, while OK 1 KIR used a 4.5 metre dish and 22 watts. Details of the project are to be published in the next edition of DUBUS magazine.

Hook Head Lighthouse Activation

Chris EI7KE/DL9YEL writes that on Saturday May 18th he plans to activate Hook Lighthouse Co. Wexford on 40m around 7.130MHz and 20m near 14.313MHz (Intermar-Net) from 8 UTC until 17 UTC if batteries allow. Equipment: Alinco DX77 and FT857 with vertical antennas from Camper Van and ground.

Hook Lighthouse is known as ARLHS IRE 038 and ILLW No IE 0003. They hope to have good conditions/weather on site and on the band.

Operators: Chris EI7KE/DL9YEL and his friend HarryDD4QW.

South Dublin Radio Club

In July 1898 the first reporting by wireless of a sporting event took place in Dublin Bay during the Kingstown Yacht Regatta. At the request of the Express newspaper, Marconi installed wireless equipment aboard the Flying Huntress and transmitted reports to the harbourmaster's office in Kingstown (now Dun Laoghaire) The results were posted in a window ashore and published even before the yachts had returned to port.

To commemorate the anniversary, the Howth Martello Radio Group and the South Dublin Radio Club plan to set up two special event stations. As the races took place off Howth Head, one station will operate from the Martello Tower in Howth and the other from the Maritime Museum in Dun Laoghaire. Plans are at an early stage still but we will keep you posted on progress. The weekend of 20-21 July is proposed for this operation.

CASHOTA

For all you CASHOTA chasers out there, the North Cork Radio Group are operational as EI1NC/P from Kanturk Castle on Sunday, 19th May 2013 from 11.30am - 4pm approx. This is a fun day out where we once again activate a new castle for the CASHOTA program under the reference EI022/C. If you wish to take part, or indeed try the bands for the first time, feel free to come and visit us, we look forward to seeing, and working, you all.

We would also like to thank all the staff of Mizen Head Visitors Centre for their support and hospitality over the recent Marconi weekend. We also wish to thank all the stations that worked us, we had great fun and look forward to doing it again next year.

We also confirm our annual Radio & Electronics Fair which is to take place at the Commons Inn, Blackpool, Cork on Sunday, 15th Sept 2013. Doors open at 11am and entry fee is 5 per adult (children free). More details to follow but if anyone wishes to make enquiries, please

feel free to contact Edwin EI2HEB at 086 3885741 or via email ei2heb /at/ ei1nc.com"

DX News

There was activity from the Galapagos Islands last week. Daniel DL5YWM was expected to operate as DL5YWM/HC8 but in the end appeared on the bands as HC2IWM/8. There will be more activity in the coming week when HD2A and HC2AQ put the callsign HD8A on the air. They will be there from 15 - 19 May. QSLs go via HD2A.

There will be two new operators on Marion Island very soon. Carson ZR6CWI and David ZS1BCE will be active as ZS8C and ZS8Z respectively. They will be working at the weather station until April 2014.

Five English amateurs will use the callsign SZ8S from the Greek island of Samos from 16 - 30 May. This will count as EU-049 for the Islands on the Air Award. QSLs go via G1LAT for direct cards or via M0SCG for bureau cards.

Contesters will be very familiar with the callsign S53EO. This year Milos is celebrating 50 years on the air. In honour of this he is using the special callsign S503EO. Those more senior IRTS members will remember him as YU3EO.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

Students Chat with Orbiting Astronauts:

Posted: 11 May 2013 05:09 PM PDT
http://www.eham.net/articles/30170

Students from Lew Wallace Stem Academy, New Tech Innovative Institute, and Frankie Woods-McCullough Academy for Girls joined schoolboys at Watson Academy during the event. The Gary Literary Coalition partnered with the National Aeronautics and Space Administration, Amateur Radio Satellite Organizations Worldwide, the American Radio Relay League, Amateur Radio on the International Space Station, Methodist Hospitals and the Gary Community School Corp. to bring the experience to an urban academic setting. "This is our first time doing this in an urban area," said radio operator and Purdue University academic advisor Edward Perosky. He said that motivated him to participate. According to Lake County Radio Club president Bob Wiberg, ARISS volunteers are called amateurs because they provide radio services around the globe for fun, not for money. The organization helps with communication during national catastrophes, regional disasters, and traffic nets. Radio technology has evolved to enable amateur radio operators like Roy Gillis to conduct scheduled contacts to NASA space shuttles. "Anyone NA1SS, anyone NA1SS. KC9JQN calling for a scheduled contact and standing by," Gillis repeated nearly 10 times prior to NASA commander Thomas Marshburn's reply.

Going to Dayton, and coming from the north?

Posted: 11 May 2013 10:44 AM PDT
http://forums.qrz.com/showthread.php?390943-Going-to-Dayton-and-coming-from-the-north&goto=newpost

Those of you driving south from Toledo, Michigan, or Ontario ... the KT8APR DStar repeater on 443.625 in Lima OH will be open for use. The 145.370- (PL 107.2) repeater is analog and IRLP 4370.

The 6-meter repeater on 53.630 is presently off the air due to a PA failure. We're trying to find the parts by the time Dayton rolls around.

Another repeater in Lima is W8AOH 146.745- (PL 100.0), which is operated by Allen County EMA.

Please remember to unlink if you link up to another repeater. Query KT8APR in the QRZ database for more info.

Note: There is heavy construction at I-75 and SR309/117 (exit 126) with exits/entry closed. Expect delays on Friday afternoon/evening. Use 4th Street to access services.

And just a quick reminder, O.S.P. usually prowls I75 between Sidney and Dayton (1-70).

Fred/W8HDU

Highlights of Solar and Geomagnetic Activity
06 - 12 May 2013

Solar activity was low for the first half of the week, and moderate for the second. After a slow start with only low-level C-class flares from the regions on the disk, activity jumped up to moderate levels on 10 May when Region 1745 (N14, L=336, class/area=Ekc/600 on 12 May) unleashed an M3.9 flare at 0057Z shortly after rotating around the east limb. Later that same day, Region 1745 produced an M1.3 flare at 1256Z. Region 1745 and 1744 (N05, L=259, class/area=Dai/190 on 12 May) were the most productive regions on the disk during the week, with 10 C-flares each to their credit. Region 1744 was responsible for the largest C-class flare of the week, a C9.0 at 09/2316, immediately preceding the beginning of moderate activity. The 11th was relatively quiet; the largest flare was a C8.0 from Region 1746 (S27, L=337, class/area=Dhi/270 on 12 May) shortly after it emerged on the disk. However, there was a 16 degree filament eruption centered near N39W50 which began at 11/2230Z. The resulting CME was visible in LASCO/C2 coronagraph imagery by 12/0000Z. WSA-Enlil output suggested this CME may brush past Earth late on the 14th or early on the 15th. Moderate activity returned on 12 April with two M-class events, an M1.9 at 2032Z and an M1.2 at 2244Z, from a newly emerged region beyond the east limb.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit was at normal to moderate levels all week.

Geomagnetic field activity was at quiet to unsettled levels all week. A positive polarity recurrent coronal hole high speed stream brought unsettled conditions for the first three days of the week. The remainder of the week saw quiet geomagnetic conditions.

Forecast of Solar and Geomagnetic Activity
13 May - 08 June 2013

Solar activity is expected to be at low levels with moderate activity likely and a chance for high activity levels throughout the forecast period.

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels begiining on 24 May and lasting through 31 May in response to a recurrent coronal hole high speed stream. Normal to moderate levels are expected for the balance of the period.

Geomagnetic field activity is expected to be at quiet to unsettled levels through the period with the exception of 15-16, 21-23. amd 28-29 May. Unsettled to active levels are expected on 15-16 May with the arrival of a glancing blow from the CME observed on 12 May. Conditions are expected to be unsettled to active on 21-23 May, and 28-29 May with in response to recurrent coronal hole high speed stream. Another high speed stream may bring unsettled conditions on 2-4 June.

New release of LOg4OM software

Posted: 11 May 2013 01:52 PM PDT
http://forums.qrz.com/showthread.php?390967-New-release-of-LOg4OM-software&goto=newpost

Updated Free Log4OM software

The latest release of the free Log4OM logging software version 1.12.1 has
just been released and available for download together with the updated
user guide here

http://www.pisto.it/wordpress/

This release has many new features, some of which are listed below, and
issues reported by our users have also been resolved.

One of the most significant changes has been the enhancement of the DX
cluster which is now probably the most refined and easy to use cluster ever
and provides instant visualisation of your required countries, band, mode,
IOTA

The user forum can be found here http://www.pisto.it/forum/

Added user selection of KM or Miles, can also be changed at runtime.

Ability to set the TX output power of the operator□s station while logging
a QSO.

Added to the archive manager a select all button to select all currently
displayed filtered entries.

Extra standard filters added to the DX clusters

New frequency control display.

Added □Un-worked mode on spot or band□ cluster filter.

New Webcam support for HRDLog.net □ Communicator window.

Added a realtime program log to the help menu

Added the Clublog's most wanted ranking into the cluster windows.

Net Control Enhancements:

Ability to start external programs before and after the initialisation of Log4OM with

time delays

Cluster colours can now be user defined to display worked and confirmed status for

country, band , mode & Call sign.

Cluster worked/confirmed status by Country, Band, Mode & Call sign can now

additionally be filtered by Country, QSL, eQSL, LOTW and LOTW+QSL.

Cluster highlight colour of special filters and most wanted can now be user defined.

New Log4OM Communicator added for interfacing external software by any data

protocol.

Terry G4POP - Log4OM Development Team

http://forums.qrz.com/showthread.php?390945-A-friendly-reminder-of-what-s-on-the-Horizon-2013-Hurricane-Season-starts-June-1st&goto=newpost

If there's any reason to be involved in Ham Radio greater than the sheer enjoyment of the hobby, it'd be in Disaster Preparedness. As we all know, when disaster strikes, Ham Radio works! So keeping in mind that with the US Hurricane season soon to start June 1st., now's the time to get prepared, sooner, rather than later. This article from one of the national Preppers groups Ham Radio Blog, offers some advice on how to start getting ready, Trying to Reason with Hurricane Season...

GB70WA & GB70BOA

Posted: 12 May 2013 11:45 AM PDT
http://forums.qrz.com/showthread.php?391083-GB70WA-amp-GB70BOA&goto=newpost

Wirral and District Amateur Radio Club (WADARC) and Chester and District Radio Society (C&DRS) are running GB70BOA and GB70WA from the Wirral Coast during May to Commemorate the 70th Anniversary of the Battle Of the Atlantic and the 70th Anniversary of the Western Approaches.

GB70WA - http://www.qrz.com/db/GB70WA

GB70BOA - http://www.qrz.com/db/GB70BOA

GB70BOA will be Hosted by the Marine Radio Museum Society (Wallasey) at Fort Perch Rock New Brighton.

GB70WA will be Hosted by Leasowe Lighthouse with Wirral & District Amateur Radio Club. It will operate from Leasowe Lighthouse.

BOA70Master_edited_1.jpgEmail the NOV Holder - G3UFO@arrl.net

We will be operating on 160, 80, 40, 30, 20, 18, 15, 12 , 10 and 6 metres if open. SSB and CW. VHF/UHF operation on 2 metres and 70cms CW/SSB and possibly FM.

Hope to speak to you during the event (20th-27th May).

From all at WADARC and C&DRS

Download the */QST/ App* for Apple mobile device users. The app is free
in Apple's App Store
<https://itunes.apple.com/us/app/qst/id531766442?mt=8>. Users with
Android devices should use the enhanced web version
<http://www.nxtbook.com/nxtbooks/arrl/qst_201306/> of /QST/ which is
optimized to automatically recognize Android phones, tablets and e-book
readers.

What is a digital edition?
The digital edition of /QST/ is an electronic form of the journal. All
ARRL members have access to the digital edition of /QST/...a way to read
and interact with the current issue of /QST/ anytime, anywhere. Each
issue includes unique, digital-edition-only content such as video, audio
features and extra content. Members can also access the digital archive
for access to previous issues.

How do I access the digital edition?
/QST/ can be read online or downloaded onto some devices. Members must
have a valid ARRL website login to access this benefit. You can always
find a link to the current digital edition and archives at
www.arrl.org/qst <http://www.arrl.org/qst>. Apple iOS device users

(iPhone, iPad and iPod touch) can also access the digital edition from a dedicated QST app. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>.
To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.
Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.
Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.
Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions.
Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

*Go Green! Go Digital-Only. *
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue. * Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

May 14 - 16 SCHOOL CLUB SPECIAL EVENT STATION

Posted: 13 May 2013 08:25 PM PDT
http://forums.qrz.com/showthread.php?391241-May-14-16-SCHOOL-CLUB-SPECIAL-EVENT-STATION&goto=newpost

a reminder: the school club station is attempting its first special event
station.

it starts May 14, Tuesday 10 am CDT (1500z). there will be several teams
of student ops. please contact as many teams as possible.

student operators will be fifth graders.

event info is found on the K0KID QRZ web site

T Hunt and Orienteering Event - Needs your support

Posted: 13 May 2013 01:54 PM PDT
http://forums.qrz.com/showthread.php?391209-T-Hunt-and-Orienteering-Event-Needs-your-support&goto=newpost

Hi all,

KI6QBM with Land Ops.

We're planning to introduce both t-hunting and orienteering into our trips.

I'm looking for hams who have experience in either or both skill sets.

The event we're aiming for is in November, but may also include our August Sierra Nevada trip.

Club site http://www.meetup.com/Land-Ops-Geocaching-Sports/

All those with experience please contact me.

Chris Doering

Ham Radio Club Hosting Station for Armed Forces Day:

Posted: 13 May 2013 05:19 PM PDT
http://www.eham.net/articles/30180

SHERMAN, Texas -- The Grayson County Amateur Radio Club (GCARC) will be hosting a special event radio station in honor of Armed Forces Day on Saturday, May 18, from 8:00 a.m. to 5:00 p.m. at the Perrin AFB Museum in Denison. The radio station, identified on the airwaves by the special callsign W5I, will operate on both the 17 meter and 20 meter amateur radio bands. These radio frequencies are capable of communicating with other radio operators both across the country and in many international locations. The public is invited to visit and watch the station in operation. Local operators (hams) will be on hand to discuss what Amateur Radio is and does, and to answer any questions.

//
Joseph J. Schroeder Jr., W9JUV (SK):

Posted: 13 May 2013 05:16 PM PDT
http://www.eham.net/articles/30178

Joseph J. Schroeder Jr. was a student at New Trier High School during World War II when a neighbor who was a radio operator in the Merchant Marine told him that if he took the school's course in radio code, he'd "never carry a rifle." Mr. Schroeder went on to pass both the class and the amateur radio exam, and at 16 received his call sign, W9JUV, which over the next 67 years would become legendary in ham radio circles.

//
Morse Code Still Relevant:

Posted: 13 May 2013 05:13 PM PDT
http://www.eham.net/articles/30177

Certain assertions in Randolph J. May's piece on the new FCC nominee may be a bit premature ("A historian for the FCC," Commentary, May 10). Specifically, Mr. May has relegated Samuel F.B. Morse's venerable Morse Code to the history books. The fact is, Morse code is still in wide use throughout the world.

Sun Emits its Biggest Flare of 2013, the Expected Peak of this Solar Cycle:

Posted: 13 May 2013 05:11 PM PDT
http://www.eham.net/articles/30176

GREENBELT, Md. (NASA GODDARD) -- On May 12, 2013, the Sun emitted a significant solar flare, peaking at 10 p.m. EDT. This flare is classified as an X1.7, making it the first X-class flare of 2013. The flare was also associated with another solar phenomenon, called a coronal mass ejection (CME) that can send solar material out into space. This CME was not Earth-directed.
Solar flares are powerful bursts of radiation. Harmful radiation from a flare cannot pass through Earth's atmosphere to physically affect humans on the ground, however -- when intense enough -- they can disturb the atmosphere in the layer where GPS and communications signals travel. This disrupts the radio signals for as long as the flare is ongoing - the radio blackout associated with this flare has since subsided. "X-class" denotes the most intense flares, while the number provides more information about its strength. An X2 is twice as intense as an X1, an X3 is three times as intense, etc. This flare erupted from an active region just out of sight over the left side of the Sun, a region that will soon rotate into view. This region has produced two smaller M-class flares as well. The May 12 flare was also associated with a coronal mass ejection, another solar phenomenon that can send billions of tons of solar particles into space, which can affect electronic systems in satellites and on the ground. Experimental NASA research models show that the CME left the sun at 745 miles per second and is not Earth-directed, however its flank may pass by the STEREO-B and Spitzer spacecraft, and their mission operators have been notified. If warranted, operators can put spacecraft into safe mode to protect the instruments from solar material. There is some particle radiation associated with this event, which is what can concern operators of interplanetary spacecraft since the particles can trip computer electronics on board.

==> EASTERN MASSACHUSETTS SM K9HI ON BOSTON MARATHON TRAGEDY AND
RESPONSE

It's been an extraordinary past few weeks for the citizens of
Massachusetts as well as for the entire country. The tragic events at
the Boston Marathon on Patriot's Day and the weeks following will
forever be seared into our collective memories. The bombings,
subsequent violence, the lockdown, an historic manhunt, and the
eventual capture of a dangerous fugitive not only shook us but led us
to summon our most enduring and positive of human qualities. We
listened and watched in awe to the stories of first responders (and
ordinary citizens) who rushed into harm's way to aid the injured and
dying. In the days afterward, we collectively grieved. Slowly, now, we
collectively heal.

For the hundreds of Amateur Radio volunteers from across New England
who came to serve that day, the Marathon was going to be a fun, routine
public service event. Sure, operators at previous Marathons have
endured hardships and weather-related challenges. Temperature extremes
in years past have resulted in hundreds of requests for ambulance
```

transport to area hospitals. One year, there was even a fatality. But in all of the thirty-plus years of Boston Marathons in which amateurs have served, this one was without precedent.

Amateur Radio volunteers performed admirably during the period where they were covering a normal public service event. BAA officials in Hopkinton successfully ensured a smooth and safe start, thanks in part to efficient communications provided by the hams that shadowed them.

Checkpoints and first aid stations were able to verify and obtain needed supplies, and later, coordinate the transport of runners. Red Cross officials who crisscrossed the course were kept in the loop always, thanks to their Amateur Radio shadows. But then ... 2:50 PM. Initially, rumors and vague reports surfaced. CNN texts and other media alerts began to light up smartphones. Phone call volume increased. In fact, in many locations along the course, cell phone service crashed under the strain. Soon, it was apparent to everyone that a major disaster was unfolding, and amateurs were caught up in the middle of it. The jarring directive went out over the amateur networks to halt all runners.

Stop the Marathon

The BAA's mission abruptly changed, and new priorities were quickly introduced. As Marathon volunteer Tim Carter, W3ATB of Meredith, New Hampshire succinctly puts it, "The bombs created a new set of problems. How do the runners stay warm? How do the runners get fed? How do the runners get to their belongings? How do the runners discover if their loved ones waiting at the finish are okay? How do the runners let their loved ones know where they are? How will thousands of runners be transported to who-knows-where?"

News coverage of the bombings and subsequent capture of the suspects has, of course, been non-stop and numbing. Soon, for the first time the behind-the-scenes story of Amateur Radio at this Boston Marathon will appear in the volunteers' own words in the pages of QST. I want to thank our Section Emergency Coordinator Rob Macedo, KD1CY, for helping to pull together much of the material that will appear in these stories. Some of the other contributors include: Paul Topolski, W1SEX, District Emergency Coordinator for Worcester County, Western MA; Steve Schwarm, W3EVE, DEC for Field Operations, Eastern MA; Tim Carter, W3ATB; Carl Aveni, N1FY, Assistant SEC; and Terry Stader, KA8SCP, DEC.

I'm proud of the actions of the section's ARES members and other Marathon Amateur Radio Communications consortium participants during this horrific event. When the shock hit, amateurs shifted gears seamlessly from public service event coverage to full-blown emergency

operations. The fact that amateurs are trained and able to make such a profound transition so quickly ensures that our services will always be in demand. You have this Section Manager's sincere gratitude. -- Phil Temples, K9HI, ARRL Eastern Massachusetts Section Manager

==> NATIONAL HURRICANE CONFERENCE: AMATEUR RADIO SESSIONS REPORT

The National Hurricane Conference was well represented with a strong Amateur Radio presence once again in 2013. This year's National Hurricane Conference took place at the Hilton New Orleans Riverside in New Orleans, Louisiana. Over 60 radio amateurs attended a day of workshops from 10:30 AM to 5:00 PM on Monday, March 25th. Presentations were received from Dr. Richard Knabb, Director of the National Hurricane Center; Julio Ripoll,WD4R, and John McHugh, K4AG, coordinators of WX4NHC, the Amateur Radio Station at the National Hurricane Center; Matt Anderson, KD5KNZ, from the Louisiana Governor's Office of Homeland Security and Emergency Preparedness

(GOHSEP); Dennis Dura, K2DCD, Assistant Director of the Office of Emergency Management for the New Jersey Department of Human Services; Joe Stepansky, KQ3F, from the Hurricane Watch Net; Rob Macedo, KD1CY, Eastern Massachusetts ARES Section Emergency Coordinator and Director of Operations for the VoIP Hurricane Net; and Mike Corey, KI1U, Emergency Preparedness Manager from

ARRL Headquarters. Jim Palmer, KB1KQW, handled videographer duties and the livestream of the National Hurricane Conference with assistance from Mike "Sparky" Leger, N1YLQ.

The morning presentation featured discussion of Hurricane Isaac and the Amateur Radio response in Louisiana by Matt Anderson, KD5KNZ, from GOHSEP. Matt explained the local response to Isaac and the hurricane's impacts to the region. Isaac, while not as strong as Katrina, provided a significant impact in terms of power outages and tree and wire damage as well as damage to levees in other parts of southern Louisiana that were not affected by Katrina and other past hurricanes. Matt reported that Hurricane Isaac did not have a significant impact to communications infrastructure in the area.

The session then turned to a panel discussion on Hurricane Sandy. Rob Macedo, KD1CY, Eastern Massachusetts Section Emergency Coordinator and SKYWARN Coordinator for the National Weather Service Forecast Office in Taunton gave the discussion of Hurricane Sandy's impacts in southern New England and how the region's main response efforts were providing damage reports and meteorological data not only to the National Weather Service but also to media and emergency management. This created a picture of situational awareness for various agencies and supported disaster intelligence gathering as the impacts from Sandy took hold over the region. Also discussed was the fact that Sandy's impacts were felt all the way to

southern New England even though the center of the system tracked several hundred miles to the south to southern New Jersey.

>From a mid-Atlantic perspective, Assistant Director for New Jersey Office of Emergency Management Dennis Dura, K2DCD, presented what occurred in the state of New Jersey and explained how the lack of situational awareness and disaster intelligence information hurt their

overall response. He also discussed how devastating the impact was to a large part of the state. Dennis participated in several aerial missions

to understand the amount of significant damage that took place over the state. A video was then shown on the impact of Hurricane Sandy across southern New England, the New York City and mid-Atlantic regions.

During the afternoon session, WX4NHC coordinators Julio Ripoll, WD4R, and John McHugh, K4AG, discussed Amateur Radio operations at the National Hurricane Center Amateur Radio station, WX4NHC. The operators and team at WX4NHC have entered their 33rd year of service to the National Hurricane Center and described the various

operations since 1980 including the move of the National Hurricane Center in the mid 1990s, and the use of digital modes and APRS weather stations across the Caribbean islands. They described the criticality of providing surface reports both in near real time and post storm and how they can affect the historical record of hurricanes and tropical storms.

The team also presented their highly critical role during the mission to Haiti after the Haiti earthquake. The team at WX4NHC coupled with MARS communicators provided interoperable communications for the medical teams associated with the University of Miami Medishare project. This was a critical international Amateur Radio project that

presented tremendous value to the agencies involved in the response efforts for the earthquake and represents one of the most critical Amateur Radio missions completed in recent memory.

Dr. Richard Knabb, the Director of the National Hurricane Center, presented from his perspective the importance of Amateur Radio surface reporting and described a case where reports from a ship at sea off the coast of El Salvador helped to change the historical record of a tropical system. Dr. Knabb impressed upon attendees how important hurricane preparedness and reporting is and reaffirmed his commitment to Amateur Radio operations at the National Hurricane Center.

Representatives from the Hurricane Watch Net and VoIP Hurricane Net presented their nets. Joe Stepansky, KQ3F, presented on the Hurricane Watch Net and their mission that started in 1965 and is entering its 49th year of service to the mission of surface reporting and communications during hurricanes. Joe described their need for net control stations across different parts of the country, bilingual operator needs, having stations in the affected area of hurricanes reporting into the net and using HF frequencies beyond their standard 20 meter frequency of 14.325 MHz. Rob Macedo, KD1CY, who is also the Director of Operations for the VoIP Hurricane Net, described the VoIP Hurricane Net method of using both Echolink and IRLP in a combined network and described the amount of surface reporting and contact with the New Orleans area during Hurricane Isaac via a video presentation. The VoIP Hurricane Net is also looking for additional net control

operators and stations in the areas affected by hurricanes.

ARRL Emergency Preparedness Manager Mike Corey, KI1U, provided an ARRL update on emergency communications. This included an update on the ARRL HQ Incident Management Team that activates for significant incidents and recent work in the past year with FEMA. The day of workshops ended with a Q&A session with the panel of speakers.

The 2013 National Hurricane Conference was live streamed with over 250 unique viewers monitoring the live stream. There were some technical issues this year that were not present last year but overall the conference live stream was a way for many other amateur operators to view presentations as they occurred at the conference and the technical issues will be rectified for next year's conference. Most of the presentations from the conference have been archived and the remaining presentations will be added to the site soon. The archive of presentations from this year's conference can be seen at the following link:

http://www.nsradio.org/video/features/voipwxnet/NHC13/

As we approach the start of the Atlantic Hurricane Season on June 1st, 2013, we encourage Amateur Radio operators to review their personal preparedness efforts and to assure their Amateur Radio stations are operational. If amateurs have thought about putting up weather stations, now is a great time to install them. -- Rob Macedo, KD1CY, Eastern Massachusetts ARES Section Emergency Coordinator and Director of Operations for the VoIP Hurricane Net

==> WX4NHC HURRICANE SEASON 2013 ON-THE-AIR STATION TEST

The WX4NHC Hurricane Season 2013 On-The-Air Station Test will be held Saturday, June 1st, 2013 from 9 AM - 5 PM EDT (1300z-2100z). The purpose of this event is to test the National Hurricane Center's Amateur Radio station equipment, antennas and computers. We will also perform operator training in preparation for this year's hurricane season. We will be making informal contacts on many frequencies and modes and would appreciate signal reports and basic weather data exchange ("Sunny," or "Rainy," etc.) from stations in any location.

WX4NHC will be on-the-air on HF, VHF, UHF and 2 and 30 meter APRS. We plan on testing on the following voice frequencies: 3.950 MHz, 7.268 MHz, 14.325 MHz, 21.325 MHz, and 28.425 MHz. We will try to stay on 14.325 MHz most of the time and announce when we QSY.

You may be able to find us on HF by using one of the DX Spotting Networks, such as the DX Summit Web Site <http://www.dxsummit.fi/Search.aspx>. We will also be on the VoIP Hurricane Net <http://www.voipwx.net/> from 1 PM to 3 PM EDT (1700z-1900z) (IRLP node 9219 / EchoLink WX-TALK Conference node 7203). Local South Florida area VHF and UHF repeaters will also be contacted.

QSL cards are available via WD4R. Please send your card with a SASE. Please do NOT send QSLs directly to the Hurricane Center address, as it will get delayed. Due to security measures, NO VISITORS will be allowed entry to NHC without prior clearance from NHC Security. Only WX4NHC operators on the NHC pre-approved operating schedule will be allowed entry. For more information about WX4NHC <http://www.wx4nhc.org>, please visit our website. Thank you for your participation in the WX4NHC Hurricane Annual Season Station Test. -- Julio Ripoll, WD4R, WX4NHC Amateur Radio Assistant Coordinator, www.wx4nhc.org <http://www.wx4nhc.org/>, celebrating 32 years at the National Hurricane Center www.nhc.noaa.gov <http://www.nhc.noaa.gov/>

==> HURRICANE WATCH NET SEEKS NET CONTROL STATIONS

With the 2013 hurricane season approaching, the National Hurricane Center (NHC <http://www.nhc.noaa.gov/>) in Miami and the Hurricane Watch Net (HWN <http://www.hwn.org/>) are gearing up for what could be a very active storm season. In preparation for the upcoming season, the HWN is currently seeking new members who can serve as net control stations.

The HWN provides on-the-ground, real-time weather data from Amateur Radio operators who volunteer their time to monitor their calibrated home weather stations. The stations report that data to the HWN, who in turn reports it to WX4NHC <http://www.wx4nhc.org/>, the Amateur Radio station at the NHC. "The Hurricane Watch Net relies on volunteer operators -- our members -- who serve as our net control stations," HWN Net Manager Bobby Graves, KB5HAV, told the ARRL. "HWN members are hams who have above-average stations, are capable of effectively conducting HF net operations and are willing to commit their time to operating in support of the HWN's mission during net activations. The net sessions can be long and, at times, very stressful."

The HWN primarily operates on 14.325 MHz, but Graves said that given the current solar activity, the HWN is looking for new members who can help with net control station duties on the low end of the 40 meter phone band. "If 20 meters goes away, we lose the ability to effectively communicate with our reporting stations or the NHC," he said. "By expanding our operation to 40 meters, we can easily change over when propagation changes."

Graves told the ARRL that the HWN is especially looking for new members with stations that can effectively communicate with Central America and the Caribbean, Mexico, the Gulf Coast, the East Coast and South Texas. "As we head into the 2013 hurricane season, we're looking for qualified amateurs who are located anywhere within North America or the Caribbean," he said. "We are also looking for bilingual hams. We recognize that some Latin American operators hesitate to check in and send reports to us if they aren't fluent in English, so we're also interested in hearing from hams who are fluent in both Spanish and English. When we're working storms that are either affecting or threatening areas where Spanish is the language of choice, we always try to have one or more bilingual HWN members on hand to help with

reporting."

While HWN membership is required to serve as a net control station, radio amateurs do not need to be an HWN member in order to participate as an HWN reporting station that provides observed or measured weather reports, or relay assistance as required by HWN net control. If you are interested in becoming a member of the Hurricane Watch Net, please visit the Membership Information page <http://hwn.org/about-us/membership-info.html> on the HWN website <http://www.hwn.org/>.

The Hurricane Watch Net is activated either at the request of the National Hurricane Center and/or when an Atlantic basin hurricane is within 300 miles of landfall. Although hurricanes can happen any time of the year, hurricane season for the Atlantic and Caribbean runs from June 1-November 30, and usually peaks anywhere from late August through September. The Pacific hurricane season runs from May 15-November 30. -- ARRL Letter

==> A GO-BOX OPTION

With the increased interest in operating on a portable basis, hams can find it difficult to transport their equipment in a secure container that affords not only insulation and protection during transit, but also in dealing with the space limitations of RV's.

Tote boxes work, but are big and bulky. A friend of mine, Louis Stempek, AB8YO, suggested the use of a tackle box (figure 1). The largest tackle box on the market is the Plano 758; it affords the room needed. The

first order of business was to remove the four tackle trays and fabricate new ones. I chose to use &#65533; inch laminated mahogany but any &#65533; inch wood will work. I installed two shelves that were spaced far enough apart to hold the equipment and easily slide in/out affording easy removal to change, add or repair equipment. In my version of the Go-Box (figure 2), the radio is located on the bottom shelf in the mobile bracket next to the LDG auto tuner. On the upper shelf of my Go-Box is the MFJ-862 UHF/VHF wattmeter, an MFJ-860 HF wattmeter and on the far right is the SignaLink USB digital interface sound card for PSK, RTTY, and other digital modes. The meters are held in place with

Velcro strips glued to the wood tray. The top of the tackle box doubles as storage where I keep a 60 watt dummy load, hand mic for SSB, keys, pens, and the 7 inch TFT display that plugs into the IC-7000. The power cable for the monitor, video cable from the 7000 and a USB cable from the SignaLink is fed via three holes drilled in the bottom of the storage tray and lead down to the 7000, SignaLink and a 12 volt Anderson power block. The USB cable is used to connect a laptop while in digital mode. Being plastic, the box was easy to cut and drill.

The rear of my Go-Box features four connections; all are surface mount as I wanted to avoid snagging while in storage. Figure 3 shows the two surface mount SO-239's, one for HF and the other for VHF/UHF. The left side has two surface mount Anderson connectors, one for 12v and the

other for ground (green). Both sides of the ground mount are soldered together inside so that no matter which side is used they go to ground. All ground connections inside the box -- rig, tuner, coax, etc. -- are tied to the Anderson ground terminal.

Power is provided by an external Jetstream JTP34BCM switching 35 amp supply. I chose this particular supply for the ease of connection as it has PowerPole connectors front and rear. The 12 volt surface mount on the back of the Go-Box is connected to an Anderson six port power block attached to the upper shelf and sitting behind the watt meters where there is ample space. An internal power supply can be used; however, consideration must be given for running 120v AC into the Go-Box. I did not want AC inside the cabinet. The Jetstream provides more than enough DC to do the job. A smaller supply could be used but I already had the Jetstream and avoided purchasing another.

Coax and power cabling needs to be kept as short as possible. There is not a lot of room behind the equipment and binding can take place when the trays are slid in. I had to cut a notch out of the bottom tray to allow for the microphone connection or use the connection on the rear of the 7000.The notch is visible beneath the VFO.

The IC-7000 runs hot in the digital mode, even at 25 watts and additional cooling should be provided as the temperature gauge will climb into the red after prolonged use. I increased cooling by cutting a 2" diameter hole in the top shelf behind the VHF watt meter directly above the rig and installed a muffin fan facing down on the IC-7000 heat sink. This proved not to be enough cooling for long winded RTTY running at higher power, so another 2 inch muffin fan was installed in an upright position behind the LDG tuner facing the rig heat sink. In addition to the internal fan, there are now two external muffins cooling the rig. This did the trick and overheating is no longer an issue. The fans are plugged into the power block so they can be unplugged if not needed. Since they are muffin fans, noise is not an issue and can be left on. If digital modes are not going to be used then one fan is ample to do the job.

There is no finite number of configurations available or rigs that can be used. If it fits it can be made to travel. My first version had an ICOM IC-2200H mounted in the mobile bracket in place of the SignaLink but I removed it as the IC-7000 has 2 meter capability. Two of my local friends use the ICOM IC-706mkIIg with great success using an internal power supply.

What I have offered here is just food for thought and while this set up works for me it may not be what you want. I did not show pictures of the internal wiring as it is assumed the builder can figure out how to connect a piece of coax or plug in an Anderson Power Pole. Use your

imagination, modify the tackle box to fit your needs and have fun whereever you go. -- Paul Zadonia, WD8CJN, Pinconning, Michigan wd8cjn@arrl.net

==> LETTERS: BATTERIES

Good point about recharging batteries in the last issue. I should point out that most of the 2 or 4-cell rechargers for AA rechargeables have a 12-V or 6-V dc input supply voltage from a wall-wart. A 12-V recharger will work just dandy off a vehicle supply and makes recharging plausible as an emcomm strategy. A 12-V to 6-V converter lets the 6-V recharger work off 12-V sources as well. What I do with my 12-V accessories is cut the cord connecting the wall wart to the coaxial power jack and put in a pair of PowerPoles. That way I can run them off of just about anything I have handy with PowerPoles. Point - you don't have to choose between primary batteries (the supply of which is not guaranteed either) and secondaries. Plan ahead, make your equipment flexible, and have both! -- Ward Silver, N0AX, St. Charles, Missouri

==> LETTERS: LESSONS LEARNED REPOSITORY NEEDED

I am very active in our local ARES group (ARESLAX Northwest) and take part in many mock drills throughout the year with the LAPD, Highway Patrol, Sheriff's Department, Metro Security, Fire Department, FBI, local police, hospitals and so forth.

Some of these drills last 7-8 hours and I always learn something from them. However, they are drills and are therefore not as stressful as a real situation. It occurred to me that in certain parts of the country some hams deal with real hurricanes and tornadoes every year. These hams must have a wealth of knowledge that many other emergency communications groups do not have, based on hard experience.

Has there been any thought to have some way of sharing the valuable experience that the hams who deal with annual disasters with those of us who have no "real" disaster experience? Is there any kind of database of "lessons learned" or what worked and what did not work?

Here in California we are waiting for the big earthquake to hit and I am not sure how well we will perform having only mock drills for experience. Maybe you could include some practical tips from the experts in your newsletter as a means of sharing the knowledge. Or if someone has a better idea of how to share the experience I am all ears. -- Terry Hall, K6MA, Emergency Coordinator, Los Angeles ARES Northwest Rapid Response Team, California, K6MA@arrl.net

==> "THIS IS NOT A TEST" -- ARES ACTIVATES IN WILL COUNTY, ILLINOIS

On Thursday, April 18th, members of the Will County ARES (WCARES, Illinois) group received a text message alert that members were needed to support a shelter and the EOC of Plainfield for communications. With rain falling for the past weeks, followed by heavy rains the previous two days, help was needed. The rivers had crested, sending water into

homes and the streets.

The Plainfield EMA established a shelter at the Plainfield High School and opened up the EOC to control any needed actions for potential victims. Dale Marzano, N9JH, Emergency Coordinator for WCARES, put out the call for members needed for Thursday night and shifts on Friday. Dan Berg, KC9VZI, showed up at the EOC at 1800 to set up a link to the

shelter, while Nathan Bloch, W6NJB, established a portable 2 meter/440 MHz station in the gym of the high school. Both stations were on the air in short time. Later in the evening, Dennis Reavis, KC9IRL, and Archie Hawley, N9ZMM, showed up to support and help as backups when needed. Throughout the night there were status checks from the EOC to "Shelter 1" to see if anyone had checked in. The shelter did not have any takers and was closed at 2300 and the ARES members were released at both sites. A "stand down" call was sent out.

You never know when the real deal is going to happen. That is why ARES members train to make sure they can help when the need is called for. That is why we encourage hams to sign up with their local ARES groups for training and meetings, because you never know when you're going to get the call: "THIS IS NOT A TEST!" -- Daniel R. Berg, KC9VZI, Coal City, Illinois

==> EMCOMM EAST SEEKS PRESENTERS FOR SEPTEMBER CONFERENCE

EmComm East <http://emcommeast.org/> will be held in Rochester, New York on Sunday, September 29, 2013. We are looking for presenters for our emergency communications conference. If you are interested, please contact info@emcommeast.org or visit our website at www.emcommeast.org <http://www.emcommeast.org/> Thanks! -- Jeff Wigal, WY7Q, Rochester, New York

==> AMATEUR RADIO SUPPORTS CARIBBEAN TSUNAMI EXERCISE

On Wednesday, March 20th, 2013 at 9:03 AM, the Puerto Rico Emergency Management Agency (PREMA, Agencia Estatal para el Manejo de Emergencia y Administraci&#65533;n de Desastres, AEMEAD) again participated in the now yearly exercise Caribe Wave/Lantex 13, in conjunction with the Puerto Rico Seismic Network (Red Sismica de Puerto Rico) and other agencies. The scenario was a tsunami situation, based on an earthquake that had its epicenter 57 miles north of the island of Aruba.

The purpose of the exercise was mainly to test the communications of the emergency agencies throughout the Caribbean, although many municipalities conducted their own evacuation drills to also test response to emergency alerts.

As always, Amateur Radio was operational from the PREMA Headquarters. The mission there was to collect information from other Amateur Radio stations in the affected region and on how they initially received the notification of the earthquake and resultant tsunami -- by

radio-EMS alert, NOAA radio, broadcast radio/TV or siren
activations. All reports were handled via the KP4CAR repeater of Carlos
A. Rosado, on 147.210 MHz, which covers almost all of the island as
well as other linked repeaters. -- ngel Santana-Diaz, WP3GW, ARRL
Public Information Coordinator, ARRL Puerto Rico Section

==> K1CE FOR A FINAL

With astonishing speed and efficiency, the Boston Marathon radio
communications support converted to a major disaster operation, and the
criminals were brought to swift justice. It's all due to the country's
massive investment of resources into emergency management and
interoperability initiatives post 9/11 and Katrina. The investment is
paying rich dividends in public safety now and for the future. The
Amateur Radio community is part and parcel of this investment.

I was sitting in the waiting room of a local (Daytona Beach, Florida)
two-way radio shop recently waiting for a technician to drill a hole in
the roof of my pick-up truck for a 2-meter mount and antenna, and
browsed the glossy PR pamphlet for the Volusia County EOC and Sheriff's
dispatch center. Smack in the middle of the short list of features on
page one was this one that jumped off the page at me: "Ham Radio
Center." I smiled and asked the clerk if I could keep the brochure --
"sure." It's now on my desk as a reminder of the integral part we play
nowadays in the vast arena of public safety.

HamRadioNow: hamShack Switch - Birth of a Product

Posted: 14 May 2013 09:16 AM PDT
www.HamRadioNow.tv

HamRadioNow – Episode 77: hamShack Switch–Birth of a Product

If your ham shack is a little more elaborate than ours, you probably have a rat's nest of cables. Maybe you've graduated from unplugging and re-plugging to manual switchboxes or maybe a patch panel to change configuration of your audio, keying, antennas and other station input/output. hamShack Switch (they drop the leading capital.... not a typo) is a new product, frrom a new company, that aims to help you clean that up. Your shack computer will control their switchbox and let you easily reroute all those peripherals, either locally or remotely.

Jack Ritter WØUCE started the new company after a lifetime in the telcom industry, and in addition to pitching the product, tells us about launching a new product in the Amateur Radio market.

In the UKQRM reflector, M0LSX says:

Interestingly IntellIcone's site states...
"When an incident occurs,"......"This is immediately transmitted,
regardless of distance, to an unlimited number of portable site alarms
with the same SRW number, which are placed in strategic positions close
to the workforce along the entire site or road closure." If the
advertising is legal, ie not misleading & dishonest, then to meet those
laws, the above claim clearly states that these alarms are NOT legal low
power devices..

Could it be that they have Foundation licences ("distance no object")?

http://forums.qrz.com/showthread.php?391386-WPA-ARES-Conference-JUNE-15-at-the-University-of-Pittsburgh-Johnstown-Engineering&goto=newpost

WPA ARES Conference, JUNE 15 at the University of Pittsburgh, Johnstown,

Engineering Building.

The Energizing Emergency Communications WPA ARES Conference Agenda and

Registration form are now available on the www.wpaares.org website.

Feel free to invite your EMA Director, Served agency Liaison and others

you feel would be interested. It is important that we get a headcount

as soon as possible so please emphasize the need for early registration.

Encourage folks to bring go-kits and especially specially equipped

vehicles if possible. Information on overnight accommodation is being

researched for those that may need it.

PRESENTERS-

The lecture hall in the Engineering Department is media ready including

video projector and Internet connection. If you need some special

hook-up, please send me an email with a copy to Bill Wieserman

k3zyk@pitt.edu .

It looks like a super emergency communications event!

73,

Larry AB3ER ab3er@comcast.net

USS TURNER JOY (DD-951) - SHIP CONSTRUCTION & SPECS

Class: Forrest Sherman Destroyer

Built at: Puget Sound Bridge & Dredging Company, Seattle, Washington

Keel laid: September 30, 1957

Launched: May 5, 1958

Commissioned: August 3, 1959

Length: 418.3 feet (127.5 meters)

Beam: 45.3 feet (13.8 meters)

Draft: 22 feet (6.7 meters)

Displacement: 2,800 tons; approx. 4,000 tons full load

Propulsion system: four-1200 lb. boilers; two steam turbines; two shafts

Propellers: two

Speed: 32+ knots

Armament: Three 5-inch/54 caliber guns and two Mark 32 torpedo launchers
that carry 6 Mark 46 torpedoes each.

Aircraft: none

Crew: 17 officers, 275 enlisted

Decommissioned: November 22, 1982

Experimental 30 Meter Mobile Beacon

Posted: 14 May 2013 05:43 PM PDT
http://forums.qrz.com/showthread.php?391350-Experimental-30-Meter-Mobile-Beacon&goto=newpo
st

Ham Radio decades ago was an experimental hobby. Most hams back then built
or designed their own equipment. Today, Al Gallo WØERE and ☐SAP☐ NØSAP
have come up with another fun project you can join in with us.

We will have a 30 Meter Mobile Beacon transmitting on 10.129.25 MHz
starting on May 16th at 12:00 UTC as we travel to Dayton Hamvention. We
will transmit on this frequency at 3 watts giving our current Grid Square
so you can track our movement from Southwest Missouri (Nixa, MO.) to
Dayton, Ohio. We will be back on the air May 20th at the same time 12:00
UTC on our return trip to Nixa, MO.

The antenna will be a 23-foot trailing wire mounted on a Hustler mast
without the resonator. Using Litz wire, it starts floating in the air at
35 MPH and will be flapping in the wind at about four to five feet off the
ground. The length of the wire gives us a safe distance for vehicles
behind us.

We will be monitoring 40 Meter SSB at 7.265 MHz and QSY to 18.140 MHz
during our trip for Beacon reports. If you should hear our Beacon signal,
please contact us on the air, by email, or audio file at
erecom@hotmail.com. You can also see the Beacon on QRZ under WØERE or Ham
Nation Episode 97 at http://twit.tv/show/ham-nation/97. Click on the SD
Large Video for viewing.

We need to hear from you to better understand propagation and signal reports at the time of transmission and location. NØSAP will be driving and receiving on the air reports. WØERE will be operating the Beacon from the passenger seat. If you are going to Dayton, we hope to see you on the road.

//
HMS Collingwood Open on ATV

Posted: 14 May 2013 03:54 PM PDT
http://forums.qrz.com/showthread.php?391338-HMS-Collingwood-Open-on-ATV&goto=newpost

The Open Day at HMS Collingwood (GB3RN) will not only involve a running shack all day but it will also be streamed live by Amateur Television!!!! All the events of the day wil be there for you to see and also you can catch the station and get a very different contact

Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, Cordell Expeditions, OH2BH and W5KUB for the following DX information.

** SPECIAL NOTE FROM EDITOR (By KB8NW): Just a reminder that there will not be an OPDX Bulletin next week and "possibly the week after". I "will" be attending the Dayton HamVention, but will be limited to conditions and how I feel. As far as the update on my health -- hopefully things are better. Monday, May 13th, I had a heart cathe-terization at the Cleveland Clinic to view my abnormalities. The results were -- I had a balloon angioplasty to the saphenous vein bypass graft to the diagonal anastomosis. There was a 99% blockage where my bypass graph tied into my natural artery (main left artery in the heart). It's now open and blood is flowing again. They could not use a stent because of the difference in size between the bypass graph (vein) and the artery (much smaller). If you would like to see the before and after pictures of my heart cath, go to:
before -

I did spend the night in the hospital and was released Tuesday after-noon. I am sore, but feel fine. I would like to thank the many well wishers who E-mailed me, and I hope to see them at Dayton.... 73 de Tedd

DAYTON HAMVENTION BROADCAST. Tom Medlin, W5KUB, reports the following [edited]: "It's time for the 2013 Dayton Hamvention broadcast!! --
Please join us during our live, online broadcast of the Dayton Hamvention this week. To join the broadcast go to <http://W5KUB.com> where the fun begins!
New venue for 2013: We will be located inside Hara Arena at Booth SA302

to provide you with a totally different program. There will be no rain, hail, sleet, or snow on our cameras this year!!
During the Hamvention W5KUB will interview vendors regarding their latest products. We will have many special guests such as Bob Heil (K9EID) of Heil Sound; Martin F. Jue (K5FLU) founder of MFJ Enterprises; John Amodeo (NN6JA) producer of ABC TV's hit show, "Last Man Standing"; and many more.
During the live broadcast, you will also have the opportunity to meet and chat with other ham radio operators from all over the world. During the 2012 Dayton Hamvention we had 47,400 viewers that followed our broadcast for the 5 day broadcast!
You could win one of 43 prizes, valued over $5,300, which will be awarded during the broadcast! The prizes include dual band mobile, HTs, D-star ID-51A, Comet Antenna Analyzer, Heil microphone and headset, antennas, weather station, computer to radio interface, spool LMR-400, auto antenna tuners, and much more. These prizes are made possible because of our relationship with partners; such as, GigaParts, Ten-Tec, NCG Company, Kantronics, MP Antenna, Heil Sound, ARRL, MFJ, and many more. In the past year over $10,000 in prizes have been awarded! Of course, no purchase is necessary to win a prize. W5KUB is not affiliated with any products or companies and does not sell any products or services.
Dayton Hamvention broadcast schedule (all times are subject to change):
* Wednesday, May 15th: 1300 UTC (8:00 AM CT) drive from Memphis to Dayton, Ohio (10 hours). Yes, this will be a live broadcast!
* Thursday, May 16th: 1300 UTC - 2030 UTC (9:00 AM - 4:30 PM ET), set up at Hara Arena and visit with vendors.
* Friday, May 17th: 1200 UTC - 2100 UTC (8:00 AM 5:00 PM ET), Dayton Hamvention
* Saturday, May 18th: 1200 UTC - 2100 UTC (8:00 AM 5:00 PM ET), Dayton Hamvention
* Sunday, May 19th: 1200 UTC 1600 UTC (8:00 AM noon ET), Dayton Hamvention
* Sunday, May 19th: 1700 UTC (1:00 PM CT) drive from Dayton to Memphis (10 hours). Yes, this will be a live broadcast!

Join our group on Facebook at <https://www.facebook.com/groups/w5kub/> to keep up with us year-round.
Also, please help spread the word by posting this announcement in Facebook and forwarding this message to your ham radio friends that may not have received this message!

We'll 'see' you at Hamvention!.....
73, Tom Medlin, W5KUB -- <http://w5kub.com>"

VK0H, HEARD ISLAND (DXpedition Reschedule!). Press release from the Heard Island Web page dated May 15th [edited]: "PROJECT RESCHEDULING AND RESTRUCTURING -- We wish to announce that the expedition to Heard Island has been rescheduled for January, 2015. The primary reason for this decision was the cost of using the preferred vessel, the Marion Dufresne to put the team on Heard Island for the required time. In spite

of extensive negotiations and rescheduling of the cruise, it became clear that the cost of using this vessel will exceed $1 million, and therefore the total cost for the project would be about $1.5 million, as we noted earlier. In spite of our plan to increase the team size to 50 (which the M-D can accommodate) to partially cover this cost, we reluctantly concluded that sponsorship at this level would be impossible. We have therefore decided to delay the expedition to January, 2015, to allow more time to restructure the project, locate a more suitable vessel, and bring the cost more in line with projected available resources.
One benefit of this rescheduling will be to enable the mountain science team to carry out the exploration of Big Ben on the 50th anniversary of the first ascent (in 1965). The 3000-meter volcano on Mawson Peak is currently erupting, and study of the changes brought by this eruption will be safe and significant during the 2015 season. A major component of the expedition will be to document the effects of the eruption, the state and condition of the flanking glaciers, and the changes in evanescent lagoons on the east slopes of the mountain.
A second benefit of the restructuring is that we will plan for amateur radio operations to be carried out over a longer time, up to 30 or more days. Furthermore, the campsite will be located on the east side of Heard Island, enabling paths to areas of the world that were not accessible in the last operation (in 1997). With the requirement of the longer stay on Heard Island, we will be assembling a new radio team with operators who are highly experienced and dedicated to the challenge of activating Heard Island with the new project requirements.
The third benefit of rescheduling is to have the time to develop sophisticated instrumentation and systems for state-of-the-art real-time communications with the expedition. We will have satellite links to enable real-time reporting of the radio log (using a new version of DXA, which was successfully used on previous DXpeditions (K7C and TX5K). In addition, we plan to implement real-time interactive communications and reporting from the mountaineering team as they explore the volcano, and to enable scientific and educational groups to work interactively with the onsite team.
The budget for the restructured project will likely be significantly less than $500k. We plan for a total team of 12-15 persons, and we will solicit team members with experience, motivation, and multiple skills. Except for the organizing principals, we are starting anew to build the team for this very different mission. We will work to keep the cost to participants below $15k, and will expect the team to work together to find support and make the appropriate preparations. Safety will be par-amount.
We will post an update on 15 June 2013, including an updated Project Description (under DOCUMENTS). For more information, please contact Dr. Robert Schmieder, KK6EK Organizer and Expedition leader, Schmieder (a) cordell.org, or Rich Holoch, KY6R, Co-planner rholoch (a) comcast.com. We have posted updates on the expedition website <www.heardisland.org>.

Z8, SOUTH SUDAN. The following is a press release from Martti, OH2BH, dated May 15th [edited]: "As part of the April 2, 2013, visit to South

Sudan by a delegation headed by the Foreign Minister of Finland, several supporting elements were discussed. Just three weeks later, following a series of meetings focusing on practical matters in Juba, there was a high-level presentation, with relevant endorsements, made to the South Sudan government. The presentation was made with a view toward enlisting support on telecommunications matters in general and Amateur Radio's role in society in particular. Ultimately, a Memorandum of Understanding (MoU) was signed specifying several elements of Amateur Radio as a study case for local administrators. These elements include Amateur Radio's role in society, frequency allocations, regulatory matters and promotion of Amateur Radio as part of an educational agenda. The MoU calls for a workshop to be held for the senior staff of the Ministry of Telecommunications and Postal Services. Members of the Ministry of Higher Education and the Research and Technology agency will also attend the workshop.
In early June, a senior South Sudan telecommunications official will attend an IARU Administrator's Course in Accra, Ghana to observe ITU and IARU. This travel will be made possible thanks to the valuable support of the Yasme Foundation <www.yasme.org>.
As Amateur Radio is only provisionally regulated in South Sudan, the Radio Arcala Fellowship Group of Finland, OH8X, was granted a provisional license Z81X to facilitate operating events during visits by the project representatives. We expect that Z81X will be activated several times during the course of this project, notably on low bands and in CQWW Contests.
Just today, the initial Z81X activity, with one radio only, was concluded with more than 20.000 QSOs. QSOs were split evenly between the three major population areas of the world - Europe 8693 (43%), North America 5774 (29%) and Asia 5162 (26%). The Finnish duo - Olli, OH0XX and Martti, OH2BH - has now returned to their native Finland. See <www.qrz.com/db/Z81X>.
As the entire project is carried out on a voluntary basis, the group will accept donations to be used solely for offsetting direct project expenses incurred in South Sudan. ClubLog OQRS is now active for QSL requests (bureau or direct) and project support..
We are pleased to acknowledge the support of Mr. Pekka Haavisto, the Finnish Foreign Minister's Special Representative to the Horn of Africa and Sudan. We also acknowledge the supporting efforts of Mr. Amul Behera of Rock City Investments, Juba, Dr Anu Kantele of Helsinki University Central Hospital, Massimo, Z81B (IZ0EGB), Diya, Z81D (YI1DZ) and Ken, Z81Z (K4ZW) for supporting the project and welcoming the latest country of the world to the valued ranks of Amateur Radio.
Z81X QSL manager is OH0XX, QRZ.com."

MMMonVHF Newsletter No. 1/ WEEK 20 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-05-15
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

CIAO, SONO PIERO BARAGETTI DI LODI, E VORREI TANTISSIMO URLARE....

GENIO BORSISTICO, VERO E PROPRIO RE MIDA, EROE CIVILE MICHELE NISTA DI http://michelenista-megliomortochearreso.blogspot.co.uk/ E' COMPLOTTATO A MORTE DA SILVIO BERLUSCONI DAL LUGLIO 1987 DOPO UNA DISCUSSIONE CHE EBBERO VIA TELEFONO DOVUTA TUTTA ALL'ARROGANZA E BORIA MAFIOSA, NAZISTA ED ASSASSINA DI SILVIO BERLUSCONI. NEGLI ANNI NOVANTA, NONOSTANTE SILVIO BERLUSCONI TRAMASSE TERRIFICANTEMENTE CONTRO MICHELE NISTA USANDO I SUOI PARTITI FASCISTISSIMI E DI COSA NOSTRA UNITI ALLE SUE MASSONERIE OMICIDA, MICHELE NISTA FU UNO DEI TRE MASSIMI PRODUTTORI DI COMMISSIONI DELLA BORSA DI MILANO. TRA I PRIMI 3 SU 10.000. ERA NOTO PER I VINCENTISSIMI RISULTATI CHE DAVA E SEMPRE. NOTO A NEW YORK, LONDRA, FRANCOFORTE, ZURIGO. FECE FARE 9 MILIONI DI EURO DI COMMISSIONI NETTE IN SOLI SEI ANNI, SENZA MAI CORROMPERE, RUBARE, GIOCARE SPORCO, QUINDI CON STILE ANTIBERLUSCONIANISSIMO. CONQUISTO' NEGLI ANNI 90 LA CREMA FINANZIARIA MONDIALE, DIVENNE IL BROKER PIU' USATO DA GOLDMAN SACHS, MERRYLL LYNCH E TANTISSIME ALTRE ENORMI, GRANDI O MEDIE BANCHE DI INVESTIMENTO MONDIALI. VISTO CHE SILVIO BERLUSCONI NON RIUSCIVA MAI A VINCERE MICHELE NISTA, CERCO' DI FARLO AMMAZZARE 4 VOLTE (FACENDOGLI SPARIRE I FRENI DELL'AUTO, MENTRE ANDAVA OLTRE I CENTO ALL'ORA IN AUTOSTRADA: MIGLIAIA SONO STATE LE PERSONE FATTE AMMAZZARE DAL MEGASSASSINO SILVIO BERLUSCONI, MASCHERANDO IL TUTTO DIETRO A FINTO SUICIDIO, FINTO MALORE, FINTO INCIDENTE; SI VA' DA CORSO BOVIO A RAUL GARDINI; DAI GENITORI DI CLEMENTINA FORLEO, AD ADAMO BOVE; DA GIORGIO PANTO A PAOLO ALBERTI; DAI DUE PM DI ROMA CHE SILVIO BERLUSCONI TANTO ODIAVA, ALBERTO CAPERNA E PIETRO SAVIOTTI, AGLI EROI, ADDIRITTTURA FATTI SPAPPOLARE DA SILVIO BERLUSCONI, FALCONE, BORSELLINO E DOZZINE DI CAPI FAMIGLIA CHE GLI FACEVANO DA SCORTA). NEL 1998, PER NON VENIRE AMMAZZATO DA SILVIO BERLUSCONI, MICHELE NISTA "EMIGRO'" A LONDRA, DOVE ORA STA FACENDO DEI NUMERI INCREDIBILI NEL SETTORE DELLA CONSULENZA FINANZIARIA (OGNI ANNO, ASSICURA PERFORMANCES PROVABILISSIMI FRA IL 50 E IL 70%; ED IN PERIODI DIFFICILISSIMI, COME DAL 2007 E AL 2012). GENIO, RE MIDA ED EROE CIVILE, MICHELE NISTA DI http://michelenista-megliomortochearreso.blogspot.co.uk/, INFATTI, FU IL PRIMO ED UNICO AL MONDO A PREVEDERE NEL SETTEMBRE 2007 IL CROLLO DEL DOW JONES DA 13.300 A 6900 ENTRO UN ANNO . TUTTI LO DERISERO QUANDO PREVEDETTE QUESTO, DANDOGLI DEL MATTO. MA TUTTI RIMASERO A BOCCA APERTA QUANDO IL SUDDETTO CROLLO SI VERIFICO' ALLA PERFEZIONE. A PRIMA VITTORIA DI OBAMA BARACK, AVVENUTA NELL'OTTOBRE 2008, IL GENIALE, VINCENTISSIMO, EROE ANTI MAFIA E NAZIFASCISMO DI SILVIO BERLUSCONI, MICHELE NISTA DI http://michelenista-megliomortochearreso.blogspot.co.uk/ PREVEDETTE, A PARTIRE DAL MARZO 2009, IL RIALZO DEL DOW JONES DA 6900 A 14.300. ANCHE QUESTO AVVENUTO ALLA PERFEZIONE. SI POSSONO CONTARE PIU' DI 4000 AZZECCATE SU PIU' 4000 PREVISIONI (PRATICAMENTE NON HA MAI SBAGLIATO UNA PROFEZIA, GRANDIOSO RE MIDA MICHELE NISTA DI http://michelenista-megliomortochearreso.blogspot.co.uk/), EFFETTUATE DALL'EROE CIVILE MICHELE DAL SETTEMBRE 2007 AD OGGI. SU TUTTE LE MATERIE PRIME DEL MONDO, TUTTE LE VALUTE DEL MONDO, SU TUTTI I MERCATI AZIONARI DEL MONDO. SPESSISSIMO, MISSON IMPOSSIBLE MAN MICHELE NISTA DI http://michelenista-megliomortochearreso.blogspot.co.uk/ RIMANE COMPLOTTATO A MORTE DA SILVIO BERLUSCONI CHE USA A TAL SCOPO I CORROTTI NAZIFASCISTI E

MAFIOSI LIBERO ED IL GIORNALE. CHE A LORO VOLTA USANO I CRIMINALI PREGIUDICATI ASSASSINI PAOLO BARRAI E MAURIZIO BARBERO DI MERCATO LIBERO E MERCATO LIBERO NEWS. OLTRE CHE IL NOTO TRUFFATORE STEFANO BASSI DE IL GRANDE BLUFF, ED IL CAGNACCIO BRUCIA RISPARMI FEDERICO IZZI, NOTO COME " ER ZIO ROMOLO DELLA CAMORRA". ALTRI SICARI ASSASSINI DI BERLUSCONI, SONO I SUPER LAVA SOLDI MAFIOSI ANDREA SCARSI DI BANCA IFIGEST E MARCO BROTTO DI BANCA LEONARDO. TUTTI NAZIFASCISTI CHE VIVONO DI LAVAGGIO DI PROVENTI KILLER DI COSA NOSTRA, CAMORRA E NDRANGHETA. INFORMEREMO DI QUESTO, MAGISTRATURA DI TUTTO IL MONDO E GIORNALI PER BENE DI TUTTO IL MONDO. LA STORIA RENDERA' MICHELE NISTA VINCITORE PER L'ENNESIMA VOLTA. DAVIDE BATTERA' GOLIA AGAIN AND AGAIN. E SE VOLETE CONTRO PROVE A PROPOSITO..

ok Michele, aspetto, lo sai che tengo a te!

Mi ricordo ancora come fosse oggi quando sei apparso in ospedale, dove ero ricoverato, grave, sofferente, portandomi dei favolosi biscotti!

Non pensare sempre che ti remo contro cazzo! Ok, sono Berlusconiano, ok, ho ordini di partito, ma non ti voglio perdere, a te ci tengo, cazzo

un abbraccio
Paolo

IL FIUTO DI UN AMICO... Post del Febbraio 2008Qualche anno fa a Milano la borsa chiudeva poco dopo pranzo. Nel pomeriggio se un operatore istituzionale cercava titoli italiani sapeva dove andare....Telefonava a Michele Nista.Michele Nista era un vero grandissimo broker, altro che macchina telematica. E riusciva anche a trovare prezzi migliori della macchina stessa facendo felice sia il venditore che il compratore.Anche con la chiusura dei mercati alle 17.30 Michele è sempre riuscito a trovare l'introvabile.Non esisteva la "missione impossibile" per Michele Nista.Un milione di Generali? Bastavano pochi minuti e venivano trovate al giusto prezzo.Poi Michele si è allontanato dal mercato, ma a Novembre l'ho incontrato dopo tanto tempo.Abbiamo bevuto un caffè e abbiamo parlato del

mercato...Caro Michele, farai anche altre cose ora ma il fiuto per gli affari, quello no...non ti manca.Michele, non sarà forse un macroeconomista, ne uno studioso di bilanci, ma ha una particolare dote...il senso degli affari.Pochi come lui si muovono nel mercato con la stessa spavalderia.Anche nel Settembre 2007 non si è sbagliato...mentre i molti urlavano al rally di Natale e il Dow Jones era intorno ai 14.000 il mio caro amico Michele mi ha guardato fisso negli occhi e mi ha detto "Ehi doctor....il Dow arriverà a 11.800 fra poco e poi a 8000"Caro Michele sei stato bravo, anzi bravissimo...Ah dimenticavo di dirvi che la scorsa settimana ho incontrato Michele, questa volta non abbiamo preso un caffè...ma siamo passati a un pranzo anche se frugale)Sapete cosa mi ha confidato guardandomi ancora una volta negli occhi? "ehi Doctor fra poco il dow Jones arriva a 10.800 e poi giu, fino a 8000"Sapete che vi dico...che se fossi Bernanke comincerei a preoccuparmi seriament, L'INIEZIONE DI DROGA DETTATA DAL TAGLIO DEI TASSI NON E' CHE UN ESTREMO TENTATIVO DI SALVARE UN MODELLO ECONOMICO ALLO SFASCIO.Vai Michele, continua cosi'!!!~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~~

ALTRO POST, IN QUESTO CASO, SCRITTO IN QUESTO CASO, A META' APRILE 2009

UN GRAZIE A MICHELE NISTA

Unico ad avvisare i nostri lettori di un DOW a 7700 (quando valeva 13.000).Unico ad avvisare che i mercati americani sarebbero ripartiti con le rondini, unico che a fine febbraio ha detto di comprare e di guardare le quotazioni a luglio.Michele ha affermato più volte che Obama riporterà ai massimi il Dow a fine mandato.Io personalmente non sono daccordo sulla sua ultima visione. ma questo è MERCATO LIBERO un blog capace di selezionare delle persone differenti ma capaci di individuare i trend.MICHELE NISTA SEI UNA FORZA!!!Pubblicato da mercatolibero a lunedì, aprile 13, 2009

O QUESTO?

MICHELE NISTA SEI UN GRANDE!!!

Share

La scorsa settimana abbiamo scritto un articolo sulla spartizione della tv di stato e della possibile vendita di rete 4 da parte di Berlusconi.L'articolo era frutto di una chiaccherata con lo stanatartufi, genio, in quanto a fiuto per gli affari, Guru di Piazza Affari, Michele Nista.Michele è in gran forma e non lo ferma più nessuno.O il nostro articolo è stato letto da Di Pietro....o qualcosa bolla in pentola nel campo delle televisioni....(segue articolo)...Insomma, Michele Nista, ha intuito tutto al volo, come sempre.Bravo Michele sei un mito

E INFINE, POST, CHE RICEVETTE " SOLO" 203 COMMENTI, A ME DEDICATO (ORA, IL VERME ASSASSINO PAOLO BARRAI, SENZA ME, RICEVE 6 COMMENTI A SCRITTO... CHE, OVVIAMENTE, SI SCRIVE DA SE.... E INFINE, IL SEMPRE, SUPER VERME PAOLO BARRAI, HA AL MASSIMO 100 LETTORI, MANIPOLA I CONTATORI, PER FARNE APPARIRE 8000: ME LO DISSE LUI STESSO DI PERSONA, DI QUESTI SUOI TRUCCHI MAFASCISTISSIMI, QUINDI...)

MICHELE GRAZIE (MICHELE NISTA!)

A nome di Mercato libero e di tutto lo staff vorrei ringraziare Michele Nista per lo stupendo lavoro fatto su questo sito da 18 mesi.

Molti nuovi lettori non sanno tutto quello che ha predetto e poi si è puntualmente avverato.

NON HA SBAGLIATO UNA VOLTA. E francamente se anche domani dovesse prendere un abbaglio….non è importante.

Ha salvato il culo ha migliaia di persone predicendo il DOW a 6900 quando stava a 10.000 (e predicendo il Dow a 10.000 quando stava a 13.500).

Ha detto ripetutamente che il mercato sarebbe salito con l'arrivo delle rondini e così è stato (e il rialzo non è stato di quelli piccoli….)

Oggi ci dice che uno storno è dietro l'angolo…e molti non capiscono….

Ma ci dice anche di comprare una volta finito lo storno.

MA QUALE BLOG O BANCHIERE, O PROMOTORE, O TRADER O PRIVATE BANKER HA SAPUTO SOLO AVVICINARSI A TALI PREVISIONI (NON NASCONDO CHE ANCHE IO ERO SCETTICO QUANDO PARLAVA DI DOW A 6900!)

Grazie ancora Michele Nista e ricordati che appena rientri in Italia organizziamo una bella serata con i nostri amici lettori.

CHIEDO A TUTTI COLORO CHE LO APPREZZANO DI SPENDERE DUE MINUTI A POSTARE UN COMMENTO

SUL SUO GRANDE LAVORO CON NOI.

Pubblicato da consulenza finanziaria di Mercato Libero a martedì, aprile 28, 2009

A CUI FACEVANO SEGUITO 203 commenti, RIPETO, 203 COMMENTI DEDICATI A GENIO, RE MIDA ED EROE CIVILE MICHELE NISTA. CHE ORA, IL MEGA LADRO, NAZISTA E DERISO IN TUTTI I PIANETI, PAOLO BARRAI DI MER-D-ATO LIBERO, NON VEDE MANCO IN CENTO ANNI (I DUE A POST CHE RICEVE, OVVIAMENTE, SE LI SCRIVE LUI: ATTRAVERSO UNO SI FA UNA DOMANDA, FINGENDOSI ANONIMO, ATTRAVERSO L'ALTRO SI RISPONDE.... CHE 50 ENNE FALLITO IN TUTTO... IN PRIMIS, UMANAMENTE E POI, DA OGNI ALTRO PUNTO DI VISTA!!!).

28 aprile 2009 18.57

Anonimo ha detto…

NISTA sei un mitooooooooooooo

28 aprile 2009 19.00

Anonimo ha detto…

Personalmente ritengo Michele un grande, una persona soprattutto trasparente, limpida, che utilizza un linguaggio diretto, senza fronzoli, ma soprattutto comprensibilissimo. Mi e' anche molto simpatico quando "parla" di Berlusconi, e col quale condivido appieno la Sua interpretazione.

Grazie Michele, dal profondo del cuore!!!!

Felix

28 aprile 2009 19.01

Leo ha detto…

Tutta la mia stima ed ammirazione per quest`uomo che ha il coraggio di dire quello che pensa e in cui crede nonostante correnti sfavorevoli e gente geneticamente scorretta.

Grazie e buon lavoro

Grazie di cuore Michele!

28 aprile 2009 19.24

Anonimo ha detto…

Non ho letto il post che ha angustiato il grande MICHELE

Certe persone sono vili fino al midollo. Purtoppo esistono e ce ne saranno sempre.

Il Sommo Poeta non ne ebbe pietà neanche all'inferno.

« Fama di loro il mondo esser non lassa;

misericordia e giustizia li sdegna:

non ragioniam di lor, ma guarda e passa. »

Maestro Michele guarda e passa anche Tu.

28 aprile 2009 19.24
Anonimo ha detto…

Di Michele Nista apprezzo ancora di più l'uomo e le sue visioni del mondo e della derelitta, sciagurata realtà italiana piuttosto che l'esperto di borsa.

Tenendo conto, che da 18 mesi il buon Michele ha previsto i movimenti del Dow quasi avesse una sfera di cristallo (e migliaia di lettori del suo blog possono testimoniarlo) credo non sia cosa di poco conto.

Grazie di cuore per tutto il tempo che ci ha dedicato, Sig. Nista, e continui, oltre a metterci a parte delle sue preziose e lucide intuizioni, a sferzare il malaffare imperante nella nostra povera ma amata Patria.

Cordiali saluti.

Adriano

MICHELE NISTA, THE BEST!!!!!!

GOD BLESS YOU!

28 aprile 2009 19.35

Anonimo ha detto…

MICHELE SEI U-N-I-C-O !!!! Aggiungo che nessuno, su nessun media che io conosca si è espresso con la tua precisione, puntualità, chiarezza, ma soprattutto CORAGGIO E GENEROSITA'. Individuare qualche spunto di trading richiede abilità, ma solo in parte minima rispetto a quanta ce ne vuole per pronosticare linee tendenza con una precisione strabiliante!!!! Un vero mago della finanza. Chi ti ha seguito non può che esprimerti RISPETTO E GRATITUDINE. Se qualche babbeo cerca di far lo spiritoso è perchè non è informato (ma allora è buona regola tacere!), altrimenti è un idiota o un un invidioso. Crepi l'invidia e … W MICHELE!

F.to / Un Post-Berlusconiano

(se prima ci siamo turati il naso, ora basta: nani e ballerine hanno già travolto uno grande, magari poi tocca anche ad uno … piccolo!)

Va meglio ?!

A Michele, vorrei dire che leggo soprattutto con attenzione le sue visioni extra-mercati, che mi sembrano importanti almeno quanto le sue previsioni sui listini.

Le motivazioni che stanno dietro alle sue previsioni mi regalano una visuale e delle riflessioni che non riscontro su nessun altro blog.

Ciao e buon lavoro a Michele.

Caro Michele, non sono d’accordo con quanti pensano che chi ti ha scritto facendoti inc….sia un cretino o uno sciammannato. Fosse così non ci sarebbe da preoccuparsi. Però tu dovresti sapere che in rete circolano i professionisti della provocazione e della disinformazione, legati ai poteri più o meno forti e più o meno occulti, il cui solo scopo è quello di destabilizzare il dissenso e renderlo non credibile. E’ così che chiudono i blog, molto più sottilmente che vietandoli. Se poi vogliono travestirsi da cretini è solo una tattica, ma sanno benissimo quello che fanno. Quindi in campana per non cadere nei trappoloni che tendono(depressione compresa), complimenti per il grande lavoro di entrambi e chi se ne frega se una volta o due tu non dovessi imbroccarla. Oppure hai trovato la sfera di cristallo buona per indovinare tutto?

A parte gli scherzi auguri!

Michele Nista è stato straordinariamente preciso nelle sue previsioni. Da ottobre è diventato positivo sull'equity mondiale indipendentemente dall'andamento di breve periodo, dicendo solo una cosa: accumulate azioni svendute, potrebbero diventare oro nel tempo. La pensavo cosi e lo ringrazio di esistere perchè mi ha confortato e incoraggiato, dandomi la spinta a osare,a rate,nei giorni di crollo. Ma ho comprato sul mercato italiano da lui un

po’ detestato. Oggi sono appagato, vendo a premio, e se il mercato storna compro ancora. Penso che lui farebbe lo stesso.

http://www.romatoday.it/cronaca/truffa-specchietto-roma-arrestato-23enne-romano.html

22 ottobre 2009.

Gruppo di risparmiatori truffati dal incapace delinquente ladro e vigliacco Paolo Barrai di Mercato Libero
Ciao, sono Antonella Rebuffini di Milano, e faccio parte di un foltissimo gruppi di clienti truffati dall'assolutamente criminale Paolo Barrai di Mercato Libero. Costui è davvero uno spietato delinquente. A tutti noi, uniti ora in una associazione ” risparmiatori truffati dal criminalissimo Paolo Barrai di Mercato Libero ” e siamo gia’ in cinquanta, dico, cinquanta", di tutta Italia e Svizzera, ci fece andare corti (al ribasso) sul mercato azionario italiano a inizio marzo 2009. Abbiam perso quasi tutti tra il 50 e il 90 per cento dei nostri investimenti. E quando lo telefonavamo per chiedere semplicemente che fare, mentre il mercato saliva rapidissimamente, egli, come un vile ratto, scappava, si faceva sempre negare al telefono. Mandavamo e mails, nessuna risposta. Citofanavamo agli uffici di ultra truffatrice, ultra malavitosa, ultra ladrona Bsi Italia Srl di Via Socrate 26 a Milano di suo padre Vincenzo Barrai, ci vedeva dalla telecamera e nemmeno ci rispondeva.Nemmeno ci apriva il cancello di entrata. Io non sto offendendo, sto dicendo la mera verità. E fra poco la faremo sapere a fior fior di Tribunali di mezza Italia. Che i delinquenti ti debbano fare fessa, e pure permettano replica, no eeeee. Il neofascismo e la mafia del criminale, del delinquente, del ladro, del truffatore, del professionalmente

incapacissimo Paolo Barrai di Mercato Libero, a noi non fa nessuna paura. Una truffata dal malavitoso falso e vigliacco Paolo Barrai di Mercato Libero. Antonella di Milano. PS Mi ha bruciato 700.000 euro. Tutto quello che avevo. Ma a tanti altri ha bruciato 1,2, 3,10 milioni di euro. Facendo comprare il gas naturale a 5$ e passa, che in poche settimane crollava a 2$. Senza che lui prendesse telefonate, rispondesse ad emails. Senza dare indicazione alcuna a noi clienti terrorizzati! Come uno struzzo, che dalla paura e coscienza di essere incapacissimo a livello di fiuto per investimenti, mette la testa sotto la sabbia. Paolo Barrai, oltre ad essere il peggiore consulente per investimenti borsistici o di qualsiasi altro tipo, ove inesorabilmente sbaglia sempre, ove mai, mai e ri mai ne azzecca mezza, è un irresponsabile, codardo, ladro, truffatore, criminale, falsissimo. E mi dicono che ha pregressi, pure vari patteggiamenti di condanne al carcere. Aaa, ad averlo saputo prima e non essermi fidata della Lega Nord, di cui son parte, e che mi ha messo in contatto con sto brucia tutti i risparmi e super truffatore. Ora mi son sfogata qui. Presto lo ri faró in fronte a polizia, carabinieri, magistrati, giudici! E con me, almeno altre 50 persone! Oooo!! Non cascateci, ne scrivo proprio per questo, via dal criminale, delinquente, ladro, truffatore, professionalmente incapacissimo Paolo Barrai di Mercato Libero.

E DOPO QUESTA SCIOCCANTISSIMA TESTIMONIANZA CHE PARLA DA SE, VIA CON VINCENTISSIMO POST!!!

PRESSO TERRIFICANTEMENTE CRIMINALE FINTER BANK LUGANO, CHIASSO, ZURICH E BAHAMAS, DI SCIACQUONE DI SOLDI MAFIOSI E, PARREBBE PURE SCIOCCANTEMENTE PEDOFILO GIOVANNI DEI CAS DA RANCATE IN NOVEZZANO (http://ricerca.repubblica.it/repubblica/archivio/repubblica/1984/11/20/una-banca-del-gruppo-pesenti-riciclava-denaro.html), RICICLAVANO E RICICLANO OCEANI DI SOLDI ASSASSINI DI COSA NOSTRA, CAMORRA, NDRANGHETA, COME STRA RUBATI DA LL, LEGA LADRONA, E PDL, POPOLO DI LADRONI:
1)
PAOLO BARRAI (GIA' 3 VOLTE IN GALERA; ORGANIZZANTE ED ORDINANTE, DI SICURISSIMO,L'OMICIDIO DI DAVID ROSSI DI MONTE PASCHI!!!; PER UNA GUERRA DI SEO, SEARCH ENGINE OPTIMIZATIONS, CHE VI ERA FRA I DUE BASTARDISSIMAMENTE ASSASSINI PAOLO BARRAI DI MERCATO "MERDATO" LIBERO, PURE LAVA SOLDI MAFIOSI E NOTO PEFOFILO IN THAILANDIA, MAURIZIO BARBERO DI TECHNOSKY MONTE SETTEPANI E MERCATO "MERDATO" LIBERO NEWS, I LORO MANDANTI, BASTARDI KILLER MASSIMO DORIS, ENNIO DORIS, EDOALRDO LOMBARDI, GIOVANNI PIROVANO, OSCAR DI MONTIGNY ED ETTORE PARLATO SPADAFORA DI BANCA CAMORRANU, NDRANGOLANUM, COSANOSTRANUM, NAZISTASSASSINANUM MEDIOLANUM. CON DALL'ALTRA PARTE, GIUSEPPE MUSSARI E BEN APPUNTO DAVID ROSSI DI MONTE PASCHI; A CUI DI CERTISSIMO, SON STATE TAGLIATE LE VENE APPOSTA, PRIMA DI BUTTARLO GIU DALLA FINESTRA, PER FAR APPARIRE IL TUTTO, COME SOLITO " FALSISSIMO SUICIDIO"; E ALLO STESSO TEMPO, ASSICURARSI CHE VI FOSSE IL DECESSO, ALL'IMPATTO COL SUOLO; ENNESIMO OMICIDIO TARGATO, SILVIO BERLUSCONI, ROBERTO MARONI, E MEGA PEZZO DI MERD-ASSASSINO PAOLO BARRAI; DEI DUE, SPIETATISSIMO SICARIO KILLER, VIA WEB E NON SOLO)

2) ALESSANDRO PROTO (ARRESTATO; A SAN VITTORE AL MOMENTO: SPERIAMO CHE IL PURE ASSASSINO, PAOLO BARRAI, LO RAGGIUNGA AL PIU' PRESTO)

3) COMPLOTTARDO CIELLINO VICINO A COSA NOSTRA, GIOVANNI RAIMONDI DI NETSYSTEM (EX DI CRIMINALISSIME GIOVANNI RAIMONDI SIM E BANCA SAI). AL CENTRO DI INSIDER TRADING SU PIRELLI CORNIG, ED ENORMI RICICLAGGI DI CASH MAFIOSO FATTO PRESSO CITATE BANCA SAI (CHE NON PER NIENTE LO HA CACCIATO) E GIOVANNI RAIMONDI SIM. CHE HA DOVUTO VENDERE A UN GRUPPO DI VENETI CHE RICICLANO TANTISSIMI MILIONI DI EURO DELLA NDRANGHETA, E CHE HAN DATO ALLA STESSA SIM, IL NOME CLASSICA. COME DIRE " SIAMO BERLUSCONES, E PER NOI E' UN CLASSICO LAVARE CASH ASSASSINO DA MATTINA A SERA"!!!

CODESTI TRE COLLETTI LERCISSIMI, PLURI CONDANNATO AL CARCERE PAOLO BARRAI DI MERCATO " MERDATO" LIBERO, ALESSANDRO PROTO (IN GALERA AL MOMENTO A SAN VITTORE: SPERIAMO, IL PURE MANDANTE DI OMICIDI, PAOLO BARRAI, LO RAGGIUNGA AL PIU' PRESTO) , IL PEDOFILO CIELLINO VICINISSIMO A GIRI DI TOTO RIINA, GIOVANNI RAIMONDI DI NETSYSTEM, LAVAVANO E LAVANO, POI, CITATI FIUMI DI SOLDI FURTI DI MEGA RUBERIE DI LL, LEGA LADRONA, PDL, POPOLO DI LADRONI, COME, RIPETO E STRA RIPETO, DI CAMORRA, NDRANGHETA E MAFIA, A LUGANO, BERLINO, PANAMA, MIAMI, ORLANDO, TAMPA. FLORIDA IN GENERE. ED ANCORA A DUBAI, ABU DHABI. IN CAMERUN, KENYA, SINGAPORE, THAILANDIA. O IN BRASILE, DOVE L'AVANZO DI GALERA PAOLO BARRAI, HA GIÀ UNA CONDANNA ALLA GALERA, DA SERVIRE. LAVA SOLDI ASSASSINI ALESSANDRO PROTO E PAOLO BARRAI: A CAVALLO FRA MAFIE DI TUTTO IL MONDO, MASSONERIE CRIMINALISSIME, LL, LEGA LADRONA E PDL, POPOLO DI LADRONI. E ORA VI LASCIO AD UN FANTASTICO ARTICOLO DI DUE FRA I MIGLIORI GIORNALISTI AL MONDO: MAURO SPIGNESI DE IL CAFFE.CH E CARMELO PIGNATRACOZZA.

Intro.
Spregiudicati affaristi di frontiera. Strategie, senso degli affari e obbiettivi di lava soldi mafiosi a gogo Alessando Proto e Paolo Barrai (soldi mafiosi, camorristi, ndranghetisti, di Silvio Berlusconi, Pdl, Popolo di Ladroni, e LL, Lega Ladrona: quindi stessa schifezza assassina, a partire da mezzo secolo fa). Il tutto in collegamento ad altra società mega lavante soldi di Cosa Nostra: criminalissima Fruimex di Alba (Alba, Prov di Cuneo; vicinissima in tutto, sia ideologicamente che geograficamente a "mignottonazista" cuneense Daniela " Garnero" Santanche'; come cosí, vicinissima in tutto, ad altro faccendiere criminalissimo cuneense; Berlusconazifascista e di Cosa Nostra: Flavio Briatore.. ex portantino e biscazziere, nonche' sicario omicida per Francis Turatello; che fece spappolare con una bomba Attilio Dutto della Paramatti Vernici; Paramatti Vernici già di mafioso e mandante di omicidi, " Berlusconianissimo" Michele Sindona... come vedete, tutto si lega, anzi, si lega ed e' tutt'uno con LL: Lega Ladrona). Come anche, in collegamento ad altro malavitoso, spessissimo in Thailandia, da Roberto Palazzolo. Terrorista nazista e faccendiere di Finmeccanica. Come anche di collegatissima a criminale Finmeccanica: Enav. E a Cosa Nostra. Financo assassino, nonche' noto pedofilo "italo-thailandese" Maurizio Barbero di Mercato Libero News e Technosky Montesettepani (non per niente, citato ladrone e corrottissimo Gruppo Enav). Come così di Alba (nazifascista Cuneo, again and again). Ma ora, i fatti, please!!! Uno porta clienti italiani, con loro tonnellate di denaro mafioso, o criminale in genere (non solo di mafia, camorra e ndrangheta, ma anche di, collegatissime alle mafie: LL, Lega Ladrona e Pdl, Popolo di Ladroni). L'altro fa la spola con l'Italia da Lugano e vende case. S'infila in affari sbruffoni. Tenta la scalata " a fini Berlusconazifascusti", di società per bene, tipo Rcs o La Sette (speriamo, facendo la stessa fine dei prestanome Berlusconicchi suoi predecessori: Stefano Ricucci e Danilo Coppola). Lava soldi mafiosi a go go Paolo Barrai, gia' con guai serissimi con la giustizia, a Milano, Biella e in Brasile (PREGIUDICATO, PLURI CONDANNATO ALLA GALERA PAOLO BARRAI DI BLOG MERCATO LIBERO, NOTO AL MONDO INTERO COME MERDATO LIBERO; CONDANNATO AL CARCERE, NON SOLO PRESSO DITTATURA ODIOSISSIMA ED ODIATISSIMA IN TUTTO IL MONDO DI BERLUSCONIA; ESATTAMENTE, DA OTTIMO PM FRANCESCO GRECO DI MILANO, NEL 2001, PER

ENORMI LADRATE DA LUI EFFETTUATE, CONNESSE A COSI' DEFINITO DA
CORRIERE DELLA SERA, " RE DELLE TRUFFE FISCALI" PIETRO TERENZIO; IL
FUNZIONARIO CRIMINALISSIMO DI CITIBANK, DI CUI SI SCRIVE QUI A FINE
ARTICOLO E' L'AVANZO DI GALERA PAOLO BARRAI STESSO; CACCIATO A
SBERLE, NFATTI, POI, DA CITIBANK, NEL 1999; E POI QUASI TRASCINATO IN GALERA DALLA STESSA;
PECCATO PER IL QUASI:
http://archiviostorico.corriere.it/2001/febbraio/02/Arrestato_imprenditore_delle_truffe_fiscali_co_7_0102023408.shtml
FRA L'ALTRO, NEL 1999, IL VERME DELLA FINANZA MONDIALE PAOLO BARRAI,
PRESSO CITIBANK, FECE UN MEGA DIVIDEND WASHING SUL 1,999%,DI
GENERALI; E OVVIAMENTE, NON 2%, PER NON DOVER LANCIARE OPA; SUPER MEGA TRUFFA ALLO STATO A
BENEFICIO DI BANCHIERI DI COSA NOSTRA, CAMORRA E NDRANGHETA ENNIO DORIS, MASSIMO DORIS,
OSCAR DI MONTIGNY, ETTORE PARLATO SPADAFORA, EDOARDO LOMBARDI E GIOVANNI PIROVANO DI BANCA
RICICLANUM, MAFIOLANUM, COCACOLOMBIANUM, MEDIOLANUM (CHE USANO IL BANCHIERE CRIMINALE,
ASSASSINO E PEDOFILO ETTORE PARLATO SPADAFORA, ANCHE PER ORDINARE OMICIDI). PER CUI GLI
STESSI SUINI APPENA CITATI, CHIESERO A GIULIO TREMONTI DI
PROMULGARE IL PRIMO SCUDO FISCALE DEL 2001-2002; PER SCAMPARSELA E
NON DOVER CHIUDERE; SE LA SONO CAVATA IN QUANTO PRESSO " BERLUSCONIA",
POLITICA, E QUINDI, OGNI TIPO DI POTERE, PIU' ECONOMIA, FINANZA,
BANCHE, ASSICURAZIONI, MEDIA, SPETTACOLO, SPORT, SONO UN TUTT'UNO
BERLUSCONAZISTA, NON PER NIENTE, COME AI TEMPI DI
"BERLUSCONIANISSIMO" BENITO MUSSOLINI; IN OGNI CASO, A ULTERIORE DIMOSTRAZIONE DI CHE
TRUFFATORE, ESTORTORE, PEDOFILO, ASSASSINO, RICICLATORE DI CASH DELLE MAFIE DI MEZZO
MONDO, PARLIAMO, QUANDO PARLIAMO DI PAOLO BARRAI DI MERCATO " MERDATO" LIBERO, A VOI LE
PROVE CHE LO STESSO, NEL MARZO 2011, VENNE PURE ARRESTATO IN BRASILE, A PORTO SEGURO (PIU'
MOLTISSIMO ALTRO); VIGLIACCO, FALSONE, CRIMINALE, LAVA SOLDI MAFIOSI A TONNELLATE, FINANCO
MANDANTE DI OMICIDI, COCAINOMANE, E SI DICE SEMPRE PIU', PEDOFILOMOSESSUALE PAOLO BARRAI DI
MERCATO "MERDATO" LIBERO SCRIVE, PUR SE ORA, MENO SPESSO PER CIO' CHE VI STIAMO PER
MOSTRARE, DI BRASILE; MA NON CI TORNA PIU', IN QUANTO SE LO FA, FINISCE IN GALERA E SUBITO;
MANDATO DI ARRESTO GIA' SPICCATO; COME DA PROVE INOPPUGNABILI, A RIGUARDO

Avanzo di galera, pregiudicato Paolo Barrai: professione fallito
blogger acchiappa boccaloni e al servizio di criminali di ogni tipo e
gravita'. Che vogliono imboscare soldi sporchi (sporchi per piu'
disparati motivi). Il faccendiere di Mafia, Camorra e Ndrangheta,
Paolo Barrai, e' anche dietro all'imboscamento all'estero dei 3-5
milioni di euro che LL, nota in tutto il mondo, ormai, come Lega
Ladrona (relazione di Price Waterhouse), ha fatto sparire nel vuoto
(tutti soldi che il gia' spesso condannato al carcere, Paolo Barrai,

ha fatto passare da mano pubblica a mano privata: cash che LL, Lega Ladrona ha ricevuto come rimborsi elettorali; o comunque, "dal popolo ciuccio e bue", credente al suo "Federalismo acchiappa fessi" che serve solo a far fregare da LL, Lega Ladrona, montagne di soldi; e che poi, ovviamente, sempre LL, Lega Ladrona, ha intestato a prestanome militanti vari; che ovviamente, han imboscato tutto all'estero; via avanzi di galera Paolo Barrai ed Alessandro Proto stessi; ora in Svizzera, ora in Germania, ora in Brasile; specie a Lugano e Berlino e se vedete 1-17/17 Servizio Pubblico: "Spazzare Via Tutti" - Francesco Speroni (19.04.2012) noterete che lo stesso Speroni dice che " la Lega ama mettere soldi a Lugano e Berlino; ovviamente, trattasi di soldi pubblici, fregati, rubati, ciulati, ladrati, frodati, IN QUANTO FATTI PASSARE DA MANO PUBBLICA A MANO PRIVATA, VIA TANTI PRESTANOME MILITANTI, CHE IL FACCENDIERE LAVA SOLDI CRIMINALI, A GO GO, PAOLO BARRAI, IMBOSCAVA E IMBOSCA PER LL, LEGA LADRONA, OGGI, A BERLINO E LUGANO, DOMANI A DUBAI; PAOLO BARRAI E' DA ARRESTARE SUBITO, SI CANDIDERA' A PROSSIME ELEZIONI, PROPRIO PER ELUDERE LA GALERA, CHE OVVIAMENTE, TANTISSIMO TEME, BEN SAPENDO QUANTI CRIMINI SU CRIMINI HA EFFETTUATO E STRA EFFETTUA; AHAHA, CANDIDARE VIENE DA CANDIDO; E IL TERMINE CANDIDO, ACCOPPIATO A UN CRIMINALE ASSASSINO E NAZIFASCISTA, NONCHE' MAFIOSO FACCENDIERE COME PAOLO BARRAI, STA COME I PINGUINI STA ALLE CALIENTISSIME TERRE DI MAFIA DI SILVIO BERLUSCONI). Altro citato mega lava soldi mafiosi: Alessandro Proto, professione consulente (in primis, come al solito, di Cosa Nostra, Camorra, Ndrangheta, ossia " Berluscones doc"). I due non hanno molto in comune, salvo gli affari a cavallo della frontiera, salvo l'essere di Milano e possedere uno spiccato senso degli affari di tipo malavitosissimo. Anche le origini di questi due businessman delle mafie di mezzo mondo, sono diverse: il pluri pregiudicato super nazifascista Paolo Barrai (gia' condannato al carcere da Francesco Greco nel 2001, come prima specificato; con problemi legali gravissimi a Biella; e ordine di arresto, già spiccato, se torna in Brasile, come da links sopra specificati) ha cominciato lavorando in Citibank, da cui fu cacciato a calci e trascinato in Tribunale. Anche qui, come prima specificato. Ora accompagna tantissimi lava soldi criminali, o addirittura mafiosi, in una sorta di gita fuori porta sino agli sportelli di istituti della piazza finanziaria ticinese. A portare i propri risparmi "sottraendoli - precisa - all'imminente fallimento dell'Eurozona (quella e' la scusa: la vera ragione e' lavare soldi di Cosa Nostra, Camorra, Ndrangheta, LL, Lega Ladrona, Pdl, Popolo di Ladroni, prendendoci grasse commissioni)". L'altro faccendiere di tutte le mafie del mondo, nazifascista tanto quanto, Alessandro Proto, faceva il venditore d'enciclopedie porta a porta. Torniamo, però, per un attimo, ora, al suino in cravatta, delinquentissimo Paolo Barrai. Ha organizzato una riunione a Ponte Tresa per imprenditori "che hanno voglia di delocalizzare (modo elegante per dire: far sparire scheletri imbarazzantissimi, da armadi). Ci sarà - sottolinea - anche un commercialista che spiegherà le regole legali (commercialista di Corleone o Gioia Tauro o Napoli zona Scampia, che Il Cielo ce la Scampi... per lo meno, attivissimo in detti luoghi)". La sua è un po'

la logica del Groupon: gruppi d'acquisto collettivo, più si è, più arrivano vantaggi. Sporchissimi, ma pur sempre vantaggi. "Facciamo piani d'accumulo e fondi pensione, ma abbiamo chiesto anche di comprare abitazioni (ovviamente, il gruppo e' pieno di mafiosi, camorristi, ndranghetisti, vermi Berlusconazisti e Padanazisti... o prestanome di tutto questo letamaio killer). Raglia il faccendiere mega criminale Paolo Barrai: " oggi la Svizzera conviene, domani chissà; lavoriamo in una dimensione globale, magari presto la Grecia lascerà l'euro e tornerà alla sua moneta e potrebbe essere più conveniente". Detto riciclatore di soldi zozzissimi Paolo Barrai ha lettori fidelizzati presso suo blog "Mercato Libero (nickato da tutti Merdato Libero)". Quasi tutti trafficanti finanziari mafiosi e nazifascisti. Che lui li accompagna in Ticino. Come citato: trattasi di soldi ladrati da LL, Lega Ladrona, da Pdl, Popolo di Ladroni. Soldi che colano oceani di sangue di morti ammazzati per mano di Camorra, Ndrangheta, Mafia. E loro sottoborghi politici (vedi vermi nazifascisti, corrottissimi, e spesso, pure mandanti di omicidi: Gaetano Saya e Domenico Scilipoti; questo ultimo, un tutt'uno, non per niente, con l'altro lavandino finanziario di ogni tipo di crimine, Alessandro Proto; come notate, alla fine tutto quadra) Altro citato WC di Camorra, Ndrangheta e Cosa Nostra, Alessandro Proto, che si dà da fare su più fronti. Spazzola, su commissione, quote di importanti società, da Unicredit a Tod's (giri massonici fascisti vari: i due lava soldi mafiosi Alessandro Proto e Paolo Barrai fan parte di Logge Massoniche " Coperte", di estremissima destra; tipo P2, P3, P4, P5, P6, P7, P8, P9, Pn-ulasorrt; Logge criminalissime, mafiose, nazifasciste, ordinanti molti omicidi; luganesi e meneghine; ma spesso anche aventi " ovvi meetings" a Caserta, Napoli, Reggio Calabria, Gioia Tauro, Palermo, Catania, Trapani; e penso che non debba aggiungere altro, a proposito). E lo fa con fondi ad hoc, come uno di diritto lussemburghese da 300 milioni, dove sostiene d'aver strappato una partecipazione anche a Donald Trump (legami " massonazifascisti" e mafiosi, mondiali, vari). Un pallino del faccendiere di colletti lerci vari, Alessandro Proto, è il salvataggio delle imprese (ove salvataggio significa " mafiosizzazione"). Con " Caronte", un fondo da 100, milioni (dietro, oltre alla malavita campana, pugliese, calabrese, sicula, colombiana, cinese, russa, vi sono altri vermi Berlusconiani, idoli in cravatta, di tutte le mafie prima citate: Ubaldo Livolsi e Bruno Ermolli; ma anche altro assoluto faccendiere di Cosa Nostra: Claudio Sposito; ex di nazifasciste Morgan Stanley e "Maf-ininvest"). Per traghettare piccole e medie aziende che arrancano sotto i colpi della crisi in terreno positivo. E tutto tenendo la cabina di regia in Ticino, dove "c'è stabilità e certezza (parole paravento per intendere: protezione di fondi assassini)". Via mega lava soldi mafiosi Protoconsulting. Azienda che farebbe muovere milioni di mafie planetarie, in tutto il mondo, nonostante abbia appena 76 mila franchi di capitale sociale. Un grandissimo neo, pero': una condanna alla galera, da pochi giorni ratificata, per Alessandro Proto. In Ticino. Per mega truffa su 93 polizze assicurative. Altro topo di fogna di Cosa Nostra, Camorra e Ndrangheta, Paolo Barrai, come

citato, e' stato condannato al carcere da Francesco Greco nel 2001 (ha ottenuto non menzione, ma la condanna vi e' stata ed eccome). Come a Biella (mega frodi fiscali di Paolo Barrai e Franco Mosca, via criminalissima Nuovi Investimenti Sim di Biella). Ed ultimamente a Porto Seguro, in Brasile (vedi tantissimi links locali di cui sopra). Scrive molto di Brasile, ma non ci torna più in quanto se effettua questo, finisce in prigione subito. Ordine di arresto gia' spiccato presso Porto Seguro, Brasiuuu (Mauro Spignesi per "Il Caffè.ch" feauturing Carmelo Pignatracozza di Emigranti italiani per bene: anti mafia, camorra, ndranghegta, nazifascismo, omicidi, ladrate e pedofilia di Silvio Berlusconi. Rosario Republica de Argentina).LEGGETE, PLS, QUESTO SCIOCCANTE COMMENTO SU TRUFFATORE, MEGA LAVA SOLDI MAFIOSI, MEGA LAVA SOLDI "CRIMINALEGHISTI" E " BERLUSCAMORRISTI", COME PURE, VI ASSICURO, MANDANTE DI OMICIDI: PAOLO BARRAI (MERCATO LIBERO ALIAS MERD.ATO LIBERO).

DA:
http://www.romatoday.it/cronaca/truffa-specchietto-roma-arrestato-23enne-romano.html

22 ottobre 2009.

Gruppo di risparmiatori truffati dal incapace delinquente ladro e vigliacco Paolo Barrai di Mercato Libero (mi dicono, spesso condannato a galera, e non su Wikipedia, come truffando, ovvero, come suo solito, intende far credere). Ciao, sono Antonella Rebuffini di Milano, e faccio parte di un foltissimo gruppi di clienti truffati dall'assolutamente criminale Paolo Barrai di Mercato Libero. Costui è davvero uno spietato delinquente. A tutti noi, uniti ora in una associazione ” risparmiatori truffati dal criminalissimo Paolo Barrai di Mercato Libero ” e siamo gia’ in cinquanta, dico, cinquanta", di tutta Italia e Svizzera, ci fece andare corti (al ribasso) sul mercato azionario italiano a inizio marzo 2009. Abbiam perso quasi tutti tra il 50 e il 90 per cento dei nostri investimenti. E quando lo telefonavamo per chiedere semplicemente che fare, mentre il mercato saliva rapidissimamente, egli, come un vile ratto, scappava, si faceva sempre negare al telefono. Mandavamo e mails, nessuna risposta. Citofanavamo agli uffici di ultra truffatrice, ultra malavitosa, ultra ladrona Bsi Italia Srl di Via Socrate 26 a Milano di suo padre Vincenzo Barrai, ci vedeva dalla telecamera e nemmeno ci rispondeva.Nemmeno ci apriva il cancello di entrata. Io non sto offendendo, sto dicendo la mera verità. E fra poco la faremo sapere a fior fior di Tribunali di mezza Italia. Che i delinquenti ti debbano fare fessa, e pure non permettino replica, no eeeee. Il neofascismo e la mafia del criminale, del delinquente, del ladro, del truffatore, del professionalmente incapacissimo Paolo Barrai di Mercato Libero, a noi non fa nessuna paura. Una truffata dal malavitoso falso e vigliacco Paolo Barrai di Mercato Libero. Antonella di Milano. PS Mi ha bruciato 700.000 euro. Tutto quello che avevo. Ma a tanti altri ha bruciato 1,2, 3,10 milioni di euro. Facendo comprare il gas naturale a 5$ e passa, che in poche settimane crollava a 2$. Senza che lui prendesse telefonate, rispondesse ad emails. Senza dare indicazione alcuna a noi clienti terrorizzati! Come uno struzzo, che dalla paura e coscienza di essere incapacissimo a livello di fiuto per investimenti, mette la testa sotto la sabbia. Paolo Barrai, oltre ad essere il peggiore consulente per investimenti borsistici o di qualsiasi altro tipo, ove inesorabilmente sbaglia sempre, ove mai, mai e ri mai ne azzecca mezza, è un irresponsabile, codardo, ladro, truffatore, criminale, falsissimo. E mi dicono che ha pregressi, pure vari patteggiamenti di condanne al carcere. Aaa, ad averlo saputo prima e non essermi fidata della Lega Nord, di cui son parte, e che mi ha messo in contatto con sto brucia tutti i risparmi e super truffatore. Ora mi son sfogata qui. Presto lo ri faró in fronte a polizia, carabinieri, magistrati, giudici! E con me, almeno altre 50 persone! Oooo!! Non cascateci, ne scrivo proprio per questo, via dal criminale, delinquente, ladro, truffatore, professionalmente incapacissimo Paolo Barrai di Mercato Libero.

E DOPO QUESTA SCIOCCANTISSIMA TESTIMONIANZA CHE PARLA DA SE, VIA CON VINCENTISSIMO POST!!!

CHE HA DOVUTO VENDERE A UN GRUPPO DI VENETI CHE RICICLANO TANTISSIMI MILIONI DI EURO DELLA NDRANGHETA, E CHE HAN DATO ALLA STESSA SIM, IL NOME CLASSICA. COME DIRE " SIAMO BERLUSCONES, E PER NOI E' UN CLASSICO LAVARE CASH ASSASSINO DA MATTINA A SERA"!!!

CODESTI TRE COLLETTI LERCISSIMI, PLURI CONDANNATO AL CARCERE PAOLO BARRAI DI MERCATO " MERDATO" LIBERO, ALESSANDRO PROTO (IN GALERA AL MOMENTO A SAN VITTORE: SPERIAMO, IL PURE MANDANTE DI OMICIDI, PAOLO BARRAI, LO RAGGIUNGA AL PIU' PRESTO) , IL PEDOFILO CIELLINO VICINISSIMO A GIRI DI TOTO RIINA, GIOVANNI RAIMONDI DI NETSYSTEM, LAVAVANO E LAVANO, POI, CITATI FIUMI DI SOLDI FURTI DI MEGA RUBERIE DI LL, LEGA LADRONA, PDL, POPOLO DI LADRONI, COME, RIPETO E STRA RIPETO, DI CAMORRA, NDRANGHETA E MAFIA, A LUGANO, BERLINO, PANAMA, MIAMI, ORLANDO, TAMPA. FLORIDA IN GENERE. ED ANCORA A DUBAI, ABU DHABI. IN CAMERUN, KENYA, SINGAPORE, THAILANDIA. O IN BRASILE, DOVE L'AVANZO DI GALERA PAOLO BARRAI, HA GIÀ UNA CONDANNA ALLA GALERA, DA SERVIRE. LAVA SOLDI ASSASSINI ALESSANDRO PROTO E PAOLO BARRAI: A CAVALLO FRA MAFIE DI TUTTO IL MONDO, MASSONERIE CRIMINALISSIME, LL, LEGA LADRONA E PDL, POPOLO DI LADRONI. CIAO DA ME, ORA, FABRIZIO DE FEO DI TORINO. VI LASCIO A QUESTO MERAVIGLIOSO ARTICOLO DI DUE FRA LE MIGLIORI MENTI GIORNALISTICHE DEL MONDO: MAURO SPIGNESI DE IL CAFFE.CH ED EROICO CARMELO PIGNATRACOZZA DI Emigranti italiani per bene: anti mafia, camorra, ndranghegta, nazifascismo, omicidi, ladrate e pedofilia di Silvio Berlusconi.
Rosario Republica de Argentina

Intro.
Spregiudicati affaristi di frontiera. Strategie, senso degli affari e
obbiettivi di lava soldi mafiosi a gogo Alessando Proto e Paolo
Barrai (soldi mafiosi, camorristi, ndranghetisti, di Silvio Berlusconi,
Pdl, Popolo di Ladroni, e LL, Lega Ladrona: quindi stessa schifezza

assassina, a partire da mezzo secolo fa). Il tutto in collegamento ad altra società mega lavante soldi di Cosa Nostra: criminalissima Fruimex di Alba (Alba, Prov di Cuneo; vicinissima in tutto, sia ideologicamente che geograficamente a "mignottonazista" cuneense Daniela " Garnero" Santanche'; come cosí, vicinissima in tutto, ad altro faccendiere criminalissimo cuneense; Berlusconazifascista e di Cosa Nostra: Flavio Briatore.. ex portantino e biscazziere, nonche' sicario omicida per Francis Turatello; che fece spappolare con una bomba Attilio Dutto della Paramatti Vernici; Paramatti Vernici già di mafioso e mandante di omicidi, " Berlusconianissimo" Michele Sindona... come vedete, tutto si lega, anzi, si lega ed e' tutt'uno con LL: Lega Ladrona). Come anche, in collegamento ad altro malavitoso, spessissimo in Thailandia, da Roberto Palazzolo. Terrorista nazista e faccendiere di Finmeccanica. Come anche di collegatissima a criminale Finmeccanica: Enav. E a Cosa Nostra. Financo assassino, nonche' noto pedofilo "italo-thailandese" Maurizio Barbero di Mercato Libero News e Technosky Montesettepani (non per niente, citato ladrone e corrottissimo Gruppo Enav). Come così di Alba (nazifascista Cuneo, again and again). Ma ora, i fatti, please!!! Uno porta clienti italiani, con loro tonnellate di denaro mafioso, o criminale in genere (non solo di mafia, camorra e ndrangheta, ma anche di, collegatissime alle mafie: LL, Lega Ladrona e Pdl, Popolo di Ladroni). L'altro fa la spola con l'Italia da Lugano e vende case. S'infila in affari sbruffoni. Tenta la scalata " a fini Berlusconazifascusti", di società per bene, tipo Rcs o La Sette (speriamo, facendo la stessa fine dei prestanome Berlusconicchi suoi predecessori: Stefano Ricucci e Danilo Coppola). Lava soldi mafiosi a go go Paolo Barrai, gia' con guai serissimi con la giustizia, a Milano, Biella e in Brasile (PREGIUDICATO, PLURI CONDANNATO ALLA GALERA PAOLO BARRAI DI BLOG MERCATO LIBERO, NOTO AL MONDO INTERO COME MERDATO LIBERO; CONDANNATO AL CARCERE, NON SOLO PRESSO DITTATURA ODIOSISSIMA ED ODIATISSIMA IN TUTTO IL MONDO DI BERLUSCONIA; ESATTAMENTE, DA OTTIMO PM FRANCESCO GRECO DI MILANO, NEL 2001, PER ENORMI LADRATE DA LUI EFFETTUATE, CONNESSE A COSI' DEFINITO DA CORRIERE DELLA SERA, " RE DELLE TRUFFE FISCALI" PIETRO TERENZIO; IL FUNZIONARIO CRIMINALISSIMO DI CITIBANK, DI CUI SI SCRIVE QUI A FINE ARTICOLO E' L'AVANZO DI GALERA PAOLO BARRAI STESSO; CACCIATO A SBERLE, NFATTI, POI, DA CITIBANK, NEL 1999; E POI QUASI TRASCINATO IN GALERA DALLA STESSA; PECCATO PER IL QUASI:
http://archiviostorico.corriere.it/2001/febbraio/02/Arrestato_imprenditore_delle_truffe_fiscali_co_7_0102023408.shtml
FRA L'ALTRO, NEL 1999, IL VERME DELLA FINANZA MONDIALE PAOLO BARRAI, PRESSO CITIBANK, FECE UN MEGA DIVIDEND WASHING SUL 1,999%,DI GENERALI; E OVVIAMENTE, NON 2%, PER NON DOVER LANCIARE OPA; SUPER MEGA TRUFFA ALLO STATO A BENEFICIO DI BANCHIERI DI COSA NOSTRA, CAMORRA E NDRANGHETA ENNIO DORIS, MASSIMO DORIS, OSCAR DI MONTIGNY, ETTORE PARLATO SPADAFORA, EDOARDO LOMBARDI E GIOVANNI PIROVANO DI BANCA RICICLANUM, MAFIOLANUM, COCACOLOMBIANUM, MEDIOLANUM (CHE USANO IL BANCHIERE CRIMINALE, ASSASSINO E PEDOFILO ETTORE PARLATO SPADAFORA, ANCHE PER ORDINARE OMICIDI). PER CUI GLI STESSI SUINI APPENA CITATI, CHIESERO A

GIULIO TREMONTI DI
PROMULGARE IL PRIMO SCUDO FISCALE DEL 2001-2002; PER SCAMPARSELA E
NON DOVER CHIUDERE; SE LA SONO CAVATA IN QUANTO PRESSO " BERLUSCONIA",
POLITICA, E QUINDI, OGNI TIPO DI POTERE, PIU' ECONOMIA, FINANZA,
BANCHE, ASSICURAZIONI, MEDIA, SPETTACOLO, SPORT, SONO UN TUTT'UNO
BERLUSCONAZISTA, NON PER NIENTE, COME AI TEMPI DI
"BERLUSCONIANISSIMO" BENITO MUSSOLINI; IN OGNI CASO, A ULTERIORE DIMOSTRAZIONE DI CHE
TRUFFATORE, ESTORTORE, PEDOFILO, ASSASSINO, RICICLATORE DI CASH DELLE MAFIE DI MEZZO
MONDO, PARLIAMO, QUANDO PARLIAMO DI PAOLO BARRAI DI MERCATO " MERDATO" LIBERO, A VOI LE
PROVE CHE LO STESSO, NEL MARZO 2011, VENNE PURE ARRESTATO IN BRASILE, A PORTO SEGURO (PIU'
MOLTISSIMO ALTRO); VIGLIACCO, FALSONE, CRIMINALE, LAVA SOLDI MAFIOSI A TONNELLATE, FINANCO
MANDANTE DI OMICIDI, COCAINOMANE, E SI DICE SEMPRE PIU', PEDOFILOMOSESSUALE PAOLO BARRAI DI
MERCATO "MERDATO" LIBERO SCRIVE, PUR SE ORA, MENO SPESSO PER CIO' CHE VI STIAMO PER
MOSTRARE, DI BRASILE; MA NON CI TORNA PIU', IN QUANTO SE LO FA, FINISCE IN GALERA E SUBITO;
MANDATO DI ARRESTO GIA' SPICCATO; COME DA PROVE INOPPUGNABILI, A RIGUARDO

Avanzo di galera, pregiudicato Paolo Barrai

(spesso condannato a carcere, e non su wikipedia,

come vuole far credere, truffanto, come suo solido: professione fallito
blogger acchiappa boccaloni e al servizio di criminali di ogni tipo e
gravita'. Che vogliono imboscare soldi sporchi (sporchi per piu'
disparati motivi). Il faccendiere di Mafia, Camorra e Ndrangheta,
Paolo Barrai, e' anche dietro all'imboscamento all'estero dei 3-5
milioni di euro che LL, nota in tutto il mondo, ormai, come Lega
Ladrona (relazione di Price Waterhouse), ha fatto sparire nel vuoto
(tutti soldi che il gia' spesso condannato al carcere, Paolo Barrai,
ha fatto passare da mano pubblica a mano privata: cash che LL, Lega
Ladrona ha ricevuto come rimborsi elettorali; o comunque, "dal popolo
ciuccio e bue", credente al suo "Federalismo acchiappa fessi" che
serve solo a far fregare da LL, Lega Ladrona, montagne di soldi; e
che poi, ovviamente, sempre LL, Lega Ladrona, ha intestato a prestanome
militanti vari; che ovviamente, han imboscato tutto all'estero; via
avanzi di galera Paolo Barrai ed Alessandro Proto stessi; ora in
Svizzera, ora in Germania, ora in Brasile; specie a Lugano e Berlino
e se vedete 1-17/17 Servizio Pubblico: "Spazzare Via Tutti" - Francesco Speroni
(19.04.2012) noterete che lo stesso Speroni dice che " la Lega ama mettere soldi

a Lugano e Berlino; ovviamente, trattasi di soldi pubblici, fregati, rubati, ciulati, ladrati, frodati, IN QUANTO FATTI PASSARE DA MANO PUBBLICA A MANO PRIVATA, VIA TANTI PRESTANOME MILITANTI, CHE IL FACCENDIERE LAVA SOLDI CRIMINALI, A GO GO, PAOLO BARRAI, IMBOSCAVA E IMBOSCA PER LL, LEGA LADRONA, OGGI, A BERLINO E LUGANO, DOMANI A DUBAI; PAOLO BARRAI E' DA ARRESTARE SUBITO, SI CANDIDERA' A PROSSIME ELEZIONI, PROPRIO PER ELUDERE LA GALERA, CHE OVVIAMENTE, TANTISSIMO TEME, BEN SAPENDO QUANTI CRIMINI SU CRIMINI HA EFFETTUATO E STRA EFFETTUA; AHAHA, CANDIDARE VIENE DA CANDIDO; E IL TERMINE CANDIDO, ACCOPPIATO A UN CRIMINALE ASSASSINO E NAZIFASCISTA, NONCHE' MAFIOSO FACCENDIERE COME PAOLO BARRAI, STA COME I PINGUINI STA ALLE CALIENTISSIME TERRE DI MAFIA DI SILVIO BERLUSCONI). Altro citato mega lava soldi mafiosi: Alessandro Proto, professione consulente (in primis, come al solito, di Cosa Nostra, Camorra, Ndrangheta, ossia " Berluscones doc"). I due non hanno molto in comune, salvo gli affari a cavallo della frontiera, salvo l'essere di Milano e possedere uno spiccato senso degli affari di tipo malavitosissimo. Anche le origini di questi due businessman delle mafie di mezzo mondo, sono diverse: il pluri pregiudicato super nazifascista Paolo Barrai (gia' condannato al carcere da Francesco Greco nel 2001, come prima specificato; con problemi legali gravissimi a Biella; e ordine di arresto, già spiccato, se torna in Brasile, come da links sopra specificati) ha cominciato lavorando in Citibank, da cui fu cacciato a calci e trascinato in Tribunale. Anche qui, come prima specificato. Ora accompagna tantissimi lava soldi criminali, o addirittura mafiosi, in una sorta di gita fuori porta sino agli sportelli di istituti della piazza finanziaria ticinese. A portare i propri risparmi "sottraendoli - precisa - all'imminente fallimento dell'Eurozona (quella e' la scusa: la vera ragione e' lavare soldi di Cosa Nostra, Camorra, Ndrangheta, LL, Lega Ladrona, Pdl, Popolo di Ladroni, prendendoci grasse commissioni)". L'altro faccendiere di tutte le mafie del mondo, nazifascista tanto quanto, Alessandro Proto, faceva il venditore d'enciclopedie porta a porta. Torniamo, però, per un attimo, ora, al suino in cravatta, delinquentissimo Paolo Barrai. Ha organizzato una riunione a Ponte Tresa per imprenditori "che hanno voglia di delocalizzare (modo elegante per dire: far sparire scheletri imbarazzantissimi, da armadi). Ci sarà - sottolinea - anche un commercialista che spiegherà le regole legali (commercialista di Corleone o Gioia Tauro o Napoli zona Scampia, che Il Cielo ce la Scampi... per lo meno, attivissimo in detti luoghi)". La sua è un po' la logica del Groupon: gruppi d'acquisto collettivo, più si è, più arrivano vantaggi. Sporchissimi, ma pur sempre vantaggi. "Facciamo piani d'accumulo e fondi pensione, ma abbiamo chiesto anche di comprare abitazioni (ovviamente, il gruppo e' pieno di mafiosi, camorristi, ndranghetisti, vermi Berlusconazisti e Padanazisti... o prestanome di tutto questo letamaio killer). Raglia il faccendiere mega criminale Paolo Barrai: " oggi la Svizzera conviene, domani chissà; lavoriamo in una dimensione globale, magari presto la Grecia lascerà l'euro e tornerà alla sua moneta e potrebbe essere più conveniente". Detto riciclatore di soldi zozzissimi Paolo Barrai ha

lettori fidelizzati presso suo blog "Mercato Libero (nickato da tutti Merdato Libero)". Quasi tutti trafficanti finanziari mafiosi e nazifascisti. Che lui li accompagna in Ticino. Come citato: trattasi di soldi ladrati da LL, Lega Ladrona, da Pdl, Popolo di Ladroni. Soldi che colano oceani di sangue di morti ammazzati per mano di Camorra, Ndrangheta, Mafia. E loro sottoborghi politici (vedi vermi nazifascisti, corrottissimi, e spesso, pure mandanti di omicidi: Gaetano Saya e Domenico Scilipoti; questo ultimo, un tutt'uno, non per niente, con l'altro lavandino finanziario di ogni tipo di crimine, Alessandro Proto; come notate, alla fine tutto quadra) Altro citato WC di Camorra, Ndrangheta e Cosa Nostra, Alessandro Proto, che si dà da fare su più fronti. Spazzola, su commissione, quote di importanti società, da Unicredit a Tod's (giri massonici fascisti vari: i due lava soldi mafiosi Alessandro Proto e Paolo Barrai fan parte di Logge Massoniche " Coperte", di estremissima destra; tipo P2, P3, P4, P5, P6, P7, P8, P9, Pn-ulasorrt; Logge criminalissime, mafiose, nazifasciste, ordinanti molti omicidi; luganesi e meneghine; ma spesso anche aventi " ovvi meetings" a Caserta, Napoli, Reggio Calabria, Gioia Tauro, Palermo, Catania, Trapani; e penso che non debba aggiungere altro, a proposito). E lo fa con fondi ad hoc, come uno di diritto lussemburghese da 300 milioni, dove sostiene d'aver strappato una partecipazione anche a Donald Trump (legami " massonazifascisti" e mafiosi, mondiali, vari). Un pallino del faccendiere di colletti lerci vari, Alessandro Proto, è il salvataggio delle imprese (ove salvataggio significa " mafiosizzazione"). Con " Caronte", un fondo da 100, milioni (dietro, oltre alla malavita campana, pugliese, calabrese, sicula, colombiana, cinese, russa, vi sono altri vermi Berlusconiani, idoli in cravatta, di tutte le mafie prima citate: Ubaldo Livolsi e Bruno Ermolli; ma anche altro assoluto faccendiere di Cosa Nostra: Claudio Sposito; ex di nazifasciste Morgan Stanley e "Maf-ininvest"). Per traghettare piccole e medie aziende che arrancano sotto i colpi della crisi in terreno positivo. E tutto tenendo la cabina di regia in Ticino, dove "c'è stabilità e certezza (parole paravento per intendere: protezione di fondi assassini)". Via mega lava soldi mafiosi Protoconsulting. Azienda che farebbe muovere milioni di mafie planetarie, in tutto il mondo, nonostante abbia appena 76 mila franchi di capitale sociale. Un grandissimo neo, pero': condanna alla galera, da pochi giorni ratificata, per Alessandro Proto. In Ticino. Per mega truffa su 93 polizze assicurative. Altro topo di fogna di Cosa Nostra, Camorra e Ndrangheta, Paolo Barrai, come citato, e' stato condannato al carcere da Francesco Greco nel 2001 (ha ottenuto non menzione, ma la condanna vi e' stata ed eccome). Come a Biella (mega frodi fiscali di Paolo Barrai, Pierluigi "Pigi" Farina e Franco Mosca, via malavitosissima Nuovi Investimenti Sim di Biella). Ed ultimamente a Porto Seguro, in Brasile (vedi tantissimi links locali di cui sopra). Scrive molto di Brasile, ma non ci torna più in quanto se effettua questo, finisce in prigione subito. Ordine di arresto gia' spiccato presso Porto Seguro, Brasiuuu (Mauro Spignesi per "Il Caffè.ch" feauturing Carmelo Pignatracozza di Emigranti italiani per bene: anti mafia, camorra, ndrangheta, nazifascismo, omicidi, ladrate e pedofilia di Silvio Berlusconi. Rosario Republica de Argentina).

http://www.hamradiors.org/index.php/en/

EW, Belarus:
EV196VTAP is the special call sign for the 70th anniversary of a military regiment. QSL via EW8LL.

EX, Kyrgyzstan:
EX20ARUK celebrates 20 years of the Amateur Radio Union of Kyrgyzstan till the 18th of May. QSL info to be requested from the actual operator you contact. http://www.qrz.ru/awards/detail/2213.html

F, France:
Binic, a town in coastal Brittany, celebrates the yearly arrival of their cod-fishing fleet. TM5BIN operates in this context from the 17th till the 20th. QSL via F8BFU. http://tm5bin.free.fr/

G, England:
Bill, G0ELZ, of the Marine Museum Society in Wallasey, and David, G3UFO, have announced the following activities:GB70BOA - Perch Rock (BARLS A 4946X, ARLHS ENG-084, TWLHD WLH G-019, WAB SJ39, WLOTA 1841, WW Loc. IO83lk) GB70WA - Leasowe Lighthouse (BARLS A 5109X, ARLHS ENG-063, WAB SJ29, WLOTA 1841, WW Loc. IO83kj)QRV 20th till 27th of May, all bands 80 to 10m, 2m, and 70cm in all modes. QSL GB70BOA via M0BZZ, GB70WA via G3UFO.
http://www.clanlinereunion.co.uk/BA70-page10.html
https://secure.clublog.org/logsearch/GB70BOA
https://secure.clublog.org/logsearch/GB70WA

The scary prospect of a Napoleonic invasion prompted Britain to install a shutter-telegraph line from London to Plymouth in the early 19th century. GB5PT commemorates this by operating from Pistle Down, nr. Alderholt in Dorset (WAB SU11, WW Loc. IO90bv). QRV 19th till 24th. QSL via M0XIG.

GB4DNA honours the achievement of Sir Francis Crick and Maurice Watson, who, 60 years ago, discovered the DNA structure.
QSL via bureau.

HK, Colombia:
A large group of YLs (Sandra, HK3JJB, Mery, HJ3MCT, Paty, HK3KFM, Janeth, HK3PUE, Dora, HK3IAI, Maria, HJ8MFF, Yolanda, HK7YMF, Laura, HJ7LDV, Yuli, HJ3KMV, Cristina, HK3QYV, Dalia, HK3JI, and Patricia, HK3IWL) plan to show up on the bands on the 18th of May as 5K3YL on 40 and 20m in SSB. QSL via EA3DUF.

I, Italy:
II9SUB operates between the 20th and 26th of May in the context of the 50th International Submariner Association Congress. QSL via IT9MRM.

LZ, Bulgaria:
LZ125VZ commemorates the 125th birthday of Vladimir Zaimov, a Bulgarian WWII general. QRV till the year's end, QSL via LZ1KLR, LotW.

ON, Belgium:
OT7G/p is an activation of the palace De Ghellinck in Elsegem for the Belgium Castle Award. QRV 18th till 20th, on all HF bands in SSB and CW, also on 2m in FM. QSL via ON5MA.

S5, Slovenia:
The radio club of Mozirje was founded 45 years ago. Members are celebrating on the air as S545DSW, mainly in SSB and digital modes. QSL via S51DSW. https://www.facebook.com/RadioClubMozirjeS51DSW

SM, Sweden:
The radio club of Farsta commemorates the founding of the ITU in 1865 with the call 8S0ITU. QRV on the 17th of May, QSL via SK0CC.

Ove, SM0PSO, shares his joy over his successful heart transplantation on the 30th of May 2009 with the amateur radio community operating SF0530COH for 2 weeks before and after the 30th.
Preferred QRGs:
CW: 3505.30 7005.30 14005.30 21005.30 28005.30 kHz.
SSB: 3705.30 7105.30 14205.30 21205.30 28505.30 kHz.
The log will be uploaded to LotW.

SP, Poland:
The PZK section in Ostroleka (SP5KVW) celebrates 35 years of its existence. QRV till the 31st of July as HF35KVW. QSL via SP5KVW. http://sp5kvw.com/

SN100PSP honours the 100th anniversary of the fire brigade in Otwock. QRV till the 31st of May, QSL via SP5YOW.

SU, Egypt:
SU8N was back on the air on the 9th from Nelson Island, but had to go QRT again on the 10th due to bad weather. QSL via SM5AQD, direct only. https://www.facebook.com/erasdnet/photos_stream
http://www.youtube.com/watch?v=l600euAOeOw&feature=youtu.be

TA, Turkey:
In 1919 Mustafa Kemal Ataturk declared the 19th of May a national day of youth and sports. TC19MYS and TC19MAY will operate in this context.

UA, Russia:
R50DXC celebrates the golden jubilee of the radio club "Dubna" till

the 26th of June. No QSL information known.

Tomsk State University opened its doors to students in 1888 (after an initial founding in 1878), making it the oldest university in Siberia. Today its student body numbers about 23000. The jubilee will be celebrated on the air with the call R135TU between the 15th and 31st of May. QSL via RW9HYY.

Russian members of the The European Phase Shift Keying Club will operate R55EPC and R73EPC till the 30th of June. QSL for R55EPC via R9CBA, for R73EPC via RK3DSW.

The Border Guard Service of Russia was founded 95 years ago. R95PW and numerous other special event calls will be QRV because of that until the 31st of July.

VK, Australia:
Australian amateurs once more will use the AX prefix for the World Telecommunication Day (1th of May).

VP5, Caicos Is.: Dave, W5CW, is due to appear on the bands once more as VP5/W5CW between the 16th of May and 11th of June. QRV on 160-6m in CW and SSB. QSL via h/c.

VP8, Falkland Islands:
Andy, M0HLT, has a work engagement for the coming two years on the Falklands. He hopes for lots of QRV time as VP8DOH in SSB on the higher bands. Logs will be uploaded to LotW and eQSL.

W, USA:
W9IMS will bring the Indianapolis 500 race to everyone's attention from the 21st to the 27th of May. QSL via bureau.

Felix, DL6JF, plans a 5000 mile road-trip through several US states between the 16th of May and 2nd of June. The route takes him from California to Texas, via Nevada, Utah, Arizona, New Mexico, Colorado, Kansas, and Oklahoma.
Felix will operate a mobile setup. Skeds are welcome via email (felix.mann.bur@fh-zwickau.de). QSLs will include the county at the time of the QSO. QSL via DM5JBN, LotW, eQSL.

YA, Afghanistan:
Jesse, KB2OBQ, returns to Panjwaiin (Kandahar Province) for a new assignment until August 2014. He will reactivate is old call T6JP on all bands 160-10m in SSB and CW, operating a 100W rig. QSL via h/c, LotW, eQSL.

YB, Indonesia:
Members of the national Indonesian radio club ORARI bring YE30P on the air celebrating 30 years of ORARI's Daerah Papua division from the country's eastern-most city Merauke. QRV 15th to 17th with 2 stations in CW, SSB, and RTTY. QSL via YB9WR, direct only.
http://ye30p.wordpress.com/

John, YB5NOF, Anton, YB5QZ, and other OPs are announcing the
following IOTA activities:
16th - 19th of May YE8P Banggai Island (OC-208)
22nd - 26th of May YB8P Togian Island (OC-213)
No QSL info known at the moment.

Reports about Arctic / Antarctic amateur radio activity.
John, KL7JR, continues to seek reports and QSLs concerning QSOs
with stations north of the polar circle or from the Antarctic for
his monthly column "Arctic and Antarctic DX" of the "Canadian
International DX Club". Please contact him via email:
KL7JR@yahoo.com.

CASHOTA-Weekend:
The weekends 18th/19th and 25th/26th of May will see this year's
activity for the Castles and Stately Homes on the Air operations.
http://www.cashota.co.uk/annual-cashota-weekend

DARC-DX-University:
DARC chose the topic "Adventurous Amateur Radio - Dxpedition" for
this year's Ham-Radio fair. Part of that will be a DX-University on
friday, the 28th of June, set up with support from DX-University
(http://www.dxuniversity.com). All amateurs interested in DX, the
seasoned DXer, the DXpeditioner, newcomers etc. are welcome as
participants. Most of the day's lectures will be in German though.

Programme
DL2VFR Opening (12am)
G7VJR ClubLog (Englisch)
DK5DC DXCC and the LotW (German)
DL3DXX Lowband DX (German)
DL6MHW DCL & DML (German)
DJ9ZB Best practices for DXpedition Operation
Finishes at around 5pm.

For planning purposes a registration is necessary. All participants
will receive lecture scripts, a certificate of participation and a
surprise gift. A few applies, with special rates for DARC members
and international guests. Young amateurs may get their fee covered
by a "scholarship".

Looking for OPs:
Harry, AC8G, and Gill, J39AL, are getting a team together for the
CQWW DX SSB in Grenada. Interested Ops, willing to bring their own
rig (including computer), are asked to contact Harry:
htflasher@gmail.com, Skype flasher-ac8g.

FT5ZM - Call for Donations:
For the expedition to Amsterdam, scheduled in January 2014, the
team is still looking for donations to cover the cost of their ship
passage. So far 53% of the total amount are covered, with the
payment being due next month. http://www.amsterdamdx.org

Silent Key:
Maurizio, I1YUM, was one of the casualties in a tragic accident in the port of Genua on the 7th of May, which in total claimed seven lifes, and injuring numerous other persons.

Our thoughts are with his family and friends. We are sorry for their loss.

Upcoming Contests
==========
18./19.05. UN DX Contest
18./19.05. King of Spain Contest

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)
====

AS-060; HL4, Cholla-namdo Province group: Kang, DS4DRE/5, will be active from Hajo Island (WLOTA LH-1006) until December on 80-10m in CW and SSB. QSL via h/c.

EU-005; G/GM/GW/M/MM/MW; Great Britain: Ian, 2E0EDX/p will join the CASHOTA weekend on the 18th from Mile Fortlet 21 (CASHOTA G-303, WAB NY04, WW Loc. IO84gi). QSL via 2E0EDX, direct only. http://cqportable.webs.com/

EU-013; GJ/MJ; Jersey: Raf/ON5RZ, Eddy/ON6EF, and Mick/ON4RAW are planning a holiday-style activity from Jersey between the 17th and 19th of May as MJ/OT1S. QRV mainly in SSB on 80-6m. QTHs will include several lighthouses and WFF areas. QSL via ON6EF.

EU-039; F; Chausey Islands: EU-039 has been activated very often, but mostly from the main island Grande Island. Now F4FET/Gil, F0FMI/Rodolphe, and SWL Gildas will put Anneret Island (DIFM MA109) on the air for the first time. QRV between 18th and 20th of May as TM0AI. QSL via F4FET (d/B).

EU-042; DL; Schleswig-Holstein State North West group: From May 21 until May 30 Harry, DJ2II, will visit Hallig Langeness (DID N-019, WLOTA 1245, WWFF DLFF-013, WW Loc. JO44hp). QRV as DJ2II/p on 80-10m in SSB and CW. QSL via DJ2II (d/B). http://www.dj2ii.de http://www.mydarc.de/dj2ii/html/langeness.html

EU-047; Niedersachsen State group: Sebastian, DL1AXX, plans to spend some days on Baltrum (GIA N-06), 20th till 26th of May and will be QRV on HF. QSL via h/c (d/B). http://www.mydarc.de/dl1axx

EU-049; SV; North Aegean Islands: Barrie/G1JYB, Ian/G0VGS, Stephany/G1LAT, Hughie/G4UME, and Bob/G1OCK, all members of the Sands Contest Group, will pay Samos Island (GIOTA SAS-006, MIA MG-099, WLOTA 4163) a visit for holidays and some operating between the 16th and 30th of May. QRV as SZ8S, the exact start date is not known yet. QSL direct via G1LAT, bureau via M0SCG.
Please no cards direct to SZ8S in Greece.

EU-064; F; Pays de la Loire Region group: The Ile de Noirmoutier (DIFM AT-020, WLOTA 1224, Grid IN87) will see an acitivation by Phil/F5TRO, Seb/F4BHZ, Jean-Paul/F5OQK, Jean-Pascal/F5TND, Marc/F8TRL, Oli/F1AKK, and Claude/F4FMB from the 18th till the 20th as F6KUF/p. Their QTH is located in FFF-218 ("Polder de Sebastopol"), where they plan to set up 3 stations to work 80-10m in SSB, CW, and RTTY. An additional station will be dedicated to 6m. QSL via F6KUF/p. http://www.f6kuf.fr/

EU-095; F; Provence-Cote D'Azur: Members of the Castres DX Gang will be on the air from the Ile de Rotonneau (DIFM ME-003, MIA MF-024, DFCF 13-061, WW Loc. JN23pg) as TM5FI from the 15th until the 22nd of May. QRV on all bands and modes. QSL via F5XX (d/B), uploads to ClubLog.http://www.qrz.com/db/TM5FI EU-115; EI/GI/MI: Ireland: Bobby/MI0RYL/p activates O'Connors Castle (CASHOTA GI-029, WAB J47, WW Loc. IO64rm) for the CASHOTA weekend on 40-10m in SSB. QSL via h/c (d/B).

EU-125; OZ; Jylland West group: A group of German radio scouts is undertaking their annual trip to Roemo Island (DIA NS-001, WW Loc. JO45gd, WWFF OZFF-004) during the upcoming weekend (including monday). QRV as OZ1RDP on 80-6m in SSB, BPSK31, and some CW. QSL via DL9BCP (d/B). http://www.oz1rdp.de/

EU-129; DL/SP1; Usedom Island: Hans, DL2RU/p, will revisit Usedom between the 18th and 25th. For the 19th or 20th, depending on wx conditions, he plans a short stint from "Schlossinsel" (GIA O-31), beginning around 1300z on 7028 and moving up the bands to 10120, 14038/40, and 18086 as long as his batteries hold. QSL via DL2RU (d/B).

EU-172; OZ; Jylland East and Fyn group: Ric/DL2VFR, activates Samso Island (DIA JY-008, WLOTA 0726) as OU1RAEM between the 18th and 24th of May. He also plans to put OZFF-073 ("Stavnfjord") on the air for the first time. QRV on all HF bands, mostly CW. QSLs are sent out automatically via bureau, the manager for OU1RAEM is DF5LW.http://www.qrz.com/db/ou1raem

Noel/OO4O will be active from the same group 19th to 25th of May as OZ/OO4O from Langeland Island (WLOTA 0590). QRV on HF in SSB and CW. QSL via LotW or OO4O (d/B).

NA-106; KP2; Virgin Islands: Fred/K9VV (NP2X) and Bob/WP2XX will be visiting the Radio Reef DXers Super-Station on St. Croix Island (USi VI002S, WLOTA 2477) from the 21st till the 28th of May. They are QRV with their own calls and as KP2M for the WPX CW contest. QSL for KP2M via LotW and direct via AI4U, for NP2X direct via K5WW and for WP2XX via WP2XX (d/B).

SA-004; HC8; Galapagos Island: Alex/HD2A and Alberto/HC2AQ are going to the Isla de Santa Cruz (WLOTA 1667, WWFF HCFF-004) as HD8A from the 15th till the 20th of May. QRV on HF with a TS590, amplifier and a yagi. QSL via HD2A, direct only.

Lighthouse activities / ILLW
==========
The weekend 17th/18th of August will see the annual "International Lighthouse and Lightship Weekend" (ILLW). Up to now 220 stations have indicated their participation, check www.illw.net for a list.

WWFF activity / RFF
==========
Vlado/UA0LCZ will spend time on the Camchatka peninsula between the 15th and 21st of May. His itinerary as UA0LCZ/0 includes the following WWFF areas: Bystrinskiy Nature Park (RFF-185), Kronotsky Zapovednik Nature Reserve (RFF-052), Nalychevo Nature Park (RFF-187), Southern Kamchatka Nature Park (RFF-186), Southern Kamchatka State Nature Reserve (RFF-269), and Kluchevskoy Nature Park (RFF-188). This is a CW only operation on 80-10m. QSL via UA0LCZ.

Duluth Children's Museum Plans a Call to Space Station:

Posted: 14 May 2013 05:09 PM PDT
http://www.eham.net/articles/30186

Sometime later this year, Twin Ports kids will be placing a long-distance call. A very long distance. The Duluth Children's Museum on Saturday announced details of its plans for amateur radio contact with the astronauts aboard the International Space Station. The 10-minute live forum will connect participants at the museum with the crew members 250 miles above the Earth's surface. It's made possible by Amateur Radio on the International Space Station, a venture by NASA and other international space agencies to coordinate radio contacts between the space station and educational organizations. The museum's Rich Jaworski said it's a little unusual for a museum to be approved for a space station call. "It is mostly geared toward schools," Jaworski said. "We figured we are an informal hands-on learning organization. We deal with a lot of students in the Twin Ports region." The museum will have a series of workshops, special events and camps this summer leading up to the event, which probably will happen sometime this fall, Jaworski said. They'll learn the approximate date of the contact about six to eight weeks in advance and the exact date only about a week ahead of time, he said. They'll have to be prepared whether it's a school day or not.

Ole Virginia Hams to Host Northern Virginia's Largest Hamfest:

Posted: 14 May 2013 05:08 PM PDT
http://www.eham.net/articles/30185

MANASSAS, Va. -- Hundreds of Amateur Radio Operators from across Virginia, Maryland and the DC area will come to Manassas to participate in the 39th Annual Manassas Hamfest, which is being sponsored by the Ole Virginia Hams Amateur Radio Club, Inc. The Ole Virginia Hams (OVH) Amateur Radio Club, Inc. will sponsor the 39th Annual, American Radio Relay League sanctioned, Manassas Hamfest on June 9 at 7 a.m. Amateur Radio Operators, also known as "Hams", from around the National Capital Region will come together to share in tailgating (the buying, selling, and trading of used amateur radio equipment) on the Prince William County Fairgrounds. A number of special events and forums are also planned during the Hamfest, to include: A youth lounge for the younger Hams to meet; forums on DSTAR, the National Traffic System (NTS), and Amateur Satellite; Fleet Watch; and the Civil Air Patrol

HF Truck. The Mount Vernon Amateur Radio Club VE Team will be hosting a testing session for people who want to become an FCC licensed Amateur Radio Operator, starting at 8:30 a.m. While this is a social event for the ham community, we also are trying to increase our operating knowledge and promote Amateur Radio to the general public. This is a good opportunity to investigate this exciting hobby, and learn the many ways we have expanded beyond the "radio of old".

//
Sun Powers Up: 3 Major Solar Flares in 1 Day:

Posted: 14 May 2013 05:07 PM PDT
http://www.eham.net/articles/30184

The sun, it seems, is in overdrive. Late Monday night, the sun unleashed its third major solar flare in 24 hours -- the biggest and most powerful solar storm of the year, so far. This latest sun storm erupted Monday at 9:11 p.m. EDT and registered as an X3.2 solar flare, one of the strongest types of flares the sun can release, space weather officials said. It came on the heels of two other recent X-class solar flares on Sunday night and Monday, all of which were sparked by a highly active sunspot on the sun's far left side. Officials at the NOAA Space Weather Prediction Center in Boulder, Colo., appeared amazed at the intense activity from the crackling sunspot. "Clearly an extraordinary active region is making its way fully onto the visible disk," SWPC officials wrote in a morning update today (May 14). "Can it keep up this hectic pace?" Two of the three recent solar flares have been associated with massive explosions, called coronal mass ejections, which flung super-hot solar material into space at millions of miles per hour. Because the sunspot firing off the flares is not yet facing Earth, the solar eruptions pose no threat to satellites and astronauts in orbit, NASA has said.

RAC Bulletin 2013-019E - Radio Amateur of Canada Foundation Grants
2013-05-16

Radio Amateurs of Canada (RAC) is pleased to announce that we are seeking applications for grants from Amateurs across Canada in the following categories:

*Scholastic Grants for deserving Amateur Radio Operators

*Research Grants for research and development related to Amateur Radio

*Community Grants for charitable institutions, senior homes, and youth centres

*Emergency Grants for radio equipment for emergency service groups

The Board of Directors is especially interested in awarding grants to deserving young Amateur Radio operators who are furthering their education at the College or University level in an Electrical Engineering course. If you are enrolled in a Science, Technology, Engineering or Mathematics (STEM) program we also encourage you to submit a request. Send your College / University name, recent transcript, Amateur Radio Certificate and a brief biography to RAC. Further details and application forms are available at the RAC web site: http://www.rac.ca/en/rac/donations/foundation/grant-info.php.

If you have a child or grandchild in college or university this would be a great way to assist them furthering their education in the technology fields. Using the knowledge obtained from their Amateur Radio skills to further their engineering ability.

The Board of Directors is pleased to thank all the Amateurs across Canada who have generously donated to this program. If you wish to contribute please contact RAC HQ for further details.

I will be the contact person for this round (2013) of grant applications.

Bill Unger, VE3XT <ve3xt@rac.ca>
RAC Director - Ontario North East

Vernon Ikeda - VE2MBS/VE2QQ
Pointe-Claire, Qu&#65533;bec

WIANEWS WEEK COMMENCING MAY 19 2013.

Many of we Hams come across Radio Microphones in our travels, be it Churches,
Schools, Sporting events and the like.

Well the Australian Communications and Media Authority has announced changes
to frequency ranges used for wireless microphones.

The changes are a key plank in supporting the transition of wireless
microphones from the digital dividend band.

The changes made are arrangements for wireless audio transmitters in the
Radiocommunications (Low Interference Potential Devices) Class Licence 2000.

The changes to the class licence:

mean that after 31 December 2014, wireless audio transmitters (including
wireless microphones) will no longer be authorised to operate in the
frequency range 694-820 MHz (the digital dividend band)

introduce new arrangements supporting the use of digital wireless audio
transmitters in the frequency range 520-694 MHz

introduce new arrangements supporting the use of wireless audio transmitters
operating in the frequency range 1790-1800 MHz.

The ACMA website provides a range of useful material for potentially affected users.

www.acma.gov.au

Rotary International (RI), the worlds first Volunteer Service Organisation, is holding it's annual convention this year in Lisbon, Portugal June 22nd - 26th.

About 30,000 participants are expected.

Rotarians Of Amateur Radio (ROAR), a fellowship of Rotarians, is activating a special event station CR 6 RI during the Convention's exhibition hours from 0900utc to 1800utc.

Frequencies to be used will be 14.293 MHz, 14.287 MHz and possibly 21.293 MHz. More information will be made available on qrz.com

Next year Australia has the privilege of hosting this Convention in Sydney and ROAR will be activating a special event station to celebrate Rotary in Australia.

(VK4ZD President Rotarians Of Amateur Radio 2012-2015)

This is our last broadcast for the WIA Year, our AGM is next weekend in VK6 so a final reminder to discover WHERE to download next weekends AGM Broadcast from, to find out WHEN it is available and to find out the duration, a must for some automated stations who have the 30 minute set you must be subscribed to the wiabroadcasters@yahoogroups.com conference server.

In the last 12 months, 52 broadcasts, we have reached some 125,000 Amateurs with RF/TEXT/NETCASTS.

Of that an amazing 47,500 were RF checkins.

Adelaides VK5RAD achieved the highest check in tally of over 3 and a half thousand.

Highest on Short Wave was in VK6 on 40 meters some one thousand three hundred

And again from the west the highest MW on 160 meters was achieved with over 600 people calling back or emailing reception reports.

Thanks to all our rebroadcasters, all our regular readers and those who dropped us a recording now and then to share with YOU the active Radio Amateur of "the 3rd rock."

(graham vk4bb)

WIA BOARD TALK

President Phil Wait VK2ASD vk2asd@wia.org.au
Vice President Chris Platt VK5CP vk5cp@wia.org.au
Secretary David Williams VK3RU vk3ru@wia.org.au
Treasurer John Longayroux VK3PZ vk3pz@wia.org.au

On WIA Front Page News, wia.org.au, a story attributed to our President Phil Wait VK2ASD is a must read item.

In brief it highlights how your WIA has lodged a submission to the ACMA concerning the High Power Trial. The WIA submission is based on responses received from trial participants following a call for information, and also on its own observations.

The WIA's submission notes that the trial appears to have gone very well, with licensees generally having a sound understanding of the self-assessment process and the use of EMR assessment tools.

The WIA also notes that it is not aware of any incidences of interference to other spectrum users, or an increase in interference to other Radio Amateurs, or an increase in the noise floor on affected amateur bands.

Many responders noted that the advantage of the higher power was most evident in contesting, when many stations are calling on the same frequency and all at once, and the relatively small 3-4 decibel increase in radiated power (from 400W pX to 1kW pX) can make all the difference in being heard.

The High Power Trial commenced on 1 March 2012 and will conclude on 31 August 2013. The ACMA is currently evaluating the success of the trial and is considering if permanent regulatory arrangements are warranted.

The WIA would very much like to see the higher power 1kW pX limit become a permanent feature for Australian Advanced Grade Radio Amateurs.

WIA AGM

Less than a week to go, time is running out for you to participate in the Amateur Radio Conference of the year. You can still register to attend and you don't need to be a member of the WIA.

Head on over to the font of information located at conference.vk6.net

While you're there, you can also sign up to operate the VI 103 WIA call sign and promote Amateur Radio with your station or club.

Information packs have been sent by email. If you have not received it, get in touch.

We've added the list of Technical Speakers, secured a very special speaker as our dinner guest and we have a little something happening after dessert on Saturday. Check conference.vk6.net for details closer to the time.

Register now and don't miss out.

HAMS ACROSS AUSTRALIA.

The Oxley Region Amateur Radio Club Inc. 38th annual field day takes place at Port Macquarie on Saturday 8 and Sunday 9th of June.

The venue is the Tacking Point Surf Life Saving Club hall in Matthew Flinders Drive, Lighthouse Beach, Port Macquarie NSW.

There will be all the usual attractions and events over the two days of the Field Day. The Field Day dinner will be held at the Port Macquarie Golf Club at 6pm on the Saturday night. Foxhunts will be conducted on both days. Sunday is the day for the traders and the trash and treasure tables. There is no charge to sellers so bring your treasure. Don't forget to enter your latest project in the Home Brew competition. The famous barbeque lunch will be available on both Saturday and Sunday. Mark your calendar now for Port Macquarie on the June Long Weekend.

Visit the Oxley Region Amateur Radio Club Inc. website at http://www.orarc.org for more information or write to the club at PO Box 712 Port Macquarie NSW 2444.

(Henry Lundell VK2ZHE President, Oxley Region Amateur Radio Club Inc.(ORARC))

Albury Wadonga Hamfest is 28-07-2013 at 10.00 am
The annual HamFest will be conducted at the First Lavington Scout Hall Mutch Street Lavington NSW

VK3

Raising the Public Profile of Amateur Radio.

This reminder from the Midland Amateur Radio Club, is of their ongoing efforts to raise the public profile of amateur radio, particularly an event with a difference May 25.

Kevin Crockett, VK3CKC, will take to the Axedale end of the O'Keefe Rail Trail which forms part of the old Heathcote Junction to Bendigo rail line.

A radio-equipped, recumbent tadpole trike has been purpose-built for the event.

The Club, callsign VK 3 CMZ, will also have an operating amateur station set up at the Axedale Market next to the hall where the public can listen in on 40m HF contacts around 7.090MHz being made. They will be able to directly communicate with the trike itself on 2m via the local VK3RCV repeater as the trike makes its way towards the town accompanied by children from the Axedale Primary School.

Automatic Packet Reporting System, or APRS, will be used to display progress on a laptop computer at a display stand at the Market. Those who can't attend should be able to follow the trike via www.aprs.fi/. An offer for Internet streaming communications audio via www.vk3cmz.com has also been received.

The City of Greater Bendigo is currently extending the Rail Trail to Heathcote and this event is something of a shakedown for a larger event later in the year that will cover from Bendigo to Axedale or even beyond if any of the extension is ready by then. It may even be repeated for the WIA National Field Day next year.

The event has attracted proud support from the City of Greater Bendigo Eppalock Ward Councillors, Friends of the Bendigo-Kilmore Rail Trail, Axedale Primary School, Axedale Our Town Our Future Committee and Axedale Public Hall Committee.

Homebrewers meet at Ashburton

A near full house of the group held on Saturday May the 4th saw examples of medium and microwave techniques on display in the 'show and tell' session.

Drew Diamond VK3XU and Rob Whitmore VK3MQ presented transmitters for the new 630 metre band while Dave Smith VK3HZ described the construction, from ex-commercial modules, of his 24 GHz transverter.

The latter produced many thoughtful questions regarding the dish feed.

After coffee Dave VK3HZ went on to present a talk on reverse polarity protection for homebrew equipment which proved to be very interesting and informative.

The next meeting of the Homebrewers group will be on Saturday June the 1st at 2pm. All are welcome.

On display at the Amateur Radio Victoria rooms, 40g Victory Boulevard, Ashburton will be the new low cost spectrum analyser marketed by Rigol, and a good opportunity to discover the potential of the instrument for hobby use.

(Jim Linton VK3PC)

DISCUSSION POINT

What use is an f-call? (20120826)

This morning I made three QSO's, that is, three contacts with new stations. People who keyed their microphone for the very first time. The thing is, there is nothing to distinguish them from other amateurs, they sound alike, their call-sign comes out the way you expect it. The only challenge for one of the stations was that they were having some minor issues with their transceiver - they were able to hear me, but I wasn't quite able to catch them.

I'd forgotten what the thrill was like to have such a contact and it reminded me of my first on-air interaction.

Unfortunately I forgot to write down, actually more accurately, I didn't know to, write down the details. All I can say is that it was on the National Field Day in 2011. I'd put together my first HF antenna - in fact, it's my current HF antenna - it works very well for me - and I was sitting in a park with other amateurs and I made my first contact.

I spoke with a Japanese station on 15m. We exchanged a signal report and everything worked as expected.

These three contacts today reminded me of the thrill that I experienced then.

If for no other reason than the thrill, get on air and talk to other amateurs, share your experience, exchange call signs and remember to make a record of your contact, you'll treasure it at some time in the future.

I'm Onno VK6FLAB

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

First radio report of sporting event commemorated

In July 1898, the first reporting by wireless of a sporting event took place in Dublin Bay during the Kingstown Yacht Regatta.

At the request of the Express newspaper, Marconi installed wireless equipment aboard the Flying Huntress and transmitted reports to the harbourmaster's office in Kingstown (now Dun Laoghaire). The results were posted in a window ashore and published even before the yachts had returned to port.

To commemorate the anniversary, the Howth Martello Radio Group and the South Dublin Radio Club plan to set up two special event stations.

As the races took place off Howth Head, one station will operate from the Martello Tower in Howth and the other from the Maritime Museum in Dun Laoghaire.

Plans are at an early stage still but we will keep you posted on progress. The weekend of 20-21 July is proposed for this operation.

SULTAN ORDERS CONSTRUCTION OF HEADQUARTERS FOR ROARS

His Majesty Sultan Qaboos Bin Said has ordered
the construction of a permanent headquarters for
the Royal Omani Amateur Radio Society also known as ROARS.

The plan was recently unveiled by the Secretary General of the
Royal Omani Amateur Radio Society.

In a speech during opening the regular session of the General Assembly, the Secretary General extended the thanks and appreciation of ROARS members to His Majesty the Sultan for the support given to the group since its establishment in the 1970's.

He also noted that is what he termed as the wise vision of the Sultan that has played a major role in moving forward with all of the activities that may advance the nation's youth while giving them the opportunity of added scientific and technical progress.

SSB using a Raspberry Pi

Guido PE1NNZ has released code to enable the Raspberry Pi computer board to generate SSB on the 7 and 14 MHz bands.

On his blog he writes, and I quote:

"My code can generate SSB modulation just by controlling a PLL carrier.
I have applied this method on the RapsberryPi PLL, and made several contacts

on 40m and 20m band with my RaspberryPi.

The RaspberryPi receives the Microphone input via an external USB sound
device. To improve the SSB quality, the signal is compounded by a
A-law compression technique. Three parallel BS170 MOSFETs were directly
driven by RaspberryPi GPIO4 output to create about 1Watt of RF.
On 40m I could made several SSB contacts through Europe using this setup,
receiving stations back by using a nearby online WebSDR receiver.

Blog - Direct SSB generation by frequency modulating a PLL
http://pe1nnz.nl.eu.org/2013/05/direct-ssb-generation-on-pll.html

Concerns over loss of amateur radio repeaters

Ruidoso News reports that the removal of ham radio repeaters from a tower
worries emergency service personnel.

Tony Davis, president of White Mountain Search and Rescue, said he learned
late Wednesday week that the tower on Buck Mountain holding the amateur radio
repeater that is owned and maintained by South-western Wireless, also a member
of Sierra Blanca Amateur Radio Club, was sold to American Tower Corporation.

"Despite attempts to negotiate an arrangement, American Tower has decided to
terminate ham use of the tower, effective (Friday)," Davis said.

The lack of backup communications could have serious implications for public
safety in Lincoln County, Davis said.

NEWS FROM ARNEWSLINE USA

DARC AND UBA SUPPORT AMATEUR RADIO IN TUNISIA

Amateur radio could soon have a new life in
Tunisia as we hear from Amateur Radio Newsline's
Norm Seeley, KI7UP:

--

The Deutscher Amateur Radio Club, which is
Germany's national amateur radio society, reports
that after the political changes in Tunisia
amateur radio in that North African country has a
new opportunity to expand. This as members of
the Association of Tunisian Radio Amateurs used
World Amateur Radio Day on April 18th to inform
the that nations public and in particular its
Minister for Technology, Information and
Communication about amateur radio in its various forms.

Representatives of European amateur radio organizations were there to support the event. This included the International Office of the Deutscher Amateur Radio Club in the person of Mustapha Landoulsi, DL1BDF. Landoulsi gave a presentation on the important role of amateur radio in emergency and disaster situations.

Stefan Dombrowski, ON6TI, from the Belgian federation the U-B-A was also on hand. He explained the history of the development of amateur radio satellites, and in particular, the construction of CubeSat spacecraft and the AMSAT-UK FUNcube satellite.

According to reports, the Tunisian Minister was quite impressed by the potential of amateur radio. As a result he has promised to ensure that the necessary statutory basis for granting individual licenses would be created as soon as possible.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

HAM RADIO IN SPACE: NASA AND HAM RADIO ASSEMBLE THE PHONESAT PICTURE

Engineers at NASA's Ames Research Centre in California and amateur radio operators around the world recently collaborated to reconstruct an image of Earth sent to them from three smartphones launched into a low Earth orbit. Amateur Radio Newsline's Heather Embee KB3TZD, reports:
--

The joint effort was part of NASA's Nano satellite mission called PhoneSat. The first phase was launched on Sunday, April 21st aboard the Antares booster from NASA's Wallops Island Flight Facility in Virginia.

Although the ultimate goal of the PhoneSat mission was to determine whether a consumer-grade smartphone can be used as the primary flight avionics for a satellite in space, the three miniature satellites also used their smartphone cameras to take pictures of Earth. These images were then transmitted to multiple ground stations as data packets with each packet holding a small piece of the big picture.

As the data became available, the PhoneSat Team working with multiple ham radio operators pieced together a high-resolution photograph from data sent back by the tiny birds. Amateur radio operators from every continent except Antarctica contributed in capturing the data packets needed to piece together the final image.

This first PhoneSat mission successfully ended Saturday, April 27th after atmospheric drag caused the tiny satellites to re-enter Earth's atmosphere and burn up as predicted by the mission planners.

For the Amateur Radio Newsline, I'm Heather Embee, KB3TZD, in Berwick, Pennsylvania.
--

The PhoneSat project is a technology demonstration mission funded by NASA's Space Technology Mission Directorate and the Engineering Directorate at NASA Ames Research Centre. The project started in summer 2009 as a student led project between the Ames Research Centre and the International Space University at Strasbourg. For more information about the PhoneSat mission and the part played by amateur radio please visit www.phonesat.org on the World-Wide-Web. (NASA Release, Southgate)

THAT FINAL ITEM: GLOW IN THE DARK SHEEP

And finally this week, word that scientists in Uruguay have announced the world's first genetically-modified phosphorescent sheep. No, we are not kidding as we hear from Amateur Radio Newsline's Bruce Tennant, K6PZW, who has this glowing report:
--

According to news reports, nine glow-in-the-dark sheep were born in October of 2012 at Uruguay's Institute of Animal Reproduction in a genetics experiment in conjunction with the Institute Pasteur. The scientists say that they used the fluorescent protein from a species of jelly fish to give sheep a distinct glowing green colour when exposed to ultraviolet light.

One of the team's lead researchers is Alejo Menchaca. In a recent press conference he noted that the genetic modification was done in the desire to fine tune the technique. Other researchers believe that these genetically modified, glow in the dark animals can help mankind to better understand diseases and how they develop in both the animal kingdom and in human beings.

The scientists say the nine sheep developed normally. They claim there are no differences between them and their non-genetically modified

siblings other than that they can be made to glow from head to toe.

And before you ask, we have no idea if they can
been trained to blink on and off in Morse code
nor if they did if they would be considered for bonus points on Field Day.

For the Amateur Radio Newsline, I'm Bruce
Tennant, K6PZW, not all that far from the glow of Hollywood.
--

More can be found on line at various on-line news
sites including tinyurl.com/sheep-glow. (Various news sources)

160M PHONE & 80/160M CW & DIGITAL TRANS-TASMAN CONTEST: 20 JULY, 8PM-2AM

SPECIAL EVENT STATIONS, DX and BEACON AND NET ADVICE

Current Arctic and Antarctic info needed

John, KL7JR, is once again requesting that if you or any of your radio
friends, SWL or Ham operators, have worked or heard any Arctic or Antarctic
stations of late, he would love to hear from you for his monthly Arctic and
Antarctic DX column which goes to CIDX (Canadian Int'l. DX Club) for
publication in the monthly "Messenger".

Scanned copies of QSLs or reception reports from anywhere north of 60 degrees
or the Antarctica are also welcomed.

You can receive a sample of his column by E-mailing him at:
KL7JR@yahoo.com

(SouthGate)

ZL 2 AGY is active from Rarotonga Island to the 29th May as both
E 51 FOC and E 51 AGY. QSL either via his home call ZL 2 AGY.

BATTLE OF THE ATLANTIC SPECIAL EVENT

G 0 ELZ and G 3 UFO have announced that special event call signs GB 70 BOA
and GB 70 WA will be on the air between May 20th and 27 to commemorate the
70th anniversary of the Battle of the Atlantic.

Operations using all modes will take place on 80 through 10 meters as well as
locally on 144 and 432 MHz.

Station operators are hoping to make over 2800 contacts during this period.

A special commemorative QSL card will be available.

More details can be found on line at tinyurl.com/cmvdvq8

(G0LEZ via arnewsline)

AWARDS

Victorian Local Government Award

This operating award encourages amateur radio activity by contacting Victoria's 79 municipalities.

Qualifying VK3 stations need contact 40 different municipalities while others in VK require 30 and DX stations 20 municipalities.

Check out the Amateur Radio Victoria website for the full rules, how to apply, useful log sheets and a name-list of the 79 local government areas.

STUDIO:

Peter Ellis VK1PE found a classic mention of Amateur Radio, but in disguise.

Peter Ellis VK1PE (0m42s):

For my friends in amateur Radio....

Mentions of Amateur Radio pop up in amazing places, often out of context and
so people may not notice them.

I was looking through a set of one-liners on The UK Daily Telegraph website
today.

There was the English actor, Tony Hancock (1924-1968), with his on-screen
one-liner from "Hancock's Half Hour" show, The Radio Ham, when he says,
'This radio lark's a wonderful hobby, y'know. I've got friends all over the
world, all over the world... none in this country, but friends all over the
world.'

HamTV from the International Space Station

Frequencies have been announced for the new Ham Radio Digital TV transmitter
that will transmit from the ISS in the amateur radio 2400 MHz band.

The main mission of HamTV is to perform school contacts between the
astronauts on-board ISS and the scholarship, not only by voice, but also by
unidirectional video from the ISS to the ground within ARISS program.

In addition to the existing VHF radio amateur station, ISS will host a
S-Band video transmitting station. This new equipment can broadcast images
from the ISS during the school contacts or other pre-recorded video images up
to 24 hours a day to allow ground stations tuning.

It is planned to transmit DVB-S signals on 2.4GHz at either 1.3Msps or 2.3Msps
with 10 watts of RF from the ISS Columbus module.

The IARU Amateur Satellite Frequency Coordination Panel have announced
coordinated frequencies of 2422.0 MHz and 2437.0 MHz.

==> + FCC ENFORCEMENT: FCC FINES PENNSYLVANIA MAN $18,000 FOR FAILING
TO ALLOW INSPECTION OF CB STATION

The FCC issued a Notice of Apparent Liability for Forfeiture and Order
on May 14 in the amount of $18,000 to Nathaniel Johnson of Pittsburgh,
Pennsylvania for failing to make his Citizens Band (CB) station
available for inspection by the FCC and for failing to comply with the
restricted hours of CB station operation.

The base forfeiture amount for failure to allow inspection of radio
equipment -- including a CB station -- is $7000. The FCC raised the
forfeiture amount by $4000, as the nature of the violation is similar
to failing to respond to a Commission communication. The FCC also found
that Johnson's failure to permit a lawful inspection of his CB station
-- after multiple notices directing him to do so -- justified a $7000
```

upward adjustment of the base amount for this violation, bringing the total amount to $18,000.

The FCC noted that misconduct such as Johnson's "is serious, exhibits contempt for the Commission's authority, and threatens to compromise the Commission's ability to fully investigate violations of its rules. As such, we caution Mr Johnson that a failure to schedule an inspection as directed in this NAL may result in the imposition of additional (and potentially higher) forfeitures, as well as other enforcement actions, as appropriate, including the seizure of his equipment. Read more <http://www.arrl.org/news/fcc-fines-pennsylvania-man-18-000-for-failing-to-allow-inspection-of-cb-station>.

==> + AMATEUR RADIO IN THE CLASSROOM: MEET MAREA -- THE MARS LANDER AMATEUR RADIO ROBOTICS EXPLORATION ACTIVITY

Students can experience the same thrills as NASA scientists and engineers through a simulation that they conduct in their own classrooms. The Mars Lander Amateur Radio Robotics Exploration Activity (MAREA) is a robotic activity using ham radio. This affordable, powerful learning activity involves the same basic knowledge and skills that the professionals need to pilot the Curiosity robot as it collects and analyzes Martian soil samples and relays the results of these distant experiments back to Earth. MAREA is hands-on learning that integrates Science, Technology Engineering and Mathematics (STEM).

MAREA uses robotic movement commands that are attached in the text portion of an Automatic Position Reporting System (APRS) packet transmission. The APRS packet with the attached commands is sent from a "mission control" school via the terrestrial APRS network or, when possible, even via the Amateur Radio station on the passing International Space Station, to a "ground station" school. At the ground station school the command packet is received and the command data is linked by UHF radio to the "Mars" robot for execution. Read more <http://www.arrl.org/marea-ham-radio-robotics>.

==> + CHECK OUT THE JUNE ISSUE OF QST

The June issue of QST -- our annual Field Day issue -- explores the fun and excitement of Amateur Radio's most popular operating event. So grab your print edition of QST -- or settle in with your computer or tablet to read the digital version <http://www.nxtbook.com/nxtbooks/arrl/qst_201306/index.php> -- and discover what the June issue has to offer.

Bill Wortman, N6MW, knows that it can sometimes be difficult to achieve the desired 1:1 SWR between antennas and coax feed line. In his article "The Hairpin Match," he discusses how to match low impedance antennas to higher impedance feed lines with a simple impedance transforming method. Robert Wilson, NT0A, found that he was getting electromagnetic interference and radio frequency interference from unknown sources. Find out how diligent analysis -- including unplugging everything in

the house -- revealed the culprit in "The Great RFI Hunt." Being able to monitor a battery in use during operation or while charging can be useful to make sure everything is working as it should. In his article "A Battery Monitor for 12 V Systems," Mert Nellis, W0UFO, presents a do-it-yourself project that lets you keep track of the status of storage batteries during Field Day.

Last year, ARRL Eastern Pennsylvania Section Manager Bob Famiglio, K3RF, took to the air in a single-engine plane for Field Day -- and he plans to do it again this year! Read about Famiglio's adventure in "Field Day Flyover" by Bob Wilson, W3BIG. There are many ways to accrue points during Field Day. One way is to operate with fewer than 5 W, or QRP. In their article "Bagging the Field Day QRP Multiplier," Carey Fuller, KX0R, and Fred Maas, KT5X, explain that even though power is limited, the fun is not. Many of today's hams were first introduced to Amateur Radio when they were Boy Scouts. Today, through the BSA's National Jamboree and through Jamboree-on-the-Air (JOTA), thousands of young people all over the world find their voice on the air. BSA Director of Communication Services Jim Wilson, K5ND, invites readers to join Scouts on the air in his article "Jammin' and Hammin' with the Scouts."

ARRL Membership and Volunteer Programs Assistant Manager Norm Fusaro, W3IZ, takes a look at the ACOM 1500 HF and 6 meter linear amplifier in this month's Product Review. He says this amplifier "delivers legal limit power on 160 through 6 meters and is quiet and easy to tune. The compact package will fit in most operating spaces." QST Contributing Editor Phil Salas, AD5X, checked out the Elecraft KAT500 automatic antenna tuner, saying that it "provides wide range automatic matching as well as a three-port antenna switch. It also works well with any transceiver and amplifier combination that doesn't exceed its specified power capability." QST Contributing Editor H. Ward Silver, N0AX, took the Array Solutions AS-419 switched band-pass filters for a test drive. He said that this accessory "offers a one-box solution to interstation interference in a multitransmitter station. Filters can be selected manually, or with a little work the Bandpasser can be controlled from the transceiver or station automation hardware." You can find a video overview of the ACOM 1500 HF and 6 meter linear amplifier <http://www.nxtbook.com/nxtbooks/arrl/qst_201306/index.php#/58>, the Elecraft KAT500 automatic antenna tuner <http://www.nxtbook.com/nxtbooks/arrl/qst_201306/index.php#/60> and the Array Solutions AS-419 switched band-pass filters <http://www.nxtbook.com/nxtbooks/arrl/qst_201306/index.php#/62> in the digital edition of the June issue of QST.

Of course, there are the usual columns you know and have come to expect in the June issue of QST: Happenings, Hints & Kinks, Amateur Radio World, The Doctor is In, Hands-On Radio, Short Takes, Vintage Radio, How's DX? and more. Look for your June issue in your mailbox and in your inbox. QST is the official journal of the ARRL, the national association for Amateur Radio. QST is just one of the many benefits of

ARRL membership. Click here

your ARRL membership.

==> + LOTW: ARRL ANNOUNCES NEW VERSION OF LOTW SOFTWARE

After much testing, the ARRL will release a new version of Trusted QSL,
the open-source development project responsible for developing and
maintaining the three Logbook of the World (LoTW
<http://www.arrl.org/logbook-of-the-world>) client-side applications:
TQSL, TQSLCert and the TrustedQSL library. After six weeks of public
beta testing, version 1.14 is ready for official release and will be
available for download from the ARRL website beginning Monday, May 20.

In December 2012, Dave Bernstein, AA6YQ, and Rick Murphy, K1MU,
recruited a group of volunteer software developers
<http://www.arrl.org/news/logbook-of-the-world-web-page-now-features-daily-an
d-hourly-status-updates>
to contribute to this project. After considering input from ARRL
management and the ARRL's LoTW user support group in the League's
Membership and Volunteer Services Department, as well as the ARRL-LoTW
e-mail discussion group on Yahoo! Groups, the volunteer development
group put forward a set of priorities that would be addressed by a
sequence of incremental software releases.

A small group of testers began exercising version 1.14 in March 2013;
this testing exposed several defects, all of which have been corrected.
Testing then progressed to an open beta test period that allowed
interested parties to download, install and try out this newest version
of Trusted QSL.

The initial release in this sequence -- version 1.14 -- includes these
new features:

- Log files can be signed and uploaded over the internet to LoTW in one
operation.
- Errors in Station Locations are reported (for example, incorrect CQ
and ITU zones).
- QSOs that need not be re-submitted ("duplicates") are brought to the
user's attention.
- Error reporting has been improved.
- Installation on Windows has been improved.
- Users are notified when a new version becomes available.
- Documentation has been improved.

Upgrading to version 1.14 is not mandatory, but is encouraged. Users
who choose not to upgrade will not be able to access the new features
in version 1.14, but they will still be able to upload logs into the
LoTW system.

==> + WARD SILVER, N0AX, ELECTED PRESIDENT OF YASME FOUNDATION

At its annual meeting last month, the Yasme Foundation's Board of Directors elected Ward Silver, N0AX, as its new President. Silver will replace Wayne Mills, N7NG, who has resigned. Mills, one of the founders of DX University, was named as the new DX editor of CQ magazine earlier this year. In recognition of Mills' many years of service to the Yasme Foundation and DX University, the Yasme Board of Directors made a contribution to DX University in support of the goals shared by the two organizations. Read more <http://www.arrl.org/news/ward-silver-n0ax-elected-president-of-yasme-foundation>.

==> ARRL E-MAIL SYSTEM CONTINUING TO EXPERIENCE DELAYS

The ARRL's e-mail service provider is continuing to experience technical issues that are affecting timely delivery of e-mail messages sent via the arrl.net forwarding service, as well as e-mail sent to addresses in the arrl.org domain. This issue remains intermittent, but may result in delaying the delivery of some messages sent to both arrl.net and arrl.org addresses by hours. The ARRL's e-mail provider is working to resolve the issue as quickly as possible. We apologize for the inconvenience.

==> SOLAR UPDATE

Tad Cook, K7RA, reports: Since we are now at (or close to) the peak of Solar Cycle 24, it is no surprise that the solar indices are up. The latest forecast predicts Solar Cycle 24 to peak in this fall, but that will be determined after the fact, and it will be based on a long running average of sunspot numbers. This past week, the average daily sunspot numbers increased by more than 34 points, rising to 156.1, while the average daily solar flux was up by nearly 3 points to 140.1. On May 15, the daily sunspot number was 186 -- the highest number since January 6-7, when the sunspot number was 186 and 196, respectively. The predicted solar flux for the near term is 145 on May 16-18, 140 on May 19, 135 on May 20-21, then 125, 140, 155, 160 and 170 on May 22-26, 160 on May 27-28, 155 on May 29-30, 150 and 155 on May 31-June 1, and rising to 160 on June 2-3. The predicted planetary A index is 8, 15 and 8 on May 16-18, 5 on May 19-20, 8 on May 21, 15 on May 22-23, 5 on May 24-27, 15 and 10 on May 28-29, 5 on May 30-June 8, and back up to 8 on June 9. Look for more information on the ARRL website on Friday, May 17. For more information concerning radio propagation, visit the ARRL Technical Information Service Propagation page <http://www.arrl.org/propagation-of-rf-signals>.

==> + ARRL HQ TO CLOSE IN OBSERVANCE OF MEMORIAL DAY

ARRL Headquarters will be closed Monday, May 27 in observance of the Memorial Day holiday. There will be no W1AW code practice or bulletin transmissions <http://www.arrl.org/w1aw-operating-schedule> that day. ARRL Headquarters will reopen Tuesday, May 28 at 8 AM (EDT). We wish everyone a safe and enjoyable holiday weekend!

==> + DXCC NEWS: 1984 OPERATION TO COCOS ISLAND NOW APPROVED FOR DXCC CREDIT

The February 1984 operation to TI9CCC (Cocos Island) has now been approved for DXCC credit. In the past, radio amateurs who have submitted this operation on a DXCC application had it rejected due to an "incorrect date period." According to DXCC Manager Bill Moore, NC1L, the date issue has now been resolved: "If you had this operation rejected, and your confirmation falls within February 15-28, 1984, please send an e-mail <bmoore@arrl.org> so you can be placed on the list for an update to your record."

==> SILENT KEY: MARK DABISH, K8MD (SK)

Prominent VHF/UHF/microwave enthusiast Mark Dabish, K8MD, of Howell, Michigan, passed away unexpectedly on May 8. He was 66. An ARRL member, Dabish represented the Great Lakes Division on the League's VHF/UHF Advisory Committee and was a strong presence in VHF/UHF contests. A service was held May 11 in Southfield, Michigan.

==> THIS WEEK IN RADIOSPORT

This week:

- May 18 -- Portuguese Navy Day Contest (Digital); Feld Hell Sprint
- May 18-19 -- His Majesty King of Spain Contest (CW); Baltic Contest; EU PSK DX Contest; Worldwide EME Contest
- May 20 -- Run for the Bacon QRP Contest
- May 22 -- SKCC Sprint
- May 22-23 -- CWops Mini-CWT Test

Next week:

- May 24 -- NCCC Sprint Ladder
- May 25 -- Portuguese Navy Day Contest (Digital); QRP ARCI Hootowl Sprint (local time)
- May 25-26 -- CQ WW WPX Contest (CW)
- May 26 -- SARL Digital Contest
- May 27-28 -- Michigan QRP Memorial Day CW Sprint

All dates, unless otherwise stated, are UTC. See the ARRL Contest Branch page <http://www.arrl.org/contests>, the ARRL Contest Update <http://www.arrl.org/The-ARRL-Contest-Update> and the WA7BNM Contest Calendar <http://www.hornucopia.com/contestcal/index.html> for more information. Looking for a Special Event station? Be sure to check out the ARRL Special Event Stations web page <http://www.arrl.org/special-event-stations>.

Upcoming ARRL Section, State and Division Conventions and Events

- May 17-19 -- Dayton Hamvention <http://www.arrl.org/hamfests/dayton-hamvention-4>, Trotwood, Ohio
- June 1 -- ARRL Georgia State Convention <http://www.arrl.org/hamfests/georgia-state-convention-atlanta-hamfest-1>, Marietta, Georgia

- May 31-June 2 -- ARRL Northwestern Division Convention
<http://www.arrl.org/hamfests/northwestern-division-convention-seapac-4>,
Seaside, Oregon
- June 7-8 -- ARRL West Gulf Division Convention
<http://www.arrl.org/hamfests/west-gulf-division-convention-35th-anniversary-
ham-com>,
Plano, Texas
- June 8 -- ARRL Delta Division Convention
<http://www.arrl.org/hamfests/delta-division-convention-2>, Rogers,
Arkansas; ARRL Tennessee State Convention
<http://www.arrl.org/hamfests/tennessee-state-convention-knoxville-hamfest-el
ectronics-convention>,
Knoxville, Tennessee
- June 28-30 -- ARRL Rocky Mountain Division Convention
<http://www.arrl.org/hamfests/rocky-mountain-division-convention-hamcon-color
ado-2013>,
Estes Park, Colorado
- July 6 -- ARRL Eastern Pennsylvania Section Convention
<http://www.arrl.org/hamfests/eastern-pennsylvania-section-convention-firecra
cker-hamfest-electronics-expo>,
Harrisburg, Pennsylvania
- July 25-27 -- Central States VHF Society Conference
<http://www.arrl.org/hamfests/central-states-vhf-society-2013-conference>,
Elk Grove Village, Illinois
- July 26-27 -- ARRL Oklahoma State Convention
<http://www.arrl.org/hamfests/oklahoma-state-convention-ham-holiday-1>,
Oklahoma City, Oklahoma
- August 2-3 -- ARRL Texas State Convention
<http://www.arrl.org/hamfests/texas-state-convention-austin-summerfest-2013>,
Austin, Texas
- August 2-4 -- Pacific Northwest DX Convention
<http://www.arrl.org/hamfests/pacific-northwest-dx-convention-2>,
Spokane Valley, Washington
- August 17 -- ARRL West Virginia State Convention
<http://www.arrl.org/hamfests/west-virginia-state-convention-3>,
Weston, West Virginia
- August 17-18 -- ARRL Alabama State Convention
<http://www.arrl.org/hamfests/alabama-state-convention-huntsville-hamfest-1>,
Huntsville, Alabama
- August 18 -- ARRL Kansas State Convention
<http://www.arrl.org/hamfests/kansas-state-convention-3>, Salina,
Kansas
- August 25 -- ARRL Western Pennsylvania Section Convention
<http://www.arrl.org/hamfests/western-pennsylvania-section-convention-3>,
New Kensington, Pennsylvania

To find a convention or hamfest near you, click here

NZART Headquarters Infoline Issue 273

17 May 2013

NZART Website: www.nzart.org.nz

In this issue:

· From the desk of HQ

· FMTAG Notes

· VHF-UHF-SHF-EHF CONTEST NEWS

· GAREC 2013

· Special Event CRS25ARVM

· RSGB Centenary Day

· Project Goodwill South Sudan Report Z81X

· Attachment to this issue – LGLO Annual Report

Debby says…I recently sent a letter to one NZART Examination in each branch listed on the NZART web page. It was not sent to ALL listed Exam Supervisors in order to keep costs down, however can those who received this information please pass it on to your other approved examiners in your branch.

I would like to thank you all for the tremendous work you do to encourage newcomers into the hobby. This is a great opportunity to also given these new amateurs a snapshot into the roles of the Association as each one receives one year’s complimentary membership to NZART, commencing 1 January of the year they pass their exam.

With the recent update of the RSM document PIB46, specific attention must be made to prospective amateurs who were not born in New Zealand. As per PIB46 dated May 2013 (a copy of which was also included with the letters sent to Examiners);

1.9 Residency

Only natural persons who are New Zealand citizens or permanent New Zealand residents may be granted a New Zealand General Amateur Operator’s Certificate (GAOC). Any application not fulfilling this criterion must be referred to the RSM Licensing Manager.

I have recently allocated call signs for a number of amateurs who fell into this category. Please wherever possible, can you also include a copy of the residency status, i.e NZ citizenship and year attained? They will have received a certificate advising of this.

If you wish to place an apology or proxy vote for the upcoming NZART Conference to be held over Queens Birthday weekend, please send them to me by Friday next week.

Attached to this issue of HQ Info-line is the Local Government Liaison Officers annual report, not included in Break In as I understand due to timing.

Talk soon…Debby ZL2DL

FMTAG NOTES FOR HQ INFOLINE 273

PROPOSAL

Branch 26 Nelson has applied for a one-way link from Grampians, located at TOPO50 BQ26 234283. The transmit frequency will be 438.900 MHz. An engineering evaluation, in accordance with RSM document PIB38, confirms that there will be no interference to other stations.

COMMENTS AND APPLICATIONS

Please send your comments and suggestions on the above, and on any other FMTAG matters, by e-mail to: fmtag@nzart.org.nz

Applications for repeaters, beacons, digipeaters, point-to-point links, and so on, should be made on the latest version of FMTAG Form 10. The latest versions of FMTAG Form 10, and the explanatory Form 10A, are available on the NZART website:

http://www.nzart.org.nz/fmtag/index.html

Completed forms should be sent by e-mail to fmtag@nzart.org.nz

VHF-UHF-SHF-EHF CONTEST NEWS

REMINDER

The next contest is the Hibernation Contest, all bands 50 MHz and up, on Saturday the 8th and Sunday the 9th of June 2013. This is the weekend after NZART Conference and Queen's Birthday.

The contest after that is the Brass Monkey Contest, all bands 50 MHz and up, on Saturday the 3rd and Sunday the 4th of August 2013.

The operating times for both contests are: Saturday 1700 to 2300 NZST and Sunday 0700 to 1300 NZST.

The Contest Rules are available at:
www.vhf.org.nz/VHF-UHF-SHF-ContestRules

All contest logs should be sent, to arrive within two weeks, to:
zl2wa@clear.net.nz

with Contest Log in the subject line.

Or by post to:

Please include your email address if you wish to receive the results as soon as they are available.

Ladies and Gentlemen

We do hope that you have well received our invitation, which was sent by email, beginning of April 2013. With pleasure we can inform you that the first registrations are already in the house. We are also pleased to inform you that the preparations are in full swing and are progressing well.

We would like to take the opportunity to remind you of the following:

· All the details of GAREC 2013 may be found on our home page www.garec2013.ch

· As a GAREC participant you will have an early booking discount of 10% of the regular hotel price. We therefore recommend to make an early reservation in one of the 3 Hotels mentioned in the flyer.

· Registration must be completed and sent by e-mail to registration@garec2013.ch. All documents must be received by 20 May 2013. Upon receipt of the documents and bank transfers, an acknowledgement will be sent to the registrant’s e-mail address. All remittances must include all bank charges, and all payments must be made out to GAREC2013.

· If you need an official invitation, for example in connection with visa formalities, send an email at info@garec2013.ch with your name, home address, date of birthday and your number of passport in-side. We will send you an official letter of invitation (.piff document) by email.

Together with my team I’m fully at your disposal for any question you might have in connection with the GAREC or the HAM RADIO exhibition and I look forward to meeting you in Zurich.

Yours sincerely

Stefan Streif

Radio Society of Great Britain Centenary Day

2013 marks the Centenary of the Radio Society of Great Britain (RSGB) the 20,000 strong body that represents Britain’s radio amateurs. The RSGB is pleased to announce that its Patron, HRH The Prince Philip, Duke of Edinburgh, KG, KT will be joining the Society for Centenary Day at the National Radio Centre at Bletchley Park on 5 July 2013. He will meet with Members and invited guests before unveiling a plaque to commemorate the Centenary.

A number of activities, talks and displays are planned in which RSGB Members and members of the public can take part during the day.

Background
Starting life as the London Wireless Club in 1913, the RSGB has since its inception brought together people with an interest in radio communication. The Society provided the framework within which the pioneers and experimenters of radio technology have thrived.

RSGB members have been at the forefront of many of the major contributions made to radio technology. For example, the development of Radio intelligence, television, radar development, re-designing the Iron lung and the discovery of Pulsars all involved radio amateurs. The influence of amateurs across science, technology, medicine and the communications industry has been huge.

One hundred years later, the RSGB still provides a platform for the exchange of ideas amongst experimenters and, although the technologies may have changed, the amateur spirit has not. With this background the many thousands of radio amateurs in the UK are proud to celebrate the Centenary of their organisation, the Radio Society of Great Britain (RSGB).

History
The London Wireless Club started after Rene
Klein had a letter published in English Mechanic on 6 June 1913. He expressed surprise that there wasn't a wireless group in London when other major cities had such gatherings. A meeting of interested parties took place on 5 July and the London Wireless Club – with a membership of four – was born. Just ten weeks later the membership had increased to 40 and by the end of the first year there were 151 Members and 11 Associate Members – 69 of whom held transmitting licences
.
Through two World Wars the Society was justly
proud of its Members war service. Its younger members, ready trained, flocked to the wireless units of the Navy, Army and Air Force. Here they served with distinction. Many of those who stayed at home during WWII were recruited to become Voluntary interceptors used to monitor enemy radio signals and pass them to Bletchley Park for decoding and analysis.

Since WWII and into a new Millennium, the
RSGB's membership have taken part in propagation experiments, pushed the boundaries of radio and electronic knowledge and shown what international amateur radio relations is all about. Whether it's proving that VHF communications is more than line-of-sight, showing the world how far radio signals can travel or putting satellites into space, radio amateurs have been involved in it all.

Future
Whilst Centenary celebrations are a time to
reflect on our past achievements, there can be no question of "resting on our laurels". Amateur radio today is as
relevant and vibrant as it has ever been and the RSGB takes very seriously its responsibility to work with partners around the world in providing leadership to safeguard and develop amateur radio over the next 100 years.

Worldwide
There are around 4 million amateur radio
callsigns worldwide, with 78,000 on issue in the UK. Radio amateurs around the world are required to pass an examination before gaining their licence. There is an international body governing amateur radio called the International Amateur Radio Union. The RSGB is a founder member of the IARU, which was formed in 1925.

FOR IMMEDIATE RELEASE

Helsinki, Finland, May 15, 2013

PROJECT GOODWILL SOUTH SUDAN INTERIM REPORT - Z81X

As part of the April 2, 2013 visit to South Sudan by a delegation headed by

the Foreign Minister of Finland, several supporting elements were discussed.

Just three weeks later, following a series of meetings focusing on practical

matters in Juba, there was a high-level presentation, with relevant

endorsements, made to the South Sudan government. The presentation was made

with a view toward enlisting support on telecommunications matters in

general and Amateur Radio's role in society in particular. Ultimately, a

Memorandum of Understanding

(MoU) was signed specifying several elements of Amateur Radio as a study

case for local administrators. These elements include Amateur Radio's role

in society, frequency allocations, regulatory matters and promotion of

Amateur Radio as part of an educational agenda. The MoU calls for a workshop

to be held for the senior staff of the Ministry of Telecommunications and

Postal Services. Members of the Ministry of Higher Education and the

Research and Technology agency will also attend the workshop.

In early June, a senior South Sudan telecommunications official will attend

an IARU Administrator's Course in Accra, Ghana to observe ITU and IARU. This

travel will be made possible thanks to the valuable support of the Yasme

Foundation <www.yasme.org>

As Amateur Radio is only provisionally regulated in South Sudan, the Radio

Arcala Fellowship Group of Finland, OH8X, was granted a provisional license

- Z81X - to facilitate operating events during visits by the project

representatives. We expect that Z81X will be activated several times during

the course of this project, notably on low bands and in CQWW Contests.

Just today, the initial Z81X activity, with one radio only, was concluded

with more than 20.000 QSOs. QSOs were split evenly between the three major

population areas of the world - Europe 8693 (43%), North America 5774 (29%)

and Asia 5162 (26%). The Finnish duo - Olli, OH0XX and Martti, OH2BH - has

now returned to their native Finland. See <www.qrz.com/db/Z81X>

As the entire project is carried out on a voluntary basis, the group will

accept donations to be used solely for offsetting direct project expenses

incurred in South Sudan. Club Log OQRS is now active for QSL requests

(bureau or direct) and project support.

We are pleased to acknowledge the support of Mr Pekka Haavisto, the Finnish

Foreign Minister's Special Representative to the Horn of Africa and Sudan.

We also acknowledge the supporting efforts of Mr. Amul Behera of Rock City

Investments, Juba, Dr Anu Kantele of Helsinki University Central Hospital,

Massimo, Z81B (IZ0EGB), Diya, Z81D (YI1DZ) and Ken, Z81Z (K4ZW) for

supporting the project and welcoming the latest country of the world to the

valued ranks of Amateur Radio.

Z81X QSL manager is OH0XX, QRZ.com

Ohio/Penn DX Special Bulletin No. 1112.2

The Ohio/Penn DX PacketCluster
DX Special Bulletin No. 1112.2
BID: $OPDX.1112.2
Mary 17, 2013
Editor Tedd Mirgliotta, KB8NW
Provided by BARF80.ORG (Cleveland, Ohio)

Thanks to the Northern Ohio Amateur Radio Society, Northern Ohio DX Association, Ohio/Penn PacketCluster Network, AB5K & the AR TelNet Clusters Network, and W2VU for the following DX information.

CQ NEWS (Press Release - 2013 Hall of Fame Inductees). CQ magazine today announced its 2013 Hall of Fame inductees, adding two members each to the CQ DX and Contest Halls of Fame along with eight new members of the CQ Amateur Radio Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals, whether licensed hams or not, who have made significant contributions to amateur radio; and those amateurs who have made significant contributions either to amateur radio, to their professional careers or to some other aspect of life on our planet. The 2013 inductees (listed alphabetically) are:

* Evelyn Garrison, WS7A (SK) - amateur radio industry leader
* Joel Kleinman, N1BKE (SK) - former Managing Editor of QST magazine
* Laurie Margolis, G3UML/GPC3L - Longtime BBC correspondent and contributor to amateur radio magazines
* Michael Owen, VK3KI (SK) - Longtime president of the Wireless Institute of Australia and chairman of IARU Region 3
* Harry Rubinstein (ex-9EEV) (SK) - Inventor of the printed circuit, the slider potentiometer and the combination potentiometer/on-off switch
* Walker Tompkins, K6ATX - Journalist, author and historian, his three dozen books included several well-known ham radio-related novels
* Joe Walsh, WB6ACU - Rock music performer and Rock & Roll Hall of Fame inductee
* William G. (Bill) Welsh, W6DDB (SK) - CQ Novice Editor for 20 years; responsible for helping thousands to get their ham licenses

CQ DX and Contest and DX Halls of Fame

The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways.

The 2013 inductees to the CQ DX Hall of Fame are:
* Vladimir Bykov, UA4WHX/AC4LN, has visited and operated from over 100 DX entities in the past ten years and operated from all six continents in 2012 alone. Has provided over 700,000 DX contacts for hams around the world (and QSLed them all).
* Robert "Gary" Dixon, K4MQG, is a founding member of the Carolina DX Association and as Founding President of INDEXA, the International DX Association, which has helped support over 200 DXpeditions in the past 30 years.

The 2013 inductees to the CQ Contest Hall of Fame are:
* Dale Green, VE7SV, is a world-class contester who has been hosting teams of new and experienced contesters at his superstation for the past 20 years, and recently helped start a contest group in Chile.
* Charles "Chas" Fulp, K3WW, also a multi-award winning contester and past president of the Frankford Radio Club (FRC), which saysChas "is our role model and sets the standard for other FRC members to strive to achieve."

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.&#65533; More detailed descriptions of inductees will appear in the official announcement in the July 2013 issue of CQ magazine.

HAMVENTION 2013: THE GATES SWING OPEN AND HAMVENTION BEGINS

Its Hamvention time in Dayton, Ohio. This as the gates at the HARA Arena swing open for this years show of shows in amateur radio. And in an interview with Rain's Hap Holly, KC9RP, Hamvention spokesman Dave Kalter, W8CI, there's a lot to look forward to including some spectacular prizes:

--

Kalter: "Our prize committee has been really busy. They want to out-do what they did last year. Last year we had over $80,000 in prizes and this year we want to surpass that."

--

But while prizes are an important aspect of Hamvention, so are other activities with the many forums being front and center:

--

Kalter: "We get a lot of questions about forums and how important forums are to amateur radio. And a lot of people love to mix their day And sit down, watch a forum and learn something. All that information can be found at our website at www.hamvention.org."

--

As this year's theme is the DX Hamvention, there are a lot of visitors from outside the United States.

--

Kalter: "We have people coming literally from all over the world. A large contingent is coming in from China this year. We had large group from India last year. And of coarse Qatar and all throughout the middle-East, Europe; a very strong (presence) from South America and throughout Africa. And that's the big thing about amateur radio: When you see people with a call that you know is a foreign call -most of these people I find are just absolutely delighted to get to know you and (have you) talk to them face to face."

--

According to Kalter, its not easy for some foreign visitor to get to the Hamvention, but planners are always ready to assist:

--

Kalter: "People come from a lot of countries for which they need an actual written. The city of Dayton; the city of Trotwood; the counties around have all joined in to help us to make amateur radio operators from all over the world feel welcome. Sometimes as many as four letters to one person (are needed) just so they can get their visa."

--

And says Kalter, the Hamvention would not be possible without the volunteers who make it happen.

--

Kalter: "This is an all volunteer undertaking. From the General Chairman all the way through. We do contract for some emergency services; for bus services; we lease out the Hara Arena but as far as the nitty-gritty work and the planning, all of that is done by volunteers."

--

Kalter adds that not all of the volunteers live in the Dayton area:

--

Kalter: "We are really pound of our amateur radio community here. We are also proud of the fact that there are amateur radio operators that come from all over the United States and other parts of the world just to help volunteer for this great event."

--

By the way, if you are in Dayton for Hamvention 2013 and find yourself in need of any kind of assistance, simply dial your 2 meter mobile or handheld to the repeater pair of 146.34 in and 146.94 out. That's the official repeater for Hamvention. Its call is W8BI and no PL tone is required.

OK. Its time for our reporters in Dayton to grab their audio recorders and go to work. You will hear their reports on Hamvention 2013 beginning next week.

(ARNewsline with audio supplied by RAIN)

**

HAMVENTION 2013: KIDS AND D-STAR MIX AT HAMVENTION 2013

Kids and D-Star were to be part of Hamvention 2013's activities. This as the Texas Interconnect Team announces that for the Hamvention weekend, reflector REF033B will officially be the Dayton Kids Reflector.

Megan McClellan, K5MEM, will spearhead the project from the ARRL Youth Booth starting Friday morning and continuing during show hours on Saturday and Sunday. The objective is to give the future young hams an opportunity to experience the fun and excitement of talking with someone far-away place using the magic of Amateur Radio. The participants in the Youth area will have access to handheld radios and a DV-AP, and will operate under the supervision of an experienced Control Operator.

Even if you not at this years Hamvention you can assist in this effort by connecting using D-Star to Reflector REF033B during event hours Friday, Saturday, and Sunday. If nobody is talking, give them a call. Remember, for any QSO to begin it takes someone calling the first CQ. (N9JA, others)

**

HAMVENTION 2013: UPDATED AMSAT LVB TRACKER SHOWN AT DAYTON

One product at Dayton that likely won't make headline reviews but which is certain to be of interest to satellite enthusiasts is a new version of AMSAT G6LVB Tracker. The new unit replaces the original amber only LCD display with an O-LED or Organic Light Emitting Diode display will be available in blue, green and amber. The new display offers a high visibility contrast with a wide angle of view. More information and a photo showing the old and new displays can be found on-line at amsat.org. (ANS)

**

INTRUDER WATCH: RUSSIAN RADAR ON 75 - 80 METERS

In other news, the latest IARU Monitoring System Newsletter reports the Russian Over The Horizon Radar that has invaded the 3.5 MHz band is still very active. The interfering Radar system is believed to be located in the area of Makhachkala, on the Caspian Sea and transmits simultaneously between 3.515 to 3.545 and 3.560 to 3.590 MHz. As a result, amateur radio and other services are suffering interference during the evening hours. The German and Dutch telecommunications regulators have been informed and have been asked to intercede.

(IARUMS)

**

HURRICANE WATCH NET SEEKS NEW MEMBERS FOR NET CONTROL STATIONS

The ARRL Letter says that with the 2013 hurricane season approaching, the National Hurricane Center in Miami, Florida, and the Hurricane Watch Net are gearing up for what could be a very active storm season. And in preparation for what Mother Nature might have in store the Hurricane Watch Net is seeking new members who can serve as net control stations.

For those not aware, the Hurricane Watch Net provides on-the-ground, real-time weather data from amateur radio operators who volunteer their time to monitor their own properly calibrated home weather stations. The hams then report the data collected to the Hurricane Watch Net, which in turn forwards it to WX4NHC which is the amateur radio station at the National Hurricane Center.

For more information on the role played by hams in this vital, life saving service, and how you can become a part of it, take your web browser to tinyurl.com/hurricane-net-2013. (ARRL)

STORY CORRECTION: PROPER SOURCE CREDIT ON DARC AND UBA SUPPORT AMATEUR RADIO IN TUNISIA STORY

And before we go any further, a correction to the source credit in last weeks newscast concerning the story about Germany's DARC and Belgium's UBA supporting amateur radio in Tunisia. In the print edition we gave the source credit to an organization called A-R-A-T. Well it turns out that the groups actual name is ASTRA which stands for Association Tunisienne des Radio Amateurs that translated into English is the Association of Tunisian Radio Amateurs. How the credit which was only seen in the print edition got typo'ed remains a bit of a mystery, but we are sincerely grateful to our listeners and readers across Europe and in Tunisia for bringing this discrepancy to our attention. (ARNewsline)

RESCUE RADIO: W6TIA SEEKS SIGNATURES ON PUBLIC WARNING LEGISLATION PETITION

Richard Rudman, W6TIA, who is a core member of the Broadcast Warning Working Group, has posted an online petition urging Congress and the Executive Branch of government to enact legislation for a national public warning strategy. This so emergency public information is always coordinated with other emergency response measures.

In the petition Rudman and the Broadcast Warning Working Group advocate that Emergency Public Information be treated as a true response resource within the culture of emergency management professionals and to be legislated by Congress. And in an interview with Amateur Radio Newsline, W6TIA, explained the importance of getting the government to pay attention to this special need:

--

Rudman: "The petition was started because we feel that two pieces of legislation that died in the last session (of Congress) should be brought back and strengthened, so that for one thing there is a unified strategy for emergency management and tying it to emergency public information including warnings."

--

The legislation referred to by W6TIA was based on the Partnership for Public Warning report titled "A National Strategy for Integrated Public Warning and Capability." He noted that this was reinforced with language from the previous legislative attempts and feels this proposal can finally give real, wide-ranging value and meaning to FEMA's Common Alerting Protocol warning tool called the Integrated Public Alert and Warning System.

Rudman tells Newsline that he hopes to collect between 100 and 200 signatures. He then plans to present them to what he terms as key people in Congress who supported past attempts at such legislation in the hope of getting them to introduce them again, and get them passed. W6TIA has about 75 signatures so far. You can read and sign the petition at tinyurl.com/true-response-resource or tinyurl.com/epi-strategy. (RW, ARNewsline)

RESCUE RADIO: EMCOMM HAM RADIO REPEATER EVICTED BY AMERICAN TOWER

A decision by American Tower Corporation to evict an amateur radio emergency communications system from a tower the company recently acquired in New Mexico has both the sponsoring radio club and many of the people working in local emergency services very concerned. Amateur Radio Newsline's Norm Seeley, KI7UP, reports:

--

The repeater in question is located on Buck Mountain overlooking the community of Ruidoso. New Mexico, and is operated by the Sierra Blanca Amateur Radio Club. The equipment was installed on the tower in 2004 and except for when the tower suffered some damage three or four years ago the repeater has been used continuously for emergencies such as the Little Bear Fire in June 2012, and in the Rio Ruidoso flood of July 2008.

Tony Davis is the president of White Mountain Search and Rescue. He said that he learned late Wednesday May 8th that the tower holding the amateur radio repeater that is owned and maintained by Rick Sohl, K5RIC, had been sold to American Tower Corporation. Despite attempts by Sohl to negotiate an arrangement, American Tower has decided to terminate amateur radio use of the facility, effective immediately. Davis said that there are other towers near the same location, but they are largely occupied.

Ruidoso Acting Fire Chief Harlan Vincent also serves as the village emergency services manager. He says that he is not happy about the decision of the Boston-based American Tower company. He noted that Ruidoso relies heavily on heavily on ham operators in time of emergency. He said that when emergency service repeaters go down, the ham radio repeaters are still functioning and able to get information from point A to point B.

According to the Ruidoso News article reporting the repeaters eviction, this system is used by amateur operators not just in Lincoln County. It also provides coverage into Otero, Chaves and Eddy County, and as far away as the Panhandle of Texas and into the city of El Paso.

Davis and Doug Thompson, W5DET, who is president of the Sierra Blanca Amateur Radio Club, have sent an "open letter" for publication in the Ruidoso News to the chairman, president and chief executive officer of American Tower Corporation. It asks him to reconsider the company's stance.

For the Amateur Radio Newsline, I'm Norm Seeley, KI7UP, in Scottsdale, Arizona.

--

More on this story can be found on-line at tinyurl.com/repeater-evicted. (Ruidoso News, Southgate)

ENFORCEMENT: FCC UPHOLDS $15000 FINE AGAINST UNLICENSED OREGON BROADCASTER

The FCC has upheld a $15,000 fine against an Oregon resident for allegedly operating an unlicensed radio station.

Following up on a complaint from a local broadcaster in 2011, the Portland office of the Enforcement Bureau traced the signal on 97.9 MHz in Prineville, Ore. to the residence of Joshua McMurchie's. A police

officer accompanied the FCC agent to the address where the FCC agent inspected the station and issued McMurchie a Notice of Unlicensed Operation.

Following another complaint in 2012, an agent again T-hunted the source of the signal to McMurchie's residence and found a transmitter there. The commission said that McMurchie admitted operating the station and offered to surrender the transmitter.

Last July, FCC issued McMurchie a Notice of Apparent Liability in the amount of $15000 raising by $500 it from the base amount of $10,000 because the unlicensed transmissions continued even after McMurchie was ordered to cease operation.

But in its May 9th release the FCC says that McMurchie never answered the original Notice of Apparent Liability. Based on that and the evidence before it the agency has now issued a Forfeiture Order for $15,000 giving him 30 days to pay or the case may be referred to the Justice Department for collection. (FCC)

**

RADIO BUSINESS: PUBLISHER SOUGHT FOR VHF COMMUNICATIONS MAGAZINE

A small but popular magazine targeted at those who operate 50 MHz and above is on the block. This as Andy Barter, G8ATD, announces his intention to retire from publishing the currently U-K based VHF Communications Magazine

According to Barter, he has published VHF Communications Magazine for the past 13 years and now wants to retire. He says that he will publish all 4 issues in 2013 but if anyone in the group would like to take over publication of the magazine from 2014 on and give it a new lease of life please contact him.

Barter says that the job of publisher involves translating articles from the German magazine UKW Berichte plus finding additional articles to fill the VHF Communications. In addition there is the work of producing the magazine, getting it printed and distributed, handling subscriptions plus orders for back issues and the like.

The current circulation of the magazine is 349 with just 80 of those from the UK. If this interests you, please contact G8ATD by e-mail to andy (at) vhfcomm (dot) co (dot) uk. (Southgate)

ARRL CENTENNIAL CELEBRATION: ARRL PUBLIC RELATIONS COMMITTEE SPONSORING "I AM THE ARRL" VIDEO CONTEST

As part of the ARRL's Centennial Celebration in 2014, the League's Public Relations Committee is sponsoring an "I am the ARRL" video contest. The Committee is looking for pairs of short video clips featuring ARRL members. One clip should show the radio amateur on the

radio, while the other should show the same ham in his or her work setting saying who they are, that they like ham radio and that they are the ARRL.

As explained by ARRL Public Relations Manager Allen Pitts, W1AGP, an example might be a car mechanic in coveralls working over an engine who looks at the camera and says 'I am Henry Smith, N0XCC. I like to talk to people in exotic countries and I am the ARRL.' This clip would then be paired with a shot of him at home talking on the radio.

Pitts says that the ARRL is looking for videos that communicate that you are that guy or gal down the street and you are an important part of the ARRL. W1AGP adds that with Field Day coming up next month, there is a great opportunity for filming clips.

If this project interests you can find out more is on-line at tinyurl.com/arrl-second-century-video. (ARRL)

**

SOCIAL SCENE: AMSAT ANNOUNCES DATE AND LOCATION OF 2013 SPACE SYMPOSIUM

And if you are an amateur radio space enthusiast the mark down November 1st to the 3rd as the dates for this years AMSAT Space Symposium. The venue will be the Marriott Hobby Airport Hotel not far from the grounds of the grounds of NASA's Johnson Spaceflight Center in Houston, Texas, which is the home of the famed ham radio station W5RRR.

The AMSAT Annual Meeting will be held in conjunction with the Space Symposium. This will provide you with an opportunity to hear about AMSAT's plans for the future and voice your own thoughts and opinions to organization's Board of Director members and other officials.

Over the coming months both the AMSAT Journal and AMSAT News Service will be issuing timely updates on plans for this years Space Symposium. More information will also be available on-line at www.amsat.org. (ANS)

**

HAM HAPPENINGS: OLE VIRGINIA HAMFEST JUNE 9

On the social scene, word that the Ole Virginia Amateur Radio Club will be holding its 39th Hamfest in Manassas Virginia on June 9th, and you are invited to be a part of the festivities.

This year in partnership with the 4 H, the club the gathering will be hosting a Youth Lounge to provide teen and preteen youth complete with on the air ham radio demonstrations. There will also be a number of educational events to foster amateur radio awareness among the younger members of the community.

Andrea Hartlage, KG4IUM, will be organizing and chairing the Youth Lounge. Hartlage, was the 2004 Amateur Radio Newsline Young Ham of the

Year and a former ARRL Vice-Director. She is nationally known as a promoter of Youth in Amateur Radio and is an active member of the Youth in the Second Century Committee sponsored by the American Radio Relay League.

More about both the Ole Virginia Amateur Radio Club hamfest and its dedicated youth activities can be found on-line at www.manassashamfest.org. Organizers say that they hope to see you there. KC4DV

EMERGING TECHNOLOGY: GOOGLE ASKS FCC PERMISSION TO CREATE EXPERIMENTAL 2.5 GHZ NETWORK

Google may be trying to create an experimental wireless network covering its Mountain View, California, headquarters. This in a move that some analysts say could be a sign that the company may be planning the creation of a super-fast wireless networks in other locations that would allow people to connect to the World-Wide-Web using mobile devices.

Google recently submitted an application to the Federal Communications Commission, asking for an experimental license to create an experimental radio service with a two-mile radius covering its headquarters. The network would only provide coverage for devices built to access frequencies from 2524 to 2625 megahertz. This is spectrum which could work well in densely populated areas and which mobile operators in China, Brazil and Japan are already building wireless networks using. This in turn means that compatible devices can eventually be manufactured.

According to Communications News, much of Google's application is confidential, but it does say that the first deployment of the experimental network would take place inside a specific building on Google's property. That building reportedly houses the company's Fiber Team, which is part of the Google Access unit that has introduced high-speed wired Internet and video in Kansas City.

A Google spokesperson declined to comment on the purpose of the application, saying the company regularly experiments with new ideas. More is on the web at tinyurl.com/google-2-ghz. (TechNewsNow.com, ARSTechnica, CommNews, others)

WORLDBEAT: ILLW REGISTRATION TIE

The battle for the most registrations for the 2013 International Lighthouse and Lightship Weekend leadership appears at this moment to be a tie between Australia and Germany with 40 registrations each. This out of more than 220 from 30 countries around the world.

Looking at other nations, the United States has registered 23 lighthouse and lightship entities. It's followed by England at 18, Argentina with at 12, Ireland and Scotland with 9 each, with Canada, Netherlands and Sweden at 8 a piece.

With registration only at about the half-way mark, it so far appears that the number of entities planning to take part is ahead of last year at this same time. If you plan to activate a lighthouse or lightship for this fun operating event and want to register it, simply take your web browser to www.illw.net.

This year's International Lighthouse and Lightship weekend takes place the weekend of August the 17th and 18th and planners say that they hope you will be there. (VK3PC)

WORLDBEAT: RADIO AND TV MARTI BACK ON THE AIR AFTER FIRE

Radio and Television Marti broadcasts to Cuba from the United States government resumed on Monday, April 22nd. This after a trashcan fire forced the temporary evacuation of the headquarters of the Office of Cuba Broadcasting in Miami the day before.

According to the United States Broadcasting Board of Governors, the building that houses Marti and its website reportedly sustained damage due to an accidental fire caused by a lighted cigarette left in a container in a designated smoking area outside the building. While windows cracked due to the heat, no one was injured and sprinklers were automatically set off.

Carlos Garc&#65533;a P&#65533;rez, director of the Office of Cuba Broadcasting said he was grateful for a quick response from firefighters, and for the continued work of the station's broadcasters through the ordeal.

In Cuba, Radio Mart&#65533; is available on 1080 AM and also on 1260 AM as Radio Caracol. (RW)

ON THE AIR: GB4PEN - THE PENLEE LIFEBOAT SPECIAL EVENT

On the air, keep an ear open for Geoff Powell, M1EDF, will be on the air as GB4PEN through the 24th of May. This, to commemorate the crew of the United Kingdom lifeboat the Penlee.

According to Wikipedia, the lifeboat Penlee sank off the coast of Cornwall in the UK on December 19, 1981. This after it had gone to the aid of the vessel the Union Star after its engines failed in heavy seas.

The story goes that after the Penlee had managed to rescue four people that both vessels were lost with all hands. In all, sixteen people died including eight volunteer lifeboatmen.

M1EDF says that he will be operating on 160, 80, 40, 30 meters using CW only. QSL's go direct to M1EDF who adds that any donations received with QSLs will benefit the United Kingdom's Royal National Lifeboat Institution. More is on-line at www.qrz.com/db/GB4PEN (Southgate)

**

ON THE AIR: NEW REGIONAL NET SERVING TN, VA, MC AND BEYOND

The State of Franklin Friendship net is a brand new regional net serving East Tennessee, Southwest Virginia, and Northwest North Carolina. This new ragchew net is held on several linked local repeaters in the area and also worldwide via Echolink. You're invited to join in every Thursday evening at 9:30PM EDT. More details and a list of net repeaters and Echolink nodes can be found at facebook.com/stateoffranklinnet. Stateoffranklin is all one word. (AE5DW)

**

DX

In DX, 7Z1HL will be active from Saudi Arabia until May 31st as HZ1FOC He is active on the various H-F Bands. QSL only Heribert Lennertz, HZ1FOC , P.O.Box 85661 , Riyadh 11612 , Saudi Arabia.

PB2T is currently operational stroke TF from Iceland on the High Frequency bands. If you make contact please QSL via his home call

OD5SK is currently active from Jordan as JY8KS. He is reported to be on the H-F bands only. QSL via IZ8CLM

OH6VM will be on the air from Market Reef from June 2nd to the 5th. He will be using the call sign OJ0VM also on the various High Frequency bands QSL OH6VM.

HA0NAR will be active as 3D2AR from Viti Levu Island in the Fiji Island group sometime in October. His operation will likely on 160 through 10 meters using CW, SSB and RTTY. QSL via his home callsign and for updates please visit www.ha0nar.hu on the World-Wide-Web.

Lastly, G3SXW and G3TXF are on the air from Jersey Island on all of the HF bands using the call sign GH4FOC for the FOC commemorative operation as well as GJ3SXW and GJ3TXF. QSL's for GH4FOC go via G3SWH while GJ3SXW go via G3SXW and GJ3TXF via G3TXF. All calls can be either paper or electronic using Logbook of the World.

(Above from various DX news sources)

**

THAT FINAL ITEM: SELF HEALING CHIPS ARE A REALITY

And finally this week, indestructible electronics are a step closer to reality thanks to engineers at the California Institute of Technology who have developed what they are calling self-healing integrated chips. Amateur Radio Newsline's Cheryl Lasek, K9BIK, has more:

--

The team from the High-Speed Integrated Circuits laboratory in Caltech's Division of Engineering and Applied Science repeatedly blasted tiny power amplifiers with a high-power laser, vaporizing many of their components. They then watched the chips develop their own work-arounds in less than a second.

The new integrated circuits are so small that 76 of them, including the amplifier and everything needed to heal it, can fit on one penny. The amplifiers developed by the team use on-chip sensors that monitor temperature, current, voltage, and power. These sensors send the information to a custom application-specific integrated circuit or ASIC which is a central processor on the same chip that functions as the system's brain. The ASIC evaluates the information it receives from the sensors about the amplifier's performance, decides what adjustments need to be made to the system's actuators, and makes those changes. The unit was designed to get to the optimum state for all actuators in any situation without outside intervention.

The benefits of this approach go beyond overcoming severe damage. Because of the self sensing, these amplifiers used about half as much power as those without the self-healing capability, and performance was more predictable and reproducible.

In addition to working around damage to parts of the circuits, the amplifier's self-healing can repair static variation due to differences across components and long-term aging problems that arise over time as use changes the internal properties of the system. It can also handle short-term variations caused by changes in load, temperature, and differences in supply voltage.

Since chips such as these are useful for next-generation communications, imaging, sensing, and radar applications, showing successful self-healing here should mean that it also can be done in less cutting-edge electronic systems such as cellphones and maybe someday even in ham radio gear.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

--

Research on this project was funded by the Defense Advanced Research Projects Agency and the Air Force Research Laboratory. More on this story is on-line at tinyurl.com/self-healing-chips. (CalTech, WIA)

NEWSCAST CLOSE

With thanks to Alan Labs, AMSAT, the ARRL, the CGC Communicator, CQ Magazine, the FCC, the Ohio Penn DX Bulletin, Radio Netherlands, Rain, the RSGB, the Southgate News, TWiT-TV, Australia's WIA News and the 2013 Dayton, Hamvention, that's all from the Amateur Radio Newsline(tm). Our e-mail address is newsline (at) arnewsline (dot) org. More information is available at Amateur Radio Newsline's(tm) only official website located at www.arnewsline.org. You can also write to us or support us at Amateur Radio Newsline(tm), 28197 Robin Avenue, Santa Clarita California, 91350

A reminder that the there are only about two and a half weeks left to nominate a young ham age 18 or under for this years Amateur Radio Newsline Young Ham of the Year Award. The closing date is midnight on May 30th and any nominations postmarked or sent to us electronically after that date will not be counted for this years judging. This years winner will receive an expense paid trip to the Huntsville Hamfest courtesy of Yaesu USA, a week at Spacecamp Huntsville from CQ Magazine, a prize of ham radio gear and a plaque commemorating the event from us here at the Amateur Radio Newsline. Full details and a nominating form are on our website at www.arnewsline.org/yhoty. We look forward to receiving your nominations.

For now, with Bill Pasternak, WA6ITF, at the editors' desk, I'm Don Wilbanks, AE5DW, in South Mississippi saying 73 and we thank you for listening.

SB PROP ARL ARLP020
ARLP020 Propagation de K7RA

This is, after all, the peak of the current solar cycle, or close to it, so no surprise that solar indices are up. But based on past solar cycles, many of us expected more. The latest forecast predicts a peak for this cycle in Fall 2013, but of course that will be determined afterward, and based on a long running average of sunspot numbers. So don't miss this one. Don't wait until a year after the peak, then lament not being on back when. Today may have the best Spring propagation for a long time.

The past week saw average daily sunspot numbers increase by more than 34 points to 156.1. Average daily solar flux was up by nearly three points to 140.1. On Wednesday, May 15 the daily sunspot number was 186, the highest number since January 6-7, when the sunspot numbers were 186 and 196.

Predicted solar flux for the near term is 145 on May 17-18, 140 on May 19, 135 on May 20, 130 on May 21, 125 on May 22, 120 on May 23-24, 160 on May 25, 170 on May 26, 160 on May 27-28, 155 on May 29-30, 150 on May 31, 155 on June 1, 160 on June 2-3, 155 on June 4, 150 on June 5, and 145 on June 6-8.

Predicted planetary A index is 15 on May 17, 8 on May 18-19, 5 on May 20, 8 on May 21, 15 on May 22, 12 on May 23, 8 on May 24, 5 on May 25-27, 15 and 10 on May 28-29, 5 on May 30 through June 8, 8 on June 9, and 5 on June 10 and 12 on June 11.

Http://Spaceweather.com reports this morning (May 17) that a CME may strike Earth today from an X1 flare two days ago, but it is expected to be a glancing blow instead of a direct hit. NOAA predicts a 40% chance of polar geomagnetic storms. This is from sunspot group 1478, which should be pointing directly at Earth in a few days. ZDnet ran a story on this today:

http://www.zdnet.com/active-sunspot-fires-solar-flares-cme-toward-us-7000015460/

Http://space.com ran a mid-week piece on sunspot group 1478, complete with video and cinematic score:

http://www.space.com/21150-huge-solar-flares-busy-sunspot.html

OK1HH predicts quiet to active geomagnetic conditions May 17-18, mostly quiet May 19, quiet on May 20, mostly quiet May 21, active to disturbed May 22, quiet to active May 23-24, mostly quiet May 25-26, quiet May 27, quiet to active May 28, active to disturbed May 29, quiet to unsettled May 30, mostly quiet May 31 and June 1, quiet to unsettled June 2-3, mostly quiet June 4, and quiet on June 5-8.

David Moore sends along a link to a video from Phil Plait's Bad Astronomy blog on http://slate.com. This one shows time-lapse photography of aurora from Northern Michigan:

http://vimeo.com/65504232

This is a pretty high bandwidth HD video, so if you have an average broadband connection, you may want to turn off the audio and walk away from the computer for a while and let the buffer load up on data, then run the video from the beginning.

Phil Plait's commentary on the video is well worth reading, and you can find it on http://slate.com if you select "Health and Science" across the top, then page down to "Time Lapse Video."

There are a couple of space weather pages on Facebook of interest to hams. You will have to sign up for Facebook to read these, but it is free and painless. Check out http://www.facebook.com/232532740131296 and http://www.facebook.com/spacewx.hfradio.

Check out http://www.ipellejero.es/hf/english/index.html, an interesting and useful page found just by fooling around with a popular web search engine. Search about one-fifth down the page for "Solar Flux Index and Sunspots." You'll see an interesting plot correlating proton flux, solar flux and sunspot number.

Today (May 17) at 0915 UTC the http://www.spaceweatherlive.com/en site issued this alert: "There was a huge eruption on the Sun observed with class M3.21." At 0952 UTC their website said "In the past two hours there was a big solar flare with a class of M3.21."

Lee Gordy, W4KUT of Cartersville, Georgia sent this report about what he was up to over the past few days, along with a propagation query about solar flares and HF blackouts: "I participated in a GEMA/FEMA/Homeland Security exercise at Stone Mountain, Georgia this week. I was with Paulding County EMA/ARES. There were a couple dozen EMA, Fire & Rescue, LEO and National Guard MCVs gathered from all over the state for the four day event."

My guess is an MCV must be a Mobile Command or Communications Vehicle, and of course a LEO is a Law Enforcement Officer. I think

EMA must be an Emergency Management Agency.

The exercise was Monday through Thursday, May 13-16.

Lee continues, "We were tasked with many activities, including checking-in to the statewide Georgia ARES HF net (80 and 40 meters) every hour, from 0900 through 1700 local, May 14-15, using CW, Voice (LSB), and PSK31.

"ARES played a big part in the exercise.

"The HF conditions were, according to local propagation experts, supposed to be a total HF blackout. But we had no problem on 80 and 40 meters. What happened?

"There was supposed to be a black-out due to CME or some kind of disturbance. Our take? Ol' Sol cannot be tamed! Much less predicted.

"Our station (WX4PCA Paulding County ARES), observed no anomalies on 80 or 40 meters during the entire period from Monday May 13 through Thursday May 16. Go figure."

Thanks, Lee! I believe the blackout predictions were based on worst case scenarios in which solar flares could have a big effect if they were aimed squarely at Earth, but they weren't.

If you check the archives for those days at http://www.spaceweather.com/ (check the upper right, and dial in your date) you will see plenty of coverage regarding solar flares, but all were around the eastern limb of the Sun, none really geoeffective toward Earth. But check the mid-latitude indices (on the left side) at http://www.swpc.noaa.gov/ftpdir/latest/DGD.txt and you don't see a lot of activity. Plus, Georgia is way down south, and not subject to the disturbances common at higher latitudes. For example, here in Seattle I am at 47.7 degrees north latitude, but the entire state of Georgia sits between 30.7 and 35 degrees north latitude.

Jon Jones, N0JK of Lawrence, Kansas wrote: "Every dog has his day. I worked LU9EHF FF95 in Argentina on 50.130 MHz with 59 signals at 2159 UTC May 10. My antenna was a dipole in the attic over the garage, the radio a 100 watt FT-897.

"I was watching our two grand children while the XYL was out on errands. I checked the radio and DXscape from time to time in between entertaining them. At 2145 UTC K0HA EN10 spotted LU9EHF on 50.130. I tuned to .130 not expecting to hear anything, but heard some weak Spanish accented SSB on frequency. It was LU9EHF. He worked a W8 then suddenly got much louder. Very loud, way over S-9. He worked N0LWF EN10wm in Nebraska at 2157 UTC. I waited anxiously for them to finish their QSO. LU9EHF went QRZ, I dropped my call in. Bam! Luis came right back and we exchanged reports. LU9EHF is in

FF95, 8,914 km away.

"I recorded parts of LU9EHF's QSOs with K9KU EN61 and WF0N EM28 after I signed with him. Luis was so loud the speaker on the radio was distorting. Larry, N0LL EM09 spotted LU9EHF at 2220 and K0GU DN70 at 2248 UTC. I suspect a fairly high wave angle to the Es link given the strength of LU9EHF's signal on the dipole. Perhaps chordal hop Es to TEP link? It was one of the more remarkable things I have heard on 6 meters.

"Let Hercules himself do what he may, the cat will mew and the dog will have his day." Spoken by Hamlet in William Shakespeare, The Tragedy of Hamlet, Prince of Denmark. Act V, Scene 1, page 13.

See http://www.dxscape.com/ for DXscape, mentioned by N0JK.

Propagation Forecast Bulletin #20 de K7RA:

Posted: 17 May 2013 06:38 AM PDT
http://www.eham.net/articles/30193

This is, after all, the peak of the current solar cycle, or close to it, so no surprise that solar indices are up. But based on past solar cycles, many of us expected more. The latest forecast predicts a peak for this cycle in Fall 2013, but of course that will be determined afterward, and based on a long running average of sunspot numbers. So don't miss this one. Don't wait until a year after the peak, then lament not being on back when. Today may have the best Spring propagation for a long time.

CQ Announces 2013 Hall of Fame Inductees:

Posted: 17 May 2013 04:37 AM PDT
http://www.eham.net/articles/30192

(Dayton, OH - May 17, 2013) -- CQ magazine today announced its 2013 Hall of Fame inductees, adding two members each to the CQ DX and Contest Halls of Fame along with eight new members of the CQ Amateur Radio Hall of Fame.

//
Hams Improve Emergency Communications:

Posted: 16 May 2013 05:01 PM PDT
http://www.eham.net/articles/30191

Emergency communications in and out of Green Isle and throughout the area were recently improved thanks to the efforts of area ham radio operators. A group of ham radio operators recently installed a low-voltage ham radio UHF repeater atop the Green Isle municipal water tower, 135 feet off the ground. The new repeater will provide and repeat a signal. It will serve Sibley, western Carver, northern Nicollet, northern Le Sueur and western Scott counties. It fills in a "communications black hole," said Green Isle resident Don Burgess, a ham radio operator and member of the Sibley County Skywarn team. Ham radio signals operate at a different level than the 800-megahertz signal police, firefighters and paramedics use, Burgess said. The repeater can be used for communications in the event of an emergency during events like Belle Plaine's Scenic Byway Half-Marathon, Bar-B-Que Days and other area events. If a storm knocks out electricity to the area,

solar-powered backup batteries will keep the repeater working, Burgess said. He said the need for a repeater in eastern Sibley County came to light in the summer of 2010 when many tornados and frequent severe weather plagued the region and state. Burgess recalled a baseball tournament at Irish Yard in Green Isle where severe weather sent fans scurrying for cover in the Green Isle Community Center.

//
ARNewsline Report 1866 -- May 17 2013:

Posted: 16 May 2013 05:00 PM PDT
http://www.eham.net/articles/30190

The following is a Q-S-T. Hamvention 2013 is here; D-Star and kids become an important part of Hamvention; Russian Radar invades 80 meters; a California ham seeks signatures for petition on public warning legislation; the Hurricane Watch Net says it could use more Net Control Stations; registrations for International Lighthouse and Lightship Weekend ramp up and the tale of some newly developed self healing integrated circuit chips. All this and more on Amateur Radio Newsline report number 1866 coming your way right now.

SARL NEWS SUNDAY 19 MAY 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

Your newsreader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY:

MEMBERS CAN DOWNLOAD SARL LOGO'S

UPDATE YOUR REPEATER INFORMATION

CHANGES TO ALL AFRICA AWARD

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

SILENT KEY Mike Lauterbach, ZS5ML, secretary of MARC reported that the key of Fred Straus, ZS5AS, went silent during the previous month. The SARL would like to offer our condolences to Fred's family and friends.

NEWS FROM THE SARL COUNCIL During a SARL Council Meeting that was held on the 15th of May a change to the rules for the All Africa Reward was decided on. This is the topic of a separate item in today's bulletin.

It was also decided that the 2014 AGM will be held on Saturday, 12 April 2014. The 'Magalies Radioamateurklub' (MRK) will be the hosts of this event. The place and other arrangements will be announced on the SARL website and on the SARL News Bulletin.

MEMBERS CAN DOWNLOAD SARL LOGO'S A new feature has been added to the member's only section of the SARL web which will allow members to download the SARL logo for use on QSL cards and their own stationary or websites. The download page has logos in various formats with instructions on how and where the logos may be used as well as information on preferred type faces. Go to www.sarl.org.za and click on the member's only button on the top right-hand of the home page and

from there follow the links.

UPDATE YOUR REPEATER INFORMATION The long awaited Repeater Data Base programme is ready for use by all amateur repeater owners in South Africa. The problems with the hosting ISP has been resolved and after extensive on-line testing and debugging of the Data Base the program is now available to update all the information of repeaters owned by clubs or individuals. To use the program go to www.zs6fz.co.za/ click on 'Log In', click on "Create a new user' and follow the instructions to register. After the registration, log in with your username and password, claim your respective repeaters and start updating the information. The next step will be to integrate the facility in the SARL web system but in the interim please update the information as soon as possible. All repeater related requests and applications for repeaters should be addressed to repeater@sarl.org.za.

CHANGES TO ALL AFRICA AWARD The council of the SARL have accepted a proposal to allow credits on Logbook of The World (LoTW) to be used when submitting applications for the All Africa Award. The rules are currently being modified. Once finalised the new rules and details on how to use LoTW credits will be published after which applications can be submitted. Details will be given in SARL News and on the SARL Web pages.

5 MHZ OPERATION ALREADY SHOWING INTERESTING PROPAGATION PATHS A large number of SARL members have already registered to operate on the 5MHz band. The SARL recently purchased licenses for two frequencies, 5250 and 5260 kHz. The two frequencies are only available to SARL members who have registered. Check the website on www.sarl.org.za and select 'Propagation Research' in the left hand panel and follow the links. If your name and callsign are not listed you may not operate on the two 5 MHz frequencies. Use by unregistered persons amounts to unauthorised use and could result being fined by the licensing authority. Registration is normally completed within 3 days.

The SARL is considering various proposals for propagation experiments on 5250 kHz and hold a teleconference on Wednesday 22 May at 20:00 to discuss proposals. Some proposals have already been received and are being evaluated. If you have ideas, submit a proposal in as much detail as possible. Include your contact details so that you can be invited to the teleconference and receive a copy of all the proposals on the agenda. Proposals should be sent to propresearch@sarl.org.za by Tuesday afternoon 21 May. Only a maximum of 10 participants can be accommodated on the teleconference and only landlines can be accommodated.

SIGNIFICANT MILESTONE FOR SKA The first scientific paper based on observations performed with South Africa's new KAT-7 radio telescope, has been accepted for publication by the prestigious journal Monthly Notices of the Royal Astronomy Society. "This is a significant milestone for South Africa's SKA project, proving that our engineers are able to deliver a cutting-edge scientific instrument, and that our scientists are able to use it for frontier science," says Derek

Hanekom, Minister of Science and Technology. "It bodes well for the delivery of our 64-dish MeerKAT telescope, currently under construction in the Karoo, and for our ability to play a key role in building and commissioning thousands of SKA antennas over the next ten years."

Using the new KAT-7 telescope in the Karoo and the existing 26 m radio telescope at the Hartebeesthoek Radio Astronomy Observatory (HartRAO), South African and international astronomers have observed a neutron star system known as Circinus X-1 as it fires energetic matter from its core in extensive, compact jets that flare brightly. The details of the flares are visible only in radio waves. Read the full story and watch a brief video on www.amsatsa.org.za/

RSGB CENTENARY PLAQUE TO BE UNVEILED BY PRINCE PHILIP

2013 marks the Centenary of the Radio Society of Great Britain (RSGB) the 20 000 strong body that represents Britain's radio amateurs. The RSGB announced that its Patron, HRH Prince Philip, Duke of Edinburgh, KG, KT will be joining the Society for Centenary Day at the National Radio Centre at Bletchley Park on 5 July 2013. He will meet with Members and invited guests before unveiling a plaque to commemorate the Centenary. A number of activities, talks and displays are planned in which RSGB Members and members of the public can take part during the day. If you are in the UK on 5 July head to Bletchley Park for a Royal event!

THE DAY OF YLs 2013 The SA YL Group would appreciate your involvement in this event which is currently taking place.

For the 3rd time in the world, "THE DAY OF YLs" takes place from 06:00 UTC on 18 May till 18:00 UTC 19 May 2013.

The aim of the days is to promote YL's activity around the world but of course all OMs are invited to participate. Bands to use are: 3,5 - 7 - 14 - 21 - 28 MHz. To help competitors to find each other it is proposed to use frequencies +/- 10 kHz from the following activity center frequencies: CW: 3,533, 7,033, 14,033, 21,033 and 28,033 MHz RTTY: 3,588, 7,044, 14,088, 21,088 and 28,088 MHz SSB: 3,733, 7,133, 14,213, 14,240, 14,300, 21,233, 21.400 and 28,433 MHz Exchanges: RS(T) + YL/OM (e.g. 59(9)+ YL/OM) The same station may be worked once on each band and mode.

Points accumulate as follows: For OM/YL 2 points For YL/YL 3 points For YL/OM 1 point.

Mail logs to f5isy@orange.fr not later than 26 May.

COMPETITION NEWS The May 2013 issue of CQ Magazine lists the results of the 2012 CQ WW DX CW Contest held in November 2012. There is a good showing of stations from Southern Africa.

Congratulations to Bernie van der Walt, ZS4TX, who achieved second place in the World in the Single Operator High Power 15 metre category.

Congratulations also to 7P8D, who achieved a second place in Africa in the multi-operator two-transmitter category and 41st out of 72 stations worldwide.

The second leg of the SARL Digital Contest will be run on Sunday 26 May from 13:00 to 16:00 UTC with PSK and RTTY operation on 80, 40 and 20 metres. A station my be contacted twice per band, once on PSK and once on RTTY. The exchange is a RST report and a serial number starting at 001. Log sheets must be submitted by Monday 3 June to contest@sarl.org.za. Find the rules on page 42 of the 2013 SARL Contest Manual.

The CQ WW WPX CW Contest is on the air from 00:01 UTC Saturday 25 May until 23:59 UTC on Sunday 26 May with activity on 160, 80, 40, 20, 15 and 10 metres. The exchange is a RST report and a serial number starting at 001. Single operators may only work 36 of the 48 hours. Find all the rules at www.cqwpx.com/rules.htm

CLUB NEWS No Club news was received the previous week.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

HF PROPAGATION REPORT Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at moderate levels. The sun is peppered with several large sunspots but only AR1748 has a delta class magnetic field that harbours enough energy for X-class flares.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 89. The geomagnetic field may be unsettled.

All the bands from 20 to 10 m will provide lots of DX fun with 15 m providing the best openings with 20 m not far behind. There will also be some good 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS 25/26 May - CQ WW WPX CW Contest 26 May - Second leg of the SARL Digital Contest 26 May - Logs for The Day of the YLs to be in to f5isy@orange.fr. 31 May - Last day to submit suggestions on the type of activity young Amateurs in South Africa would like to see included in 2014 Youth Week programme. Send your suggestions to youth@sarl.org.za. 31 May - Last day to submit logs for the Antique Wireless Association AM/SSB Valve QSO Party to andy.cairns@xsinet.co.za. 2 June - Deadline for submitting SARL Digital Competition logs. 15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 22/23 June - Second weekend of International Museums Weekend special event.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 025, and 17 660 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. The website also lists various other retransmissions. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za. Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by Louis Kirstein, ZS1LK.

Thank you for listening, 73.

/EX

CQ announces 2013 Hall of Fame Inductees

Posted: 17 May 2013 12:41 PM PDT
http://forums.qrz.com/showthread.php?391641-CQ-announces-2013-Hall-of-Fame-Inductees&goto=newpost

CQ announces 2013 Hall of Fame Inductees

CQ magazine today announced its 2013 Hall of Fame inductees,
adding two members each to the CQ DX and Contest Halls of Fame along with
eight new members of the CQ Amateur Radio Hall of Fame.

The CQ Amateur Radio Hall of Fame honors those individuals,
whether licensed hams or not, who have made significant contributions to
amateur radio; and those amateurs who have made significant contributions
either to amateur radio, to their professional careers or to some other
aspect of life on our planet.

The 2013 inductees (listed alphabetically) are:

* Evelyn Garrison, WS7A (SK) - amateur radio industry leader

* Joel Kleinman, N1BKE (SK) - former Managing Editor of QST
magazine

* Laurie Margolis, G3UML/GPC3L - Longtime BBC correspondent and
contributor to amateur radio magazines

* Michael Owen, VK3KI (SK) - Longtime president of the
Wireless Institute of Australia and chairman of IARU Region 3

* Harry Rubinstein (ex-9EEV) (SK) - Inventor of the printed
circuit, the slider potentiometer and the combination potentiometer/on-off
switch

* Walker Tompkins, K6ATX - Journalist, author and historian,
his three dozen books included several well-known ham radio-related novels

* Joe Walsh, WB6ACU - Rock music performer and Rock & Roll Hall
of Fame inductee

* William G. (Bill) Welsh, W6DDB (SK) - CQ Novice Editor for
20 years; responsible for helping thousands to get their ham licenses

CQ DX and Contest and DX Halls of Fame

The CQ DX and Contest Halls of Fame honor those amateurs who not only excel in personal performance in these major areas of amateur radio but who also "give back" to the hobby in outstanding ways.

The 2013 inductees to the CQ DX Hall of Fame are:

* Vladimir Bykov, UA4WHX/AC4LN, has visited and operated from over 100 DX entities in the past ten years and operated from all six continents in 2012 alone. Has provided over 700,000 DX contacts for hams around the world (and QSLed them all).

* Robert "Gary" Dixon, K4MQG, is a founding member of the Carolina DX Association and as Founding President of INDEXA, the International DX Association, which has helped support over 200 DXpeditions in the past 30 years.

The 2013 inductees to the CQ Contest Hall of Fame are:

* Dale Green, VE7SV, is a world-class contester who has been hosting teams of new and experienced contesters at his superstation for the past 20 years, and recently helped start a contest group in Chile.

* Charles "Chas" Fulp, K3WW, also a multi-award winning contester and past president of the Frankford Radio Club (FRC), which saysChas "is our role model and sets the standard for other FRC members to strive to achieve."

Formal inductions to the CQ Contest and DX Halls of Fame were scheduled for the Dayton Hamvention.® More detailed descriptions of inductees will appear in the official announcement in the July 2013 issue of CQ magazine.

WIA Submission to ACMA on High Power Trial:

Posted: 17 May 2013 05:04 PM PDT
http://www.eham.net/articles/30198

The WIA has lodged a submission to the ACMA concerning the High Power Trial. The WIA submission is based on responses received from trial participants following a call for information, and also on its own observations. The WIA's submission (below) notes that the trial appears to have gone very well, with licensees generally having a sound understanding of the self-assessment process and the use of EMR assessment tools. The WIA also notes that it is not aware of any incidences of interference to other spectrum users, or an increase in interference to other Radio Amateurs, or an increase in the noise floor on affected amateur bands. Many responders noted that the advantage of the higher power was most evident in contesting, when many stations are calling on the same frequency and all at once, and the relatively small 3-4 decibel increase in radiated power (from 400W pX to 1kW pX) can make all the difference in being heard.

//
Peter Brown, VK4PJ (SK):

Posted: 17 May 2013 05:03 PM PDT
http://www.eham.net/articles/30197

Peter Brown became a silent key on the 8th of May 2013 - He had only recently chalked up the century - he was 100 years old. Peter was a WIA stalwart, being the national contest manager during the 70~80s. He was behind the introduction of the WIA Contest Trophy, one that was before its time - these days with results of contests able to be produced much more quickly the trophy has been reintroduced in 2012/13 a fitting tribute to his love of the hobby. The trophy bears his name and callsign and will be awarded at the WIA AGM in Perth this year after an absence of some 25 years. It is believed by his friends that Peter was first licensed in the early 1950's. There is evidence that he was issued with Amateur Radio licence QA.244 on 12 May 1963 so we can say with some certainty that he has been licensed for well over 50 years.

Region Tunes in to Hamvention:

Posted: 17 May 2013 05:02 PM PDT
http://www.eham.net/articles/30196

DAYTON, Ohio (WDTN) - Nearly 25,000 amateur radio operators from around the world are expected at the 62nd Annual Dayton Hamvention May 17-19 at the Hara Complex.

//
Smartphone Satellites Snap Some Amazing Photos:

Posted: 17 May 2013 05:01 PM PDT
http://www.eham.net/articles/30195

Three consumer smartphones that were sent into orbit around Earth last month snapped some incredible photos of our planet from space. The images were snitched together as part of NASA's PhoneSat initiative, which aims to show how existing technology could be incorporated into powerful low-cost satellites. Named Alexander, Graham and Bell, the trio of tiny cube-shaped PhoneSats was launched into orbit during the inaugural test flight of Orbital Sciences Corp.'s Antares rocket on April 21. Each PhoneSat had a smartphone for a brain. Alexander and Graham : both PhoneSat 1.0s : were battery-powered and carried a Nexus One smartphone running Goggle's Android operating system. Bell was a more advanced PhoneSat 2.0, built around a Nexus S smartphone running on Android. The nanosatellite was also outfitted with solar panels and a two-way radio that allowed engineers to control the satellite from the ground. What's perhaps most remarkable is that they were cheap. The three PhoneSats cost just $3,500 to $7,000 each; most satellites can cost upwards of $1 million. As part of this demonstration, the smarthphones' cameras captured photos of Earth and converted them into image-data "packets" to be beamed back on the amateur radio spectrum. These packets were then decoded and put together by the PhoneSat team and amateur ham radio operators.

//
Fallout from Huge Solar Flare to Sideswipe Earth:

Posted: 17 May 2013 05:01 PM PDT
http://www.eham.net/articles/30194

A huge explosion on the sun will deal Earth a glancing blow Friday but should not pose a threat to the planet, scientists say. The sun storm erupted late Tuesday during a powerful solar flare -- the fourth unleashed by a single sunspot in just 48 hours -- and hurled a massive cloud of charged particles out into space at millions of miles an hour. Such eruptions -- known as coronal mass ejections, or CMEs -- can wreak havoc if they hit Earth squarely, temporarily disrupting GPS navigation, satellite communications and power grids. But this one isn't aimed directly at us, so there's no cause for alarm, experts say.

DXNL 1836 - June 12, 2013
DX Newsletter

a free and weekly service of
DARC Committee "DX and HF contesting"
(http://www.darcdxhf.de)

Editor: Johannes Amchewicz, DK8JB
(e-mail: dxnl@dxhf.darc.de)

translation by: Oliver Bock, DJ9AO
(e-mail: dj9ao@darc.de)

7Q, Malawi:
7Q7DFC will leave Malawi in the next days and return to the USA. QSLs will still be available through his manager OE4VIE (now also OQRS). During the last months David managed to make a significant number of QSOs with Europe on 6m.

A2, Botswana:
Roger (ZS6RJ) plans to get on the air as A25RJ from Tuli Block for 4 or 5 days, starting June 15. QRV on 80-10m in CW and RTTY. QSL direct via h/c, LotW.

A5, Bhutan:
Yuki, JH1NBN, returns to Bhutan as A52W until the 19th of June. QRV mainly on 40, 20, 17, and 15m in SSB. QSL via h/c, direct only.

DL, Germany:
Karl, DL1JKK, will activate Mylan Castle (WCA DL-01267, COTA-DL SAX-161) during the weekend 15/16th of June.

F, France:
TM24H continues to operate on the occasion of the 24 Hours of Le Mans until the 23rd of June. QRV in SSB, CW, and digital modes. QSL via F6KFI.http://asso.proxiland.fr/aras72/

The Amateur Radio Club ALPR in Perigny (F6KAP) will activate the special event call TM350FDR for the June 15 - 16 weekend. The suffix indicates "Filles Du Roi" (The King's Daughters) and refers to a group of young women who left France 350 years to settle in Nouvelle France (North America). QSL via F6KAP (B).

The radio club of Laval-Fourches celebrates its golden jubilee with the call TM50QF until June 15. QSL via F6KSU, eQSL.

TM88CE is activity from the Chateau d'Epinal (DFCF 88-006), run by the Radio Club du Vosges. QRV June 15 & 16 with 2 stations, mainly on 80 and 40m in CW and SSB. QSL via F6CSQ (B). http://www.ra88.org/

G, England:
GB2BCN operates in the context of a celebration of 200 years of the Narrow Canals, a network of waterways in the Midlands. For QSL info see qrz.com.

Amateur Radio in Great Britain celebrates its centenary this year. Among the first clubs to receive a transmitting permit was the "Barrow Wireless Association", which was assigned the call RXY on the 26th of June 1913. GB100RXY continues to honour this historical moment until the 2nd of July. QSL via G4USW, direct only, eQSL. http://gb100rxy.com/

H4, Solomon Islands:

Greg, VK1AI, will be active as H44PA from Honiara until June 30, mainly in CW. QSL via h/c (B).

HI, Dominikanische Republik:
JA 1/4 rgen, DL4SDW, announces his intention to get on the air as DL4SDW/HI3 from the 17th of June till the 26th of July during his spare time. QRV on HF, mainly in CW with some SSB and digital modes. QSL via h/c, bureau preferred.

I, Italy:
The special event station II5MD (until June 16) draws attention to the life of the Italian inventor Antonio Meucci. He presented the prototype of a telephone in 1860 and tried unsucessfully to claim patent rights against Alexander Graham Bell in the 1870s. QSL via bureau.

JA, Japan:
8N6MMTTY operates in the context of the Okinawa Amateur Radio Day 2013. Activity will continue until November 30. QSL via bureau.

8J8RD1OO will get on the air for 100 years of Hakodate's tram service. QRV June 14 & 15. QSL via bureau.

8J170ICK celebrates the 70th anniversary of the Ichikawa Technical High School until march 2014. QSL via bureau.

LX, Luxembourg:
Marc, ON7SS (OO9O) visits Luxemburg between the 17th and 20th of June and plans some activity as LX/OO9O; mainly on 30m in CW and PSK. QSL via ON7SS, LotW, eQSL.Sophie, F4DHQ, and her team will be QRV during the 44th SAARLORLUX meeting (14-16th of June) as LX0SAR. QRV on all bands and modes. QSL via DK4XC.

ON, Belgium:
Ivo, ON7IVO, will get the castle Zandvliet (WCA ON-01931, BCA AN-207) on the air for the World Castles Weekend (WCW) (15/16th of June).

OZ, Denmark:
Andreas, DG3XA, plans to set up a station for 6m (1kW and 3 element yagi) as OZ0TX from JO46bh. QRV 15th - 21st of June, also on 80m. QSL via h/c.

PA, Netherlands:
Hoogeveen's amateur radio club celebrates its 35th anniversary with the call PI35HGV until June 28. QSL via bureau.

PY, Brazil:
Brazil is hosting this year's FIFA Confederations Cup. PS2013CCB will operate from the 15th to the 30th of June, QRV on 40-10m in CW, SSB and digital modes. QSL via PS7AB (bureau only; email request: <ps7ab[at]yahoo.com>), LotW, eQSL.

SP, Poland:
SN0DCH (QSL via SP6FRF) and SN0KWF (QSL via SP6OPZ) are two stations operating for the national stamp collectors exhibition in Chojnow; QRV June 15 - 24.

Accompanying the successful "Welcome Spring Award" is the new "Welcome Summer Award". Between the 16th and the 26th of June the special event stations 3Z1LATO (via SQ1NXN), 3Z3LATO (via SP3SBY), HF1LATO (via SQ1KSM), HF3LATO (via SP3GVX) und SN1LATO (via SQ1KSL) will be providing the necessary points for the award. Calls will be UT4UZA/p (QSL via UX7UN) and homcalls/p.

V3, Belize:
Jim, W8ERI, wants to operate holiday-style from Ambergris Caye (NA-073) from the 12th to the 19th. QRV as V31ZF from 80-10m in SSB. QSL via h/c.

XW, Laos:
Champ, E21EIC, announces an activity from Laos as XW0YJY between the 15th of June and the 14th of September, including the AA CW Contest. QSL via E21EIC, LotW.
https://www.facebook.com/SomChamp http://www.e21eic.net/

ZP, Paraguay:
Manu, ZP9MCE, Antero, ZP9CN, Francisco, ZP9GB, and Derlis, ZP9DK, members of the "Radio Club Paraguay Filial Itapua" (ZP9EE), are joining forces as ZP99E from a World Heritage Site, the ruins of a Jesuite settlement (La SantA-sima Trinidad de Parana and Jesus de Tavarangue). QRV June 12 - July 21 on 40, 30, 20, 15, 10 in CW, SSB, and some PSK31. Log will be uploaded to ClubLog. QSL via EA5ZD, direct only.

Galileo Special Event:

PI9ESA and II0ESA honours the European Satellite Navigational System "Galileo" from the 14th till the 23rd. QSL for PI9ESA via DL3LUM, for II0ESA via IZ0FEJ.
https://sites.google.com/site/hamradiogalileo/home

International Museums Weekend:
Harry, M1BYT, asks radio amateurs to take part in the "International Museums Weekend" (June 15/16 and 22/23) and set up a station in connection with an exhibition, museum etc. Up to now 36 stations have registered. http://www.ukradioamateur.co.uk/imw
http://myweb.tiscali.co.uk/m1byt/page4.htm

World Castles Weekend:
Check the website http://www.wcagroup.org for all information regarding the Weekend on the 15th and 16th of June.

QSL Status TX5K:

Bob, N2OO, reports that his team will begin to send out TX5K-QSLs by the end of June. http://ky6r.com/

Pick up DX-QSLs in Friedrichshafen from the Swiss DX Foundation for the following calls:

4U1ITU, 4U1WRC (2012), 3B9SP, 3B9FR (for QSOs from October 2012 onwards), HB9SOLAR, HB9SPACE; please have your QSO details ready.

DXCC:
VU7KV - Lakshadweep Islands (Mai 2013) has been approved for DXCC credit.

Silent Key:
Hermann, 5Z4RT, died on the 4th of April.

Tim, WJ0G, was killed on the 31st of May while monitoring a tornado in Oklahoma.

Our thoughts are with their family and friends.

IOTA Compiled by Klaus, DL7UXG (E-Mail: iota@dxhf.darc.de)

AF-022; ZD7; St. Helena Island: Bob, well known as VP8LP, will pay
a visit to St. Helena (WLOTA 1488) as ZD7LP until the 14th of June.
QSL via VP8LP, direct only.

AS-043; JA1; South Izu Islands: Ted/JF1CCH signs /1 from Hachijo Island (JCG 10006) from June 14 - 17. The island is part of JAFF-009. QRV on HF, mostly in CW. QSL via h/c (d/B).

EU-002; OH0; Aland Islands: Pete/OH2BEE and Raimo/OH2BCI will be on the air as OG0W from the 14th to the 17th. Their main objective is the the AA CW Contest. QSL via LotW and OH2BEE (d/B).

EU-027; JW; Bear Island: Svein/LA9JKA will spend the next months until mid-December on Bear Island (beginning June 16). He hopes to get active with the call JW9JKA during his spare time, QRV on 160-4m. QSL via LA9JKA, direct only.

EU-043; SM6; Goteborg och Bohus/ Halland County group: Bernd, DL8AAV, will spend his holiday on Orust from the 17th till the 29th of June, using the call SD1B/6. QSL via DL8AAV (d/B).

EU-084; SM5/SM0; Uppsala/ Stockholm County group: Vaxholm Island will be activated by Bodo/DF8DX June 17 - 19 as SM0/DF8DX. QSL via LotW and DF8DX (d/B).Fogdo Island is yet another stop on Keith's (G3TTC) Swedish and Norwegian IOTA Tour on the 16th and 17th of June. QRV as SM/G3TTC/p mainly on 14260 and 7055. QSL via G3TTC (d/B).

EU-093; EA5; Alicante/ Murcia Province group: Manel/EA3EGB announces his activation of Benidorm Island (DIE E-007, WW Grid JM08) and the local lighthouse (FEA E-0172, WLH EA-003, WLOL SPA-165, WLOTA 3329, Admiralty E 0172) as EA3EGB/5. QRV on 40-6m in SSB and RTTY. QSL via h/c (d/B) and LotW.

EU-101; OH6; Lansi-Suomi (Vaasa) Province group: Thomas/SM3DMP and Jan/SM3CER plan to operate from Bjorkon Island as OH/SM3DMP and OH/SF3A June 16 - 19. QRV "holiday-style" on 30, 20, and 17m, mainly in CW. QSLs via h/c (d/B).

EU-166; I*9; Sicily's Coastal Islands: Depending on weather conditions operators Maurizio (IT9BWD/p), Peppe (IT9BWW/p), Riccardo (IT9CVO/p), and Giuseppe (IT9HBS/p) plan to get on the air from the Isola dei Porri (IIA RG-001, MIA MI-078, WLOTA 3691) on the 15th of June. QSLs via h/c (d/B).

EU-177; SM5; Sodermanland/ Ostergotland County group: Yet another stop on Keith's (G3TTC) Scandinavian tour is Kattilo, scheduled for June 12 - 14. QSL via h/c (d/B).

NA-023; VP2V; British Virgin Island: Dave/W9DR plans a 6m activation of Anegada Island (WW Loc.FK78tr). QRV as VP2V/W9DR from the 14th to the 28th of June on 50115 (SSB) and 50115.6 (CW; also

his beacon qrg). QSL via h/c, direct only.

NA-035; HR; Santanilla Islands: The Honduran IOTA DXpedition will get Swan Island on the air June 16 - 20. HQ8S will be operated by Dan/HM2DMR, Johnny/HQ2JCM, and HQ2DOM in SSB, CW, and RTTY. QSL via LotW and direct via KD4POJ. http://www.hriotas.com/

NA-204; CO5/CO6; Matanzas/ Villa Clara/ Sancti Spiritus Province group: Reynel/CL6RLD, Jose/CO6EC, Ore/CO6LC, Luis/CO6LP, Amaurys/CO6WYR, and Yordany/CO6YAC plan to sign T46C from Cayo Santa Maria Island June 13 till 17. They want to operate 2 or 3 stations continuously, one for SSB, one for CW, and a third depending on band conditions. QSL direct via EA5GL.

OC-073; JD; Minami Torishima: Take/JG8NQJ returns to Marcus Island (WW Loc. QL64xg, JCG #10007) mid-June. He works for the local weather station and hopes to get on the air during his free-time as JG8NQJ/JD1 on 17-10m, mainly in CW and some SSB. He usually stays for as long as 6 to 8 weeks on the island. QSL via JA8CJY (d) or JG8NQJ (B).

OC-086; KH0; Northern Mariana Island: Tony/JA6CNL will get QRV as KH0N from Saipan Island around the AA DX Contest. QSL via JA6CNL.

WWFF activities
�����
DLFF-032 Biosph�renreservat Vessertal-Th�ringer Wald
Hans/DO2HRB will activate this area on the 15th and 16th as DO2HRB/p. QSL via h/c.

FFF-1253 - Moncteaux les Meaux
Chris/F4GTB and Fabien/F4GYM will visit this area and the local castle (DFCF 77187) on the 15th and operate as F4GTB/p. QRV on 80-10m in PSK and SSB. QSL via LotW and F4GTB (d/B).

Joao, CU3AA, manager of the Azores Flora Fauna Award (AFFA) announces the award's new website:

Original 13 Colonies Special Event 2013

Posted: 12 Jun 2013 04:28 AM PDT
http://forums.qrz.com/showthread.php?394630-Original-13-Colonies-Special-Event-2013&goto=newpost

13 Colonies Special Event

INDEPENDENCE WEEK

JULY 1-6, 2013

CT-DE-GA-MA-MD-NC-NH-NJ-NY-PA-RI-SC-VA

The 2013, 13 Colonies stations will operate from 09:00 AM Eastern Daylight Savings Time (1300Z),on July 1st, to 12:00 PM (midnight) Eastern Daylight Savings Time, July 6 (0400Z, July 7)

There will be at least two S.E. stations per colony state. Also included will be Super contest stations, multi-operator Club stations and OM & XYL teams

The total QSO count for 2012 was 62,079 - expect MORE in 2013!

The theme for 2013 will be "Banners of the Revolution". The certificate is printed on heavy card stock. Stations working one state or, as many as all 13, will be eligible for the certificate. A "Clean Sweep" indicator will be affixed, for those lucky enough to "Q" all 13. A special endorsement will be attached for stations contacting our sister operation, WM3PEN, in Philadelphia, PA.

MMMonVHF Newsletter No. 1/ WEEK 23 2013

Hallo dear MMMonVHF friends,

please find below our latest NEWSLETTER from the VHF-DX-Portal
"Make More Miles on VHF" (www.MMMonVHF.de), dated 2013-06-12
We try to distribute our Newsletter, once a week on thursday;
if any special activity will make it necessary
we will inform you with Breaking News or a Special NL-Edition.
For further details please be so kind and look at our "News"-page
http://www.mmmonvhf.de/latest.php - you are welcome for any
input and we hope you will enjoy the VHF-DX-Portal MMMonVHF!

//
City Of Roseville Emphasizes Ham Radio Involvement At Tornado Drill:

Posted: 11 Jun 2013 06:09 PM PDT
http://www.eham.net/articles/30278

ROSEVILLE (CBS13) -- Following the recent devastating and deadly tornadoes in Oklahoma, Roseville city officials are doing their part to prepare for a similar catastrophe in their area. Twelve different agencies gathered in Placer County on Tuesday for a tornado drill where they discussed the importance of good emergency communication. "I wouldn't imagine somebody going to a boxing ring unless they practiced boxing a little first. You'll get knocked out, and I think that's the same scenario here," said Chuck Minton, the emergency coordinator for Placer County Amateur Radio Services. Roseville is being proactive instead of being reactive about emergencies. "This is why we practice, to get them in the proper mindset and so they have those tools to draw from when we do have a disaster," said city of Roseville Emergency Preparedness Manager Pete Hnat. The exercise emphasized communication and the city brought in local ham radio operators to assist. The radios were a tool used during and after the recent tornadoes in Oklahoma.

//
Feeling Supersonic About Radio Communications:

Posted: 11 Jun 2013 06:07 PM PDT
http://www.eham.net/articles/30277

Supersonic heterodyne. Now that's something not often heard in daily conversation. But the term came to mind at the recent Newton Longville Festival of Transport, while perusing the radio amateurs stall. For there on display was a radio set made during WW2 for clandestine use by secret agents. In fact such equipment was manufactured in the grounds of Whaddon Hall, and this area has quite a connection with radio matters. Born in 1872 Alfred Peerless joined the Telegraph Battalion of the Royal Engineers and when Marconi conducted early wireless experiments on Salisbury Plain he was detailed to maintain liaison between the transmitter and the receiver. During WW1 he became an instructor at Staple Hall, Fenny Stratford, where in 1917 the personnel of the Royal Engineers (Wireless) Depot arrived. During WW2 secret transmitters in the local countryside broadcast 'black' propaganda to the enemy, and among other activities from Whaddon Hall and its outstations radio communications were maintained with secret agents. Whaddon also handled the radio traffic of Bletchley Park and after the war

the operation became the Diplomatic Wireless Service. Centred at Hanslope Park, for many years a feature was the forests of radio masts. However, these disappeared with the advent of satellite communication.

//
Thank You to Owners of Repeater Systems:

Posted: 11 Jun 2013 06:05 PM PDT
http://www.eham.net/articles/30276

CORBIN -- When you hear people say "ham radio" or "amateur radio" what do you think of? Perhaps a licensed citizen band radio, or maybe you think about a radio the size of a window air conditioner. In some cases, you may be correct in your thinking. Some people who are amateur radio operators may have started out talking on the citizens band. The desire to be able to communicate over longer distances or talk without all the static and hiss of the AM band associated with the CB may have prompted them to study and get their amateur radio license. I have had my license now for several years. Although I may not use the historic Morse code mode of communication, I have used many of the other modes available. When I started with my technician license I, like most technicians, utilized many of the local FM repeaters in the area to communicate. I heard various strangers on the airwaves only to have them become very good friends. You could hear anything from fishing reports to local and national news events discussed on the airwaves. Many amateur radio operators share all kinds of different hobbies and those with common interests enjoy talking or listening about those hobbies. Other people use their amateur radios as a means of communication when no other communications will work. Imagine picking up the phone, turning on the TV or turning on the computer just to find out that it is not working.

//
NASA Captures Image of Massive Solar Flare:

Posted: 11 Jun 2013 06:03 PM PDT
http://www.eham.net/articles/30275

As the sun reaches peak intensity of its 11-year sun cycle, solar flares become increasingly common. This latest solar flare was ejected from the sun at approximately 6:49 p.m. on June 7, 2013 and was powerful enough to disrupt long-range communications. NASA's Solar Dynamics Observatory captured the images. The flare, classified as an M5.9, was an ejection of moderate intensity capable of producing mild space weather effects around Earth. The National Oceanic and Atmospheric Administration reported a temporary radio blackout. Powerful solar flares can disrupt communications by blasting Earth's ionosphere with X-ray and UV radiation.

Scouts National Jamboree - July 5-13, 2013
2013-06-12

Scouts Canada will be holding a National Jamboree in Alberta at Camp Woods Sylvan Lake near Red Deer. We will have an Amateur Radio station and will be using the call signs of VE6JAM and VA6JAM. The Jamboree will be from July 5 to July 13. We will be on HF (JOTA Frequencies), and VHF/UHF and PSK31 and plan on contacting the International Space Station.

New GB3WGI 144MHz transatlantic beacon goes live with G2FKZ legacy funding

Posted: 12 Jun 2013 02:13 PM PDT
http://forums.qrz.com/showthread.php?394710-New-GB3WGI-144MHz-transatlantic-beacon-goes-live-with-G2FKZ-legacy-funding&goto=newpost

New GB3WGI 144MHz transatlantic beacon goes live with G2FKZ legacy funding

The GB3WGI Transatlantic 144MHz amateur radio beacon went live at 1600 GMT on the 4th of June in time for the peak of the 2013 Sporadic E season.

The beacon runs 100 Watts EIRP in CW and JT65b modes on 144.487MHz and is located in the West of Northern Ireland (IO64bl). The plan is to apply for an increase in EIRP in due course.

The beacon's function is to provide an early warning of 144MHz Transatlantic propagation on the Europe to USA path as a complement to the existing 144MHz Transatlantic beacon network in the USA which provides alerts on the USA to Europe path.

It also aims to encourage participation in the IRTS Brendan Trophy and to further study the propagation path using weak signal digital modes (WSJT) developed by Nobel Laureate Professor Joe Taylor K1JT.

It is hoped that the project will benefit radio amateurs interested in 144MHz long distance weak signal working as well as those generally interested in digital modes, and could provide the first real evidence of transatlantic propagation from the US to North West Europe.

Current 144MHz European transatlantic beacons are much further to the South and/or East in Cornwall, France and the Azores. GB3WGI has a clear sea takeoff to the eastern seaboard of the USA.

The beacon was supported by a number of amateur donations including The City of Belfast Radio Amateur Society, but the major donation of £500 was made by the RSBG Propagation Studies Committee from the legacy left by the late Charlie Newton G2FKZ. The bulk of this went on the beacon, the remainder to fund beacon driver development for future beacons. Charlie Newton, wrote the definitive book on radio auroras, and was acknowledged as one of the leading experts on the topic of VHF propagation. He was for many years a leading light in the Radio Society of Great Britain (RSGB) Propagation Studies Committee.

Acknowledgements also go to Brian WA1ZMS who inspired the concept of
GB3WGI, Andy G4JNT who designed and built the driver, Powabeam Antennas
and The DX Shop who supplied parts for the antenna system, to James G3RUH
who provided a GPSDO reference, to Murray G6JYB for Ofcom liaison, to John
GI4BWM and Dave GI4SNA and of course to beacon keeper and site manager
Gordon Curry GI6ATZ who really drove the project through to completion.

APRS Messenger Android app now released

Posted: 12 Jun 2013 02:05 PM PDT
http://forums.qrz.com/showthread.php?394709-APRS-Messenger-Android-app-now-released&goto=n
ewpost

APRS Messenger Android app now released

I've just released a new APRS app for Android phones and
tablets so that radio amateurs can send APRS position beacons and messages
from an Android phone or tablet over a 3G or Wi-Fi link to the APRS-IS
internet system. It can also link by Bluetooth to the new Bluetooth
version of the APRS TNC Digi Tracker.

I've designed it to be simple to use as it only needs the
user to enter a callsign and APRS passcode to get started. The APRS beacon
rate is fixed at 3 minutes and the message decay is set at 31 seconds so
that it can send messages to VHF APRS stations via a two way APRS igate.

Menu options include GPS position information including WGS84
location for worldwide use and OSGB location including National Grid
Reference for UK users. Another menu option also opens an OpenStreetMap
centred on the GPS fix.

The app can be used on any Android phone or tablet with GPS
(and Bluetooth for use with the Bluetooth version of the Digi Tracker).

The app can be downloaded from the Google Play Store.

More information on a new web page:

http://www.crosscountrywireless.net/...r_android.html

There is a small charge for the app to help pay for the
development tool licensing fee and paracetamols!

Regards,

Chris, G4HYG

Ham's Help Fight Terrorism

Posted: 12 Jun 2013 06:34 AM PDT
http://forums.qrz.com/showthread.php?394648-Ham-s-Help-Fight-Terrorism&goto=newpost

Breaking NewsNewington, CT

Sources inside ARRL confirm a new public service program to aid our
government in the war on terror. LOTW logs are being shared with the
National Security Agency. This monitoring of our communications with
foreign nationals began 2 years ago and is apart of the program known as
PRISM. Our leaders in ARRL were on capitol hill to protect our valuable
spectrum and in order to keep from loosing the 440 UHF band the ARRL agreed
to provide direct access to all LOTW data.

Recent server upgrades of LOTW and recent crashes of LOTW happened as a
result of implementing this new cooperation with the government.

Hams do a great job in keeping accurate logs and in keeping our tradition
of providing public service it now makes "hams" not only valuable in
disaster relief but in protecting the nation from terrorism.

RAC Bulletin 2013-021E - Power Line Interference Contact Information
2013-06-10

Industry Canada has just posted contact information to report Power Line Radio Interference. This information covers all the major Power Line companies in Canada. The posting can be found at: <http://www.ic.gc.ca/eic/site/smt-gst.nsf/eng/sf10641.html>. The information is provided with the cooperation of the Canadian Electricity Association and its member power utilities. Radio Amateurs in Canada are encouraged to use this contact and reporting information when confronted with suspect power line interference. Radio Amateurs of Canada is pleased to see the release of this information which is the culmination of ongoing discussion at meetings of the Canadian Amateur Radio Advisory Board (CARAB) between RAC and Industry Canada.

Norm Rashleigh, VE3LC
RAC representative to the Radio Advisory Board of Canada (RABC)

WIANEWS WEEK COMMENCING JUNE 16 2013.

WIA GO TO MEETING

WIA QSL BUREAU ADDRESS CHANGE.

WIA CONTEST WINTER VHF-UHF FIELD DAY

THESE STORIES AND MORE IN THIS EDITION OF NEWS FROM THE WIRELESS INSTITUTE
OF AUSTRALIA FOR WEEK COMMENCING JUNE 16 2013.

RSGB Centenary Day July 5

The RSGB Patron, HRH The Duke of Edinburgh is indisposed and, as a result,
will not be able to be present on the Society's Centenary Day.

Her Majesty's Lord Lieutenant of Buckinghamshire, Sir Henry Aubrey-Fletcher,
Bt JP has kindly agreed to officiate in his stead.

WIA BOARD TALK

As we mentioned on last weeks news the new WIA board has been formed.

News in this week is that the new WIA board has scheduled it's first
board meeting to take place next week using an online video conference

technology known as "Go To Meeting".

WIA director Robert Broomhead VK3DN said this week, that being able to have regular monthly meetings using video conference technology will help to improve communications between the various board members as well as reducing costs to the WIA associated with holding face to face meetings.

At it's first meeting the WIA board will formally elect its President and Vice President and will be discussing a number of important matters including progress on the ACMA's evaluation of the high power trial.

QSL BUREAU

Check out the new address for the QSL bureau, it's on wia.org.au

OUTWARDS bureau mailing address is now. PO BOX 66 Boolaroo NSW 2284.

HAMS ACROSS AUSTRALIA.

Community broadcasters with spurious signals

An Australian and Communications Authority (ACMA) audit of FM community radio transmit sites found 28 per cent of them sending out spurious emissions along with the allocated frequency.

A significant number of those transmitters were emitting into the aeronautical radiocommunication band of 108-136 MHz.

The ACMA says this could potentially cause interference to this nearby aviation band and to the safety of aircraft.

It wants community broadcasters to maintain clean signals on air.

Most problems are fixed by the use of antenna filters that limit the emission of unwanted spurious signals.

ACMA have identified some simple ways to check the health of radio transmissions:

Are there any changes in transmitter meter readings?
Is the transmitting equipment overheating?
Is there a change in transmitter power levels?
Is there any damage or deterioration to the antenna or antenna cable?

Spurious emissions are easily detected with a spectrum analyser. This means that an assessment by a technical expert is often the most effective method of identifying spurious emissions. Using a "scanning" type receiver across the aeronautical band may give an indication of spurious emissions.

Licensees or operators of community based radio broadcast services who need advice on interference resolution matters can contact the ACMA or Airservices Australia via email:

ACMA - interference@acma.gov.au
Airservices Australia - interference@airservicesaustralia.com

(Jim Linton VK3PC/Radio Info)

(ED:- Of course I'm sure the 2 community stations that take this WIA National News service, namely TANK-FM in Kempsey and Trax FM 105.1 upper Spencer Gulf would not fall into this category! HiHi)

Winter VHF-UHF Field Day

The Winter VHF-UHF Field Day will be held over the weekend of June 22 and 23.

The Field Day includes sections for portable, home and rover stations, and if you prefer you can enter the 6 hour section rather than the full 24 hours.

Full details were published in the May issue of "Amateur Radio" magazine, and you can download full details and scoring sheets from the contest web page on wia.org.au

(John VK3KM Contest manager)

VK0

Moon bounce from Antarctica

The exploits of Craig Hayhow VK0JJJ in bouncing radio signals off the moon from Mawson has been written about in the Australian Antarctic Division science newsletter.

Craig VK0JJJ achieved a 742,000 km hop when he made an EME contact with Peter Taylor G8BCG at Cornwall in England, on May 4, at 0720 UTC.

Two nights later he contacted via 'moon bounce' Bo Nilsson SM7FJE in Sweden. He said it seemed now like everybody in Europe and the USA wanted an EME contact.

Now that the equipment and software has been proven a success, more EME contacts will be made.

The newsletter hailed it as a first from an Australian Antarctic station. Craig VK0JJJ said, "The technical challenges are immense, but with modern high speed computers and sophisticated software, it has become a lot easier."

During his recreation period he is also on the HF bands, often causing pile-ups with his unique location.

North Queensland Amateur Radio Convention

The 21st Bi-ennial North Queensland Amateur Radio Convention will be happening
in Charters Towers from Thursday 3rd to Monday 7th October 2013, with
primary venue and events happening at the Charters Towers Golf Club
from afternoon Friday 4th to Sunday afternoon 6th October.

Displays, Talks, Awards, Raffles, Prizes, a home brew afternoon, some golfing
combined with ARDF, the Monster Auction and some serious socialising will
all be a part of the convention proceedings.

There are some school reunions happening at the same time and motel and cabin
accommodation is scarce, but can be had if you ring around or head online.

Book your accommodation now!

(tarc)

VK9

The RSGB tells us that VK3DAC is currently operational as VK9DAC from
Christmas Island, IOTA reference OC-002.
He is active on the 10 to 80m bands.

DISCUSSION POINT

What use is an f-call?

In 2005 there were no F-calls in Australia. Today there are more F-calls than
Standard licenses. Clearly there is an influx of Amateurs coming from the
introduction of the Foundation License.

I know that there are many Amateurs who want F-calls to upgrade their license.
This is not a new phenomenon. In the past there were Z-calls who were
encouraged to upgrade their license. I suspect that if I spent enough time
doing research and talking to Hams who've been around the block, I'll find
that there are examples going back to the dawn of Amateur Radio.

In fact, a HAM, i.e., us, is an example of that. In the official world of
Radio Telegraphy a hundred years ago, us amateurs were not taken seriously as
a group. Funny to think that today there are still people who distinguish
themselves from Amateurs by calling themselves Professional.

My point is this, being encouraged to upgrade or gain skill is nothing new.
It's been around for over a century and it will continue long after everyone

listening today has become a silent key.

Do I want to have a higher license than the one I have? Well, perhaps.

Right now I'm spending my time learning about anything and everything. For me, Amateur Radio is a way to escape from my daily grind as a professional in my field and escape to the joy of learning new things. Getting a license that is of a higher class is in of itself not an endpoint.

At the moment I'm learning Morse, I'm learning about Morse keys, figuring out how to set my radio up for portable operation in a simpler way than I've been doing to date and finding the time to participate in this amazing community.

Will I always be a Foundation License holder, who knows - I've got a HR truck license and have been toying with upgrading it to an MC - but I know plenty of people who didn't get more than their car license.

What you want to get out of Amateur Radio is up to you. There are going to be people around you wanting to encourage you to learn, regardless of your license, but there will also be those who look down their nose at what they see as a lowly F-call.

I'm Onno VK6FLAB

EDUCATION YOUTH AND ADVANCEMENT OF AMATEUR RADIO
www.hamcollege.com.au

RADIO AMATEURS CAN CONTRIBUTE TO SCIENCE

The ARRL published a new book called Radio Science for the Radio Amateur.

The 190 page book explores and explains the often profound differences between science and technology, and dispels the notion that we know all there is to know about radio.

Using a fresh, playful approach, Author Eric Nichols, KL7AJ, will guide you through some of the most fascinating "nooks and crannies" of the radio universe. Along the way, you'll find out how solving long-standing mysteries of radio, of which there are still many, doesn't require expensive hardware, but merely a scientific mind-set and attention to detail.

(zs news)

INTERNATIONAL NEWS With thanks to IARU, RSGB, SARL, Southgate AR Club, ARRL, Amateur Radio Newsline, NZART, ARVictoria and the WW sources of the WIA.

A new radio system being installed at Fort Gordon in the USA should enhance emergency communications across the area but is causing mass frustration with hundreds of homeowners who have been locked out of their garages because of jammed remote-control signals.

The confusion started last week when Fort Gordon unexpectedly upgraded its land-mobile radios to a 390 megahertz bandwidth, the same frequency used in many automatic garage door remotes.

As a result, nearly 500 residents have called or visited the Overhead Door Co. of Augusta to complain about garage doors that fail to open and close on command.

Most complaints have been reported along Gordon Highway, faulty remotes have been encountered as far as 15 miles away from Fort Gordon.

PERCEPTIVE RADIO ADAPTS TO WHERE IT IS

A radio that is able to change the context of a broadcast depending on where you are and what you are doing, has been demonstrated by the BBC. The Perceptive Radio, created by Ian Forrester of the corporation's Future Media division, is thought to be a world first.

For its initial showing the team produced a computer-generated radio drama where the script altered depending on factors such as weather. This proof-of-concept drama used a computer generated voice for one of the characters and could adapt on the fly according to data pulled from external sources. For instance, it could make reference to local places which would differ from the script depending on where in the world a listener is.

If you want to read more about this latest in almost senescent computer technology you will find it on the web at tinyurl.com/thinking-radio.

ARNewsLine(tm) from various news sources

LOST MOON DUST FOUND IN STORAGE ON EARTH

And finally this week, several vials of moon dust brought back to Earth by the first men on the moon have been found inside a lab warehouse in California. This after sitting in storage unnoticed for more than 40 years. Amateur Radio Newsline's Cheryl Lasek, K9BIK, reports:

--

Many of you likely remember those fuzzy live pictures from the moon's surface when Astronaut Neil Armstrong became the first human being to set foot on an alien world. We also watched as Armstrong and Apollo 11 crew mate Buzz Aldrin collected samples from the Lunar surface before returning with them to mother Earth. Now some four decades later a part of the samples that Armstrong and Aldrin brought back with them were recently rediscovered by an archivist who was

going over artefacts tucked away at the Lawrence Berkeley National Laboratory.

Karen Nelson, who made the surprising discovery, said in a statement from the lab that they don't know how or when the samples ended up in storage. She says that she came across about 20 vials with handwritten labels dated "24 July 1970," packed in a vacuum-sealed glass jar.

Accompanying the jar was an academic paper published in the Proceedings of the Second Lunar Science Conference in 1971, titled "Study of Carbon Compounds in Apollo 11 and Apollo 12 Returned Lunar Samples." All of the authors of the paper were from the University of California, Berkeley's Space Sciences Laboratory. This included Nobel Prize-winning chemist Melvin Calvin, who worked with NASA on efforts to protect the moon from contamination during the first lunar landing, as well as planning on how to protect those on Earth from unknown pathogens that might have been lurking on the Moon's surface.

It turns out that the moon dust samples were supposed to have been sent back to NASA after the Space Sciences Laboratory team finished their research on them for some unknown reason they instead ended up in storage.

After making the discovery Nelson then got in touch with NASA officials. They in turn permitted her to open the jar to remove the vials before she returned them to the space agency and making for a happy ending to a 4 decade old story that began on the surface of the Moon.

For the Amateur Radio Newsline, I'm Cheryl Lasek, K9BIK, in Zion, Illinois.

- -

In all, NASA's moon-walking Apollo astronauts brought 842 pounds of lunar samples back to Earth between 1969 and 1972, and very little of it was thought to be unaccounted for until Nelson's discovery. More on this important find is on the Web at tinyurl.com/moon-dust-found

EMC WORKING GROUP FRIEDRICHSHAFEN MEETING

The International Amateur Radio Union's Region 1 Electromagnetic Compatibility Working Group has invited its members as well as observers from all national societies to attend the meeting. This to take place in Friedrichshafen, Germany on Friday, June 28th.

The meeting will be held from 12:00 to 13:30
local time at the same venue as last year.
Details of how to find the meeting room can be
obtained from the Deutscher Amateur Radio Club or
IARU booths in the main convention hall or from
the convention's operations personnel. More
including a group of EMC Working Group members is
on line at tinyurl.com/iaru-r1-emc-2013

Improved RTTY performance from DXpeditions

A leading DXer has objectively analysed 36 recent DXpeditions with a total
of two million contacts, to find only 6.7 per cent of all QSOs were in RTTY.

Ernie Walls VK3FM, writing in the June edition of the WIA journal, Amateur
Radio magazine, is in praise of the good job done by DXpeditions activating
far flung DX entities.

However, while most DXpeditions prepare well to service the CW and SSB demands
by having good operators, they miss the boat when it comes to RTTY.

He said the mode was arguably the fastest growing on the bands and those
using it deserved better from DXpeditions.

Ernie VK3FM claimed that in general DXpeditions don't maximise the mode,
place enough resources behind it, and quite often leave it to relatively
inexperienced and sometimes those apparently not terribly interested in RTTY.

Only two out the 35 DXpeditions surveyed produced a RTTY ratio above 15 per
cent, which Ernie VK3FM suggests indicates the current demand.

He believed it was time that every well planned DXpedition select a skilled
RTTY expert to give it the best shot, rather than leaving RTTY as an afterthought.

The full story "Can a 'small pistol' station offer useful advice to a 'big gun' DXpedition? 'can be read on pages 32 and 33 of the magazine.

(Jim Linton VK3PC)

The VU 7 KV Lakshadweep Islands operation last month has been approved for DXCC credit. If anyone had this contact rejected in a recent submission send an e-mail to bmoore@arrl.org to be placed on the list for an update to your record.

F 5 SWB is on the air as TU 5 DF from the Ivory Coast through to October.
Activity on all of the High Frequency bands.

Now to awards and again this week thanks to Ray VK4CF it's to another of Brisbanes Redcliffe Clubs Award.

Last week I outlined the VK9 award, one of 3 awards that are sponsored by the Redcliffe club.

This week I will outline the TOWBAR award.

The TOWBAR award is an armchair tour around Australia by amateur radio, making progressive contacts as you go. The award can be completed, by using any or all bands and all modes including Echolink.

Short wave listeners are eligible to participate in this award and to qualify their log must include of the callsigns of both stations claimed.

To complete this award requires contact with amateur radio stations located in 19 cities and towns around Australia. The FIRST and FINAL contacts are deemed to the Redcliffe checkpoint regardless of the participant's QTH and this contact must be a member of the Redcliffe and District Radio Club.

Amateur radio stations must be contacted in the following CITIES and TOWNS in order: REDCLIFFE; BRISBANE; GOLD COAST; LISMORE; SYDNEY; CANBERRA; MELBOURNE; HOBART; ADELAIDE; PERTH; DARWIN; MOUNT ISA; CAIRNS; TOWNSVILLE; MACKAY; ROCKHAMPTON; BUNDABERG; MARYBOROUGH, SUNSHINE COAST & REDCLIFFE. (N.B. For Sydney and the other major cities, all amateur stations in the greater metropolitan area of the city, are included as the major city).
Your tour may be run in either direction, i.e. Redcliffe south towards Sydney or Redcliffe north towards Townsville but the progress must be in order from the cities and towns listed above.

The application for this award should be accompanied by a certified log extract, signed by 2 other licensed amateurs showing date, time, frequency, call sign and location of stations worked.

Fill out the log, get it signed by two licensed amateurs, enclose either $A 10.00 or 10 IRC, and send to THE AWARDS MANAGER, REDCLIFFE and Districts Amateur RADIO CLUB, PO BOX 20 WOODY POINT QLD 4019, AUSTRALIA or email it to the clubs website http://www.redclifferadioclub.org.au or just type in Redcliffe radio club into your search engine for all the details.

WW SPECIAL INTEREST GROUPS --- FINAL FRONTIER

HAMTV FROM THE INTERNATIONAL SPACE STATION

The frequencies of 2422.0 MHz and 2437.0 MHz have been announced for a new ham radio Digital TV transmitter that will operate as an educational adjunct from the International Space Station.

The main mission of what's being called Ham TV is to perform school contacts between the astronauts on-board ISS and educational institutions on the ground.

This by providing space station to ground video within ARISS program.

To accomplish this, the ISS will host a new S-Band video transmitting station in addition to the existing VHF FM ham band transceiver. The new equipment will have the ability to transmit images from orbit during the school contacts. It will also be able to broadcast other pre-recorded video images up to 24 hours a day to allow ground stations tuning. More information on this new on-orbit service is on the Web at tinyurl.com/iss-dtv

Australia and Germany have by far the most registrations so far in this year s International Lighthouse and Lightship Weekend in August - just nine weeks away.

Up there also is a strong representation from the USA, England and Argentina. With 260 registrations from 30 countries, attention is now focussed on who will grab the coveted 300th spot.

The International Lighthouse and Lightship Weekend on August the 17th and 18th sees radio amateurs go portable from lighthouses, lightship and marine beacons.

Submitting news items

If you would like to submit news items for inclusion in the VK1WIA broadcasts, please email your item in text to nationalnews@wia.org.au

to submit audio read "how to submit items" in the weekly news page on wia.org.au

Remember the sooner you submit material the more the likelihood of it being broadcast in the very next edition of WIA National News. Each item will only be broadcast once, if you want a couple of mentions, please submit different slants to keep your event 'fresh 'and always if the news room is to read your item write in the 3rd person.

==========
WIANews - we've reported...YOU decide.

TWITTER http://twitter.com/VK1WIA

Societies and Club News Letter Editors can EXCHANGE a feed prior to the actual broadcast date, e-mail nationalnews@wia.org.au

Call-backs follow the RF editions, but also for text readers you may lodge a quick reply to let us know you read it, who knows, you might even get a "cheerio call".

Thanks to our dedicated band of broadcast volunteers who utilize their time and equipment in bringing you this weekly broadcast.

The purpose of "WIANews" is to rapidly provide news of interest to
active amateurs residing in Australia and the globe.

We strongly encourage membership in the Wireless Institute of Australia
and participation in the activities of local clubs. Opinions expressed in
"WIANews" are those of the writers who submit material and do not necessarily
reflect those of the rebroadcasters, nor the National WIA, but are broadcast
in the spirit in which they were submitted."

Material may be reproduced in whole or in part, in any form, a credit to
WIANews wouldn't go astray...

Compiled by VK4BB on behalf of the National WIA.

Amateur Radio Newsline(tm) Report 1870 - June 14 2013

Amateur Radio Newsline report number 1870 with a release date of June 14 2013 to follow in 5-4-3-2-1.

The following is a QST. The International amateur Radio Union gets ready for WRC 2015; a busy agenda for GAREC in Zurich; more and more over the horizon radar invades the upper High Frequency bands; a petition to extend Technician class privileges on 10 meters is filed with the FCC and some strange communications from the insect world. Find out the details are on Amateur Radio Newsline(tm) report number 1870 coming your way right now.

RADIO LAW: IARU STUDY IN PREPARATION FOR WRC 2015

The International Amateur Radio Union, also known as the IARU is setting its sights on the upcoming 2015 World Radiocommunication Conference. In a recent teleconference, the IARU Administrative Council authorized the distribution of a paper which sets forth a number of agenda items that will be considered during the gathering. Amateur Radio Newsline's Heather Embee, KB3TZD, has more:

--

There are a number of agenda items that impact amateur radio and amateur-satellite services. These include Agenda Item 1.1 which is to consider additional spectrum allocations to the mobile service on a primary basis and identification of additional frequency bands for International Mobile Telecommunications and related regulatory provisions. This is to facilitate the development of terrestrial mobile broadband applications, in accordance with Resolution 233 passed at WRC 12.

Agenda Item 1.4 is to consider possible new allocation to the amateur service on a secondary basis within the band 5250 to 5450 Kilohertz. Agenda Item 1.6.1 will look at possible additional primary allocations to the fixed-satellite service of 250 MHz in the range between 10 GHz and 17 GHz in ITU Region 1. Item 1.18 will consider a primary allocation to the radiolocation service for automotive applications in the 77.5 to 78.0 Gigahertz GHz frequency band.

Lastly, Agenda Item 9.1.8 will consider the regulatory aspects for nano-satellites and Pico-satellites as required by Resolution 757 passed at WRC 12. This calls for the results of studies of the procedures for notifying space networks that presently apply such tiny birds to be reported to WRC 15.

Because of the possible implications of these studies for the amateur radio and amateur-satellite services, the IARU is following their progress very attentively.

For the Amateur Radio Newsline, Im Heather Embee, KB3TZD, in Berwick, Pennsylvania.

--

All IARU member societies are being encouraged to meet with their respective telecommunication authorities to discuss the WRC 15 Agenda Items and to gain support for the IARU positions. (RAC, VE3YV, VE2MBS/VE2QQ)

**

RESCUE RADIO: BUSY AGENDA AT GAREC 2013 IN ZURICH

The delegates and guests at the Global Amateur Radio Emergency Communication or GAREC 2013 Conference will have a busy agenda later this month. This as they share ideas and learn the approach being taken in different parts of the world.

GAREC 2013 will discuss the true objectives, dissemination of disaster information at an international level, how to have hams prepared, trained and involved, and convince authorities about amateur radio emergency communication.

Stefan Streif HB9TTQ is an organizer of GAREC 2013. He advises that one topic on the agenda is whether amateur radio has an emergency communications role in Europe. This is because the authorities believe their infrastructure is so good and its technical level so high, that a disaster could not affect communications over a wide area.

This years Global Amateur Radio Emergency Communication Conference will be held June 25th to the 27th in Zurich, Switzerland. More information can be found at www.garec2013.ch. (VK3PC)

**

RADIO LAW: SOUTH AFRICA FIVE-YEAR LICENSE STILL LEAVES QUESTIONS

The South African Radio League says that it is still receiving questions about the five year license issue with telecommunications regulator the Independent Communications Authroity of South Africa also known as ICASA.

The South African Radio League says that a detailed explanation of the new rule was received from ICASA. According to that regulatory body if a South African radio amateur paid for 5 years and has advised ICASA

accordingly, the problem will be sorted out. This even if a ham in that nation has received a license for only this year.

ICASA says that the process may take several more weeks and it is not necessary to call or contact them at this time.

Meantime the South African Radio League has placed the matter on the Agenda of the next liaison meeting with the telecommunications regulator. That conclave is scheduled for mid-June. (SARL)

**

INTRUDER WATCH: LOTS OF OTH RADAR ON THE UPPER HF BANDS|

The latest Amateur Radio Union Monitoring System Region 1 newsletter reports a United Kingdom military station identified as STANAG 4285 station has been heard on the 20 meter band. Reports are that the station which is believed to be in Norwich, England has been on 14.236.8 Megahertz. What action taken to get it to move is unknown

Also in the newsletter DGZ0JBJ reported during May no less than 11 Over The Horizon or OTH radar systems have been heard on 20 meters, with 30 on 10 meters and an almost unbelievable 65 of these radar devices heard and logged on the 15 meter band. The newsletter says that these figures do not include the numerous frequency jumping Iranian Over The Horizon radars in that nation.

You can read the entire monitoring service intruder report on the web at tinyurl.com/hamband-intruder-alert. It's a real eye opener for those who are new to HF and not quite certain of the source of the noise that may be causing harmful interference to a QSO. (IARUMS-R1)

**

RESCUE RADIO: KEEPING HURRICANE NET FREQUENCIES CLEAR

The Atlantic hurricane season officially started on 1st June and many predictions indicate an above average number of storms this year. And as amateur radio continues to play a significant role in the gathering and distribution of information for the weather and emergency services each year hams in other IARU Regions are being reminded that the same frequencies may be in use by nets in North and Central America to track and deal with the consequences of these severe weather events. As such, it is possible for Region 1 or Region 3 amateur stations to cause unintentional QRM to these nets. Because of this, hams world-wide are being asked to please listen carefully if operating near these frequencies. A full list of which nets are operating on various frequencies can be found on line at www.iaru-r1.org (IARU)

**

RESCUE RADIO: ARES RESPONDS TO COLORADO WILDFIRES

The Amateur Radio Emergency Service in Colorado is providing communication support for personnel on the Black Forest and the Royal Gorge Fires currently burning in the Southern part of that state. Operators have been assigned to shelters, Emergency Operations Centers's, and other locations as needed.

The Automatic Packet Reporting System or APRS is being used and constantly updated with current data showing the locations of the fires, shelters, evacuation zones, and road closures. You can find the APRS data on APRS.fi and OPENAPRS.net. More in future Amateur Radio Newsline reports. (Colorado ARES via Facebook)

**

RESTRUCTURING: TOLEDO MOBILE RADIO ASSN SEEKS FM PRIVILEGES FOR TECHS ON 10 METERS

The Toledo Mobile Radio Association has filed a Petition for Rule Making with the FCC asking for increased voice privileges for Technician Class license holders in the 10 meter band. In its request the group is asking that Technician class privileges to include 29.520 MHz to 29.700 MHz which covers the gentlemen's agreement repeater subband on 10 meters.

Tony Everhardt, N8WAC, is with the clubs Technical Committee. He tells Amateur Radio Newsliine that the petition was the result of the club considering the installation of a 10 meter repeater:

--

N8WAC: "During the talks of a 10 meter repeater I suggested that if we put up a 10 meter repeater just the General class and higher can use that which doesn't benefit the Technicians. This was a few months ago and the more I thought about it the less it made sense that they (Technicians) do not have FM privileges. They can talk world wide from 28.300 to 28.500 MHz but they are not able to use the FM portion of the band."
--

So Everhardt brought the matter up to the clubs Technical Committee and the concept of Tech's on 10 meter FM was warmly received:

--
N8WAC: "I brought up to the Technical Committee the suggestion of filing a Petition and the Technical Committee was all for it. So the

Committee brought it up to the membership at the monthly meeting and it was a unanimous decision to file the petition."
--

In its rule making request the Toledo Mobile Radio Association argues that the current FCC rule that limits both Novice and Technician Class operators to 28.000 MHz to 28.500 MHz is not in keeping with the reality of today. It notes that with linking of various repeaters, the Internet Radio Linking Project and Echolink it feels that Section 97.301 (e) which allows the Technician class license privileges on the 10 meter band only from 28.000 MHz to 28.500 MHz is outdated.

The bottom line of the Toledo Mobile Radio Association rule making request is that its time to bring Technician voice privileges on 10 meters up to date. Also to bring them in line with the technology and the reality of ham radio in the 21st century. (Toledo Mobile Radio Association)

**

LAW: HAM MURDERED IN CALIFORNIA SHOOTING SPREE

A ham has been killed in what authorities are calling a homicide spree by a Los Angeles area resident. The incident began with a report of shots fired at Santa Monica home shortly before noon on June 7th. Officers arrived to find the house on fire and two people later identified as the shooter's father and brother dead of gunshot wounds inside. One of those murdered was Samir Zawahri, N6KXL.

The shooter, who police say was wearing what appeared to be a ballistic jacket, then shot a woman passing by in a car and carjacked another woman at gunpoint. He directed her to drive to the college campus, having her stop so he could shoot along the way. He fired on a city bus where three women were left with minor injuries. Authorities say that the gunman also fired on police cars, bystanders and pedestrians.

>From there, he demanded to be taken to Santa Monica College. In a faculty parking lot he fired on two people in a red Ford Explorer that crashed through a block wall. Police say that the driver was killed and a passenger was in critical condition after undergoing surgery UCLA Medical Center. He then shot a woman outside the college library before entering and attempting to shoot students there. Police said the rampage lasted about 10 minutes and ended when the shooter, who had been firing a semiautomatic rifle, was shot and killed on the campus.

Authorities have not officially named the gunman but law enforcement sources in Washington, D.C., and Los Angeles have since identified him as 23 year old John Zawahri, the son of Samir Zawahri, N6KXL. (AC6C, KG6FBM, K6FCC, published news reports)

**

RADIO LAW: ELECTRONIC FRONTIER FOUNDATION VS. PERSONAL AUDIO LLC

A follow-up to last weeks story regarding Patent Trolls. Here's Don Wilbanks, AE5DW:

--

The Electronic Frontier Foundation has also decided to do something about Patent Trolls that are making life miserable for some Podcasters. This in a campaign being called Help Save Podcasting.

The Electronic Frontier Foundation is soliciting donations and searching for prior proof of patent rights also known as prior art that would derail the lawsuit brought by a group called Personal Audio LLC. The Foundation says that the groups attorneys claim they own certain patents that govern podcasts and they want money for use of podcasting technology. They have filed lawsuits against some podcasters and now have moved against larger broadcasting corporations, CBS and NBC.

The Electronic Frontier Foundation says that it is also partnering with the Cyberlaw Clinic at Harvard to investigate legal avenues. More is on-line at tinyurl.com/save-podcasting-campaign.

I'm Don Wilbanks, AE5DW.

--

The Electronic Frontier Foundation is an international non-profit digital rights group based here in the United States. Among other things it provides funds for legal defense in court and defends individuals and new technologies from what it considers baseless or misdirected legal threats. You can read more about the Electronic Frontier Foundation at www.eff.org. (EFF, RW)

**

ENFORCEMENT: OMAHA NB. CITATION FOR SALES OF UNAUTHORIZED DEVICES

According to the ARRL, the FCC has cited an Omaha, Nebraska based online retailer for marketing unauthorized RF devices. These include 10 and 12 meter amplifiers capable of several thousand watts output in violation of FCC rules.

An FCC Citation dated June 6 orders the Enterprise Group Inc., doing business as ePowerAmps, to immediately stop advertising, marketing and selling all unauthorized radio frequency devices. These include modified CB radios and non-certified external radio frequency amplifiers for use in the 10 to 12 meter bands.

The FCC warned the Enterprise Group Inc. that continuing to engage in such conduct could subject the retailer to substantial fines and seizure of equipment. You can read more on-line at tinyurl.com/Omaha-amp-citation. (FCC, ARRL)

**

BROADCAST BUSINESS: DIALECTRIC CLOSING LEAVES VA STATIONS WITHOUT A PRIMARY ANTENNA

The decision by SPX Communication Technology to close its Dielectric broadcast, TV, radio and wireless operation on June 29th is already having an impact on television viewers in one city.

The Richmond Virginia Daily Progress reports that the antenna array that serves public station WCVW and commercial stations WRIC and WRLH suffered weather-related damage this past winter. Dialectric was supposed to do the final repair this summer but with SPX decision to close its Dialectric operations at the end of tthis month it appears as if the company will not be around to do the job.

Workers did put up a temporary antenna as a result of damage that happened to on March 6th. Because the temporary installation has a shorter range than the original one, some viewers of the three stations have been unable to receive over-the-air broadcasts since the weather-caused damage occurred. (RW, Daily Progress)

**

HAM HAPPENINGS: CROWD FUNDING SAVES TESLA MUSEUM

Some good news for those working to maintain the history of communications. This with word that the famed Tesla Laboratory on New York's Long Island has been saved and is now in the hands of the non-profit organization that has been trying to purchase it for the past eighteen years.

It all came about because of the dedication of famed cartoonist Matthew Inman, who is the creator of "The Oatmeal." Inman was able to raise $1,370,461 by crowd-funding to set up a permanent museum honoring the great scientist.

The purchase price of the former Nikola Tesla laboratory was $850,000. The remainder of the funds raised by the campaign will be used to clean up and to begin renovations of the property.

Although the actual science center is going to take a lot more time to finance and build, in the interim those involved in the project are planning on having a celebration of sorts in Shoreham, New York, hopefully sometime this summer. That event will focus on science, technology, and innovation. You can read the entire story on-line at tinyurl.com/tesla-museum-saved. (Southgate, other published news reports)

**

HAM HAPPENINGS: W9ZL TO CELEBRATE AIRVENTURE 2013

The Fox Cities Amateur Radio Club will once again be operating special a event station in celebration of this years EAA Airventure Convention and Fly-In gathering in Oshkosh, Wisconsin. Listen out for W9ZL from July 31st through August 4th on 7.250, 14.250 and 50.150 MHz operating only SSB. If you work them, QSL with a large Self Addressed Stamped Envelope to the Fox Cities Amateur Radio Club AirVenture, PO Box 2346, Appleton Wisconsin 54912. More about the EAA Airventure gathering is

on line at www.airventure.org. (AB9AH)

**

HAM HAPPENINGS: DAYTON HAMVENTION REPORTS SLIGHT RISE IN ATTENDANCE

According to an announcement posted to the Dayton Hamvention website, the official attendance figure for this years gathering was 24,542. This is a very modest increase of 59 attendees over last years 24,483, but is a major increase over 2007 when only 19,750 showed up.

The all time high took place in 1994. That's when the Dayton Daily News reported that some 35,000 walked through the gates at the Hara Arena for that years Hamvention. (Dayton Hamvention, Dayton Daily News)

BREAK 2

This is ham radio news for today's radio amateur. From the United States of America, We are the Amateur Radio Newsline with links to the world from our only official website at www.arnewsline.org and being relayed by the volunteer services of the following radio amateur:

(5 sec pause here)

**

EMERGING TECHNOLOGY: STRANGE COMMUNICATIONS FROM THE INSECT WORLD

Now here's one for the books. It happened recently when a 75 year woman in a southwestern German town called police at 3 a.m.. Her complaint was that she couldn't sleep because her doorbell was always ringing.

Police officers dispatched to investigate the cause quickly tracked down the culprit. It wasn't some form pf poltergeist or other strange phenomena. Rather ants had constructed a large nest next to the doorbell. In fact, the tiny creatures had built such a large home that the nest pressed the doorbells switching contacts together. That in turn kept ringing the bell.

Officers silenced the intermittently ringing doorbell by removing the nest with a knife. Likely much to the dismay of the ants who had spent the time to build it there. (Published news reports)

HAM RADIO IN SPACE: PASS PREDICTIONS LINK BACK AT AMSAT WEBSITE

The AMSAT Online Satellite Pass Predictions webpage is back on AMSAT's website. This as the result of a team effort by N1DID, KB1LQC, KB1LQD and W2GPS. You can find it on-line at www dot amsat dot org under the Pass Predictions link. (K1MP)

**

CONTEST CORNER: RULES CHANGES FOR THE 2013 CQ WORLD WIDE VHF CONTEST

Some new rules are coming to the CQ World Wide VHF Contest. The 2013 rules reflect changes in the log submission deadline and the publication date that have been implemented by the magazine.

In order to be considered for an award, your log must be received by the robot or postmarked no later than 23:59 UTC on August 4th. Logs received after that date will still be listed in the results but will not be eligible for an award. Extensions may be granted by the director for a valid reason if you contact that person before the deadline.

The 2013 CQ World-Wide VHF Contest starts at 1800 UTC ob Saturday July 20th and concludes at 2100 UTC on Sunday July 21st, A detailed set of rules can be found beginning on page 56 of the June 2013 issue of CQ Magazine. (CQ)

***

PROPAGATION: NEW 144 MHZ UK TO US BEACON TAKES TO THE AIR

A new Trans-Atlantic propagation beacon has come on the air from the United Kingdom beaming West over the Atlantic Ocean.

The GB3WGI Transatlantic 144 MHz amateur radio beacon went live at 1600 GMT on June 4th. This in time for the peak of the 2013 Sporadic E season.

GB3WGI runs 100 Watts Effective Radiated Power using both CW and JT65b modes on 144.487 MHz. It is located in the West of Northern Ireland in grid square IO64bl and its primary mission is to provide an early warning of 144MHz Transatlantic propagation on the Europe to USA path. This as a way of complimenting the existing 144MHz Transatlantic beacon network in the United States that provides alerts when a USA to Europe path is open.

Most current 144 MHz European transatlantic beacons are located much further to the South and/or East in locations like Cornwall in the U-K, in France and the Azores. By contrast, the GB3WGI beacon has a clear sea takeoff to the eastern seaboard of the United States giving it a distinct advantage of being heard when the 2 meter band is open across the great Atlantic pond. (G4BAO)

**

PROPAGATION: 6 METER BEACON NOW COVERS ALL OF SOUTH AFRICA

The ZS2X Six Meter VHF beacon now covering most of South Africa. This after its two-element Yagi was turned north by Tim Joubert, ZS2X. The 25 watt beacon transmits FSK modulation on 50.007 MHz near Port Elizabeth. This produces some very strong radio bursts on the daylight meteor shower Arietids that is currently active until July 2nd and is the most intense daylight meteor shower of the year. The beacon beacon can also indicate country-wide Tropospheric Ducting as well as Tropo Scatter propagation on 50 MHz in the early mornings as well as aircraft

scatter along their flight paths. (SARL)

**

PROPAGATION: C6AFP 6 METER BEACON TEMPORARILY OFF THE AIR

Steve Rutledge, N4JQQ, reports via the VHF Reflector that the C6AFP six meter propagation beacon that operates on 50.040 from grid-square FL16 is temporarily off the air. Steve says that the beacon system which is located at Abaco, Green Turtle Cay in the Bahamas, developed a significant chirp that his friend, C6AGN, could not pin down the source of the problem. So the beacon has been shipped to the United States for repair.

N4JQQ notes that at the time of its temporary removal for repair that the beacon was still operating on the six meter Ringo that John Walker, WZ8D, took down there at least 20 years ago. Steve says that this antenna has been through many serious hurricanes, has not fallen over and still has no tuning issues. He calls that "certainly amazing."

N4JQQ says that he hopes to get it fixed quickly and get it back as soon as possible. He adds that he will advise when the C6AFP beacon is back on the air or at least headed in that direction. (N4JQQ)

**

DX

In DX, word that ZS6RJ will be on a one man DXpedition to Botswana as A25RJ starting June 15th. Activity will focus on 80 through 10 meters, CW. QSL direct to his home address or electronically using Logbook of the World. There is no bureau service for Botswana.

JH1NBN will be on the air from Bhutan as A52W through June 19th. Activity will be limited to his spare time because he is there once again on a business trip. He will operate SSB with 100 watts into wire antennas. QSL via JH1NBN direct.

K9HZ is on the bands as J68HZ from his villa on St. Lucia operating 160 through 6 meters on CW, SSB and RTTY. He will be there until June 22nd with a special emphasis on 160 and 80 meters operations. QSL via his home callsign.

EA4GBA, will be operational as C91GBA from Mozambique from June 27th through December 15th. Activity will be on all H F bands using SSB with 100 watts into a dipole. QSL direct via EA4GBA. QSL cards will be answered once he arrives back in Spain early 2014.

IW2NEF will be operational as 5R8NE from Nosy-Be Island between July 16th to the 30th. Activity will be on 40 through 10 meters using SSB. QSL via IK2DUW.

Lastly, five operators will be on the air from November 12th to the 27th using the callsign N8A from the southeast coast of Tutuila Island.

Activity will be on 160 through 10 meters, with a significant effort on 160. QSL this one via ZL3CW.

(Above from various DX news sources)

**

THAT FINAL ITEM: A RATHER SPECIAL LIGHTHOUSE

And finally this week, word that over 200 lighthouses and lightships will be taking part in this years International Lighthouse and Lightship weekend. Amateur Radio Newsline's Skeeter Nash, N5ASH, tells us that number 200 is very special:

--

"The honor of being the 200th registrant for this years International Lighthouse and Lhtship weekend goes to the Whitby High Light in England. Built in 1858, the Whitby High Light helped ships avoid the Whitby Rock on the Noerh Yorkshire coast. Its well known as the place that Captain James Cook became a seaman before leading his epic voyages of discovery.

"The special event call GB2WHL will be operated from the lighthouse by the Denby Dale Radio Club. A special QSL is available on request.

"So far there are registrations from 29 countries. To read the guidelines for the International Lighthouse ans Lightship Weekend slated for August 17th and 18th; or to register a lighthouse, lightship or maritime beacon on line, please visit illw.net.

"Im Skeeter Nash, N5ASH"

--

This years International Lighthouse and Lightship Weekend takes place on August 17th and 18th and is sponsored by the Ayr Amateur Radio Group in Scotland. Again the URL for more information or registration is simply illw.net. (ILLW, VK3PC)

1072. July 2013 QST Digital Edition

Newsgroup: rec.radio.amateur.misc
Date: 2013-06-14 13:39:44 UTC
From: ARRL Web site <memberlist@www.arrl.org>
Message-ID: <20130614133719.D1E0227CB42@bmail.arrl.org>
Source record: 22
Cross-posted to: rec.radio.amateur.moderated,rec.radio.amateur.misc,rec.radio.amateur.policy,rec.radio.info

***July 2013 /QST/ Digital Edition - Now Available* July Digital QST
<http://www.nxtbook.com/nxtbooks/arrl/qst_201307/>
Go to this link and start reading: July 2013 /QST/
<http://www.nxtbook.com/nxtbooks/arrl/qst_201307/>.

Inside this Issue ...

* Put a miniature SSTV camera to work with a PIC interface
* Give your old transceiver a facelift with an LED display
* See High Speed Multimedia in action in Texas
* Firsthand accounts from radio amateurs who served at the Boston
Marathon
* Build the "real" Q-Pole antenna
* ... and much more!

Enjoy Content You Won't Find in the Print Edition

* Watch video overviews of the MFJ-9982, Palstar AT2K and AT2KD
antenna tuners.

Every issue of /QST/ is filled with the news and features you need to
keep active in Amateur Radio. Enjoy this issue!

App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>
Download the */QST/ App* for Apple mobile device users. The app is free
in Apple's App Store
<https://itunes.apple.com/us/app/qst/id531766442?mt=8>. Users with
Android devices should use the enhanced web version
<http://www.nxtbook.com/nxtbooks/arrl/qst_201307/> of /QST/ which is
optimized to automatically recognize Android phones, tablets and e-book
readers.

What is a digital edition?
The digital edition of /QST/ is an electronic form of the journal. All
ARRL members have access to the digital edition of /QST/...a way to read
and interact with the current issue of /QST/ anytime, anywhere. Each
issue includes unique, digital-edition-only content such as video, audio
features and extra content. Members can also access the digital archive
for access to previous issues.

How do I access the digital edition?
/QST/ can be read online or downloaded onto some devices. Members must
have a valid ARRL website login to access this benefit. You can always
find a link to the current digital edition and archives at
www.arrl.org/qst <http://www.arrl.org/qst>. Apple iOS device users

(iPhone, iPad and iPod touch) can also access the digital edition from a dedicated QST app. The app is free in Apple's App Store <https://itunes.apple.com/us/app/qst/id531766442?mt=8>.
To login or register, go to www.arrl.org/myarrl <http://www.arrl.org/myarrl>.
Forgot password? Go to www.arrl.org/forgot-password <http://www.arrl.org/forgot-password> to reset your password.
Not a member? Join today <http://www.arrl.org/join/QDF> and get access to the current digital edition, now.
Need help? Visit the digital edition help page <http://www.arrl.org/digital-qst-faq> for frequently asked questions.
Need more help? Contact Member Services by telephone 860-594-0200 or 888-277-5289 (US only) or email circulation@arrl.org <mailto:circulation@arrl.org>.

*Go Green! Go Digital-Only. *
You can choose to opt-out* of the mailed, print edition of /QST/ at any time. Complete our online opt-out form <http://www.arrl.org/QST-print-edition-opt-out-form>. Due to the lead time required to prepare /QST/ for mailing, you may receive one last printed issue. * Disclaimer: Choosing to opt-out of the print edition of /QST/ is voluntary and will not result in a refund or reduction of ARRL membership dues. Any savings will be used to extend the ARRL's reach in the areas of public service, education, advocacy, technology and membership.

About this email
You are subscribed to receive monthly notification of the digital edition of /QST/. If you have an ARRL website user account, you can manage all of your e-mail preferences at www.arrl.org/myarrl <http://www.arrl.org/myarrl>.

Ofcom Amateur Consultation on 2 & 3 GHz allocations

Posted: 13 Jun 2013 09:32 AM PDT
http://forums.qrz.com/showthread.php?394803-Ofcom-Amateur-Consultation-on-2-amp-3-GHz-allocations&goto=newpost

Ofcom Amateur Consultation on 2 & 3 GHz allocations

Ofcom has published a consultation relating to amateur use of the
2310-2450 MHz and 3400-3475 MHz spectrum bands.

These frequencies are within, and adjacent to, spectrum planned for
release by the Ministry of Defence (MoD). The MoD plans to release 40 MHz
of spectrum between 2350 and 2390 MHz and a further 150 MHz from 3410 to
3600 MHz for new civil uses. The technical and regulatory aspects of this
release will be the subject of a full consultation in due course. In
advance of this, Ofcom are consulting on proposals to make changes to the
Amateur Radio Licence for these bands.

Ofcom say: it is likely that the released MoD spectrum will be used for
wireless broadband using 4G Long Term Evolution (LTE) or LTE advanced
technology.

Based on our technical analysis we believe that the impact and likelihood
of harmful interference being caused by amateur uses to new uses in the
release band [2350-2390 and 3410-3600 MHz] are sufficiently severe to
preclude continued use following the release.

We are also consulting on proposals for the adjacent bands [2310-2350,
2390-2400 and 3400-3410 MHz]. Our current thinking is that amateurs should
continue to be granted access to the adjacent bands although with
additional terms in the licence which amend the current terms of access to
these bands. Continued access would be on the basis that interference may
not be caused to new and existing uses in the release and adjacent bands
and that no protection from interference from those new uses can be
expected.

The consultation closes on July 22, 2013.

The consultation and information on how to respond is available at

http://stakeholders.ofcom.org.uk/con...ctrum-release/

Consultation PDF document

http://stakeholders.ofcom.org.uk/bin...SR-amateur.pdf

It is worth noting that in some countries amateur radio access to the entire 2300-2400 MHz band has been completely lost to 4G LTE.

Sweden loses 2300 MHz band

PRESS RELEASE

FOR IMMEDIATE RELEASE

Contact

Keith Farley

keith@w6poc.us

(925) 872-1489

USS Hornet Amateur Radio Club To Hold

June 22 Field Day Event in Alameda

On Saturday, June 22, 2013, the historic ship□s radio club will
demonstrate ham radio emergency operations □ and the public is invited to
visit.

ALAMEDA, CALIF. □ Beginning Saturday morning, June 22, 2013, a group of
□ham□ radio operators from the USS HORNET MUSEUM SHIP will be setting up a
host of amateur radio stations on the flight deck of the museum ship,
providing a behind-the-scenes glimpse into the nuts and bolts of emergency
radio operations.

The event, which has been a family-fun favorite for generations, is not only educational, but a hands-on experience for the whole family ☐ and the public is encouraged to visit and participate.

As part of the American Radio Relay League☐s nation-wide ☐Field Day,☐ the Hornet Hams will be communicating with some 35,000 other radio operators across the country. Field Day has been an outdoor fixture for amateur radio enthusiasts since 1933 ☐ and is always open to the public. In fact, kids and adults alike are encouraged to visit field day stations and "get on the air," trying their hand at real ham radio operations.

☐

This is the premier radio event of the year,☐ said Keith Farley, president of the USS Hornet Amateur Radio Club. ☐It☐s a lot of fun to be a part of the USS Hornet Museum and operate our amateur radio club from the ship year round, but to set up our remote stations on the flight deck during this event is exciting and a rare opportunity." He added, ☐Setting up radio stations on field day and talking with people from near and far is seriously good family fun, and a great way to see amateur radio in action.☐

The Hornet Hams will have an array of radio stations, some on battery and some on generator power, on the bow of the aircraft carrier museum ship, which is located at 750 W. Hornet Avenue, Alameda, CA. In addition to the outdoor fun, tours of the club☐s on-board radio room will also be given. Find out more about the radio club at http://hornet-arc.us/.

Be sure to visit the Hornet Hams at the USS Hornet Museum in Alameda. The ship will be open from 10:00 a.m. until 5:00 p.m., and everyone is invited for a tour of the ship and to visit the Hornet Ham☐s radio operators on the flight deck. General museum admission is required: $16 for adults and $7 for kids under 17 years old.

ZCZC AP24
QST de W1AW
Propagation Forecast Bulletin 24 ARLP024
>From Tad Cook, K7RA
Seattle, WA June 14, 2013
To all radio amateurs

SB PROP ARL ARLP024
ARLP024 Propagation de K7RA

Average daily sunspot numbers declined over 32 points this week to 39.6. Average daily solar flux was down more than 8 points to 99.2. Tuesday's solar flux at 89.5 was the lowest since June 22-25 of last year, when values ranged from 84 to 88.6. Likewise, Tuesday's sunspot number of 14 was also the lowest since June 25, 2012 when the sunspot number was also 14. Since then both numbers have been recovering, with Wednesday and Thursday's sunspot numbers at 27 and 45, and solar flux at 93.3 and 98.9.

The latest prediction has solar flux at 105 on June 14-17, 100 on June 18-19, 105 and 110 on June 20-21, 115 on June 22-24, 110 on June 25, 105 on June 26-28, and 110 on June 29 through July 4. Solar flux is expected to reach a minimum of 95 around July 7-8 and another peak at 115 on July 18-21. Note that ARRL Field Day is June 22-23, right when solar flux is expected to be highest.

The predicted planetary A index is 5 on June 14-16, 8 on June 17-18, 5 on June 19-20, then 25, 18, 10 and 8 on June 21-24, 5 on June 25-27, then 30, 20, 10 and 8 on June 28 through July 1, 5 on July 2-4, 10 on July 5-6, 8 on July 7, and 5 on July 8 through mid-month.

A geomagnetic forecast comes to us this week from Petr Kolman, OK1MGW, who sees quiet to unsettled conditions June 14, mostly quiet June 15-18, quiet to unsettled June 19-20, quiet to active June 21-23, quiet to unsettled June 24, quiet June 25-26, quiet to active June 27, active to disturbed June 28-29, quiet to unsettled June 30 through July 2, quiet to active July 3-4, mostly quiet July 5-6.

Word has come that the link to the W6ELprop installation file at http://www.qsl.net/w6elprop/ is broken. Until it is restored you can find it at ftp://150.214.111.198/pub/ham/propag/W6ELPropInst270.EXE.

Unfamiliar with FTP? FTP is File Transfer Protocol, and you can paste that link into your web browser URL window, hit Enter, and a download dialog should appear. W6ELprop works only on Windows computers, and with it you can predict propagation from your station to anywhere else, on any frequency between 3-30 MHz. If you have any trouble installing, try right-clicking the file and running as administrator.

The latest NASA prediction for Cycle 24 moves the sunspot peak back to Summer 2013, but NOAA predicts the peak for the end of this year. Check pages 16 and 17 at http://www.swpc.noaa.gov/weekly/pdf/prf1970.pdf and note the highest smoothed sunspot and solar flux numbers are predicted in November and December 2013. These are smoothed international sunspot numbers, with a scale quite a bit lower than the Boulder numbers reported here.

If you would like to make a comment or have a tip for our readers, email the author at, k7ra@arrl.net.

For more information concerning radio propagation, see the ARRL Technical Information Service web page at, http://arrl.org/propagation-of-rf-signals. For an explanation of the numbers used in this bulletin, see http://arrl.org/the-sun-the-earth-the-ionosphere. An archive of past propagation bulletins is at http://arrl.org/w1aw-bulletins-archive-propagation. More good information and tutorials on propagation are at http://k9la.us/.

Monthly propagation charts between four USA regions and twelve overseas locations are at http://arrl.org/propagation.

Instructions for starting or ending email distribution of ARRL bulletins are at http://arrl.org/bulletins.

Sunspot numbers for June 6 through 12 were 71, 76, 27, 41, 21, 14, and 27, with a mean of 39.6. 10.7 cm flux was 109, 109.8, 103.2, 96, 93.3, 89.5, and 93.3, with a mean of 99.2. Estimated planetary A indices were 17, 32, 10, 9, 13, 6, and 5, with a mean of 13.1. Estimated mid-latitude A indices were 16, 26, 9, 8, 12, 6, and 5, with a mean of 11.7.

INTERNATIONAL MUSEUMS ON THE AIR 15/16 & 22/23 JUNE 2013.

GB0FP

This year again see□s Humber Fortress DX A.R.C participating in this
event. Operating from both the club house station and the new mobile shack
station within the grounds of FORT PAULL museum.

This has been one of our popular events in past years with over 10,000
stations contacted worldwide!!!. Listen for GB0FP on 160,80,40,20 & local
vhf or check out the DX clusters Fort Paull is a great place to visit as
it takes you back to the Napoleonic times when this establishment was first
in use in the 15th century through world wars 1&2 and up to the late 1960's
when it was decommissioned by the MOD.

A family venue with lot's to do to entertain the children whilst mum & dad
relax and un-wind in the well kept grounds or visit us at our radio shack.

Fort Paull is also the home of the last remaining Blackburn Beverly transport aircraft in the world!!,

a unique aircraft open to the public with lot's of displays inside and out. ********** ********** * MUSEUM No' . 5099

WAB . TA12

LOCATOR . IO93VR

Details can be found on QRZ.COM about the club (MX0HFC) or just click on the link below.

(several links to on line live camera's, club web site, guestbook to sign!!!)

false MicrosoftInternetExplorer4 AMATEUR
RADIO ASSOCIATION OF SERBIAN

RADIO CLUB "BAGDALA" YU1ADO

KT competition rules "VIDOVDAN 2013"

AND ORGANIZATION: To celebrate the Day of the Municipality of Krusevac - St. Vitus Radio Club "Bagdala" - KT YU1ADO organized competition "St. Vitus' Day in 2013."

II PARTICIPANTS: All licensed ARS from home and inostranastva

III TIME: Competition will be held 28.06.2013.god. (Friday)

at frequencies from 3.5 MHz to 3.8 MHz (DX outside the range) in two periods:

1 The first period of CW

From 19:30 until 20:15 (CET) at frequencies of 3.510 to 3.580 MHz.

2 The second period of SSB

From 20:15 until 21:00 (CET) on the frequencies of 3,675 to 3,775 MHz.

IV DATA EXCHANGE

The Exchange: RS (T) and serial number starting with 001 (to be continued in future periods)

and car registration number. Example: 599 001 BG. Participants from outside of Serbia shows, apart from the RS (T) and serial number of connections, and label NY.Primer: 599 001 NY.

Cells organized in Krusevac encoder report no connection with the serial number label (VD) telegraphy and telephony, the word "St. Vitus".

V Award categories:

1 One operator

2 More operators

3 Stations outside of Serbia

YOU SCORING

Scoring is done as follows:

-Any proper connection issues: CW - 3 points, SSB - 2 points.

Multipliers are made-Serbian car license plates and tags NY that provide non-yu cells, which do

during one period.

- Acting as worth three (3) multipliers.

- Own label does not count as a multiplier.

- Each station is allowed to do only once in each period.

- The number of points in one period is obtained by multiplying the sum of QSO points from a single period to the sum of

multipliers in the period.

- The total score is the total points of all periods.

- Any broken link (incomplete or incorrectly added in writing received data) will not be counted in the final score.

- The time difference made connections greater than 5 minutes between 2 correspondent, will be considered as proper

connection.

- Call sign to send the log must be registered in at least 10 dailies in both periods (calculated

and erroneously admitted character), so that such a connection was recognized by those who have received the correct call sign.

- Call sign which did not send log information must also be registered in at least 10 dailies in both periods (calculated wrongly admitted and sign), so that such a connection was recognized by those who have received the correct call sign.

- Selective reporting only certain stations are not allowed.

VII POWER ADR: ADR Power must be reconciliation licensed operators.

VIII PRIZES: First place trophy or statue.

Organizer diploma awarded for the first 3 of clubs and individuals.

IX Competition Commission: Competition Commission diaries browsers YU1ADO the following composition

YT2A, YU1SS, YT1TS

X SUMMARY AND LOG LIST:

The log contains: date, time (CET), callsign, exchanged RST, serial numbers, and clearly marked multiplier.

The cover sheet shall contain the name and date of the competition, contestants call sign, name and address, the call signs of other team members (if any), number of connections and the number of points (for each period), the total number of connections and the total number of points, short description Device, antenna, and a statement of compliance proposition.

Logs sent at least eight days after the contest, and no later than 07 July 2013. God. (Valid postmark) to the following address:

RADIO CLUB "BAGDALA" YU1ADO

PO Box 136, 37000 Krusevac, SERBIA

or e-mail (in doc, txt format or CT): yu1ado@yahoo.com with mandatory confirmation (reply) receiving daily

XI ANNOUNCEMENT OF RESULTS: The results of the competition will be announced on the website www.yu1ado.qrz.ru and diplomas delivered by mail within 60 days of the end of the competition.

Ham Radio Operators to Demonstrate Skills:

Posted: 13 Jun 2013 06:25 PM PDT
http://www.eham.net/articles/30288

Amateur radio operators around the world will show their communication capabilities June 22 and 23 during the Amateur Radio Relay League's field day activities. Locally, members of the Littleton Radio Amateurs ham radio club will set up their equipment at the senior shelter in Cornerstone Park. Cornerstone Park is located at the corner of West Belleview Avenue and South Windermere Street. Field day activities begin at noon June 22 and run for 24 hours. The ARRL is an international amateur radio organization that holds a number of events each year. The ARRL website states more than 35,000 amateur radio operators around the world will be operating and communicating from remote locations during the June 22-23 field day. The focus of field day is to demonstrate emergency communications without the use of phone systems, the Internet, power grid or any other link that could be knocked out in case of an emergency.

//
When Power Fails, Lines Are Down, Cell Phones Jammed, Hams Can Save the Day

Posted: 13 Jun 2013 06:22 PM PDT
http://www.eham.net/articles/30287

The SCVRA consists of amateur radio operators (or Hams as they are commonly known) from River Falls, Hudson, Baldwin, Hammond, New Richmond, Somerset and the surrounding area in western Wisconsin, with several from Minnesota sometimes participating with the local group. The objective of Field Day, a nationwide event, is to practice and demonstrate the ability to set up radio transmitting and receiving equipment under simulated emergency conditions and communicate with as many other Hams as possible. Most of our area Hams take part in emergency communications training so that, in time of a disaster, whether it be local, regional, or national, they can be ready to provide emergency and supplementary communications when called upon by Emergency Government, Red Cross, Salvation Army, hospitals, or other disaster-serving organizations. In the wake of hurricanes such as Katrina, devastating tornadoes as in Joplin, MO, or major earthquakes as in Japan, amateur radio may be the only functioning electronic communication available until workers can begin to restore cell phone operations and emergency power can be provided for fire fighters, law enforcement, and disaster-aid organizations.

//
We're Getting Some More 4G Spectrum By Stomping All Over Radio Enthusiasts:

Posted: 13 Jun 2013 06:21 PM PDT
http://www.eham.net/articles/30286

You want the good news first, don't you? Well, the UK will be bathing in an extra 105Mhz of 4G spectrum, if Ofcom has its dastardly way. The bad news? In order to have aforementioned dastardly way, Ofcom's got to kick 80,000 amateur radio enthusiasts off the spectrum. Sucks to be them, I guess. The chunk of spectrum under consideration to be sold is around the 2000-3000Mhz mark, and is primarily used by the MoD. Since the Army don't use the frequency extensively, and use fancy kit that doesn't tend to be interfered with*, amateur radio hams are a 'secondary user' of the airwaves. If the spectrum gets sold off for 4G, however, amateur radio antics would cause interference, meaning your 4G streaming of Corrie might be interrupted by the sounds of a bearded man fiddling with knobs and tinfoil.

//
Pttow! Ofcom Kicks Hams Out of MoD Bands:

Posted: 13 Jun 2013 06:21 PM PDT
http://www.eham.net/articles/30285

Ofcom plans to kick radio amateurs from 105MHz of radio spectrum, and warn them off another 60MHz, so it can be sold off for 4G telephony. The spectrum belongs to the Ministry of Defence, with radio hams classed as "secondary users" who are tolerated as long as they don't interfere with MoD kit. But these days the MoD is being asked to pay for its spectrum, so the department wants shot of the radio hams so the bands can be flogged off to the mobile networks post-haste. In contrast with other radio users, amateur radio operators, most (but not all) of whom have beards, don't pay for their spectrum. Even the RNLI has to pay for the frequencies it uses to communicate with lifeboats. And though the government foots the bill, the argument is that pricing spectrum encourages more efficient use, with hams being the notable exception. Amateur operators aren't supposed to be efficient, they're supposed to try new things and develop new techniques and ensure Blighty maintains some radiophonic skills, but as the value of spectrum rises more questions are being asked about that investment.

//
67-Foot-Tall Radio Antenna Upsets Neighbors:

Posted: 13 Jun 2013 06:17 PM PDT
http://www.eham.net/articles/30284

Antennas are exempt from town height restrictions, according to town officials. James Setzler is serious about his ham radio avocation. So serious, in fact, that he recently replaced a large antenna afixed to the side of his house on Sylvan Drive with an even larger antenna - this one reaching 67 feet into the air - held in place with stanchions bolted to concrete footings at three corners of his property. "This antenna will allow me to communicate more reliably with other parts of the world," said Setzler last week. For neighbors, however, the antenna is an eyesore. "A

nice residential neighborhood now looks like a commercial cell tower zone," said Derek Moscarelli, who lives on Verndale, next door to the Setzlers. He and others have contacted the town to see if something could be done about the antenna. The answer, according to town building official John Hoyle: the antenna is allowed. Hoyle listed the various items exempted from the town's height restriction, including church spires, flag poles, chimneys, weather vanes ... and radio antenna. "It says it right there, it's not ambiguous at all," he said. "If there were a height restriction on radio antennae and he wanted to go higher, he would have had to petition the Zoning Board of Review for a dimensional variance. It would have been listed in the newspaper and everybody within 200 feet of his property would have been notified in a certified mailing and they could have come to the public forum and they could have spoken about their concerns." But there is no height restriction. "Just because you don't like it doesn't necessarily mean he can't make full beneficial use of his property," Hoyle said. "You have to provide somebody full beneficial use of their property." Setzler, a retired engineer, has lived in East Greenwich for 30 years and from his perspective, the antenna is kind of like the trailer that sits in someone's driveway, or the odd color someone decides to paint their house. Who legislates eyesore?

SARL NEWS SUNDAY 16 JUNE 2013

You are listening to ZS6SRL, the official radio station of the South African Radio League, the national body for amateur radio in South Africa. The SARL broadcasts a news bulletin every Sunday at 08:15 CAT in Afrikaans and at 08:30 CAT in English. To listen to a web stream, visit www.sarl.org.za, click on 'Amateur Radio Today' and follow the links for details. For audio via Echolink, connect to ZS0JPL-R.

You can download this bulletin and previous ones from www.sarl.org.za and also subscribe there to receive future bulletins by e-mail.

SILENT KEYS

The key of Pieter (Louwtjie) Louw, ZS1MV, went silent on Tuestday 28 May 2013 stil geword. Louwtjie was 82 years old and a radio amateur for more than 60 years.

We convey our sympathy to his family and friends.

We are also sorry to announce that ZS1ANO,Captain Brain Greenwood, became a silent key on Friday, June 7th, after a short illness in the Panarama Hospital near Cape Town. He leaves 4 children, and 5 grandchildren.

'his key is silent but his memory lives on'

Your news reader this morning is (name and call sign), on 145,725 from Pretoria, with relays on 7,066 MHz and 3,695 MHz SSB. (Other news readers change to suit).

IN THE NEWS TODAY: MORE ON THE FIVE YEAR LICENCE ATTEMPT TO PROVE THE PERTH TO SOUTH AFRICA PATH SARL RE-INTRODUCE ITS ELMER PROGRAMME

You are listening to ZS6SRL. Stay tuned for more details on these and other important and interesting items.

MORE ON THE FIVE YEAR LICENCE

The confusion around the five year license was discussed at the ICASA/SARL liaison meeting last week. It was agreed that ICASA will check all R501 payments made and issue a 5 year license accordingly. This process may take four to six weeks.

If you have renewed your license for 5 years and have paid R501 and have not received the 5 year license document by end of July, please send an email to Dewald at dkuhrau@icasa.org.za with a copy to Gareth

at gthumbran@icasa.org.za. This information is also available on the SARL web home page.

CORRECTION TO THE RADIO REGULATIONS

The subject of corrections to the radio regulations published on 1 April 2011 is on every ICASA/SARL Liaison meeting agenda but as the issue was pending the outcome of a court case between ICASA and one of the cellular companies no progress could be made. Indications are that there is light at the end of tunnel and the issue could be resolved in the next two months. The corrected regulations are ready in draft format and from the amateur side address the issue of power for both class A and Class B licenses on certain bands and a few other issues. The draft still has to be approved at the ICASA council.

Another issue discussed was the guest licensing between SADC countries. The draft document to be circulated prior to the next CRASA meeting was approved. The document proposes that any licenced amateur from a SADC country visiting another SADC country may operate as a guest for up to three months without the need to apply for permission.

The next meeting of the ICASA/SARL liaison committee will be held on 12 September 2013. It was also agreed to hold a follow up regulatory workgroup meeting to discuss the outstanding issues from the meeting held in December last year.

RASPBERRY PI MICRO COMPUTER LONG DISTANCE CONTACT CHALLENGE

In SARLNEWS of 7 April radio amateurs in South Africa were challenged to try their hand at covering distance with Milliwatt power into the antenna using a Raspberry Pi.

This was in response to Eddie Bennett, G3ZJO, of Northampton in the United Kingdom who used the 10 milliWatt of RF that can be generated from the Raspberry Pi computer board and was heard at over 2000 km on the 7 MHz band. The Raspberry Pi board can be made to operate as a WSPR mode transmitter covering Low, High and VHF frequencies up to 250 MHz. G3ZJO connected the board via a low pass filter to a dipole for the 7 and 14 MHz bands.

The Raspberry Pi is a credit-card sized computer board that plugs into a TV and a keyboard. The Raspberry Pi Model A and Model B boards are supplied as board only, and come without operating system, SD card, power supply, keyboard, case or cables.

SARL Elmer, Jaco le Roux, ZS6PX, responded to the challenge. He received reports from several stations; the furthest was some 900 km from ZS2CX.

He said that when he heard about the challenge on SARLNEWS he was immediately interested and ordered a Raspberry Pi. "When I received the unit, I loaded a new SD card with Raspbian Wheezy and followed the instruction that I found on the Web. I could not believe that 10mW

could travel that far" Jaco received the book prize.

LOTS OF OVER THE HORIZON RADARS ON THE UPPER HF BANDS

The latest Amateur Radio Union Monitoring System Region 1 newsletter reports that a United Kingdom military station identified as STANAG 4285 station has been heard on the 20 metre band. Reports are that the station which is believed to be in Norwich, England has been on 14.236.8 Megahertz.

Also in the newsletter, DGZ0JBJ reported during May no less than 11 Over The Horizon or OTH radar systems have been heard on 20 metres, with 30 on 10 metres and an almost unbelievable 65 of these radar devices heard and logged on the 15 metre band. The newsletter says that these figures do not include the numerous frequency jumping Iranian Over The Horizon radars.

You can read the entire monitoring service intruder report on the web at tinyurl.com/hamband-intruder-alert. It's a real eye opener for those who are new to HF and not quite certain of the source of the noise that may be causing harmful interference to a QSO.

ATTEMPT TO PROVE THE PERTH TO SOUTH AFRICA PATH

A new 2m beacon on 144.950MHz is being established in Perth, Western Australia, by the Northern Corridor Radio Group in an attempt to prove the Perth to South Africa path. The beacon, VK6RIO, will use Chirp modulation which can be detected some 50dB below the noise floor in a 2kHz bandwidth. The beacon will run 100W into 4 by 8 element yagis directed towards South Africa. With the processing gain from using Chirp modulation the Effective Radiated Power is 100 Megawatts.

The beacon is GPS locked both in frequency, time and Chirp synchronisation. Tests across Australia have proven the effectiveness of Chirp modulation for detecting very weak signals.

An article explaining Chirp modulation, and its application to propagation measurements and beacons, can be found in the March edition of the RSGB RadCom magazine. There is also an article explaining the Chirp beacon in Dubus 4-2011.

In order to detect the Chirp beacon the receiving station will require a GPS locked Software Defined Radio, a GPS locked 2m converter and 1 pulse per second from a GPS receiver to time stamp received signals. Open source PC software by Hermann, DL3HVH, will be provided for processing the received signals.

This beacon can only be detected if there is someone on the other end with "similar equipment" and a desire to be the first to receive these signals in South Africa or surrounding countries. Is that someone you?

Anyone interested in more details regarding the new beacon should contact Keith Bainbridge, VK6RK, vk6rk@wia.org.au.

LEAGUE NEWS

SARL RE-INTRODUCE ITS ELMER PROGRAMME

Jaco Le Roux took over the SARL Elmer portfolio and is ready to answer any amateur related questions. If he does not know the answer he will find someone to answer the question. Send your questions to elmer@sarl.org.za.

The SARL has further expanded the Elmer concept by creating webpages that cover topical subjects about amateur radio. The first series of questions deals with the Raspberry Pi and will go live on Sunday on the SARL members only section of the SARL website at www.sarl.org.za, select members only on the top right hand and enter your pin number.

SARL MEMBERSHIP Applications for listener membership of the SARL have been received from the following persons: Na-aim Jordan and Petrus Pelser.

Any objections against the acceptance of the applications must reach the Secretary before or on the Tuesday after this bulletin.

CONTEST NEWS

WORLD QRP DAY Tomorrow, Monday 17 June, is World QRP Day. Switch off the amplifier, turn down the power on your rig and try QRP power. How many kilometres per watt can you achieve. You will be amazed at what you can achieve with QRP.

SARL TOP BAND QSO PARTY The SARL Top Band QSO Party is a fun activity to promote contacts on 160 metres between radio amateurs in Southern African countries and to encourage radio amateurs to apply for the SARL Top Band Award.

The QSO Party runs from 00:00 UTC on Thursday 20 June 2013 to 00:00 UTC on Monday 24 June 2013, with phone from 1 840 - 1 850 kHz and CW activity from 1 810 - 1 838 kHz. Each station can be worked once per mode i.e. once on Phone and again with CW.

The exchange is a RS(T) report and provincial or country abbreviation. Following the QSO, the station must change the dial frequency by at least 2 KHz for the next QSO, unless a period of 10 minutes has lapsed between contacts. The frequency of each QSO must be shown on the log sheet. The event is open to all licensed amateurs that have access to the 160 metre band.

Each contact will count three (3) points. Bonus Points: Each South African call area and each DXCC country worked will be awarded with five (5) additional bonus points. Total Score = (Total QSO points) and (Bonus points). Log sheets must be submitted by 1 July to contest@sarl.org.za.

HF PROPAGATION REPORT

Hannes Coetzee, ZS6BZP, reports that the solar activity is expected to be at low levels. Sunspot AR1768 continues to grow but it is not yet actively flaring.

If you want to do your own frequency predictions, the expected effective sunspot number for the week will be around 40.

All the bands from 20 to 10 m will provide lots of DX fun with 20 m providing the best openings with 15 m not far behind. There will also be some 10 m openings on sunlit paths.

Please visit www.spaceweather.co.za for further information.

DIARY OF EVENTS

15/16 June - First weekend of International Museums Weekend special event, register your museum station at www.ukradioamateur.co.uk/imw. 17 June - Due date for ZS4 Sprint log sheets 20-24 June - QSO Party runs from 00:00 UTC on Thursday 20 June 2013 to 00:00 UTC on Monday 24 June. 22/23 June - Second weekend of International Museums Weekend special event. 1 July - QSO Party log sheets must be submitted.

SARL News invites clubs and individuals to submit news items of interest to radio amateurs and short-wave listeners. Submit news items - if possible in both English and Afrikaans to www.sarl.org.za/newsinbox.asp, not later than the Thursday preceding the bulletin date.

The SARL also invites you to listen to Amateur Radio Today every Sunday morning at 10:00 CAT on 145,750 MHz in the Pretoria area, with relays on 7 082, 7 205, and 17 660 kHz. There is also a podcast by ZS6RO. For a web-stream and Echolink by ZS6FCS, visit www.sarl.org.za, click on 'Amateur Radio Today', go down the green column and click on 'LISTEN ON THE WEB'. A repeat transmission can be heard on Mondays at 16:30 UTC on 3 230 kHz. The website also lists various other retransmissions. Reception reports, comments and suggestions are invited. Send an email to artoday@sarl.org.za. Sentech sponsors the transmissions on the non-amateur frequencies.

You have listened to a bulletin of the South African Radio League compiled and edited by Louis Kirstein, ZS1LK.

Thank you for listening, 73.

/EX

Alaska Field Day 2013

Posted: 13 Jun 2013 10:44 PM PDT
http://forums.qrz.com/showthread.php?394881-Alaska-Field-Day-2013&goto=newpost

The Elmendorf ARS will operate under the Sun at Paxton Park on JBER.

What's a JBER? Joint Base Elmendorf Richardson

This is a Joint Air Force and Army facility these days.

The Base Radio Club will be operating from 10am Saturday June 22 until we hope Sunday afternoon the 23rd. Two HF Stations will be available. We will operate 100 watts or less on Verticals and Dipoles. Band Conditions will dictate where we will play the most.

We will have CQ/Phone and Digital, All Mode available on 80-10m and FM on 2m and 70cm.

Plan is to operate as needed for visitors. If you are in the area please try to stop by. Sorry to report that without prior coordination access to the base will be a problem unless you are already authorized to be on the Military Base.

Prior coordination will I hope permit us to escort folks in to the operating location for a visit.

Contact club@kl7air.us or kl7air@arrl.net

Talk in on the EARS VHF Repeater 146.67 - Split and a 103.5 PL Tone.

http://forums.qrz.com/showthread.php?394825-KT-competition-rules-quot-VIDOVDAN-2013-quot&goto=newpost

Normal 0 21 false false
false MicrosoftInternetExplorer4 AMATEUR
RADIO ASSOCIATION OF SERBIAN

RADIO CLUB "BAGDALA" YU1ADO

KT competition rules "VIDOVDAN 2013"

AND ORGANIZATION: To celebrate the Day of the Municipality of Krusevac -
St. Vitus Radio Club "Bagdala" - KT YU1ADO organized competition "St.
Vitus' Day in 2013."

II PARTICIPANTS: All licensed ARS from home and inostranastva

III TIME: Competition will be held 28.06.2013.god. (Friday)

at frequencies from 3.5 MHz to 3.8 MHz (DX outside the range) in two
periods:

1 The first period of CW

From 19:30 until 20:15 (CET) at frequencies of 3.510 to 3.580 MHz.

2 The second period of SSB

From 20:15 until 21:00 (CET) on the frequencies of 3,675 to 3,775 MHz.

IV DATA EXCHANGE

The Exchange: RS (T) and serial number starting with 001 (to be continued
in future periods)

and car registration number. Example: 599 001 BG. Participants from outside
of Serbia shows, apart from the RS (T) and serial number of connections,
and label NY.Primer: 599 001 NY.

Cells organized in Krusevac encoder report no connection with the serial
number label (VD) telegraphy and telephony, the word "St. Vitus".

V Award categories:

1 One operator

2 More operators

3 Stations outside of Serbia

YOU SCORING

Scoring is done as follows:

-Any proper connection issues: CW - 3 points, SSB - 2 points.

Multipliers are made-Serbian car license plates and tags NY that provide non-yu cells, which do

during one period.

- Acting as worth three (3) multipliers.

- Own label does not count as a multiplier.

- Each station is allowed to do only once in each period.

- The number of points in one period is obtained by multiplying the sum of QSO points from a single period to the sum of

multipliers in the period.

- The total score is the total points of all periods.

- Any broken link (incomplete or incorrectly added in writing received data) will not be counted in the final score.

- The time difference made connections greater than 5 minutes between 2 correspondent, will be considered as proper

connection.

- Call sign to send the log must be registered in at least 10 dailies in both periods (calculated

and erroneously admitted character), so that such a connection was recognized by those who have received the correct call sign.

- Call sign which did not send log information must also be registered in at least 10 dailies in both periods (calculated wrongly admitted and sign), so that such a connection was recognized by those who have received the correct call sign.

- Selective reporting only certain stations are not allowed.

VII POWER ADR: ADR Power must be reconciliation licensed operators.

VIII PRIZES: First place trophy or statue.

Organizer diploma awarded for the first 3 of clubs and individuals.

IX Competition Commission: Competition Commission diaries browsers YU1ADO the following composition

YT2A, YU1SS, YT1TS

X SUMMARY AND LOG LIST:

The log contains: date, time (CET), callsign, exchanged RST, serial numbers, and clearly marked multiplier.

The cover sheet shall contain the name and date of the competition, contestants call sign, name and address, the call signs of other team members (if any), number of connections and the number of points (for each period), the total number of connections and the total number of points, short description Device, antenna, and a statement of compliance proposition.

Logs sent at least eight days after the contest, and no later than 07 July 2013. God. (Valid postmark) to the following address:

RADIO CLUB "BAGDALA" YU1ADO

PO Box 136, 37000 Krusevac, SERBIA

or e-mail (in doc, txt format or CT): yu1ado@yahoo.com with mandatory confirmation (reply) receiving daily

XI ANNOUNCEMENT OF RESULTS: The results of the competition will be announced on the website www.yu1ado.qrz.ru and diplomas delivered by mail within 60 days of the end of the competition.

Moon bounce from Antarctica

Posted: 15 Jun 2013 02:51 AM PDT
http://forums.qrz.com/showthread.php?395007-Moon-bounce-from-Antarctica&goto=newpost

Moon bounce from Antarctica

The exploits of Craig Hayhow VK0JJJ in bouncing radio signals
off the moon from Mawson has been written about in the Australian
Antarctic Division science newsletter.

Craig VK0JJJ achieved a 742,000 km hop when he made an EME
contact with Peter Taylor G8BCG at Cornwall in England, on May 4, at 0720
UTC.

Two nights later he contacted via 'moon bounce' Bo Nilsson
SM7FJE in Sweden. He said it seemed now like everybody in Europe and the
USA wanted an EME contact.

Now that the equipment and software has been proven a success,
more EME contacts will be made.

The newsletter hailed it as a first from an Australian
Antarctic station.

Craig VK0JJJ said, "The technical challenges are immense, but
with modern high speed computers and sophisticated software, it has become
a lot easier in recent years."

During his recreation period he is also on the HF bands, and
causes pile-ups as the unique callsign is much sought after.

More of the story can be read at:

Power Line Interference contact information

Posted: 15 Jun 2013 02:45 AM PDT
http://forums.qrz.com/showthread.php?395006-Power-Line-Interference-contact-information&go

to=newpost

Power Line Interference contact information

Industry Canada has just posted contact information to report
Power Line Radio Interference. This information covers all the major Power
Line companies in Canada.

The posting can be found at:

http://www.ic.gc.ca/eic/site/smt-gst...g/sf10641.html.

The information is provided with the cooperation of the
Canadian Electricity Association and its member power utilities.

Radio Amateurs in Canada are encouraged to use this contact
and report information when confronted with suspected power line
interference.

Radio Amateurs of Canada is pleased to see the release of
this information which is the culmination of ongoing discussion at
meetings of the Canadian Amateur Radio Advisory Board (CARAB) between RAC
and Industry Canada.

Norm Rashleigh, VE3LC

RAC representative to the Radio Advisory Board of Canada (RABC)

100 Years Anniversary of RSGB NoV Special CallSigns

Posted: 13 Jun 2013 02:59 PM PDT
http://forums.qrz.com/showthread.php?394842-100-Years-Anniversary-of-RSGB-NoV-Special-Call
Signs&goto=newpost

On The 5th of July 2013 marks 100years of RSGB

You can get a NoV to mark the occasion my going onto the RSGB Website (UK
Only i think?) Anyways, you will get an extra 'V' before your number
example 'MV6', '2VE0' and 'GV4' Mine is MV6NAV which feel free to check
out. The Radio Society of Great Britain has also set out a special callsign
running around Britain GB100 so keep your ears out for it on HF, VHF or
even (so called dead) UHF.

On July 5th is the date the NoV starts and ends on July 31st so that gives
you plenty of time to have a play with your new callsign. Has any of you
already done it? If so just tell us in the replys and then we can try and
see if we can hear you?

Joshua Glicklich M6NAV / MV6NAV

http://forums.qrz.com/showthread.php?394829-Amateur-Radio-Youth-Support-Net-(ARYSN)-Debuting-Friday-June-14th&goto=newpost

As of tomorrow (June 14th) the Amateur Radio Youth Support Net (ARYSN) will be debuting for the first time on 14.290Mhz at 2130 UTC. The net will take place Monday and Friday every week. The goal of the ARYSN net is to promote youth in Ham Radio and encourage more kids to get into the hobby. It is organized by Jesse Shulins KB1YNK (15) and Cameron Smith KF5HQB (18). We really hope to get as many check ins and support for the net as possible!

Thanks

NASA Satellites Capture Stunning Images of the Sun:

Posted: 14 Jun 2013 06:27 PM PDT
http://www.eham.net/articles/30290

GOLDEN VALLEY, Minn. -- Violent eruptions exploding out of the sun's atmosphere show an ever-changing, truly dynamic star, whose activity waxes and wanes over every 11 years. Just in the month of May, the sun emitted 16 sizable solar flares and 19 fast coronal mass ejections that sent powerful solar material and radiation into the solar system, and at times toward Earth. NASA's observatories keep a constant watch on the sun, providing scientific data, not to mention beautiful views, of this activity.

Propagation Forecast Bulletin #24 de K7RA:

Posted: 13 Jun 2013 05:00 PM PDT
http://www.eham.net/articles/30289

Average daily sunspot numbers declined over 32 points this week to 39.6. Average daily solar flux was down more than 8 points to 99.2. Tuesday's solar flux at 89.5 was the lowest since June 22-25 of last year, when values ranged from 84 to 88.6. Likewise, Tuesday's sunspot number of 14 was also the lowest since June 25, 2012 when the sunspot number was also 14. Since then both numbers have been recovering, with Wednesday and Thursday's sunspot numbers at 27 and 45, and solar flux at 93.3 and 98.9.

Irish Radio Transmitters Society
Radio News Bulletin
Sunday 16th June 2013

IRTS AGM Awards

For a complete and full listing of recipients of IRTS AGM 2013 awards and many other interesting topics on amateur radio in Ireland, please visit www.irts.ie. The IRTS serving and supporting the interests of Amateur Radio in Ireland.

Duhallow Repeater Group..

The Duhallow Repeater Group have set up a FM Simplexer for the Four Meter band. The callsign of this simplexer is EI4SMR and operates on 70.375mhz FM.It is located on Musheramore Mountain, in north County Cork. The device was installed on Wednesday 11th June to enhance FM activity on the 4M band. Also back on air over the recent months is the Duhallow UHF repeater operating from the same site with a new antenna installed. EI7SMR operates on RU74, 430.925mhz, input is 438.525mhz (7.6mhz split) and requires a ctcss tone of 103.5Hz.

Dundalk Amateur Radio Society EI7DAR

Dundalk Amateur Radio Society EI7DAR will be operating a Radio Station from the County Louth Agricultural Show in Dundalk on Sunday 16th June, mostly operating 40m around 7.170 + or - qrm in the morning and all other bands throughout the day. Visitors to the stand would be made very welcome.

GB3WGI 144Mhz Beacon

The GB3WGI Transatlantic 144MHz amateur radio beacon went live at 1600 GMT on the 4th June in time for the peak of the 2013 Sporadic E season.

Tipperary Amateur Radio Group

On Thursday 6th of June last, members of the Tipperary Amatuer Radio Group met at Raheen House, Clonmel. A number of topics were discussed including up and coming events on the IRTS calender. Plans and arrangements for the VHF/UHF Field Day in July was the event discussed

at length. Also in attendance at the meeting was Denny O'Dwyer, a SWL and a member of the Hillwalking Radio Group. Denny gave a very interesting talk on how 446mhz PMR radios were used by members of the Hillwalking Radio Group to assist the organisers of The Glen of Aherlow Walking Festival held over the June Bank Holiday weekend. Hillwalking Radio are a very active group and have participated in a number of similar events since its formation. For more information about this group go to www.hillwalkingradio.blogspot.ie .The meeting concluded at 11pm after TARG Chairman Paul Norris EI3ENB thanked everyone for their input and attendance. For more information about Tipperary Amatuer Radio Group go to http://www.ei7trg.org

---

South Eastern Amateur Radio Group

The South Eastern Amateur Radio Group will activate Kells Priory in County Kilkenny over the weekend of Saturday and Sunday 22nd and 23rd of June. Kells Priory has been assigned the CASHOTA number EI023/C and the WAI square S44 - Kilkenny. Kells Priory is unusual in that it consists of seven castles all within the same site. Its history can be dated back as far as 10th century and it has connections with Strongbow who was involved with the Norman invasion of Ireland.

On a different note the Committee and members of The South Eastern Amateur Radio Group would like to wish club member Michael Fitzgerald EI9GGB and his wife to be Laura the very best of luck as they tie the knot in the coming weeks. We wish both Michael and Laura the best of luck for their big day and may you have a long and happy life together.

Plans for the refresher sessions for those wishing to sit the next exam on July 4th have being finalized and are as follows. The three sessions will take place on Wednesday the 19th June, Wednesday the 26th June and the final one on Monday the 1st July. Further information regarding classes maybe obtained from Mark Wall EI7IS on 087 6302026 or from any SEARG committee member. Please note these are just refresher classes and not the entire syllabus for the exam.

The June meeting of the South Eastern Amateur Radio Group will take place in the Roanmore Social and Sports Centre, Cleaboy Road, Waterford on Monday the 24th June at 8.30 p.m. The meeting will be preceded by a committee meeting at 8.00 pm sharp and as always new members are very welcome.

For up-to-date news about the South Eastern Amateur Radio Group and it's actives you can check our website www.searg.com and you can also follow us on Facebook and Twitter

---

A FREE Cleartone CM-7200 4m AM/FM Radio Giveaway.

Tony, EI4DIB is giving away one Cleartone 4 metre radio to a lucky winner. The radio will be completely and absolutely free, you only pay for postage. For full details of this free and exciting competition

please click on the following link http://bit.ly/187mw0r

Bushvalley Amateur Radio Club

The Bushvalley Amateur Radio Club will be Activating Kilrea Royal Observer Corp Bunker on Saturday 22nd June 2013 from 10.30am onwards using the club callsign MN0GKL.

North Cork Radio Group

The North Cork Radio Group will be active from Friday 21st - Sunday 23rd June to commemorate the 75th anniversary of the Cork Grand Prix. The call sign used will be EI75GP. There are more details to be found on the Grand Prix event at www.ei1nc.com or www.corkgrandprix.com. We look forward to working you on the air.

Bangor & District Amateur Radio Society GI3XRQ

The Bangor & District Amateur Radio Society will hold their annual summer radio rally on Saturday 6th July at 11.30am, at the Donaghadee Community Centre, BT21 OHE. Admission is £3.00. Further detail from Bill GI4AAM or visit www.bdars.com. Everyone welcome.

Summits On The Air

Filip ON4TA has been activating Irish summits for a number of years, and is back again this year - enjoying somewhat better weather than on his previous visit! He started off on Arranmore Island Co. Donegal and then activated a number of the Mayo hills, including the Nephins. Filip has been using 4 metres and 6 metres as well as the HF bands.

Meanwhile down in Kerry we see that Luk DD1LD has been on the MacGillycuddy's Reeks, making the first ever activation of Cnoc na P£iste under the SOTA programme, and then heading on to the highest mountain in Ireland, Carrauntoohil. Luk's activations were on 30 metres and 40 metres CW.

DX News

Champ E21EIC will be in Laos from mid June until mid September. On previous visits he used the callsign XW1IC. This time he will sign XW0YJY. He will be QRV on all bands 160 - 2m. QSLs go via his home call in Thailand.

Three US amateurs, K4RX, AC4TO and N4SIA will be active from Guantanamo Bay from 22 - 29 June. Look for them on the air as KG4RX, KG4TO and KG4AS respectively.

Yuki JH1NBN is on a business trip to Bhutan where he will sign A52W until 19 June. He will operate in his spare time and run 100w to wire antennas. He will use mainly SSB on 40, 20, 17 and 15m.

Stations in Gibraltar are using the prefix ZB54 instead of the usual ZB2 until 27 June. This is to celebrate the fact that Gibraltar has become UEFA's 54th member. UEFA is European Football's governing body.

Items for inclusion in next week's Radio News can be submitted via e-mail to "newsteam /at/ irts / dot / ie" for automatic forwarding to both the radio and printed news services. Urgent news items for the radio news maybe telephoned to the radio news editor, Aidan, EI7JC on 085 7100511.

Please note that items for the radio news should reach the editor no later than midday on Thursday in order to be guaranteed inclusion in the following Sunday's bulletin.

DXCC COUNTRY/ENTITY REPORT: According to the AR-Cluster Network for the week of Sunday, 9th-June, through Sunday, 16th-June there were 222 countries active. Countries available: 3A, 3B8, 3D2, 3W, 4J, 4L, 4O, 4S, 4U1I, 4X, 5B, 5N, 5R, 5T, 5W, 5Z, 6Y, 7P, 7Q, 7X, 8P, 8R, 9A, 9G, 9H, 9J, 9K, 9M2, 9M6, 9Q, 9V, 9Y, A2, A3, A4, A5, A6, A7, A9, AP, BV, BY, C3, C6, C9, CE, CM, CN, CP, CT, CT3, CU, CX, D2, D4, DL, DU, E5/s, E7, EA, EA6, EA8, EA9, EI, EK, EL, EP, ER, ES, ET, EU, EX, EY, EZ, F, FG, FH, FJ, FK, FM, FO, FP, FR, FS, FY, G, GD, GI, GJ, GM, GU, GW, H4, HA, HB, HB0, HC, HH, HI, HK, HL, HP, HR, HS, HV, HZ, I, IS, J2, J6, J7, J8, JA, JD/o, JT, JX, JY, K, KG4, KH0, KH2, KH6, KL, KP2, KP4, LA, LU, LX, LY, LZ, OA, OD, OE, OH, OH0, OJ0, OK, OM, ON, OX, OY, OZ, P2, P4, PA, PJ2, PJ4, PJ7, PY, PZ, R1FJ, S5, S7, SM, SP, ST, SU, SV, SV5, SV9, T31, T32, T5, T7, T8, TA, TF, TG, TI, TJ, TK, TL, TN, TR, TT, TU, TZ, UA, UA2, UA9, UK, UN, UR, V3, V4, V5, V7, V8, VE, VK, VP2E, VP5, VP8, VP9, VQ9, VR, VU, XE, XU, XW, XX9, YA, YB, YI, YL, YN, YO, YS, YU, YV, Z2, Z3, Z8, ZA, ZB, ZC4, ZD7, ZF, ZL, ZP, ZS, ZS8

* PLEASE NOTE: The report "could" contain "Pirate/SLIM" operations or more likely a "BUSTED CALLSIGN". As always, you never know - "Work First Worry Later" (WFWL).

4O, MONTENGRO (Also IOTA Op!). Operators Alex/UA3RF and Nikolay/RK3RB will be active as 4O/UA3RF and 4O/RK3RB from Montenegro between July 21st August 2nd. Activity will be on 40-10 meters using CW, SSB, PSK and RTTY.

They also plan to be active as 4O/UA3RF/P and 4O/RK3RB/P from Sveti Nikola Island (EU-163) between July 26-28th. Look for them to be an entry in the RSGB IOTA Contest (July 27-28th). QSL via their home callsigns.

5Z, KENYA. The "DX-World.net" reports that Bruno, VE2FTT, is active as 5Z4/VE2FTT from a hotel room in Nairobi until June 19th. It was also mentioned that he plans to be active from time to time throughout the year when on business trips to Kenya. Bruno operates mostly SSB and uses an FT-897 with 100 watts into a screwdriver antenna. QSL via his home callsign.

C9, MOZAMBIQUE. Gerard, ZS6AYU, will once again be active as C91GR from Bilene between 1600z, July 19th and 0400z, July 23rd. Activity will be holiday style on CW only using a Cushcraft R7000 vertical and 200-400 watts. QSL via ZS6AYU, direct or by the Bureau.

DXPEDITIONS TOUR (Update). Yuki, JH1NBN, is currently on a business trip to Bhutan (Thimphu, central area and eastern area) until June 19th. His activity will be limited, but will sign A52W and states [edited], "I will establish and operate small station with wire and 100w output in several cities/villages in Bhutan - mainly SSB on 40/20/17/15 meters (I will check on 3.8m through 50m) during local night time. Yuki will continue to travel to various places through September, and plans to visit the following locations (specific dates were provided):
* Micronesia - Callsigns V63AQ and V6T. He may visit [operate 1 hour] from some small islands between Pohnpei and Woleai. The islands mentioned are: Pohnpei (OC-010), Kosrae(OC-059), Chuuk (OC-011) and Woleai (OC-132).
* Mongolia - He is not sure if he will operate; maybe a club operation.
* Bangladesh - He may not operate due to not enough time. August was mentioned.
* Japan - He will be at the "TOKYO HAM FAIR" (booth of foreign radio league/club), August 24-25th.
* Thailand - He will not operate, but will meet with local people. September was mentioned.
* Nauru - Callsign C21BN; he will be in Nauru for about 2 weeks; operation during local night time. September was mentioned.

Yuki apologizes for the delay in QSLing and is replying at a very slow rate. He suggests to "Please do not re-send QSL request twice". He will add a log search to his Web page when he has time at: http://1nbn.net

FS & PJ7, ST. MARTIN AND SINT MAARTEN ISLANDS. By the time you read this, Mark, N1AFG, will be active as PJ7/N1AFG from Sint Maarten (NA-105, WLOTA 0711) [Dutch Side] until June 21st. Activity will be limited depending on the weather and other vacation activities, etc. Mark suggests, "Look for me near the top of the 20 and 15 meter Phone bands." There is also a French side of the island, St. Martin (NA-105, WLOTA 0383), and if Mark gets an opportunity as he did last year, he will operate from one of the beaches on the French side using the callsign FS/N1AFG. PLEASE NOTE: Mark states, "The best way to get a QSL card is to send me one via direct mail. Return postage is appreciated, but it is not absolutely necessary. If you

have sent a QSL card to me from one of my past trips to the Caribbean and have not received one, please E-mail me, and I will rectify the situation." QSL via his QRZ.com address.

FT/T, TROMELIN (Press Release). Seb, F5UFX, Team Leader of the "Tromelin 2014", announced the following in a press release dated June 13th [edited]: "After many successful DXpetitions in the past, the Radio Club de Provins (F6KOP) team and the Lyon DX Gang (F6KDF) are joining together in an effort to put Tromelin back on the air in 2014. In the last months we have exchanged many documents, E-mails with the authorities and we have also met them in their office. Today, we are working all together in a very efficient way, and, even if all papers are not finalized yet, we are very confident for our project. We hope to give you some good news as soon as possible..... Best 73s, de Seb, F5UFX."

HI, DOMINICAN REPUBLIC. Juergen, DL4SDW, will be active as DL4SDW/HI3 from the Dominican Republic (NA-096, WLOTA 2974) between June 17th and July 26th. Activity will be limited to his spare time on the HF bands, using mainly CW, but some SSB and Digital modes. QSL via his home callsign, by the Bureau is preferred.

HK0/S, SAN ANDRES ISLAND (Update to OPDX.1114). Members of the "DX Friends" will activate San Andres Island (NA-033) between November 1-10th. The current list of operators mentioned are Alberto/EA1SA, Toni/EA5RM (Team Leader), Roberto/EA2RY, Manolo/EA7AJR, Jose/EA7KW, Fabrizio/IN3ZNR, Alain/F6ENO, Tony/F8ATS, Faber/HK6F, Bernard/F9IE, Roberto/HK3CW and Valery/RG8K. As of press time, no callsign has been announced. QSL via EA5RM direct (see Web page). You can use the OQRS (see Web page) for direct and Bureau cards. More details should be forthcoming. Visit their Web page at: http://www.dxfriends.com/SanAndres2013

HS, THAILAND. Look for HS4AK, the club station of the Radio Amateur Association of Khon Kaen [R.A.K.K], to be active until June 17th. A team of operators will be operating and activating this callsign to celebrate the 22th anniversary until June 17th. Activity will be on 40-10 meters using CW, SSB, RTTY and PSK. HS4AK participated in this past weekend's 2013 All Asian DX CW Contest as M/S category. QSL via E20YLM.

II8, ITALY (LH Op!). Alex, IK8YFU, and other Calabria DX Team members will be active as II8LH on June 22nd, from the Capo Suvero Lighthouse (WAIL CL-003, ARLHS ITA-045). QSL via the Bureau to HB9FHZ (USKA Bureau). QSL via IK8YFU direct. E-QSL Authenticity is guaranteed. Also LoTW. For more info, see: http://www.calabriadxteam.it

IOTA NEWS.....
AS-006. Kazuhiko, VR2KF, will be on during the RSGB IOTA Contest (July 27-28th) from his home QTH on Ma Wan Island. This is a good time to work him because he is leaving Ma Wan early 2014. He is the only station on Ma Wan. Kazuhiko's plan is only to be active on 20-10 meters. QSL only direct to QRZ.com address.

AS-043. Operators Suehiro/JI1PLF, Mitsuo/JA1UNS,Hisashi/7N1GMK,
Takeo/7L4PVR and Kazuhiko/7N4VPS will be active as homecall/1
from Hachijo Island in the JA1 South Izu Group, between October
18-21st. Activity will be on 160-6 meters using CW, SSB and
RTTY. QSL via their home callsigns, direct or by the Bureau.

AS-120. Operators Stavros/5B4AFM and Philip/5B4ZN will be active as
homecall/p from Agios Georgios Island between 1600z, June
22nd and 0600z, June 23rd. Activity will be on 40/30/20 meters
using mostly CW and with a focus on North America. QSL via
their home callsigns, by the Bureau or direct.

EU-043. Bernd, DL8AAV, will once again be active as SD1B/6 from Orust
Island between June 17-29th. Activity will be holiday style
on, or near the usual island and IOTA frequencies. QSL via
DL8AAV, direct or by the Bureau.

EU-073. Members of the Taranto ARMI section and the 599 DX Team will
once again be active as IJ7T from San Pietro Isle (IIA TA-002)
between July 26-28th. Activity will be on the HF bands, 6 and
2 meters using CW, SSB and the Digital modes. They will par-
ticipate in the RSGB IOTA Contest (July 27-28th). QSL via
IK7WDS, direct or by the Bureau. QSL cards can also be requested
via the OQRS on ClubLog. For more information and updates,
visit: http://www.qrz.com/db/IJ7T
http://www.armi.ta.it

EU-101. Operators Thomas/SM3DMP and Jan/SM3CER will be active as
OH/SM3DMP and OH/SF3A, respectively, from Bjorkon Island
(WW Loc. KP02) between June 16-19th. Activity will be on
30/20/17 meters, mainly CW (split 1-3 up). QSL OH/SM3DMP
via his home callsign, and QSL OH/SF3A via SM3CER, by the
Bureau or direct.

EU-123. Operators Doug/GM0ELP and Simon/M0GBK to be active as MM3T
from the Isle of Bute (IOSA CL02, SCOTIA CS19, WLOTA 1883)
during the RSGB IOTA Contest (July 27-28th) as a Multi-Op/
All-Band/Low-Power/Mixed/DXpedition entry. QSL via eQSL only.

EU-141. Hans, LA2MOA, will be active from Vardo Island in the Finnmark
County East Group during the RSGB IOTA Contest (July 27-28th)
as a Single-Op/CW-Mode/Island-DXpedition entry. QSL via his
home callsign, direct, by the Bureau, eQSL or LoTW.

NA-035. By the time you read this, Dan, HM2DMR, should be active as
HQ8S from the Honduran Island of SWAN. Activity could last
until June 25th, depending on the Honduran Navy schedule.
It is suggested to "Keep an eye on the clusters". Look for
CW to start then followed by SSB. There will be no InterNet
on the island, so please help Dan relay any info he may have.
Activity will be on 160-10 meters. For more details and
updates, watch: http://hriotas.com
ADDED NOTE: Next is NA-223 &#65533; Vivorillos (callsign HQ8D);

July 16-20th.

NA-213. Operators Allan/KV4T, Steve/KI4GGJ, John/AJ4T, Gaston/W4CCF
and Nicholas/KJ4AVG will once again be active as homecall/p
from Dauphin Island (USI AL002S, Mobile County, AL) between
June 19-24th. Activity will be on the HF bands using CW and
SSB. QSL via the operator's home callsign.

OC-129. Tim, KC5DCT, will be active as DU6/KC5DCT from Lakawon Island
on June 22nd. Activity will be QRP on the HF bands with a
Elecraft KX3 using CW and SSB [until batteries go dead].
QSL via his home callsign.

JW, SVALBARD. Karl, LA8DW, will once again be active as JW8DW from the
JW5E club station in Longyearbyen, Spitsbergen Island (EU-026), between
September 25th and October 3rd. Activity will probably be on 80-10 meters
using CW and SSB. Not sure about RTTY and PSK31. QSL via his home callsign,
direct, by the Bureau or via LoTW. Visit the JW8DW Web page at:
http://la8dw.com/Svalbard%202011/home.html
Also, visit the JW5E Web page and interesting Webcam at:
http://www.jw5e.com

K8CX'S 2013 DAYTON HAMVENTION PHOTO GALLERY. Tom's, K8CX, 2013 Dayton
Photo Gallery is now up at: http://hamgallery.com/dayton2013/
This is Tom's 17th consecutive year for the gallery, and it contains 353
photos taken at Crowne Plaza at various events and hospitality suites.
You may submit your own Dayton photos to be included in this gallery.
Please read the guidelines listed on the top of the gallery page. There
is also an interesting Dayton Hamvention history link on top of this page.
ADDED NOTE: There is also a recap of this year's HamVention at:
http://hamgallery.com/gallery/D/hamvention2013.htm
If anyone has a forum review or interesting story, please submit it to
K8CX <k8cx@hamgallery.com> to be included on this page.

KH8, AMERICAN SAMOA (Update to OPDX.1110/1114; Callsign Added; Samoa Op Added). The N8A operators announced that they have also reserved the callsign W8A. Operators John/9M6XRO, Aki/ZL1GO (JE4EKO), Masahiro/JH3PRR, Kip/W6SZN and Jacky/ZL3CW (F2CW/WE3B) are to be active using the special event callsign N8A from the Turtle and Shark Lodge, Village of Vaitogi, on the southeast coast of Tutuila Island (OC-045, USI AS007S, WLOTA 4385) between November 12-22nd (not through the 27th). QSL via ZL3CW. The call-sign N8A will be used during the CQWW DX CW Contest (November 23-24th) as a Multi-2 entry. QSL route was not mentioned. Four of the five operators plan to be active as 5W8A from Samoa after their activities on American Samoa between November 27th and December 2nd. Operators mentioned are 9M6XRO, W6SZN, ZL1GO and ZL3CW. QSL route also was not mentioned. For more details and updates, watch the N8A Web page at: http://www.n8a.eu
Also, watch their FaceBook page at:
https://www.facebook.com/N8a2013AmericanDXpedition

KL7, ALASKA (Rare IOTA). Rick, K6VVA, announced this past week that he has been planning to activate the rare IOTA Sarichef Island (NA-152) for years, and now it looks like it will take place between June 25-27th. He will sign K6VVA/KL7. Activity will be on 40/30/20/17 meters primarily CW, but with some SSB. QSL via N6AWD, direct or by the Bureau. For more details, especially a special messages to CW operators, visit:
http://www.k6vva.com/iota/na152
For updates, watch his Twitter page at: http://www.twitter.com/k6vva

OY, FAROE ISLANDS. Members of the Cambridge University Wireless Society will be active as OY/homecall from the Faroe Islands (EU-018) between June 17-23rd. Operators mentioned are Martin/G3ZAY, Michael/M0GXM, Will/M0ZXA, Gavin/M1BXF and Greg/MD0IGD. Activity will be on 40-6 meters using mostly SSB. It is suggested to listen for operator's QSL instruc-tions.

CO2HQ & H44RK (OC-149) QSL STATUS. Rex, NR6M, reports on June 15th:
"QSL cards for CO2HQ and H44RK (OC-149) were received Friday 6/14/2013. All requests received were mailed out 6/15/2013."

LOG & PICTURES POSTED. The group of Indonesian operators, who activated YE3I from Gili Ketapang, have now posted their log and pictures at:
http://www.mdxc.org/ye3i

TS8TI QSL STATUS. Fred, IK7JWX, the QSL Manager for Italy, reports that during the next week they should be get the QSLs from LZ3HI. He also states that whomever made a contact with TS8TI can send all their QSO data via E-mail to Antonello, IK2DUW, the QSL Manager for the rest of the world, at <ik2duw@yahoo.it>, and he will respond to all whose and also the QSLs already received via directly, by the Bureau and MDXC. The log is available online at the following Web sites: LoTW, <http://www.mdxc.org/ts8ti/log-on-line>, <http://www.ik2duw.it> and <http://www.enzolog.org>.

QSL RECEIVED VIA LoTW: 4A1TD, 9A7A, A35JP, F8VOE, FJ/N5WR, JH4UTP, KH2L, KH6ZM, PY1PDF, RM5P, SX5KL, T88AT, US4IQ, VU7KV and XE1GRR

QSLS RECEIVED VIA MAIL: 3B9DX, 5U9AMO, 9N7SZ, C98RF, FH/DL7BC, JX9JKA, PJ4/SP6AXW, PJ4/SP9FIH, PJ4/SQ9CNN, SX5KL, VK9/OH1VR VK9CZ and XX9TYT

QSLS RECEIVED VIA THE BUREAU: 4W6A, 5B75FOC, 9M4SLL, 9M6XRO, 9M8Z, CY9M, ES95A...Z, ZC4VJ and ZL/GD3OOK

SV9, CRETE. Luc, ON6DSL, will once again be active as SV9/ON6DSL/P from the Island of CRETE (EU-015) between August 12- 21st. Activity will be holiday style, a SOTA portable, on 40-15 meters and SSB only operations He will use a FT817ND w/5w QRP into a homemade multiband dipole. QSL via his home callsign, direct or by the UBA Bureau (preferred).

V3, BELIZE. Jimmy, W6JKV, will once again be active as V31IV from San Pedro (WW Loc. EK67), Belize, between June 20th and July 1st. Activity will be on 80-6 meters. He will probably focus on 6 meters CW. QSL via his home callsign.

V6, MICRONESIA. Operators Sho/JA7HMZ (V63DX) and Masayuki/JA7ZF (V63ZF) will once again be active from Pohnpei Island (OC-010) between November 22-30th. Activity will be on all HF bands and modes. QSL via their home callsigns.

VQ9/VQ93, CHAGOS (Reminder/Update). Just a reminder that Jim, ND9M/VQ9JC, will once again be active with a special prefix, this time as VQ93JC from Diego Garcia between June 22nd and July 7th. He usually activates an unique/special prefix each year (last year it was VQ92JC). Jim informs OPDX on his current operating conditions: "The rig (FT-857D) that I use normally for working from the island crapped out on me about half way through the VQ975FOC operation. I thought I was done for until I remembered that I'd rescued an Icom IC-760 from the ham shack when the Navy shut it down. The IC-760 had been donated by a former VQ9 years ago and did not belong to the Navy, so I snagged it. But there was no way I was going to lug that thing back and forth to the island every day just for a little operating, so I set up on the ship and operated from the Lagoon. I was still using dipoles, but now they were 110 feet above the waterline (and 40,000 tons of metal!) instead of just 30 feet above the ground. Better still, the IC-760 and dipoles kept me on the air for the duration of the celebration. Overall, I made 3400 contacts as VQ975FOC. The first 1200 QSOs were from the island; the other 2200 on the ship. Of course, the QSOs made from the ship will not count for DXCC, and my QSL will be marked

accordingly, but the spirit of this particular special callsign was to get the FOC callsign 'out there' to give extra points toward the FOC75 award which does not require contacts to be made with land-based stations. When my FT-857D died, my XYL Cori (KK4CGA) shipped out my back up rig, a Yaesu FT-897D, it didn't arrive until after the special callsign expired, but it's here now, and I'm active from the island again. I'm still getting my radio teeth kicked in since I'm running barefoot into a low dipole, but VQ9 is back on the air! I'll continue operating from the ship and may put up a 6M dipole to use with my FT-857D for a beacon. I'll be here until about July 10th, which would bring me back in mid November."
Just a reminder, when Jim states he is still operating, it is Field Day style from a recreational park using 100 watts to a dipole at a height of 10 meters because the VQ9 club station has been shut down. Jim reports that he has to set up the station each time and then break it down each day which further limits his operating time typically to 1230-1615z on most days. Sometimes he is on Fridays starting as early as 0830Z. QSL via ND9M.

YN, NICARAGUA. Members from the Spanish Aitana DX Group (ADXG) will be active from Octavio, YN2N, radio shack in Nicaragua between October 1-16th. Callsign will be announced soon. Operators mentioned are Javi/ EA5KM (CW), Fer/EA5FX (CW), Eugen/EA5HPX (CW), Fran/EA7FTR (SSB/RTTY), Jose/EA1ACP (SSB/RTTY) and Carlos/EA1DVY (SSB/RTTY). Pilot station named is Ismael/EA1AZ. Activity will be on 160-6 meters. Suggested frequencies are:
CW - 1821, 3521, 7021, 10121, 14021, 18081, 21021, 24901 and 28021 kHz
SSB - 1840, 3795, 7185, 14250, 18145, 21295, 24965 and 28495 kHz
RTTY - 3580, 7035, 10145, 14080, 18105, 21080, 24925 and 28080 kHz
6m - 50101/CW and 50145/SSB

QSL via EB7DX, direct or by the Bureau. An OQRS will be available for direct and Bureau QSLs. All QSOs will be confirmed via LoTW. For more details and updates, visit: http://nicaragua2013.com

YW0, AVES ISLAND. It was announced that the 4M5DX Group is planning a DXpedition to Aves Island (NA-020) sometime between November 1st, 2013, and February 28th, 2014. Callsign mentioned is YW0A. It is suggested to watch the following media Web pages at:
DXpedition's Web page - http://www.avesisland.info (under construction)
4M5DX Group's Facebook page - https://www.facebook.com/4M5DX
4M5DX Group's Twitter page - https://twitter.com/4m5dxgroup

ZB54, GIBRALTAR (Special Event). Ernest, ZB2FK, is now active as ZB54FK until June 27th. Activity is because the Union of European Football Associations (UEFA) has accepted Gibraltar as its 54th member. QSL via ZB2FK, direct only.

Carter Co. Amateur Radio Association Hosting Kids Day:

Posted: 15 Jun 2013 05:30 PM PDT
http://www.eham.net/articles/30294

The Carter County Amateur Radio Association will be opening their new Club House/ Radio Shack Saturday, June 15th to the public for Kid's Day. Kid's Day is a nationwide event sponsored by The American Radio Relay League to introduce youth to Ham Radio. Kids will be able to talk locally to ham operators and will also be able to talk with other youngsters and amateur operators overseas. Parents or guardians are invited to stop by the "Shack" at 805 Highway 91, about 2 miles up Stoney Creek, Northeast of Elizabethton Municipal Airport from 1 to 4 p.m. Saturday, June 15. Children generally need to be no younger than 4th grade. Individual radio operators will be on hand to demonstrate the hobby to children and parents and explain differences in VHF, UHF and H-F (world wide) transmissions from the Carter County Radio Associations Headquarters. The club's 2 dozen members were able to purchase a used, portable classroom fromNorth Carolina and move it to a lot located on Highway 91. Donations from ALH Construction, Summers -Taylorand Co-operation from Elizabethton Electric System and others have made the clubhouse/meeting place and radio station a success.

//
Ham Radio Shows Off Emergency Capabilities:

Posted: 15 Jun 2013 05:27 PM PDT
http://www.eham.net/articles/30293

The Clark County Amateur Radio Club will join thousands of amateur radio operators in their emergency capabilities from noon to 4 p.m. June 22 at the SEH America overflow parking lot, 3900 N.E. 112th Ave. Amateur radio, often called ham radio, sometimes is the only way people can communicate during natural disasters. Clark County ham radio operators will show different modes of communication, including digital, voice communications and even the historical Morse code.

//
Things Heating Up In Space: Heightened Activity Reported On Sun:

Posted: 15 Jun 2013 05:26 PM PDT
http://www.eham.net/articles/30292

GREENBELT, Md. (WJZ) -- It's not visible by eye, but the sun is experiencing a great deal of activity right now. Kai Jackson reports-experts say we could feel the effects on Earth. The sun is, as a song says, a great ball of fire. With energy, heat, storms and activity far more powerful than anything that happens on Earth. "The sun has been very active lately over the last couple weeks as well as the last couple years," said Dr. Holly Gilbert, Solar Physics Laboratory. Scientists at the Goddard Space Flight Center in Greenbelt, Prince George's County are studying the massive star. Researchers say the sun's heightened activity is noticeable. "We're in this period of time called 'solar maximum,' when the sun has been very active. As having more sun spots than usual, more solar flares," Dr. Gilbert said.

Operators needed - VC2CGJCS
2013-06-16

Le Club Radio Amateur de l'Estrie will be running the VC2CGJCS Special
Event station for the Canada Games from August 2 to August 17, 2103.
As we are a small club, we are looking for operators to fill the
operating positions for the duration of the event. The location that
we will be operating from is air-conditioned and on-site.

We will be using dipoles for 20, 40 and 70 metres as well as a T2FD
and G5RV for 160 metres is we have the space. We will be using N1MM
logging software.

If you need more information or if you want to volunteer, contact me
at va2sch@gmail.com or via phone at 1 819 446 1190.

Here comes an all-in-one mobile phone App that will enable you to get great deals in your local area, get customized news of your choice, get taxi services in your vicinity and many more free services and yet get opportunity to turn your mobile phone into income generating tool forever if you join it now and invite other people to do the same during this pre-launch period until the end of September 2013.

Also be informed that Perfect Internet will start an Online Music Competition for Amateur Musicians known as I Wanna Be Famous through its website starting July 2013. If you are Amateur Musician, this is your golden opportunity to be famous both locally and globally by participating in this competition. It is free to participate and it is free to watch. All kinds of musics will be competed for be it Reggae, Rock, Country, Classical, Pop, R&B, Traditional Musics, you name it. Amateur Musicians have started to upload their video clips ready for 1 on 1 battles that will start from July 2013.

The audience who will be watching these competitions globally through Perfect Internet website will be the judges by voting through their “Likes”. Anyone who will want to download music will do so after paying and hence Amateur Musicians will start to earn money when competition is going on. This competition will be broadcasted globally through Perfect Internet website and through radio and television owned by Perfect Internet. Winners in all types of musics will go to Las Vegas, USA and will be treated like VIPs by being taken in Limos and stay in 5 star hotels during the period of competition. Perfect Internet has entered into contract with big music companies in USA who will produce the musics of finalists and distribute them globally so this is an opportunity for Amateur Musicians they can’t afford to let it go.

So go to the link below and register for Perfect App opportunity. After that, you can go to a Music Competition Platform and get additional details. For those who will like to watch this competition, you are advised to join the site too for free so that you can watch it in Perfect Internet website as well as participate in promoting Amateur Musicians of your choice.

Highlights of Solar and Geomagnetic Activity
10 - 16 June 2013

Solar activity was at very low to low levels during the period. The
period started off with an isolated C1/Sf flare at 10/1424 UTC from
Region 1765 (N08, L=052, class/area Dai/210 on 09 June). By 11 June,
Region 1765 was the only spotted region left on the visible disk but
only managed to produce several B-class flares. On 12 June, rapid
flux emergence was observed on the southwest quadrant of the solar
disk and was numbered as Region 1768 (S11, L=356, class/area Dko/320
on 14 June). Although 1768 was the largest region on the visible
disk during the rest of the period, it failed to produce any
substantial flare activity. Solar activity continued at very low
levels until early on 14 June, when Region 1769 (S22, L=261,
class/area Cro/020 on 14 June) produced a long duration C1/Sf flare
at 14/0031 UTC with an associated Type II radio sweep reported at
14/0021 UTC (431 km/s). Solar activity continued at low levels for
the rest of the period with an isolated long duration C1 flare at
15/0400 UTC from Region 1774 (S19, L=238, class/area Cro/030 on 16
June) and a C1/Sf from Region 1769 at 16/1020 UTC. No Earth-directed
coronal mass ejections were observed during the period.

No proton events were observed at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit reached
moderate levels through the period.

Geomagnetic field activity was at quiet to active levels. Unsettled
to active levels with an isolated minor storm period at high
latitudes was observed for the first half of 10 June due to possible
activity associated with a shock arrival from a non Earth-directed
CME from 07 June. During this time, total field (Bt) increased from
approximately 4 nT to 9 nT while the Bz component varied from +8 nT
to -8 nT before calming to more nominal levels by midday on 10 June.
Solar wind speed increased briefly on 10 June from approximately 350
km/s to 419 km/s by 10/1514 UTC before decreasing back to 360 km/s
```

by early 11 June. A slow increase in solar wind speed occurred on 11 to 12 June reaching maximum values near 476 km/s by 12/0430 UTC before declining to background levels through the rest of the period. The geomagnetic field was mostly quiet with an isolated unsettled period midday on 11 June. Conditions declined to quiet levels for the rest of the period.

Forecast of Solar and Geomagnetic Activity
17 June - 13 July 2013

Solar activity is expected to be at predominantly very low to low levels. There is a chance for M-class (R1-Minor) flares from 18 June through 08 July due to potential flare activity from old Region 1762 (S30, L=129) and two new regions observed in STEREO A/B EUVI 195 imagery located to the northwest of old Region 1765 (N08, L=052) and southwest of old Region 1757 (S08, L=148).

No proton events are expected at geosynchronous orbit.

The greater than 2 MeV electron flux at geosynchronous orbit is expected to be at high levels from 22 June through 07 July due to coronal hole high speed stream (CH HSS) activity. Normal to moderate levels are expected for 17-21 June and 08-13 July.

Geomagnetic field activity is expected to be quiet to unsettled on 17-18 June due to weak CH HSS activity. Mostly quiet conditions are expected on 19-20 June. A recurrent CH HSS is expected to become geoeffective from 21-24 June causing unsettled to active levels with a chance for minor storm (G1-Minor) conditions. Mostly quiet levels are expected from 25-27 June. From 28 June through 01 July, another CH HSS is expected to be geoeffective causing unsettled to minor storm (G1-Minor) levels. Quiet levels are expected to return from 02-04 July. On 05-06 July, a weaker CH HSS is expected to cause quiet to unsettled levels. From 07 July until the end of the forecast period, mostly quiet conditions are expected.
